Price \$1.00 per year.

RAILWAY FREIGHT TRAFFIC

The monthly Freight Traffic Statistics for 1956 are not comparable to those for previous years due to two principal changes. First the water-borne imports at lake or ocean ports formerly included with rail imports as "Receipts from Foreign Connections" are now included with the commodities "Loaded at Stations in Canada". This change now permits a thorough analysis of freight entering the country by rail, subdivided between goods destined to Canadian points and intransit freight en route to foreign points by rail. In this regard freight terminated has also been modified to show freight exports to the United States by rail. The second major change is the adoption of the "Uniform Classification of Accounts for Common Carriers by Railway", which groups railways into four classes. All railways having gross annual revenues of \$500,000 or more (class 1 and 11 carriers) are now required to report monthly and weekly statistics of their operations. The change has been made in order that the monthly statistics for Freight Traffic, Railway Operating and Carloading statistics will be more comparable. It has not been possible in the past to make comparisons between these series due to the fact that different groups of railways were included in each.

The table below shows the result of the change in the companies reporting. Eight companies which had annual revenues of less than \$500,000 per annum were deleted from statistics for 1955, and one company was added to those for 1956. The table gives comparisons between 28 and 20 railways for June, 1955, and for 21 and 20 railways for June, 1956. The effect of the change is very slight and the eight companies deleted carried only 179,750 tons of freight or just over 1 per cent of the total reported for June 1955. The principal commodity affected is "mine products" due to the deletion of bituminous coal hauled by the Cumberland Railway and Coal Co., and the Morrissey, Fernie and Michel Railway Co.
