Vol. 6 No. 21
ASC-SB-2-1

Airport Activity Statistics

Second and third quarter data for traffic at selected Canadian airports for 1973 have been compiled and tabulated. Data for the first quarter of 1973 along with year-to-date figures also appear in this bulletin. We have also included quarterly and annual data for 1972.

The first quarter of 1973 shows a generally large increase over the first quarter of 1972 due to the strikes of air traffic controllers and radar technicians in 1972. The air traffic controllers' strike lasted from January 17 to January 28, 1972. The radar technicians' strike, either rotating or nation-wide was from February 6 to March 7, 1972.

The ground personnel of Nordair were on strike from November 15, 1972 to January 20, 1973. Some flight services were offered during the strike, although most of the major routes were closed down. Service returned to normal on January 22.

The figures for the second quarter of 1973 were affected by Air Canada's machinists' rotating strike from June 1 to June 19, 1973, with service back to normal by June 22.

The figures for the third quarter were affected by the C.P. Air machinists' strike from July 25, to September 22, 1973. C.P. Air continued providing service during the strike, although it was greatly reduced.

On July 26, 1973 non-operating rail workers started a series of rotating strikes; this turned into a general tie-up of rail services. They returned to work in the first week of September. This strike would affect the airlines' share of passengers and cargo traffic.

We regret that problems exist with the data for Edmonton International, Victoria International and Windsor Airports. These airports will appear in our 4th quarter service bulletin.

Where relevant, 1st quarter figures for 1973 have been updated to include revised data reported by the air carriers.

Further information can be obtained from Mr. M. Baker at the Aviation Statistics Centre, 275 Slater Street, Ottawa, Ontario, telephone: 613-992-2332.

bulletin de service

Centre
des statistiques
de l'aviation

Rédigé par le Centre des statistiques de l'aviation, Division des transports et des communications, Statistique Canada, pour le Ministère des Transports et la Commission canadienne des transports

March 1973 Mars

Statistiques d'activité aéroportuaire

Les données du deuxième et troisième trimestre de 1973 sur le trafic aérien à certaines aérogires choisies ont maintenant été recueillies et disposées en tableaux. Les données du premier trimestre de 1973 ainsi qu'un total cumulatif depuis le début de l'année apparaissent aussi dans ce bulletin. Nous avons ajouté les données trimestrielles et annuelles pour l'année 1972.

Le premier trimestre de 1973 démontre une augmentation générale en comparaison avec le premier trimestre de 1972 qui est due aux grèves des contrôleurs de la circulation aérienne et des techniciens en radars qui ont affecté l'industrie en 1972. La grève des contrôleurs aériens a eu lieu du 17 au 28 janvier 1972. La grève des techniciens en radars, qui a été soit rotative soit générale, a eu lieu du 6 février au 7 mars, 1972.

Cependant, le premier trimestre de 1973 a subi certains effets à la suite de la grève des préposés aux opérations au sol de Nordair qui s'est étendue du 15 novembre 1972 au 20 janvier 1973. Certains services ont été maintenus durant la grève, cependant la plupart des routes principales n'ont pas été opérées. Le service est revenu à la normale la 22 janvier.

Les données du deuxième trimestre de 1973 ont été affectées par la grève rotative des machinistes à l'emploi d'Air Canada qui a eu lieu du 1^{er} juin au 19 juin 1973. Le service a été rétabli le 22 juin.

Les données du troisième trimestre ont subi l'effet de la grève des machinistes à l'emploi de C.P. Air qui s'est étendue du 25 juillet au 22 septembre 1973. Même si le service de la compagnie C.P. Air a été considérablement réduit, C.P. Air a continué à maintenir son service au cours de la grève.

Les travailleurs non itinérants des chemins de fer ont commencé une série de grèves rotatives le 26 juillet 1973 et sont retournés au travail dans la première semaine de septembre. Cette grève qui a paralysé les services de chemin de fer a eu un effet certain sur les opérations aériennes en ce qui a trait au transport de passagers et de marchandises.

Nous regrettons que certains problèmes soient survenus avec les données pour les aéroports industriel d'Edmonton, International de Victoria et de Windsor. Ces aéroports seront inclus dans notre bulletin de service du 4^e trimestre.

Quand c'était applicable, les données du premier trimestre de 1973 ont été révisées pour inclure les corrections soumises par les transporteurs aériens.

De plus amples renseignements peuvent être obtenus en communiquant avec M. M. Baker au Centre des statistiques de l'aviation, 275, rue Slater, Ottawa, Ontario, téléphone 613-992-2332.

COLLECTION OF DATA

The data concerning international flights were collected on a census basis from the individual air carriers concerned. The data concerning domestic flights were collected on a mixed 15 per cent sample and census basis. The sample is such that each day of the week is sampled twice each quarter and there is at least one sample day in each week. This gives 14 sample days per quarter and 56 for each year.

CHARACTERISTICS OF THE DATA

At airports where flight numbers changed, all arriving traffic is reported as being deplaned, although this may not actually be the case.

Conversely, where a flight number originated all departing traffic is reported as being enplaned.

"Other International" refers to any international traffic flying to or from any international point other than in the United States.

Transborder refers to any international flight flying to or from the United States (including Alaska and Hawaii).

COLLECTION DES DONNEES

Chacun des transporteurs aériens impliqués a fourni les données relatives aux vols internationaux à partir d'un recensement. Les données pertinentes aux vols intérieurs ont été ramassées à partir à la fois d'un échantillonnage de 15 pourcent et d'un recensement. L'échantillonnage est conduit de telle façon que chaque jour de la semaine apparaît deux fois chaque trimestre et qu'il y a au moins un jour d'échantillonnage à chaque semaine. Ceci fait qu'il y a 14 jours d'échantillonnage par trimestre et 56 par année.

CARACTERISTIQUES DES DONNEES

Aux aéroports où les numéros de vol ont changé, tout le trafic arrivant est déclaré comme étant débarqué, même si ce n'est pas toujours le cas.

En contrepartie, aux aéroports où le numéro de vol tire son origine tout le trafic en partance est déclaré comme étant embarqué.

"Autre international" réfère à tout trafic international ayant une destination ou une en provenance autre que les Etats-Unis.

Transfrontalier se rapporte aux vols internationaux effectués à destination ou en provenance des Etats-Unis (incluant l'Alaska et Hawaii).
