SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

An explanation of abbreviations used throughout this report follows:

- N.E.S. - not elsewhere specified.
- C.L. - carload.
- L.C.L. - less than carload.
- T.O.F.C. - trailer on flat car.
- C.O.F.C. - container on flat car.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

L'explication des abréviations employées dans le présent bulletin:

- n.d.a. - non dénommé ailleurs.

} Ces abréviations ne sont pas utilisées en français.

INTRODUCTION

Coverage and Methodology

This publication presents revenue freight traffic statistics, by commodity and by geographic area, for 24 Class 1 and Class 2 common carrier railways operating in Canada. Excluded from this report are similar details of Class 3 and Class 4 railways whose shipments account for less than 1% of total rail volume. Freight interlined between two or more Canadian lines is counted only once to avoid duplication.

The commodity detail is shown for 320 individual classes which are derived from the Standard Commodity Classification (SCC) of Statistics Canada. The SCC is the basis of commodity series published for water and road transport, imports, exports, manufacturing materials used and shipments.

The geographic breakdown covers loadings and unloadings in each province and in the territories.

Tables have been added to this report (commencing with the first quarter of 1977) to show traffic information in metric measure using the International System of Units (SI). This is the most modern version of the metric system and is supported by the International Bureau of Weights and Measures and the Standards Council of Canada.

The statistics in this publication are aggregated and tabulated manually from hand-produced returns and computerized printouts submitted by the carriers. The data are reported in short tons (as presented in Part I) and converted by Statistics Canada to metric tonnes in Part II. In producing metric tonnes, only the components within each classification category are converted. These are then added to "force" totals. Thus the latter may differ slightly with figures obtained by converting such totals separately.

Quality and Other Limitations of Data

The terms "loadings" and "unloadings" as used throughout this report show the geographic location at which an initial or final rail haul took place within Canada. They do not necessarily indicate the points of origin or final destination of a particular commodity.

Champ d'observation et méthodologie

Ce bulletin présente des statistiques, selon le groupe de marchandises et la région, sur le trafic des marchandises payantes pour 24 entreprises ferroviaires de 1^{re} et 2^e classe en activité au Canada. Les données sur les entreprises de 3^e et de 4^e classe dont le trafic représente moins de 1 % de l'ensemble des expéditions ferroviaires n'ont pas été prises en compte. Afin d'éviter tout double compte, les marchandises acheminées par plus d'une entreprise ferroviaire n'ont été comptées qu'une fois.

Le lecteur trouvera dans cette publication des données sur 320 classes de marchandises établies à partir de la Classification type des produits (C.T.P.) de Statistique Canada. La C.T.P. sert également de base à d'autres séries statistiques portant sur le transport par eau et le transport routier, les importations, les exportations, les matières utilisées pour la fabrication et les livraisons.

La répartition géographique comprend les chargements et les déchargements de marchandises dans chaque province et dans les territoires.

À compter du premier trimestre de 1977, la présente publication renferme de nouveaux tableaux; cette addition a pour but de produire des données en valeur métrique à l'aide du Système international d'unités (SI). Cette version, la plus récente, du système métrique a été approuvée par le Bureau international des poids et mesures et le Conseil canadien des normes.

Les statistiques du présent bulletin ont été groupées et totalisées manuellement à partir de déclarations remplies à la main et d'états mécanographiés présentés par les transporteurs. Les données sont exprimées en tonnes courtes (voir partie I) et sont converties en tonnes métriques par Statistique Canada (partie II). Seuls les éléments de chaque classe de marchandises sont convertis en tonnes métriques. Ces valeurs sont ensuite ajoutées aux totaux de l'ensemble des transporteurs. Par conséquent, elles peuvent s'écarter légèrement des chiffres qui auraient pu être obtenus en convertissant séparément chaque total.

Qualité et autres limites des données

Les termes "chargement" et "déchargement" figurant dans cette publication indiquent l'endroit où a eu lieu le premier ou le dernier transport au Canada. Ils ne désignent pas nécessairement l'origine ou la destination finale d'une marchandise donnée.

With respect to piggyback freight the figures reported include only that traffic wherein a shipper submitted a trailer or container as such, for shipment by rail. Not included under this heading are goods which were submitted by the shipper as loose merchandise which the railways chose to move in a railway-owned container or trailer on a flat car as opposed to say, a box car. The latter freight is included under various other commodity groups according to the nature of the merchandise involved.

Figures preceded by a minus sign (-) are to revise overstatements of data published previously.

In undertaking long term analyses of rail freight commodity data using this series of reports (52-002 and 52-205) it should be noted that changes in the classification structure and in reporting practices occurred in 1970. In that year the new 320-item commodity system was introduced and, in an attempt to improve the timeliness of these statistics, certain railways switched from a "received" to a "forwarded" basis of reporting. A more detailed explanation of these changes and their effect on the statistics appears in the 1970 publication.

Concepts and Definitions

Railways serving both Canadian and United States points treat the American portion of their line as a United States rail connection for the purpose of these tabulations. Thus freight crossing the International Boundary, whether from or to a non-reporting United States railroad at that point, or carried by one of the respondents reporting in this series, appears as a receipt from or a delivery to a United States rail connection. Certain extensions of Canadian National and Canadian Pacific rail services in the United States (72 and 324 miles, respectively, in 1976) are, for statistical purposes, considered part of Canadian operations and included herein. These mileages include, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting United States carriers.

The terms used in the columnar headings throughout this publication reflect the following instructions to the railways.

"Loaded" means: (a) revenue freight originated directly on the road of the respondent, including that received from private, non-reporting industrial sidings; (b) freight received from switching roads connecting with

Pour ce qui est du transport rail-route, les chiffres déclarés ne comprennent que les marchandises expédiées dans leur remorque ou conteneur d'origine. Cette rubrique ne prend pas en compte les marchandises en vrac qu'une entreprise de chemin de fer livre dans une remorque ou un conteneur qu'elle possède déjà et qu'elle place sur un wagon plat au lieu d'un wagon couvert. Ce genre de marchandises est compris dans divers autres groupes selon la nature des produits en cause.

Les chiffres précédés du signe moins (-) ont été surestimés dans une publication antérieure.

En effectuant des analyses à long terme des données sur le transport marchandises ferroviaire à l'aide de la présente série de bulletins (52-002 et 52-205), le lecteur voudra bien prendre note que des modifications ont été apportées en 1970 à la structure de la classification ainsi qu'aux méthodes de déclaration. C'est à cette date que le nouveau système des 320 classes de marchandises a été lancé et, afin d'améliorer l'actualité des données, certaines entreprises ferroviaires ont décidé de déclarer des données sur les marchandises livrées au lieu des marchandises reçues. Un exposé détaillé de ces modifications et de leurs répercussions sur les statistiques obtenues figure dans la publication de 1970.

Concepts et définitions

Dans les tableaux ci-dessous, les sociétés ferroviaires qui desservent des localités au Canada et aux États-Unis considèrent la partie située aux États-Unis comme un raccordement américain. Ainsi, une marchandise qui traverse la frontière internationale, en provenance ou à destination d'un chemin de fer américain non enquêté à cet endroit ou une marchandise transportée par l'un des enquêtés est inscrite comme une marchandise en provenance ou à destination d'un raccordement aux États-Unis. Certains prolongements du Canadien National et du Canadien Pacifique aux États-Unis (72 milles et 324 milles respectivement en 1976) sont considérés comme canadiens et inclus pour des fins statistiques. Dans la majorité des cas, il s'agit de mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

Les expressions utilisées dans les en-têtes du présent bulletin proviennent des directives suivantes adressées aux sociétés ferroviaires.

"Chargées" signifie: a) transport commercial de marchandises effectué directement sur une ligne de l'enquêté, y compris les marchandises provenant d'embranchements privés non enquêtés; b) marchandises provenant de voies d'aiguillage reliées à

the respondent where such freight has not previously been given line haul transportation; (c) freight received from other modes of transport; (d) freight re-shipped following milling or fabrication at some point in transit; (e) idler or trailer cars.

"Received from United States rail destined to Canadian points" means: traffic received from United States rail connections, or transported across the border by the respondent, destined to Canadian points.

"Received from United States rail destined to United States points" means: freight moving from United States rail connections to points in the United States (overhead traffic).

"Unloaded" means: (a) freight terminated directly on the road of the respondent, including that delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; (b) freight delivered to switching roads connecting with the respondent where there is no further line haul; (c) freight delivered to other modes of transport; (d) freight unloaded for milling or fabrication at some point in transit.

"Delivered to United States rail" means: (a) traffic delivered to United States rail connections or transported across the border by the respondent; (b) deliveries to United States rail connections of freight originated in the United States and moved overhead through Canada.

A "common carrier" as referred to in this publication refers to a railway which holds itself out to the general public to transport passengers and/or goods for compensation.

STATISTICAL HIGHLIGHTS

The volume of all rail freight carried in the fourth quarter of 1977 totalled 66.8 million short tons, or 60.6 million t. This represented a decrease of 0.6% from the last three months of 1976. Traffic received from United States rail connections (included above) declined 4.8% to 5.2 million short tons, or 4.8 million t, in the latest period.

Of the seven major commodity groups under which rail freight is reported, decreases were recorded in five in the quarter under review. Crude Materials, the largest category (accounting for 53% of the total) declined 0.2% from the preceding year. Food,

celles de l'enquête lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; c) marchandises provenant d'autres modes de transport; d) marchandises réexpédiées après usinage ou transformation en cours de route; e) wagons-allongés ou wagons-remorques.

"Provenant de voies des États-Unis et destinées à des localités canadiennes" signifie: marchandises provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquête et destinées à des localités canadiennes.

"Provenant de voies des États-Unis et destinées à des localités américaines" signifie: marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

"Déchargées" signifie: a) marchandises livrées directement à partir d'une ligne de l'enquête, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; b) marchandises livrées à des voies d'aiguillage reliées à celles de l'enquête au point où à partir duquel plus aucun transport n'a lieu; c) marchandises livrées à d'autres modes de transport; d) marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

"Livrées à des chemins de fer des États-Unis" signifie: a) marchandises livrées à des raccordements ferroviaires des États-Unis ou transportées au-delà de la frontière par l'enquête; b) livraisons à des raccordements ferroviaires des États-Unis de marchandises provenant des États-Unis et passant par le Canada.

Dans le présent bulletin, un "transporteur commercial" est une société ferroviaire qui offre ses services au grand public pour le transport de personnes ou de marchandises moyennant rétribution.

POINTS SAILLANTS

Le volume des marchandises transportées par rail au cours du quatrième trimestre de 1977 s'est élevé à 66.8 millions de tonnes courtes (60.6 millions de tonnes métriques), en baisse de 0.6 % sur les trois derniers mois de 1976. Les marchandises provenant de raccordements ferroviaires américains (inclus ci-dessus) ont baissé de 4.8 % pour s'établir à 5.2 millions de tonnes courtes (4.8 millions de tonnes métriques) au cours de la dernière période.

Au cours de la période observée, on a noté des diminutions pour cinq des principaux groupes de marchandises pris en compte dans le trafic marchandise ferroviaire. Les matières premières, qui représentent la catégorie la plus importante (in-

Feed, Beverages and Tobacco was down 3.0% and End Products, reflecting a notably lower volume of passenger automobiles and motor vehicle engines, fell by 8.0%. Reductions in trailer-on-flat-car, freight forwarder and mixed carload freight combined to bring movements under the Special Traffic category down by 0.6%. The Live Animals group fell 32.8%, due primarily to a drop in loadings of cattle. Fabricated materials and non-carload traffic registered increases of 0.8% and 19.7%, respectively.

Rail freight loadings in Canada (excluding receipts from Canadian and United States connections) amounted to 61.6 million short tons, or 55.9 million t, a decline of 0.3% from the October - December 1976 period. Regionally, decreases occurred in Quebec and the four western Provinces with the Maritimes, Ontario and The Territories recording gains in traffic.

Summarizing the results reported in this series during 1977, railways operating in Canada reported carryings of 272.2 million short tons of revenue freight (247.0 million t). Compared with the same 1976 source of information this represented an increase of 3.6%. Year over year comparisons of quarterly data showed volume increases of 5.6% in the first three months; 8.0% in the second quarter; 1.6% in the July - September period; and a decrease of 0.6% in the final three months of 1977.

tervenant pour 53 % du chiffre total), ont régressé de 0.2 % par rapport à l'année précédente. Les denrées alimentaires, aliments pour animaux, boissons et tabacs ont diminué de 3.0 % tandis que les produits finals, traduisant une baisse appréciable du volume de voitures particulières et de moteurs de véhicules automobiles, ont tombé de 8.0 %. La catégorie Trafic Spécial a pour sa part diminué de 0.6 % par suite de réductions du volume des marchandises transportées par remorques sur wagons plats, par transporteurs et des marchandises diverses par wagons. Il y a eu baisse de 32.8 % dans le groupe des animaux vivants par suite principalement d'une réduction des chargements de bétail. Les matières fabriquées et le trafic de détail ont marqué des hausses de 0.8 % et 19.7 % respectivement.

Les chargements ferroviaires de marchandises au Canada (à l'exclusion des recettes provenant des raccordements canadiens et américains) ont totalisé 61.6 millions de tonnes courtes (55.9 millions de tonnes métriques), ce qui représente une diminution de 0.3 % par rapport à la période octobre-décembre 1976. Au niveau des régions, des baisses sont survenues au Québec et dans les quatre provinces de l'Ouest, tandis que les Maritimes, l'Ontario et les Territoires enregistraient des gains à ce titre.

Pour résumer les chiffres indiqués dans cette série en 1977, les sociétés ferroviaires en exploitation au Canada ont déclaré avoir transporté 272.2 millions de tonnes courtes de marchandises payantes (247.0 millions de tonnes métriques). Par rapport à la même source de renseignements en 1976, cette quantité représente une augmentation de 3.6 %. Les comparaisons annuelles de données trimestrielles révèlent une augmentation en volume de 5.6 % pour les trois premiers mois, de 8.0 % pour le second trimestre, de 1.6 % pour la période juillet-septembre et une diminution de 0.6 % pour les trois derniers mois de 1977.

PART - I - PARTIE

All volume data published in this part of the report are presented in short tons. Metric tonnes appear in Part II beginning on page 68.

Toutes les données pondérales publiées dans cette partie de la publication sont présentées en tonnes courtes. Les tonnes métriques sont produites dans la partie II commençant à la page 68.
