RAILWAY FREIGHT TRAFFIC

The Monthly Freight Traffic Statistics Reports for 1956 are not comparable to those for previous years due to two principal changes. First the water-borne imports at lake or ocean ports formerly reported together with rail imports as "Receipts from Foreign Connections" are now included with the commodities "Loaded at Stations in Canada". This change now makes possible an analysis of traffic entering the country by rail subdivided between goods destined to Canadian points and intransit freight en route to foreign points by rail. In this regard also freight terminated has been modified to show freight exports by rail to the United States. The second change results from the adoption of the "Uniform Classification of Accounts for Common Carriers by Railway", which groups railways into four classes. All railways having gross revenue of \$500,000 per annum or more (class 1 and 11 carriers) are now required to report monthly or weekly statistics. Data for freight traffic, railway operations, and carloadings will be more comparable as a result. These series were not previously comparable because the same groups of railways were not used in every case.

The table below shows the results of the change in the companies reporting. Eight firms which had annual revenues of less than \$500,000 were deleted from statistics for 1955, and one company was added to those for 1956. The table gives comparisons between 28 and 20 railways for February 1955 and for 21 and 20 railways for February 1956. The table shows that the eight companies removed from the report carried only 129,174 tons or less than 1 p.c. of the total reported for February, 1955. "Mine products" was the principal commodity group affected by the change because of the deletion of bituminous coal hauled by the Cumberland Railway and Coal Co. and Morrissey, Fernie and Michel Railway Co.
