# CANADIAN NATIONAL RAILWAYS REVENUES, EXPENSES, ETC.

1923 - 1929

The operating results of the Canadian National railway system and of the constituent railways prior to amalgamation have been combined in the attached tables to present comparisons of long term debt and appropriations back to 1919 and of operation to 1923.

The Canadian lines of the Canadian National railways in this report include the Canadian Northern system, the Grand Trunk Railway of Canada, the Grand Trunk Pacific and, to June 30, 1927, the Canadian Government railways, consisting of the Intercolonial, Prince Edward Island, National Transcontinental and several small lines in the eastern provinces, and, from July 1, 1927, that part of the Intercolonial and National Transcontinental west of Levis and Diamond Junction, Quebec. The Eastern Lines, as defined by the Maritime Freight Rates Act, 1927, are those parts of the Canadian National railways east of Levis and Diamond Junction, and the United States lines include the lines known as the New England lines, the Grand Trunk Western, and the Duluth, Winnipeg and Pacific. The Hudson Bay railway, now being rehabilitated and completed, was excluded in 1926 and deductions made for appropriations and accumulated deficits in the statistics for that year, which slightly affects the comparisons.

The Maritime Freight Rates Act, effective July 1, 1927, ordered that the lines of the Canadian National railway east of Levis and Diamond Junction in Quebec, New Brunswick, Nova Scotia and Prince Edward Island, designated as the Eastern Lines, reduce the freight rates on local and certain other traffic by 20 per cent, and that the accounts of these lines be kept separate from the accounts of the remainder of the Canadian National system. It also provided that

the deficit, if any, should be included in a separate item in the estimates submitted to Parliament. The management of the entire system, however, was not to be affected by the Act, other than the segregation of the accounts. Other railways operating in this eastern territory were allowed to reduce their rates by the same percentage as ordered on the Mastern Lines and authorized to bill the Board of Railway Commissioners for the differences between the normal and the reduced tolls. The railways have treated such bills against the Board of Railway Commissioners as revenues earned and in these tables the contributions made by the Government, to meet the differences in revenues due to the reductions in freight rates ordered by the Act, have also been included with revenues earned. Consequently these losses are not included in the deficits in tables 1 and 2 and, as stated in the footnote to table 3, neither these losses nor the deficit of the Eastern Lines are included in the long term debt.

Table 1. No interest had been charged on the appropriations for construction and purchase, nor for advances to meet deficits of the Canadian Government railways. With the consolidation of the system, the railways have included in their liability the operating deficits of the Canadian Government railways from 1921. The accounts for the Eastern Lines, which, under the Maritime Freight Rates Act, were ordered segregated from those of the remainder of the system, are shown separately.

Table 2. The operating results of the railways, since they were all put under one management, are shown in this table. The data have been adjusted to show the results of the Fastern Lines' operation for the twelve months of 1927 comparable with 1928 and 1929, and totals are shown, both including and excluding them. The deficits include all interest charges accruing on debentures, etc. held by the public and on advances made by the Dominion Government. The revenues and expenses of the commercial telegraph department were included with railway revenues and expenses in 1928 and 1929 and the 1927 data were adjusted to make them comparable with the 1928 and 1929 data. The cash appropriations for the Eastern Lines' deficits do not include some interest adjustments and other payments made by the Department of Railways and Canals and carried into the income accounts of the Eastern Lines.

AND DESCRIPTION OF THE PERSON OF THE PERSON

Table 3. This table shows for each year, 1919 - 1929, the long term debt liabilities as set up by the railway system and does not include the operating deficits of the Canadian Government railways for 1919 and 1920, nor the deficits of the Eastern Lines for the last six months of 1927 and twelve months of 1928 and 1929 which were assumed by the Dominion Government.

It includes the cost of construction and purchase of the Canadian Government lines, composed of the Intercolonial, National Transcontinental, etc. but does not include any interest on the capital expenditures nor the deficits of these lines prior to 1921. It also includes all loans and advances to the Canadian National, to the Canadian Northern, Grand Trunk and Grand Trunk Pacific with accrued and unpaid simple interest at rates from 3½ per cent to 6 per cent, which were made to meet (a) interest due to the public, (b) operating deficits, (c) costs of additions and betterments, and (d) additional working capital, etc. It also includes the perpetual debenture stock and bonds held by the public, but does not include Canadian Northern or Grand Trunk capital stock, as explained by the footnote to the table, nor the cost to the Government of obtaining stock held by it. The stock of the Grand Trunk Pacific is all held by the Canadian National system.

Table 4. No consolidated balance sheet was made for 1922 and, consequently, it is not possible to show the changes during the seven years the system has been under the unified management. Table 4, however, shows the asset side of the balance sheets for 1923 and 1929 and the increases and decreases during this six-year period.

The gross increase in investment in road and equipment of \$255,912,681 is included in the total of \$298,689,936 for additions and betterments, discounts, etc. for 1924-1929, shown in table 1, and during this period the increase in miles of road owned was 1,891.87, (Hudson Bay railway excluded in both capital and mileage). In the investment accounts some of the increases are due to transfers from one account to another. Some of the leased properties now controlled by the system were transferred to account 701 and hotels were transferred from account 701 to account 705. Much of the increase in account 706, "Investments in affiliated companies" was due to advances to the Central Vermont railway. Also, against the special deposit with the Minister of Finance of \$39,847,693.86, were temporary loans of \$32,601,600 not included as long term debt shown in table 3.

<sup>(1)</sup> In computing the public debt of Canada, the Finance Department considers railway appropriations and advances in the same way as investments in canals, public works, etc., i.e., as "non-active assets" and does not subtract them from the gross debt in computing the net debt; similarly, no interest is charged by the Finance Department. The railways, however, debit their accounts with the accrued interest on Government advances although none of this interest has been paid.

<sup>(2)</sup> Not assumed by Canadian National system. (See page 2)

<sup>(3)</sup> Deficits of Eastern Lines are met by appropriations by Dominion Government. These deficits do not include loss in revenues due to the 20 per cent reductions in freight rates, viz., \$931,810 for six months 1927, \$2,151,528 for 1928, and \$2,451,818 for 1929 plus \$13,743 for Gaspe railways, also paid by the Dominion Government.
