ELECTRIC RAILWAYS OF CANADA

1 9 4 2

Passenger traffic on electric railway systems continued to increase in 1942, increases ranging as high as 67 per cent, and for all systems the increase was 25.4 per cent. The eleven large systems carrying more than 10,000,000 passengers each, carried 912,164,402 passengers which was 181,036,661 passengers in excess of the 1941 traffic. The International Transit Company ceased operating electric street cars in 1941, the traffic being handled by motor buses of a local carrier in Sault Ste. Marie in 1942.

The gross revenues of the 1942 operating systems increased from \$55,283,724 in 1941 to \$69,034,130, and operating expenses increased from \$36,975,768 to \$43,473,516. Taxes increased from \$4,669,250 to \$8,172,958, exclusive of the refundable portion of the income tax, and the net income, available for dividends, reserves, etc., increased from \$11,790,722 to \$16,345,967.

There was a reduction in the miles of track of 14.42 miles or from 1,519.67 to 1,505.25 miles. Freight carried, largely in switching movement, increased from 3,265,449 tons to 3,711,468 tons, and electric car, motor bus and trackless trolley bus miles increased from 137,400,881 to 155,370,886 miles or by 13.1 per cent, for an increase in passengers carried of 25.4 per cent.

During the year there was a net increase of 80 one-man cars, 8 trackless trolley buses and 165 motor buses. The number of two-man cars remained unchanged and minor changes were made in other classes of equipment. The number of car and bus conductors and motor-men increased from 7,696 to 8,509 or 10.5 per cent, and total employees increased by 8.6 per cent, for an increase in the pay roll of \$4,757,444 or 20.5 per cent.

During the year 2 passengers were killed and 3,157 were injured, 59 pedestrians were killed and 769 were injured, 22 motorists were killed and 409 were injured and 4 persons riding in other vehicles were killed and 129 were injured. Including all persons a total of 91 were killed and 4,984 were injured in electric railway systems' accidents as against 66 and 3,933 respectively, in 1941.

The railway in Montreal is operated under a contract between the city and the operator and the statistics are those of the operator except that table 6 shows also the income data of the company. This income includes certain allowances to the company shown as expenses of operation, together with taxes, dividends, etc. payable by the company.
