# ELECTRIC RAILWAYS

## 1954

The financial and operating statistics of electric railways, together with their motor bus and trolley coach lines, are presented in this report. A complementary report "Motor Carriers, Freight and Passenger" contains details relating exclusively to the motor bus segment of the transit industry.

The system of accounts used in recent issues of Electric Railway statistics is in accordance with the "Classification of Accounts for Transit Systems in Canada" as compiled by the General Transit Accounting Committee of the Canadian Transit Association, and prescribed by the Bureau. This became effective January 1, 1946. While comparability with previous annual reports has been altered in some respects, the current standard classification has improved the uniform coverage of detail and made possible closer comparisons with United States statistics. Further, the revised classification is suitable for a punch card system of accounting and readily adaptable to large or small operating companies.

The electric street car has been and is being steadily replaced as the principal vehicle of mass transportation in most Canadian cities and towns. The shift from electric trams to motor buses and electric trolley coaches has been pronounced since the end of the war. While the street car is particularly suited to the efficient mass movement of large

Passenger traffic on the twenty-one electric railway systems operating in Canada during 1954 dropped 1.2 per cent to 1,063,705,752 fares from 1,076,979,055 in 1953 and indicates a continuance of the downward trend of recent years.

A comparison of the passenger traffic on lines which operated in both 1953 and 1954 is presented on page 8. Gains over 1953 were recorded for only three of the reporting systems, these being the Toronto Transit Commission, Nova Scotia Light and Power Co. and Regina Transit System. Increases in the Toronto Transit Commission data were due mainly to the fact that on January 1, 1954 the T.T.C. were made responsible for all public passenger

numbers of passengers, surface traffic conditions in metropolitan areas have become so congested, noticeably at the rush hours in down-town sections, that the largest cities are planning subways. That for Toronto was placed in operation in March, 1954. Few of the older cities were designed to carry the present increasing volume of motor vehicle and street car traffic on relatively narrow streets. The street car on a fixed track lacks manoeuvrability and has become the target of the motoring public and some town planners and traffic experts.

The shift from electric railway to bus operations is illustrated by the fact that over the past thirty years some 43 electric railway systems have ceased operating as such. The convenience of operating over a "right-of-way" maintained by the municipality or province combined with the greater adaptability and manoeuvrability inherent in a freewheeling vehicle have encouraged this transformation in transit operations.

In 1946 just over 19 p.c. of the total passengers carried by electric railways were moved on motor buses and trolley coaches, whereas by 1954 this percentage has risen to 55.4 p.c. compared with 51.0 p.c. in 1953. From current monthly transit reports covering both electric railway and bus companies, it is apparent that an even larger percentage of passenger traffic is presently carried by motor bus and trolley coach combined.

### 1954 Operating Results

transportation in the Municipality of Metropolitan Toronto. As a result, railway, urban and intercity bus services previously operated and reported separately are now part of the integrated transportation system and as such were incorporated into the T.T.C. report for 1954.

### Principal details of the Toronto Transit Commission in 1954 and component companies in 1953.

The Toronto Transit Commission in 1954 reported \$28,983,546 revenue; \$29,482,951 expenses; 320,249,800 passengers carried and 45,291,294 vehicle miles run. The 1953 equivalent services were reported as follows:

### Electric Railways Report, 1953

	Revenues	Expenses	Passengers carried	Vehicle mileage
	\$	\$	No.	No.
York Township and Town of Weston .....	839,307	650,074	13,546,046	1,170,285
Toronto Transportation Commission .....	23,771,791	23,116,440	286,851,401	35,885,287

## Motor Carrier Report, 1953

	Revenues	Expenses	Passengers carried	Vehicle mileage
	\$	\$	No.	No.
Danforth Bus Lines .....	599,137	574,017	6,371,280	1,162,330
Hollinger Bus Lines .....	698,389	676,644	10,395,193	1,482,804
Toronto Coach Lines.....	69,844	71,414	129,604	118,614
T.T.C. (Metropolitan Area Buses).....	940,879	1,021,659	15,490,223	1,819,500
West York Coach Lines.....	370,761	344,369	1,467,703	734,371
David R. Murray .....	149,776	135,669	1,153,147	348,991
<b>Grand Total.....</b>	<b>27,439,884</b>	<b>26,590,286</b>	<b>335,404,597</b>	<b>42,722,182</b>

The Montreal Transportation Commission carried 30.8 per cent of the total passengers moved with 327,515,022 persons transported during the year under review. This was 15,378,755 fewer than the 1953 total of 342,893,777. The third largest carrier was the British Columbia Electric Railway which accounted for 10.1 per cent of the total with 107,751,885 passengers in 1954 as compared to 113,763,294 in the preceding year.

## Revenues and Expenses

Revenues from operations of the 21 companies totalled \$109,334,662, up 1.2 per cent from \$107,990,692 in 1953. Operating expenses advanced more rapidly than revenues, rising 3.8 per cent to \$109,006,301 from \$105,027,443 thus reducing the net operating revenue from \$2,963,249 in 1953 to \$328,361 in 1954. This compares very poorly with the peak net revenue of \$26,528,022 in 1944 and even the \$11,466,700 which remained from operations during the depression year of 1933. The Saskatchewan and Manitoba operators registered the only gains over the 1953 results. In Nova Scotia the 1953 net of \$170,280 was reduced to \$70,450; the Quebec profit fell from \$1,574,442 in the previous year to \$789,655; in Ontario the 1953 net of \$1,336,314 became a deficit of \$289,951; a Manitoba deficit of \$191,674 was reduced to one of \$27,963 in 1954; Saskatchewan operations netted \$88,232 in 1953 compared with \$96,279 in the year reviewed; the Alberta net revenue decreased from \$792,815 to \$746,136 and the British Columbia loss of \$807,160 in 1953 became one of \$1,056,245 in 1954.

Investment in road and equipment by the industry was \$291,138,722 in 1954 compared to \$283,256,339 in 1953 while the total stocks and bonds outstanding increased to \$192,896,895 from \$186,117,922.

## Employment and Wages

Total salaries and wages paid to 20,318 employees were \$70,109,414 in 1954 versus \$69,329,176 earned by 20,408 employees in 1953. Average annual earnings rose 1.6 per cent to \$3,451 in contrast to \$3,397 in the previous year.

Statistics of the Montreal Transportation Commission relate to the twelve month period commencing December 1, 1953 and ending November 30, 1954. Those of the Greater Winnipeg Transit cover the twelve month period November 1, 1953 to October 31, 1954. For purposes of this report these details are treated as pertaining to the calendar year 1954.

## Mileage and Equipment

Total mileage of main track decreased to 771.66 in 1954 from 814.30 at the end of 1953. This decline was mainly due to a 29.30 mile decrease in trackage of the British Columbia Electric Railway Company. Other reductions in track mileages were reported by the Montreal Transportation Commission, the Ottawa Transportation Commission and the Toronto Transit Commission. With the length of sidings and turnouts slightly reduced to 216.16 miles from 221.76, total track mileage amounted to 987.82 at the close of 1954 and compares with 1,036.06 at December 31, 1953. Vehicle miles run increased to 173,593,088 during the year under review as against 168,464,343 miles in 1953. Declines in electric car miles contrasted with considerable gains in vehicle miles of trolley coaches and motor buses.

Of the 1,063,705,752 passengers carried by Electric Railway Systems during 1954, electric cars carried 43.5 per cent; trolley coaches moved 22.9 per cent and motor buses transported 32.5 per cent. These compare percentagewise with 49.0; 22.6; and 28.4 respectively for 1953. Passengers numbering 12,100,929 or 1.1 per cent of the total carried in 1954 were not distributed according to type of transit vehicle in the report filed by the Regina Transit System.

The number of electric cars in service at the end of the year was down to 2,137 from 2,312 in 1953 but trolley coaches increased to 1,144 from 1,113 and there were 171 more motor buses at 2,348 as against 2,177 in 1953.

## Safety Performance

Fatal accidents in 1954 resulted in the death of 42 persons including one passenger, twenty-nine pedestrians, ten persons riding in motor vehicles and two others. The 1953 operations showed two employees, eighteen pedestrians and thirteen persons in motor vehicles for a total of 33 fatalities.

The number of injuries during 1954 were reduced to 4,748 from 4,913 one year earlier. In 1954, 1,394 injuries were the result of collisions, 10 resulted from electric contact and 3,344 from "other" causes.

## Passengers and Freight Carried and Vehicle Miles

Year	Passengers carried	Freight carried	Vehicle miles
