CANADIAN NATIONAL RAILWAYS
REVENUES, EXPENSES, ETC.
1923 - 1947

Statistics of the Canadian National Railways, as presented in this report, are for the twenty five years 1923 to 1947 and include the lines which were amalgamated and operated as one System from January 1, 1923.

The Canadian Lines of the Canadian National Railways include the railways formerly operated as the Canadian Northern System, the Grand Trunk Railway of Canada, the Grand Trunk Pacific, and the Canadian Government Railways, the last consisting of the Intercolonial, Prince Edward Island, National Transcontinental and several small lines in the eastern provinces. The United States lines include the lines known as the Canadian National Lines in New England, the Grand Trunk Western and the Duluth, Winnipeg and Pacific. Control of the Central Vermont Railway, which had been operated by a receiver from 1927 to January 1930, was purchased by the Canadian National Railways and, from February 1, 1930, has been included as one of the United States lines. The Hudson Bay Railway is being operated for the government by the Canadian National Railways as a separate railway. From 1923 to 1926 its accounts were included with those of the Canadian National and adjustments for the transfer to the Dominion Government were made in the 1926 accounts. The profit or loss of all ancillary operations is included in the income accounts, but the data of the Trans-Canada Air Lines, Canadian Government Merchant Marine, and Canadian National (West Indies) Steamships, Limited, are not included in these statements. Investment in capital stock of Trans-Canada Air Lines, all of which is controlled by the Railway, is included in column 4, Table 4. Financing of this investment is included in column E of Table 3.

The Maritime Freight Rates Act, effective July 1, 1927, provided that the Canadian National Railways east of Levis and Diamond Junction (designated as the Eastern Lines) should reduce the freight rates on local and certain other traffic by 20 per cent. Other railways operating in this eastern territory were allowed to reduce their rates by the same percentage and all railways were authorized to bill the Dominion Government for the difference between the normal and the reduced tolls. All the railways have treated such items as revenue earned and they are so treated

in this report. Eastern Lines deficits since July 1, 1927, have been paid by the Dominion Government and the amounts have not been added to the debt of the Canadian National System. The amount of the Government contribution to meet the deficits of the Eastern Lines is not included in the loans and advances as given in Table No. 2, but the amounts so contributed are included in Table No. 3. The "Duff Report" recommended that the deficits of the system each year be met by special appropriations of the Dominion Government and consequently deficits for 1932 and subsequent years are also excluded from Table No. 2 and are included in Table No. 3 for the respective years.

Table 1 shows the operating revenues, expenses and net operating revenues of the Canadian lines, the United States lines, and the System on the same basis as in previous reports. The second part of the table has been revised to conform with the new set-up effected by the Canadian National Capital Revision Act, chapter 22 of the 1937 Statutes. Under this Act the Canadian National Railways Securities Trust was created as a medium for maintaining in perpetuity the Government's claims against the railways for loans made, amounting to \$643,860,558, and accrued and unpaid interest of \$574,781,637. This total of \$1,218,642,195 includes \$43,949,039 interest the railway had disputed and had not included in its accounts, but does not include any interest on the deficits which the Government had paid for the Eastern Lines since July 1, 1927, and for the entire system since January 1, 1932. Since this interest on Government loans has been cancelled it has been omitted from this table for each year. "Net corporate income before deducting interest," shown in reports previous to 1937, has been replaced with "Income available for fixed charges." The fixed charges include in addition to interest on funded debt held by the public, (1) rent for leased road and equipment, (2) interest on unfunded debt, (3) amortization of discount, and (4) interest on certain Government loans. Deducting these fixed charges leaves "Net income or deficit" shown in reports previous to 1937, as "Net income or deficit excluding Government interest." Interest on Government loans in the fixed charges is interest on temporary loans for redemption of funded debt pending refunding and, from 1937, also interest on loans for capital purposes made since January 1, 1932, but no interest on these latter loans has been included in fixed charges for 1932 to 1936 inclusive.

The Capital Revision Act, which is explained more fully under Table 2, eliminated the Profit and Loss balance as at January 1, 1937. Profit and Loss balances for 1937 and subsequently will also be eliminated by (1) The Government contributing cash for cash deficits. (2) Crediting to "Dominion of Canada Proprietor's Equity" the amount of cash surpluses, and (3) Crediting or charging to "Dominion of Canada Proprietor's Equity" capital gains or losses which do not involve the payment of cash at the time the items are accounted for. Cash surpluses and deficits are shown in the last column of the table; for the years 1923-1936 they have been met by loans by the

Government, by direct payment as stated above, and by reduction of working capital.

Table 2 shows for each year 1922 to 1947 (1) Shareholders' Capital, (2) Funded Debt held by Public, (3) Government Loans and Advances, and (4) Appropriations for Canadian Government Railways. The Share Capital consisted of \$165,627,739 stock of the Grand Trunk Railway held by the Dominion Government and \$100,000,600 of the Canadian Northern Railway stock also held by the Dominion Government. There was also outstanding on December 31, 1922, \$4,591,975 stock of constituent lines held by the public. At Dec.31,1947 this figure is \$4,570,940, a decrease of \$21,035. In the 1923-45 report the table showed the adjustments of the capital liabilities of the System made effective Jan.1,1937, under the Capital Revision Act. This act provided for cancellation of capital stocks and certain indebtedness of the Canadian National Railway System to His Majesty and for adjustment of the accounts of the System. The previously outstanding capital stock of the Canadian National Railway Company (formerly Grand Trunk Railway Company of Canada) was surrendered by the Dominion and cancelled. \$82,000,600 of the outstanding stock of the Canadian Northern Railway Company was surrendered by the Dominion and cancelled. The remainder of the outstanding stock of the Canadian Northern Company, amounting to \$18,000,000 was transferred from the Dominion Government to the Canadian National Railway Company in exchange for one million no par value shares of the latter company, being its entire issued capital stock. Dominion loans for deficits and interest accruals were eliminated from the System balance sheet. Dominion Government loans to and including the 1931 requirements were transferred by the Government to the Canadian National Securities Trust in exchange for the Capital Stock of the Trust, at an initial stated value equal to the loans for Capital purposes. The new Capital Stock of the Canadian National Railway Company, the Capital Stock of the Trust and the investment by the Crown in Canadian Government Railways were transferred to a shareholders' account styled "Dominion of Canada Proprietor's Equity." Adjustment of the Balance Sheet accounts of the System was made as at January 1, 1937. The effect on the balance sheet of the System is shown on page 3 of the report for 1923-41.

The Dominion Government has carried loans to the railway in two accounts, (1) non-active assets and (2) active assets, and when computing the net debt of Canada has deducted the second account, but not the first, from the gross debt. The Government loans in this table have been segregated into these two accounts. The difference in the fiscal years of the railway and the Government, however, prevents checking these loans against the published "Public Accounts" except where no transactions occurred during the first three months of the calendar

years. If it is desired to combine the capital debts of the Canadian National Railways System with those of the Dominion, only the Funded Debt of the System in the hands of the Public should be added to the Dominion debt.

The Grand Trunk Western has assumed certain contingent liabilities, in some cases solely and in others in conjunction with other tenant companies, guaranteeing the payment of interest and principal of bonds of the Detroit and Toledo Shore Line, Toledo Terminal, and Chicago and Western Indiana railways. It is not anticipated any of these will become actual liabilities. The Hudson Bay Railway is a direct liability of the Dominion Government and is being operated by the Canadian National for the Government, but is not included in the following tables.

This table does not include subsidies granted by the Dominion, Provincial and Municipal governments to the privately operated lines which later became part of the Canadian Government Railways and other constituent lines of the Canadian National Railways. Excluding grants to the Grand Trunk Pacific Development Company for the Prince Rupert dry dock and shipyard, payments of wages for unemployment relief labour during 1936, and subscriptions for stock, the grants were as follows:

	Cash Subsidies	Land Grants
	\$	Acres
Dominion	49,261,220	5,763,735
Loan to Grand Trunk	15,142,633 /	
	<u>64,403,853</u>	
Provincial	16,698,208	1,815,141
Municipal	7,393,867	...
Total	<u>88,495,928</u>	<u>7,578,876</u>

/ No interest was paid on this loan made prior to Confederation and it has been included with cash grants by the Bureau. It was cancelled by the Canadian National Capital Revision Act 1937 as a Canadian National Railway liability.

Table 3 shows for each year, 1923-1947, the cash received from Long Term Debt, Government Loans, and Appropriations to Canadian Government Railways, as reflected in Table 2, also the Dominion contributions for deficits comprising the deficit of the Eastern Lines from July 1, 1927, and the remainder of the System from January 1, 1932. Loans treated as active assets in Public Accounts totalling \$689,470,349 are as follows:

Dominion of Canada Loans

Loans for repatriation of U. K. Securities	\$ 391,431,960
" " debt redemption	222,576,030
" " new rolling stock	42,047,355
" " investment in T.C.A.	16,643,023
" " working capital, Canadian Gov't Rlys. at consolidation, 1923	16,771,981
<hr/>	
TOTAL	\$ 689,470,349
<hr/>	

Table 4 shows for each year, 1923-1947, the expenditures for capital purposes and on deficit account.

Table 5 shows the principal operating statistics of the combined Canadian National Railways in Canada and the United States, Central Vermont statistics being included in this table as from January 1, 1930, and not February 1, as in the other tables. The average miles operated and number of employees are monthly averages. The total pay roll covers all employees and includes pay roll charged to (1) operating expenses as labour, (2) stores department, which is charged to operation or to capital account as part of the cost of materials, (3) joint facilities for the years 1923-1930 (This item is included in operating expense labour for 1931-1944) and (4) capital account. The breakdown of the total pay roll for 1947 is as follows:

Pay Roll charged to Operating Expenses	\$ 239,056,859
Stores, Tie, Timber and Fuel Departments, Capital and other Items	19,280,845
<hr/>	
Total Pay Roll (includes railway, express and telegraph and excludes hotel and subsidiary company employees)	\$ 258,337,684
<hr/>
