**MONTHLY TRAFFIC REPORT OF RAILWAYS OF CANADA**

JUNE, 1934

Although Canadian railways carried less agricultural and animal products during June than in June last year, increases in mine and forest products and in manufactures and miscellaneous freight more than offset these losses, bringing the total tonnage up to 5,269,240 tons as against 4,974,041 tons in 1933. All the decreases were in the three Prairie Provinces, each of the other provinces showing substantial increases. Wheat loaded and received from foreign connections declined from 1,206,060 tons in June 1933 to 530,083 tons. Corn, oats, barley and all other grains and flour also showed considerable decreases, the total of agricultural products being lighter than last year by 698,790 tons. Anthracite coal, copper ore and salt were lighter than in 1933, but all other mine products showed increases and the total was heavier by 573,087 tons, or 46 per cent. All commodities listed under forest products showed increases and the total of 699,139 tons was up by 165,135 tons, or 31 per cent. Manufactures and miscellaneous freight loaded and received from foreign connections amounted to 1,537,668 tons as against 1,280,811 tons in June 1933. Only five commodities showed decreases and the other twenty classes were heavier. Pig iron, structural iron, castings, machinery, brick, cement, lime and plaster all showed substantial increases. Gasolene was up by 12,037 tons, automobiles by 30,770 tons, newsprint paper by 30,942 tons, wood pulp by 3,890 tons and merchandise by 12,183 tons.
