August 1969
Preliminary

Civil Aviation - February 1969 Canadian Commercial Air Carriers Except Group V

February reports from approximately 120 scheduled and non-scheduled Canadian air services indicate generally increased traffic and revenues in all types of service. Although the number of hours flown in unit toll operations increased by less than five per cent there were greater than proportionate increases in traffic. Goods traffic especially showed a major gain compared to the same month a year earlier.

In charter services there were sharp increases in loads and distances flown. The figures reflect greater use of modern jet and turbo prop equipment over longer distances especially by carriers specializing in charter services for passengers and freight. Increased competition for charter passenger traffic among the airlines, along with lower fares, new aircraft and "package" holiday tours have made the totals for bulk operations increase markedly.

Enquiries concerning this table should be directed to Mr. K.J. Marks, Aviation Statistics Centre, Congill Building, 12th Floor, 275 Slater St., Ottawa, Ontario. (Telephone 992-2957)
