CANADIAN NATIONAL RAILWAYS

1923 - 66

The current report continues the series in which statistics of the Canadian National Railways are presented on a System basis. The report gives data for the forty-four years 1923 through 1966 and includes the lines which were amalgamated and operated as one System from January 1, 1923.

The Canadian Lines of the Canadian National Railways include the railways formerly operated as the Canadian Northern System, the Grand Trunk Railway of Canada, the Grand Trunk Pacific, and the Canadian Government Railways, the last consisting of the Intercolonial, Prince Edward Island, National Transcontinental, several small lines in the Eastern provinces and Newfoundland Railway, which was added April 1, 1949. Effective January 1, 1950, the Canadian National was entrusted with the management and operation of the Temiscouata Railway which had been purchased by His Majesty in right of Canada (P.C. 5186 October 14, 1949). On November 30, 1951 the properties of the Quebec Railway, Light and Power Company were acquired to integrate rail operations between Quebec City and Nairn's Falls on the north shore of the St. Lawrence River. On January 1, 1953, the Canadian National acquired the National Harbours Board Terminal Railway facilities in the Greater Vanconver area and effective November 1, 1952, leased with the option to purchase the Second Narrows Bridge (excluding the highways thereon) from the Burrard Inlet Tunnel & Bridge Company, During 1956 and 1957 the Canadian National purchased all the shares of capital stock of the Buffalo and Lake Huron Railway Company. Effective 1957 the assets and liabilities of this company were consolidated with the System accounts. During 1958 all shares of the Yukon Telephone Co, were purchased by the Canadian National and assets and liabilities consolidated with System accounts. During 1960 and 1961 shares of Yellowknife Telephone Co. were purchased and the assets and liabilities consolidated with System accounts effective 1961. Canadian National's highway operations throughout 1966 owned nine subsidiary trucking companies.

The United States lines include the lines known as the Canadian National Lines in New England, the Grand Trunk Western and the Duluth, Winnipeg and Pacific. Control of the Central Vermont Railway, which had been operated by a receiver from 1927 to January 1930, was purchased by the Canadian National Railway and, from February 1, 1930, has been included as one of the United States lines. The New London Northern Railroad Company was acquired on Dec. 19, 1951 in order to affect a saving in rentals and taxes to which the Central Vermont Railway was obligated by virtue of a 99 year lease.

Early in 1958 the Hudson Bay Railway and the Northwest Communication System (both formerly operated for the Government by the Canadian National) were entrusted to the Canadian National System on a basis similar to that of other Canadian Government railways. From 1923 to 1926 the ac-

counts of the Hudson Bay Railway were included with those of the Canadian National and adjustments for the transfer to the Government of Canada were made in the 1926 accounts. The profit or loss of all ancillary operations is included in the income accounts, but the data of Air Canada is not included in these statements. Investment in capital stock of Air Canada, all of which is owned by the Railway, is included in column 4, Table 4. Financing of this investment is included in Table 3.

The Maritime Freight Rates Act, effective July 1. 1927, provided that the Canadian National Railways east of Levis and Diamond (designated as the Eastern Lines) should reduce the freight rates on local and certain other traffic by 20 per cent. This freight rate reduction was extended to embrace Newfoundland under the terms of Union. Other railways operating in this eastern territory were allowed to reduce their rates by the same percentage and all railways were authorized to bill the Government of Canada for the difference between the normal and the reduced tolls. All the railways have treated such items as revenue earned and they are so treated in this report. Eastern lines deficits since July 1, 1927, have been paid by the Government of Canada and the amounts have not been added to the debt of the Canadian National System. The amount of the Government contribution to meet the deficits of the Eastern Lines is not included in the loans and advances as given in Table 2, but the amounts so contributed are included in Table 3. The "Duff Report" (1931-2) recommended that the deficits of the System each year be met by special appropriations of the Government of Canada and consequently deficits for 1932 and subsequent years are also excluded from Table 2 and are included in Table 3 for the respective years. Effective July 1, 1957, the subsidies payable under the Maritime Freight Rates Act were increased by legislation from 20% to 30% for movements from the Maritimes to other Canadian Points.

Table 1 presents the operating results of the Canadian lines, the United States lines and the System, presented on a basis as similar as possible for the forty-four year period, 1923 to 1966. In accordance with the new Uniform Classification of Accounts, adopted by the two major Canadian Railways January 1, 1956, tax accruals and rents are included in operating expenses from that time forward. The second part of Table 1 conforms with the changes affected by the Canadian National Capital Revision Act, Chapter 22 of the 1937 Statues. Under this Act the Canadian National Railways Securities Trust was created as a medium for maintaining in perpetuity the Government's claims against the railways for loans made, amounting to \$643,860,558, and accrued and unpaid interest of \$574,781,637. This total of \$1,218,642,195 includes \$43,949,039 interest the railway had disputed and had not included in its accounts, but does not include any interest on the deficits which the Government had paid for the Eastern Lines since July 1, 1927, and for the entire system since January 1, 1932. Since

this interest on Government loans has been cancelled it has been omitted from this table for each year. "Net corporate income before deducting interest," shown in reports previous to 1937, was replaced in 1937 with "Income available for fixed charges" and changed effective in the 1966 report to "Net income before fixed charges." The fixed charges include, in addition to interest on funded debtheld by the public. (1) rent for leased roads, (2) interest on unfunded debt, (3) amortization of discount, and (4) interest on Government loans. Deducting these fixed charges leaves "Net income or deficit" shown in reports previous to 1937, as "Net income or deficit excluding Government interest." Interest on Government loans in the fixed charges is interest on temporary loans for redemption of funded debt pending refunding and, from 1937, also interest on loans for capital purposes made since January 1, 1932, but no interest on these latter loans has been included in fixed charges for 1932 to 1936 inclusive.

The Capital Revision Act, 1937, which is explained more fully under Table 2, eliminated the Profit and Loss balance as at January 1, 1937. Profitand Loss balances from 1937 to 1951 are also eliminated by (1) The Government contributing cash for cash deficits, (2) Crediting to "Government of Canada Proprietor's Equity" the amount of cash surpluses, and (3) Crediting or charging to "Government of Canada Proprietor's Equity" capital gains or losses which do not involve the payment of cash at the time the items are accounted for. Cash surpluses and deficits are shown in the last column of Table 1; for the years 1923-36 they had been met by loans by the Government, by direct payment as stated above, and by reduction of working capital.

Changes in the Income Tax Act made the Canadian National Railways (along with other Governmentowned enterprises) subject to the Act for the first time in 1952; however, no Canadian income tax was payable by the Company on earnings for 1952 or subsequent years.

Under terms of the Capital Revision Act, 1952, which is explained in greater detail under Table 2, earnings available after income tax must be paid to the Federal Government as dividends on the Company's 4 p.c. preferred stock. These dividends are non-cumulative.

Table 2 shows for each year 1922 through 1966 (1) Shareholders' Capital, (2) Funded Debt held by Public, and (3) Government Loans and Appropriations. The Share Capital consisted of \$165,627,739 stock of the Grand Trunk Railway held by the Government of Canada and \$100,000,600 of the Canadian Northern Railway stock similarly held. There was also outstanding on December 31, 1922, \$4,591,975 stock of constituent lines held by the public; this figure at December 31, 1966, was \$4,345,185. In the 1923-45 report the table showed the adjustments of the capital liabilities of the System made effective January 1, 1937, under the Capital Revision Act. This Act provided for cancellation of capital stocks and certain indebtedness of the Canadian National Railway System to His Majesty and for adjustment of the accounts of the System. The pre-

viously outstanding capital stock of the Canadian National Railway Company (formerly Grand Trunk Railway Company of Canada) was surrendered by the Government and cancelled. \$82,000,600 of the outstanding stock of the Canadian Northern Railway Company was also surrendered by the Federal Government and cancelled. The remainder of the outstanding stock of the Canadian Northern Company, amounting to \$18,000,000, was transferred from the Government to the Canadian National Railway Company in exchange for one million no par value shares of the latter company, being its entire issued capital stock. Government loans for deficits and interest accruals were eliminated from the System balance sheet. Government loans to and including the 1931 requirements were transferred by the Government to The Canadian National Securities Trust in exchange for the Capital Stock of the Trust, at an initial stated value equal to the loans for Capital purposes. The new Capital Stock of the Canadian National Railway Company, the Capital Stock of the Trust and the investment by the Crown in Canadian Government Railways were transferred to a shareholders' account styled "Government of Canada Proprietor's Equity." Adjustment of the Balance Sheet accounts of the System was made as at January 1, 1937. The effect on the balance sheet of the System is shown on page 3 of the report for 1923-41.

The 1923-52 report contains details concerning the Canadian National Railways Capital Revision Act, 1952. Major changes resulting from the Act were:

- \$736,385,405 of interest bearing debt to the Federal Government was exchanged for Canadian National Railway Company 4 p.c. noncumulative preferred stock.
- 2. Outstanding loans from the Federal Government to the amount of \$100 million were converted into a 3% p.c. twenty-year debenture which is to mature on January 1, 1972. This debenture was non-interest bearing until January 1, 1962. The interest free feature (as extended by Financing and Guarantee Acts) expired on December 31, 1965. The interest free feature has been extended by Financing and Guarantee Acts to December 31, 1967.
- 3. Capital stock of the Canadian National Securities Trust in the amount of \$378,518,135 was transferred to the Canadian National Railway Company in exchange for a like amount of the Company's capital stock.
- 4. The Federal Government undertook to purchase 4 p.c. preferred stock in amounts equal to 3 p.c. of the annual gross revenues in each of the years 1952 to 1960. This provision (as extended by Financing and Guarantee Acts) expired on December 31, 1965. This provision has been extended by Financing and Guarantee Acts to December 31, 1967.

Effect of the Act on the capitalization of the System is shown in tabular form on pages 4 and 5 of the 1923-52 report.

The Government has carried loans to the railway in two accounts, (1) non-active assets and (2) active assets, and when computing the net debt of Canada has deducted the second account, but not the first from the gross debt. The Government loans in this table have been segregated into these two accounts. The difference in the fiscal years of the railway and the Government, however, prevents checking these loans against the published "Public Accounts" except where no transactions occurred during the first three months of the calendar years. If it is desired to combine the capital debts of the Canadian National Railways System with those of the Government of Canada, only the Funded debt of the System in the hands of the Public should be added to the Federal debt.

The Grand Trunk Western has assumed certain contingent liabilities, in conjunction with other tenant companies, guaranteeing the payment of interest and principal of bonds of the Detroit and Toledo Shore Line, The Belt Ry. Co. of Chicago and Chicago and Western Indiana railways. It is not anticipated any of these will become actual liabilities.

Table 2 does not include subsidies granted by the Federal, Provincial and Municipal governments to the privately operated lines which later became part of the Canadian Government Railways and other constituent lines of the Canadian National Railways. Excluding grants to the Grand Trunk Pacific Development Company for the Prince Rupert dry dock and shipyard, payments of wages for unemployment relief labour during 1936, and subscriptions for stock, the grants were as follows:

Table 3 shows for each year, 1923-66, the cash received from Funded Debt held by Public, Government Loans and Appropriations, as reflected in Table 2, also the Government contributions for deficits comprising the deficit of the Eastern Lines from July 1, 1927, and the remainder of the System from January 1, 1932. Loans and debentures treated as active assets in Public Accounts totalling \$445,354,762 are as follows:

Table 4 gives for each year, 1923-66, the expenditures for capital purposes and on deficit account.

Table 5 shows the principal operating statistics of the combined Canadian National Railways in Canada and the United States, Central Vermont statistics being included in this table as from January 1, 1930, and not February 1, as in the other tables. The average miles operated and number of employees are monthly averages. The total payroll covers all employees and includes payroll charged to (1) operating expenses as labour, (2) stores department, which is charged to operation or to capital account as part of the cost of materials, (3) joint facilities for the years 1923-30; this item is included in operating expense labour thereafter, and (4) capital account. The breakdown of the total pay roll for 1966 is as follows:

No interest was paid on this loan made prior to Confederation and it has been included with cash grants by the Bureau. It was cancelled by the Canadian National Capital Revision Act 1937 as a Canadian National Railway Liability.
