RAILWAY FREIGHT TRAFFIC

The monthly Freight Traffic Statistics Reports for 1956 are not comparable to those for previous years due to two principal changes. First the water-borne imports at lake or ocean ports have been separated from the rail imports and are now included with the commodities "Loaded at Stations in Canada". This change now permits a thorough analysis of traffic entering the country by rail, subdivided between goods destined to points in Canada and intransit freight shipped to foreign points by rail. A similar treatment of freight terminated permits study of rail exports to the United States. The second change is the adoption of the "Uniform Classification of Accounts for Common Carriers by Railway", which groups railways into four classes. All railways having gross revenues of \$500,000 or more per annum (class 1 and 11 carriers) are now required to report monthly and weekly statistics. Monthly statistics of freight traffic and railway operations and those for carloadings will be more comparable. Comparisons between these statistical series were not possible in the past due to the different groups of railways included in each.

In order that comparison may be made between the twenty railways which are included in statistics for both March, 1955 and March, 1956 the table below gives principal totals for 28 and 20 railways in March, 1955 and for 21 and 20 railways in March, 1956. Companies which had annual revenue of less than \$500,000 were deleted from statistics for 1955 and one company has been added in 1956. The effect of the change is very slight and the eight companies deleted carried only 141,451 tons of freight or less than 1 per cent of the total reported in March, 1955. The principal commodity affected is "mine products" due to the extraction of bituminous coal hauled by the Cumberland Railway and Coal Co. and Morrissey, Fernie and Michel Railway Co.
