## CANADIAN NATIONAL RAILWAYS

## 1923-1958

The carrent report continues the series in which statistics of the Canadian National Railways are presented on a System basis. The report gives data for the thirty-six years 1923 through 1958 and includes the lines which were amalgamated and operated as one System from January 1, 1923.

The Canadian Lines of the Canadian National Railways include the rallways formerly operated as the Canadian Northern System, the Grand Trunk Railway of Canada, the Grand Trunk Pacific, and the Canadian Government Railways, the last consisting of the Intercolonial, Prince Edward Island, National Transcontinental, several small lines in the Eastern provinces and Newfoundland Railway, which was added April 1, 1949. Effective January 1, 1950, the Canadian National was entrusted with the management and operation of the Temiscouata. Railway which had been purchased by His Majesty in right of Canada (P.C. 5186 October 14, 1949). On November 30, 1951 the properties of the Quebec Rallway, Light and Power Company were acquired to integrate rail operations between Quebec City and Nairn's Falls on the north shore of the St. Lawrence River. On January 1, 1953, the Canadian National acquired the National Harbours Board Terminal Railway facllities in the Greater Vancouver area and effective November 1, 1952, leased with the option to purchase the Second Narrows Bridge (excluding the highways thereon) from the Burrard Inlet Tunnel \& Bridge Company. During 1956 and 1957 the Canadian National purchased all the shares of capital stock of the Buffalo and Lake Huron Railway Company. Effective 1957 the assets and liabilities of this company were consolidated with the System accounts. During 1958 all shares of the Yukon Telephone Co. Were purchased by the Canadian National and assets and liabilities consolidated with System accounts.

Further progress was made in 1958 towards the simplification of the System's corporate structure. The number of corporate entities comprised in the System was reduced from 45 to 37 , and preliminary steps have been taken for a further reduction in 1859.

The United States lines include the lines known as the Canadlan National Lines in New England, the Grand Trunk Western and the Duluth, Winnipeg and Pacific. Control of the Central Vermont Railway, which had been operated by a receiver from 1927 to January 1930, was purchased by the Canadian National Railway and, from February 1. 1930, has been included as one of the United States lines. The New London Northern Railroad company was acquired on Dec. 19, 1951 in order to affect a saving in rentals and taxes to which the Central vermont Radlway was obligated by virtue of a 99 year lease.

Early in 1958 the Hudson Bay Railway and the Northwest Communication System (both formerly operated for the Government by the Canadian

National) were entrusted to the Canadian National System on a basis similar to that of other Canadian Government railways. From 1923 to 1926 the accounts of the Hudson Bay Railway were included with those of the Canadian National and adjustments for the transfer to the Govemment of Canada were made in the 1926 accounts. The profit of loss of all ancillary operations is included in the income accounts, but the data of the Trans-Canada Alr Lines, Canadian Government Merchant Marine, and Canadian National (West Indies) Steamships, Limited, are not included in these statements. Investment in capital stock of Trans-Canada Air Lines, all of which is owned by the Rallway, is included in column 4, Table 4. Financing of this investment is included in Table 3.

The Maritime Freight Rates Act, effective July 1, 1927, provided that the Canadian National Railways east of Levis and Diamond (designated as the Eastern Lines) should reduce the frelght rates on local and certain other traffic by 20 per cent. This freight rate reduction was extended to embrace Newfoundland under the terms of Unlon. Other rallways operating in this eastern territory were allowed to reduce their rates by the same percentage and all rallways were authorized to bill the Government of Canada for the difference between the normal and the reduced tolls. All the railways have treated such items as revenue earned and they are so treated in this report. Eastern lines deficits since July 1, 1927, have been paid by the Government of Canada and the amounts have not been added to the debt of the Canadian National System. The amount of the Government contribution to meet the deficits of the Eastern Lines is not included in the loans and advances as gaven in Table No. 2, but the amounts so contributed are included in Table No. 3. The ''Duff Report' ( $1931-2$ ) recommended that the deficits of the System each year be met by special appropilations of the Government of Canada and consequently deficits for 1932 and subsequent years are also excluded from Table No. 2 and are included in Table No. 3 for the respective years. Effective July 1, 1957, the subsidies payable under the Maritime Freight Rates Act were increased by legislation from $20 \%$ to $30 \%$ for movements from the Maritimes to other Canadian Points.

Shown in table 1 are the operating results of the Canadian lines, the United States lines and the System, presented on a basis as similar as possible for the thirty-six year period, 1923 to 1958. However, in accordance with the new Uniform Classiflcation of Accounts, which was adopted by the two major Canadian Railways January 1, 1956, tax accruals and rents are included in operating expenses. The second part of the table conforms with the changes affected by the Canadian National Capital Revision Act, chapter 22 of the 1937 Statutes. Under this Act the Canadian National Railways Securitles Trust was created as a medlum for maintalning in perpetuity the Government's claims agalnst the railways for loans made, amount-
ing to $\$ 643,860,558$, and accrued and unpaid interest of $\$ 574,781,637$. This total of $\$ 1,218,642,195 \mathrm{in}$ cludes $\$ 43,949,039$ interest the railway had disputed and had not included in its accounts, but does not include any interest on the deficits which the Government had paid for the Eastern Lines since July 1, 1927, and for the entire system since January 1, 1932. Since this interest on Government loans has been cancelled it has been omitted from this table for each year. "Net corporate income before deducting interest," shown in reports previous to 1937, has been replaced with "Income available for fixed charges." The fixed charges include, in addition to interest on funded debt held by the public, (1) rent for leased road and equipment, (2) interest on unfunded debt, (3) amortization of discount, and (4) interest on Government loans. Deducting these fixed charges leaves "Net income or deficit" shown in reports previous to 1937, as "Net income or deficit excluding Government interest." Interest on Government loans in the fixed charges is interest on temporary loans for redemption of funded debt pending refunding and, from 1937, also interest on loans for capital purposes made since January 1, 1932, but no interest on these latter loans has been included in fixed charges for 1932 to 1936 inclusive.

The Capital Revision Act. 1937, which is explained more fully under Table 2, eliminated the Profit and Loss balance as at January 1. 1937. Profit and Loss balances from 1937 to 1951 are also eliminated by (1) The Government contributing cash for cash deficits, (2) Crediting to "Government of Canada Proprietor's Equity" the amount of cash surpluses, and (3) Crediting or charging to "Government of Canada Proprietor's Equity" capital gains or losses which do not Involve the payment of cash at the time the items are accounted for. Cash surpluses and deficits are shown in the last column of the table; for the years 1923-1936 they had been met by loans by the Government, by direct payment as stated above, and by reduction of working capital.

Changes in the Income Tax Act made the Canadian National Railways (along with other Government-owned enterprises) subject to the Act for the first time in 1952; however, no Canadian income tax was payable by the Company on earnings for 1952 or subsequent years.

Under terms of the Capital Revision Act, 1952, which is explained in greater detail under table 2 , earnings available after income tax must be paid to the Federal Government as dividends on the Company's 4 p.c. preferred stock. These dividends are non-cumulative.

Table 2 shows for each year 1922 through 1958 (1) Shareholders' Capital, (2) Funded Debt held by Public, and (3) Government Loans and Appropriations. The Share Capital consisted of $\$ 165,627,739$ stock of the Grand Trunk Railway held by the Government of Canada and $\$ 100,000,600$ of the Canadian Northern Railway stock similarly held. There was also outstanding on December 31, 1922,
$\$ 4,591,975$ stock of constituent lines held by the public; this flgure at December 31, 1958, was $\$ 4,504,203$. In the 1923-45 report the table shower the adjustments of the capital liabilities of the System made effective January 1, 1937, under the Capital Revision Act. This act provided for cancellation of capital stocks and certain indebtedness of the Canadian National Railway System to Her Majesty and for adjustment of the accounts of the System. The previously outstanding capital stock of the Canadian National Railway Company (Formerly Grand Trunk Railway Company of Canada) was surrendered by the Govemment and cancelled. $\$ 82,000,600$ of the outstanding stock of the Canadian Northern Railway Company was also surrendered by the Federal Government and cancelled. The remainder of the outstanding stock of the Canadian Northern Company, amounting to $\$ 18,000,000$, was transferred from the Government to the Canadian National Railway Company in exchange for one million no par value shares of the latter company, being its entire issued capital stock. Government loans for deficits and interest accruals were eliminated from the System balance sheet. Government loans to and including the 1931 requirements were transferted by the Govermment to The Canadian National Securities Trust in exchange for the Capital Stock of the Trust, at an initial stated value equal to the loans for Capital purposes. The new Capital Stock of the Canadian National Railway Company, the Capital Stock of the Trust and the investment by the Crown in Canadian Government Railways were transferred to a shareholders' account styled "Government of Canada Proprietor's Equity." Adjustment of the Balance Sheet accounts of the System was made as at January 1, 1937. The effect on the balance sheet of the System is shown on page 3 of the report for 1923-41.

The 1923-52 report contains details conceming the Canadian National Rallways Capital Revision Act, 1952. Major changes resulting from the Act were:

1. $\$ 736,385,405$ of interest bearing debt to the Federal Government was exchanged for Canadian National Railway Company 4 p.c. noncumulative preferred stock.
2. Outstanding loans from the Federal Government to the amount of $\$ 100$ million were converted into a $3 / 3$ p.c. twenty-y ear debenture which is to mature on January 1. 1972. This debenture is non-interest bearing until January 1. 1962.
3. Capital stock of the Canadian National Securities Trust in the amount of $\$ 378.518,135$ was transferred to the Canadian National Rallway Company in exchange for a like amount of the Company's capital stock.
4. The Federal Government undertook to purchase 4 p.c. preferred stock in amounts equal to 3 p.c. of the annual gross revenues in each of the years 1952 to 1960.

Effect of the Act on the capitalization of the System is shown in tabular form on pages 4 and 5 of the 1923-52 report.

During 1958 the Canadian National Rallways issued $\$ 300,000,000.4$ p.c. bonds, maturing February 1, 1981 .

The Government has carried loans to the railway in two accounts, (1) non-active assets and (2) active assets, and when computing the net debt of Canada has deducted the second account, but not the flrst, from the gross debt. The Government loans In thls table have been segregated into these two accounts. The difference in the fiscal years of the railway and the Government, however, prevents checking these loans against the published "Public Accounts" except where no transactions occurred during the first three months of the calendar years. If it is desired to combine the capital debts of the Canadian National Railways System with those of the Government of Canada, only the Funded debt of the System In the hands of the Public should be added to the Federal debt.

The Grand Trunk Western has assumed certain contingent liabilities, in conjunction with other tenant companies, guaranteeing the payment of interest and principal of bonds of the Detroit and Toledo Shore Line, and Chicago and Western Indiana railways. It is not anticlpated any of these will become actual liabilities.

Table 2 does not include subsidies granted by the Federal, Provinclal and Municipal governments to the privately operated lines which later hecame part of the Canadian Government Railways and other constituent lines of the Canadian National Railways. Excluding grants to the Grand Trunk Pacific Development Company for the Prince Rupert dry dock and shipyard, payments of wages for unemployment relief labour during 1936, and subscriptions for stock, the grants were as follows:

[^0]Table 3 shows for each year, 1923-1958, the cash received from Funded Debt held by Public, Government Loans and Appropriations, as reflected in Table 2, also the Government contributions deficits comprising the deficit of the Eastern Lines from July 1, 1927, and the remainder of the System from January 1, 1932. Loans and debentures treated as active assets in Public Accounts totalling $\$ 484,791,699$ are as follows:

## Govemment of Canada Loans and Debentures

Debenture issued under Capital Revision Act, 1952 maturing January 1 , 1972
$\$ 100,000,000$
Advances for Canadian Government Rallways working capital ................. 16,988,091
Financing and Guarantee Acts, 1956 1958
Temporary loans ................................ 284,796,722
Refunding Act, 1955
Loans for debt redemption.................. 83,006,886
Total................................................. 484,791,699

Table 4 gives for each year, 1923-1958, the expenditures for capital purposes and on deflcit account.

Table 5 shows the principal operating statistics of the combined Canadian National Rallways in Canada and the United States, Central Vermont statistics being included in this table as from January 1, 1930, and not February 1, as in the other tables. The average miles operated and number of employees are monthly averages. The total payroll covers all employees and includes payroll charged to (1) operating expenses as labour, (2) stores department, which is charged to operation of to capital account as part of the cost of materials, (3) joint facillties for the years 1923-1930; this item is included in operating expense labour thereafter, and (4) capital account. The breakdown of the total pay roll fot 1958 is as follows:

Pay Roll charged to Operating Ex-
penses................................................... $\$ 410,113,056$
Stores, Tle, Timber and Fuel Departments, Capital and Other Items ......... 41,430,272

Total Pay Roll (includes railway, express and telegraph and excludes hotels and subsidiary companles employees)
$451,543,328$

Table 4
${ }^{1}$ Years 1923-1955 capital expenditures recorded on a "net" basis. Effective 1956 expenditures reporded on a "Gross"' basis.
${ }^{2}$ Includes cost of acquiring control of Atlantic and St. Lawrence Railroad Company.
${ }^{3}$ During the year, adjustments totalling $\$ 173,302,045$ were made increasing the book values of properties and equipment with a corresponding increase in recorded depreciation to record amounts not included in these accounts under previous accounting policies. Without making a physical appraisal it is not feasible to determine the amount of depreciation accruing prior to the adoption of depreciation accounting; the foregoing adjustments have the effect of providing in part for such depreciation.

## Table 5

${ }^{1}$ Revenue and non-revenue freight.
${ }^{2}$ Includes portion of mixed train miles.
