SUMMARY
OF
MONTHLY TRAFFIC REPORTS
FOR
YEAR ENDED DECEMBER 31, 1929

The data in the following tables include only revenue freight carried by the Canadian railways and not the "On company service" freight which includes coal for locomotives, ties, ballast and other railway material. These data will consequently not check with data on imports although this freight will not affect the exports. Freight interchanged between Canadian roads is not duplicated in these tables, but freight unloaded and subsequently reshipped is counted each time it is billed out. Foreign connections include railways in the United States and boats cleared for, or entered from, foreign ports, and in this report all freight moved to ports on export rates has been shown as delivered to foreign connections. Although the railways report all grain delivered to the elevators at the head of the lakes as unloaded at stations in Canada and all grain received from the lake elevators as loaded at billing stations, the reports have been corrected from the elevator returns to show the deliveries to and receipts from foreign connections. Grain delivered to elevators at Montreal, Vancouver and other ocean ports for export has been shown as delivered to foreign connections and adjustments have been made for grain taken out of these elevators for local consumption. Freight carried to ports on local rates has been reported as unloaded at stations although it might subsequently be exported by water routes. Grain unloaded at the elevators at the head of the lakes and later forwarded to Montreal by boat is reported as unloaded at stations in Ontario and does not again enter into the railway records, and consequently affects the net imports into the province. Also western grain ground in Ontario will increase the imports of grain since it is reported out as flour. Other provinces are similarly affected but to a less degree.

The above method of reporting grain was used in 1927, 1928 and 1929 but not by all railways in previous years.

These data cover only railway revenue freight and the differences between column 1, freight loaded, and column 6, freight unloaded, are the net imports and exports by rail into and out of the respective provinces. If the loadings exceed the unloadings the data show a net export and if the unloadings exceed the loadings the excess is an import irrespective of how often the same freight is loaded or unloaded. Except for freight handled by water, these data give a very complete picture of the movement of freight in Canada, and, in the prairie provinces where practically all freight is handled by rail, the net imports and exports cover all imports and exports into and out of these provinces.

As mentioned above, a commodity may be imported and exported in another form such as wheat and flour, pulpwood and paper, etc., so that the net imports might be exported as other commodities.

Railways crossing the United States border consider their lines in the United States as foreign connections and show freight coming into Canada as received from foreign connections and freight crossing into the United States as freight delivered to foreign connections. Freight delivered to foreign connections includes exports from Canada and also in-transit freight which has been received from foreign connections, rail and water, destined to foreign points and which is shown in column 3. This in-transit traffic is heaviest between Detroit and St. Claire river gateways and the Niagara river gateways. There is also a considerable traffic from the western states through to Quebec ports and a lesser amount from the Pacific Coast.

These tables show comparisons of 1929 data with 1927 and 1928. These comparisons are valuable, not only from the railway viewpoint, indicating the growth of traffic, but they also indicate industrial activities in many cases much earlier than it is possible to secure the data from the censuses of the industries.

The total freight loaded and received from connections was less than for 1928 by 4,626,980 tons, or 3·9 per cent. Wheat alone decreased by 8,776,595 tons, or 45 per cent, due to a light crop in the Prairie Provinces and also to a smaller percentage of the crop being shipped during August-December than in 1928. The estimated crops for Manitoba, Saskatchewan and Alberta were as follows:—

	1928	1929
	Bushels	Bushels
Wheat.....	544,598,000	276,664,000
Oats.....	297,676,000	141,620,000
Barley.....	112,684,000	79,787,000
Rye.....	13,158,000	11,982,000
Flaxseed.....	3,519,400	1,970,000
Total.....	971,635,400	512,023,000

The 1929 wheat crop was only slightly over half of the 1928 crop and after making deductions for seed, feed, loss, etc., the quantity available for shipment would be less than half of the 1928 supply. The large carry-over from 1928 assisted somewhat during the first half of the year, but large decreases were recorded in grain loading in the west during January and February and when the new crop began to move in September, the effect of the light crop was very pronounced, the total loadings for October being only about a third of those for October, 1928, and for November they dropped to less than a fifth. For the four months, September-December, the total tons of wheat loaded at Canadian stations in 1929 amounted to only 4,168,124 tons as against 11,647,153 tons in 1928. Oats showed a decrease of 378,914 tons, barley a decrease of 557,670 tons, rye of 219,923 tons and flax of 71,597 tons, the last three being only about half as heavy as in 1928.

The tonnage of horses increased from 101,738 tons in 1928 to 118,530 tons, but cattle and calves decreased by 58,574 tons and hogs decreased by 41,512 tons. Dressed meats, fresh, showed an increase of 7,822 tons, or 1·7 per cent. The bulk of this tonnage is in-transit traffic across Ontario. Dressed meats, cured or salted, showed lighter loadings at Canadian stations of 9,649 tons, or 15·6 per cent. Butter and cheese showed decreases in loadings and in-transit tonnage, but foreign imports increased by 8,476 tons.

Anthracite coal tonnage was heavier by 351,164 tons, or 7·3 per cent, bituminous coal increased by 1,413,900 tons, or 10·7 per cent, coke increased by 233,110 tons, and lignite coal was lighter by 56,215 tons. Iron ore, other ores and concentrates and base bullion and matte all showed large increases as a result of increased activity in Canadian mines. Clay, gravel, sand and stone (crushed) was heavier by 1,235,373 tons, or 16 per cent. This tonnage is largely sand, gravel and stone for building purposes, particularly for highway construction. Crude petroleum, mostly imported, increased by 134,646 tons, or 16·7 per cent, and asphaltum was heavier by 110,265 tons. This also is used extensively for highway construction. Salt showed decreases in both loadings and imports, total tonnage being lighter than in 1928 by 19,238 tons.

Logs, posts, poles and cordwood increased by 99,582 tons, or only 25 per cent, but pulpwood showed a decrease of 1,095,302 tons, the deliveries to foreign connections being lighter by 673,617 tons. Wood pulp also showed a decrease of 55,804 tons, but paper, printed matter and books, which consists largely of paper, increased by 350,821 tons. These fluctuations were largely due to a reduction in exports of pulpwood and wood pulp, more pulpwood being manufactured into paper in Canadian mills, and an increase in the export of paper.

Refined petroleum and its products, which include gasoline, increased over the 1928 record by 451,588 tons. Bar and sheet iron, structural iron and iron pipe was heavier by 449,282 tons, foreign imports increasing by 200,479 tons. Cement increased by 224,541 tons, or 15 per cent, in-transit freight being heavier by 51,722 tons, imports by 4,558 tons, and loadings by 168,261 tons. Increased construction of buildings, highways and dams, docks, etc. accounted for the increased tonnage unloaded of 140,949 tons. Brick and artificial stone showed decreases in loadings and in-transit tonnages but an increase of 63,893 tons, or 37 per cent in imports. Agricultural implements were lighter by 65,665 tons. Imports decreased by 37,833 tons and deliveries to foreign connections increased by 37,403 tons, whereas tonnage unloaded at Canadian stations decreased by 92,482 tons. Automobiles and auto tracks tonnage increased by 182,418 tons. About 75 per cent of this tonnage is in-transit freight mostly between Detroit and St. Clair river ports and Niagara gateways. Loadings at Canadian stations increased by 54,031 tons and imports decreased by 6,500 tons. Household goods, largely made up of settlers' effects, decreased by 12,080 tons and liquor beverages decreased by 11,053 tons. Tonnage of fertilizer delivered to foreign connections was heavier by 12,550 tons, but the quantity unloaded at Canadian stations decreased by 18,834 tons. Fish tonnage amounted to 109,189 tons; this does not include the fish carried by express, but only the tonnage shipped by freight. The total of manufactures and miscellaneous freight amounted to 32,069,170 tons, as against 29,783,281 tons in 1928. Of this increase of 2,285,889 tons, in-transit freight accounted for 645,903 tons, imports for 657,828 tons and loadings at Canadian stations for 982,158 tons. The only outstanding decrease in tonnage, besides grain, was pulpwood, although live stock, lumber, agricultural implements, wood pulp and merchandise all showed substantial decreases. The decrease in merchandise was entirely in Ontario, Manitoba, Saskatchewan and Alberta and was undoubtedly the result of the small grain crop reducing the purchasing power of the Prairie Provinces, the decreases being almost entirely in August to December. Manufactures as a whole showed a substantial increased tonnage in loadings, imports and in in-transit freight.

Prince Edward Island.—Potatoes constituted a larger percentage (59 p.c.) of the total freight loaded than in 1928 or 1927, amounting to 156,687 tons, which was 17,670 tons over the 1928 tonnage. The net export by rail, amounting to 108,390 tons, was less than in 1928 by 21,706 tons, the tonnage unloaded at Prince Edward Island stations amounting to 48,297 tons as against only 8,921 tons in 1928. Imports of bituminous coal increased from 60,623 tons in 1928 to 65,855 tons and the imports of clay, gravel, sand and stone (crushed) increased from 20,363 tons to 20,738 tons. Tonnages of fertilizer, loaded, unloaded and imported, all showed decreases. Merchandise tonnage loaded was slightly lighter but unloadings increased by 1,627 tons.

Nova Scotia.—The railway tonnage originating in Nova Scotia is predominantly bituminous coal which constituted 80 per cent of the total tonnage in 1927, 75 per cent in 1928 and 73 per cent in 1929. Although the percentage decreased, the tonnage increased, amounting to 6,009,267 tons, or 435,086 tons more than in 1928. Apples increased by 16,162 tons and the net exports were heavier by 15,808 tons. Dressed meats, fresh, showed an increase in tonnage unloaded of 850 tons but cured and salted meats showed a decrease of 101 tons. Butter and cheese showed an increase in tonnage imported through Nova Scotia ports of 8,837 tons. Of the total of 12,895 tons loaded and received from connections, only 910 tons were unloaded at Nova Scotia stations, the remainder being forwarded to other provinces. Tonnage of coke loaded and also unloaded was less than in 1928 but the net exports out of the province increased by 7,949 tons. Other ores and concentrates loaded at Nova Scotia stations increased from nothing in 1927 and 56 tons in 1928 to 18,048 tons in 1929. Clay, gravel, sand, stone (crushed) increased by 227,864 tons. Pulpwood loaded showed an increase of 43,270 tons, but logs, posts, etc., lumber, timber, etc. and other forest products showed decreases of 40,591 tons, 21,629 tons and 11,837 tons, respectively. Refined petroleum and its products increased by 34,187 tons, or 37 per cent. Sugar showed a decrease of 5,148 tons loaded and 8,451 tons imported through Nova Scotia ports. Iron, pig and bloom, showed decreased loadings of 22,687 tons and rails a decrease of 12,445 tons. Bar and sheet iron, structural iron and iron pipe, showed an increase in loadings of 22,407 tons and in receipts from foreign connections of 10,380 tons. The net imports of cement amounted to 57,528 tons which was an increase of 27,671 tons. Brick and artificial stone originated increased by 23,590 tons, but lime and plaster decreased by 8,979 tons. Tonnage of automobiles unloaded amounted to 14,522 tons.

and deliveries to foreign connections to 15,389 tons, which were increases of 2,162 tons and 2,393 tons, respectively. Fertilizers loaded amounted to 42,721 tons and net exports amounted to 18,074 tons. Fish, fresh, frozen, or cured, showed a small decrease in loadings but an increase in the net exports out of the province of 927 tons. Total freight loaded was heavier by 837,653 tons, coal accounting for over 50 per cent of this and freight unloaded increased by 945,824 tons. Also, both receipts from and deliveries to foreign connections were heavier than in 1928 and 1927.

New Brunswick.—Over 40 per cent of the freight originating in New Brunswick was forest products, 13 per cent was mine products, less than one per cent animal products, 16 per cent agricultural products and 30 per cent was manufactures and miscellaneous freight. Potatoes were the heaviest item in agricultural products; the tonnage loaded amounted to 184,127, or an increase of 13,534 tons and the tonnage delivered to foreign connections amounted to 274,422 tons. Bituminous coal loadings amounted to 124,583 tons, an increase of 7,143 tons and the net imports into the province amounted to 294,007 tons, which was 22,042 tons in excess of the 1928 imports. Clay, gravel, sand, stone (crushed) showed an increase in loadings of 112,063 tons and in unloadings of 107,348 tons. Forest products showed a decrease in loadings of 29,585 tons due almost entirely to light shipments of pulpwood which decreased by 52,483 tons. Deliveries of pulpwood to foreign connections also decreased by 38,998 tons. Deliveries to foreign connections of lumber, via New Brunswick points, also decreased by 76,581 tons, but the tonnage unloaded at New Brunswick stations increased by 35,788 tons. Tonnage of refined petroleum and its products unloaded increased by 14,636 tons, or 28 per cent. Also the tonnage of cement and of brick and artificial stone unloaded increased by 21,418 tons, or 66 per cent, and 17,647 tons, or 98 per cent, respectively. Tonnage of fertilizers unloaded decreased by 8,952 tons, or 16 per cent. Paper loaded increased by 8,516 tons, or 34 per cent and wood pulp loaded increased by 12,221 tons, or 14 per cent. Although the net exports by rail decreased by 2,864 tons, this, as explained above, does not mean that the New Brunswick paper mills exported less wood pulp; the mill at Edmundston exports large quantities by pipe line.

Quebec.—Only 7 per cent of the freight loaded and received from foreign connections at Quebec stations was agricultural products, but agricultural products constituted 14 per cent of the tonnage unloaded and 28 per cent of the tonnage delivered to foreign connections. This was due to the heavy movement of western grain to Montreal and Quebec. The tonnage of wheat unloaded was less than in 1928 by 325,082 tons, or 48 per cent and deliveries to foreign connections dropped off by 488,468 tons, or 47 per cent. Corn, oats, barley, rye and flour all showed large decreases in tonnage unloaded and delivered to foreign connections. Hay and straw loaded decreased by 53,894 tons and the net exports from the province were less by 65,812 tons, or 62 per cent. There were 60,552 tons of potatoes loaded and 119,532 tons unloaded, indicating a net import of 58,930 tons, 20,665 tons less than in 1928. Butter and cheese delivered to foreign connections amounted to 38,132 tons, which was 1,007 tons over 1928 deliveries. Imports, by rail, of anthracite coal into the province decreased by 54,032 tons and bituminous coal imports decreased by 187,081 tons. Other ores and concentrates showed increased loading of 54,383 tons and an increase in net exports of 32,786 tons. Net exports of asphaltum increased from 55,209 tons in 1928 to 95,054 tons. Forest products showed decreases in tonnage loaded and also in tonnage delivered to foreign connections, the largest decrease being in pulpwood which was lighter in tonnage loaded by 283,918 tons, or 14 per cent, and in tonnage delivered to foreign connections by 161,128 tons, or 19 per cent. Refined petroleum and its products loaded was heavier by 96,450 tons and bar and sheet iron, structural iron and iron pipe loaded was heavier by 44,536 tons, or 32 per cent. There was a decrease of 77,035 tons, or 22 per cent in the tonnage of brick and artificial stone loaded. The exports of paper out of the province amounted to 1,128,203 tons which was an increase of 33,461 tons, or 3 per cent, but the exports of wood pulp decreased by 105,745 tons.

Ontario.—Total freight loaded at Ontario ports showed an increase of 313,872 tons and receipts from foreign connections for Canadian points increased by 1,520,962 tons, but in-transit freight received at Ontario points decreased by 47,804 tons. Freight unloaded was lighter by 897,420 tons and freight delivered to foreign connections decreased by 3,046,843 tons. The large decrease in this last item was due to the light deliveries of grain at the head of the lakes for Buffalo, wheat deliveries to foreign connections decreasing by 2,651,883 tons, or over 88

million bushels. The in-transit freight received at Ontario ports amounted to 13,828,247 tons, which was 81 per cent of the total in-transit freight passing through Canada by rail. The principal commodities of in-transit freight received at Ontario ports were automobiles, 1,951,123 tons; bituminous coal, 1,610,042 tons; and miscellaneous manufactures, 2,507,761 tons. Grain, flour, packing house products, lumber, machinery, bar and sheet iron also moved in substantial quantities across Canada. Although 47 per cent of the freight handled by Canadian railways was loaded at Ontario stations or received from foreign connections at Ontario ports, only 21 per cent was loaded at Ontario stations and about a sixth of this was western grain reloaded out of Fort William and Port Arthur and Georgian Bay ports. The small western crop affected the loadings in Ontario which for wheat were less than in 1928 by 1,077,161 tons, or 41 per cent. The tonnage of logs loaded decreased by 32,434 tons, or 22 per cent, and the unloadings were less by 30,311 tons. Anthracite coal unloaded decreased by 131,591 tons, but bituminous coal unloaded increased by 463,094 tons. Ores and concentrates, other than iron, showed an increase in loadings of 822,119 tons, or 47 per cent, and the tonnage unloaded exceeded the tonnage loaded by 14,168 tons. Clay, gravel, sand, stone (crushed) constituted 9 per cent of the total freight originated in Ontario and increased in tonnage during the year by 632,776 tons. Pulpwood tonnage decreased by 561,515 tons, and the exports out of the province decreased by 175,126 tons. Refined petroleum unloaded increased by 72,826 tons, or 6.8 per cent. The net export of agricultural implements was heavier than in 1928 by 12,692 tons and of automobiles by 9,060 tons. There was an increase of 133,191 tons of paper loaded and an increase of 255,338 tons delivered to foreign connections.

Manitoba.—During 1929 there was only half the 1928 tonnage of wheat loaded at Manitoba stations and oats, barley, rye and flax showed decreases of 40 per cent, 35 per cent, 26 per cent, and 40 per cent, respectively. The greater part of this slump was during October, November and December. During these months only 185,919 tons of wheat were loaded in 1929 as against 850,434 tons in 1928. The tonnage of cattle and calves loaded was less than in 1928 by 10,551 tons and hogs also showed a decrease of 6,669 tons, but horses and sheep showed increases. Imports of foreign bituminous coal decreased by 24,475 tons, but the tonnage of lignite coal loaded increased by 23,682 tons and the tonnage unloaded was larger by 93,446 tons. Clay, gravel, sand, stone (crushed) loaded amounted to 948,898 tons which was almost equal to the wheat tonnage and was heavier than in 1928 by 80,862 tons. Slate and dimension or block stone also increased by 24,281 tons. Pulpwood loaded was lighter by 113,479 tons and exports out of the province were less by 78,190 tons, indicating that a larger percentage was converted into paper in Manitoba. The net imports of petroleum and its products increased by 27,699 tons. Also the tonnage of automobiles loaded and unloaded increased by 5,870 tons and 5,037 tons, respectively. The loadings, unloadings and net exports of cement all showed substantial increases. Agricultural implements loaded decreased by 14,878 tons, the foreign imports decreased by 16,962 tons and the tonnage unloaded was less by 15,544 tons. Paper loaded increased by 10,569 tons and exports out of the province were heavier by 11,118 tons. Merchandise tonnage, both loaded and unloaded, was lighter than in 1928.

Saskatchewan.—Total freight loaded and received from foreign connections at Saskatchewan stations amounted to 7,048,100 tons as against 11,489,728 tons in 1928. This decrease of 4,441,628 tons, or 38.7 per cent was almost entirely in grain; agricultural products constituted 82 per cent of the total tonnage in 1928 and 70 per cent in 1929, wheat alone being 71 per cent and 55 per cent, respectively, in 1928 and 1929, and the decrease in wheat loaded was 4,278,879 tons, or 142,629,300 bushels. For the six months, March-August, the loading was heavier than in 1928 but for January and February the loading was only 39 per cent of the 1928 tonnage and when the new crop began to move in September large decreases were recorded, the tonnage loaded in November being only 350,376 tons as against 1,800,119 tons in November, 1928, and other grains showed somewhat similar fluctuations, all of them showing large decreases in the autumn months. Flour, however, showed increases in loadings and exports of 45,750 tons and 39,153 tons, respectively. Horses, sheep and hogs showed heavier loadings, but cattle and calves decreased by 9,013 tons. Lignite coal loaded was heavier by 34,520 tons and the tonnage unloaded increased by 195,717 tons. Also the imports into the province increased by 161,197 tons, whereas the imports of bituminous coal decreased by 200,542 tons. There is always the chance of local agents billing these coals incorrectly and although care is taken

to detect errors, it would probably be safer to consider the combined tonnage as soft coal loaded or unloaded. The foreign imports of crude petroleum, via Saskatchewan ports, were heavier than in 1928 by 82,593 tons and unloadings increased by 33,812 tons. Also the unloadings of asphaltum increased by 27,913 tons. Refined petroleum and its products loaded increased by 14,088 tons and unloaded by 10,631 tons and automobiles unloaded were heavier by 13,631 tons. Agricultural implements loaded decreased by 16,382 tons and the net imports into the province decreased by 19,344 tons.

Alberta.—The decrease in the tonnage of wheat loaded was only 40 per cent as against 52 per cent in Saskatchewan and 49 per cent in Manitoba. The decrease in the wheat crop was smaller than in Saskatchewan, the 1929 crop being 53 per cent of the 1928 crop, as against only 48 per cent in Saskatchewan. The decrease in tons was 2,486,553 and oats, barley, rye, flax and corn also showed large decreases. Flour, however, showed a relatively small decrease, the tonnage loaded being 223,559 tons as against 231,271 tons in 1928. Tonnage of horses loaded increased by 4,499 tons, sheep increased by 1,022 tons and hogs by 3,844 tons, but cattle and calves decreased by 10,900 tons. Both bituminous and lignite coal showed decreases in tonnage loaded and the net export of both was lighter by 110,864 tons. Clay, gravel, sand, stone (crushed) loaded showed an increase of 206,143 tons and crude petroleum and asphaltum loaded increased by 8,715 tons and 5,176 tons, respectively. Logs, poles, etc., loaded increased by 10,434 tons but lumber, etc. loaded decreased by 22,254 tons and the imports decreased by 59,890 tons. The imports of refined petroleum and its products increased by 29,630 tons and of bar and sheet iron, structural iron and iron pipe by 41,366 tons. The exports of cement decreased by 28,448 tons but brick exports increased by 2,617 tons. Agricultural implements loaded decreased by 5,634 tons; unloadings decreased by 33,197 tons and the imports were smaller by 27,563 tons. The imports of automobiles also decreased by 6,585 tons.

British Columbia.—There was a decrease in the tonnage delivered to foreign connections of 849,651 tons due almost entirely to lighter exports of wheat through British Columbia ports, the decrease in this commodity being 989,003 tons; but the total tonnage originated was heavier by 26,572 tons and unloadings increased by 46,009 tons. As explained above, grain unloaded into the elevators for export is shown as delivered to foreign connections although it might not be shipped out by vessel during the same year. Deliveries to foreign connections of corn, barley and flour were heavier than in 1928. Loadings of apples decreased by 9,942 tons and other fruit, fresh, decreased by 8,017 tons. The exports of these decreased by 10,758 tons and 7,865 tons, respectively. The foreign imports of butter and cheese amounted to only 285 tons; the greater part of New Zealand butter was imported via Nova Scotia ports. Bituminous coal loaded decreased by 148,478 tons, or 12.4 per cent. Ores and concentrates, other than iron, amounted to 1,639,595 tons which was over the 1928 loadings by 86,860 tons. Practically all this was smelted in the province as the unloadings amounted to 1,613,857 tons. British Columbia and Saskatchewan were the only provinces that did not show substantial increase in the loading of clay, gravel, sand and stone (crushed), the decrease in British Columbia being 8,972 tons, or 12 per cent. Logs, etc. loaded amounted to 2,024,515 tons, an increase of 83,460 tons, and the net export increased by 69,870 tons. Lumber loaded decreased by 22,058 tons and the exports were lighter by 32,871 tons. Cement showed an import of 21,049 tons which was 16,310 less than in 1928. Automobiles imported decreased by 3,509 tons and exports of paper decreased by 3,182 tons. Considerable quantities of British Columbia paper are exported direct from the mills to vessels and do not enter into these railway figures at all. This is also true of fish, lumber, copper matte and many other commodities. Fish shipped as railway freight amounted to 14,562 tons loaded and 2,076 tons were received from foreign connections. This does not include shipments by express. Canned goods which includes fish, fruit, vegetables, etc., but not meat, amounted to 43,061 tons loaded and 31,250 tons exported out of the province.

REVENUE FREIGHT CARRIED BY CANADIAN RAILWAYS, 1929
 MOUVEMENT DES MARCHANDISES PAR CHEMINS DE FER CANADIENS, 1929

RÉSUMÉ

DES

RAPPORTS MENSUELS SUR TRANSPORTS COMMERCIAUX

POUR

L'ANNÉE TERMINÉE LE 31 DÉCEMBRE 1929

Les données des tableaux qui suivent couvrent seulement les transports commerciaux des chemins de fer canadiens et non pas les transports en service, c'est-à-dire le charbon pour les locomotives, les traverses, le ballast et autres matériaux de chemins de fer. Par conséquent, ces données ne peuvent coïncider avec celles des importations tandis qu'elles sont en concordance avec celles des exportations. Les chargements échangés entre les chemins de fer canadiens ne sont pas comptés doublement dans ces tableaux, mais les marchandises déchargées et plus tard réexpédiées sont comptées pour chaque fois qu'elles ont été expédiées. Les connections étrangères comprennent les chemins de fer des Etats-Unis et les bateaux en partance pour des, ou arrivant de, port étrangers, et dans le présent rapport toutes les marchandises transportées à des ports de sortie aux taux d'exportation sont inscrites comme livrées à des connections étrangères. Bien que le rapport des chemins de fer montre que tout le grain livré aux élévateurs à la tête des lacs comme déchargé à des stations au Canada et tout le grain pris aux élévateurs des lacs comme chargé à des points canadiens de départ, des corrections ont été faites à l'aide des rapports mêmes des élévateurs montrant que les arrivages et les départs étaient de ou pour des connections étrangères. Le grain livré aux élévateurs de Montréal, Vancouver et autres ports océaniques pour exportation, est classé comme livré à des connections étrangères et des ajustements ont été faits pour en exciper le grain pris à ces élévateurs pour la consommation domestique. Les marchandises transportées aux ports à des taux locaux sont classées comme déchargées aux stations locales, bien qu'elles puissent être ensuite exportées par eau. Le grain déchargé aux élévateurs à la tête des lacs et plus tard expédié à Montréal par eau est classé comme déchargé à des stations en Ontario et ne figure plus dans les rapports des chemins de fer; il affecte en conséquence le chiffre net des importations de la province. De même, le grain de l'ouest moulu dans l'Ontario augmente les chiffres d'importations de grain parce qu'il est exporté comme farine. Les autres provinces sont affectées de la même manière au même sujet mais sur une moindre échelle.

La méthode ci-dessus décrite de faire les rapports sur le grain a été suivie en 1927, 1928 et 1929 par tous les chemins de fer, mais les années précédentes il y avait des exceptions.

Ces données couvrent seulement les transports commerciaux et les différences entre la colonne 1, marchandises chargées, et la colonne 6, marchandises déchargées, sont les chiffres nets des importations et exportations par chemin de fer pour chaque province respectivement. Si les chargements dépassent les déchargements c'est une indication d'un surplus net d'exportations et si les déchargements dépassent les chargements c'est qu'il y a un surplus d'importations, quelque soit le nombre de fois que les mêmes marchandises aient été chargées ou déchargées. En dehors des marchandises transportées par eau, ces données donnent un aperçu complet du mouvement des marchandises au Canada et, dans les Provinces des Prairies où tous les transports se font par chemin de fer, le chiffre net des importations et exportations par chemin de fer est synonyme des importations et exportations totales de la province.

Tel que noté plus haut, une marchandise peut être importée sous une forme et exportée sous une autre comme le blé et la farine, le bois de pulpe et le papier, etc., de sorte que les importations nettes peuvent ensuite exportées sous une autre forme.

Les chemins de fer traversant la frontière des Etats-Unis considèrent leurs ramifications dans les Etats-Unis comme des connections étrangères et classent les marchandises entrant au Canada par leurs propres ports comme reçues à des connections étrangères, et les marchandises traversant la frontière du Canada aux Etats-Unis comme des marchandises livrées à des connections étrangères. Les marchandises livrées à des connections étrangères comprennent les exportations du Canada et aussi tous les transports en transit qui ont été reçus de connections étrangères, par chemins de fer ou par eau, destinés à l'étranger et qui apparaissent dans la colonne 3. Ce trafic transitaire est particulièrement lourd de Détroit et la rivière Ste-Claire à la rivière Niagara. Il y a aussi un trafic considérable des Etats de l'ouest jusqu'aux ports de la province de Québec et un autre trafic du même genre mais moins considérable vers les ports du Pacifique.

Ces tableaux présentent les comparaisons entre les données de 1929 et celles de 1927 et 1928. Ces comparaisons servent non seulement à indiquer l'accroissement du trafic au point de vue des chemins de fer, mais aussi de l'accélération des activités industrielles et ils illustrent les tendances du commerce beaucoup plus tôt qu'on ne le peut en faire le relevé par le recensement des industries.

Le volume global des marchandises chargées à des, ou reçues de, points canadiens, est inférieur à 1928 par 4,626,980 tonnes ou 3·9 pour cent. Le seul blé a diminué de 8,776,595 tonnes ou 45 pour cent, en raison d'une récolte légère dans les Provinces des Prairies et aussi du fait qu'une plus faible proportion de la récolte a été expédiée au cours de la période août-décembre qu'en 1928. Les estimations des récoltes du Manitoba, de la Saskatchewan et de l'Alberta sont comme suit:

	1928	1929
	Boisseaux	Boisseaux
Blé.....	544,598,000	276,664,000
Avoine.....	297,676,000	141,620,000
Orge.....	112,684,000	79,787,000
Seigle.....	13,158,000	11,982,000
Graine de lin.....	3,519,400	1,970,000
	971,635,400	512,023,000

La récolte de 1929 n'est qu'un peu plus de la moitié de celle de 1928 et après déductions faites pour graine de semence, grain fourrager, pertes, etc., la quantité disponible pour l'expédition sera moins de la moitié de celle de 1928. Le fort report de la récolte de 1928 a été de quelque secours au cours du premier semestre, mais de fortes diminutions dans les chargements de blés sont enregistrées dans l'ouest en janvier et février et lorsque la nouvelle récolte a commencé à être transportée en septembre, l'effet de la faible récolte était très prononcé, tous les chargements d'octobre étant seulement environ un tiers de ceux d'octobre 1928, et ceux de novembre reculant à moins d'un cinquième. Pour les quatre mois septembre-décembre, tout le blé chargé aux stations canadiennes en 1929 se chiffre à 4,168,124 tonnes contre 11,647,153 tonnes en 1928. L'avoine donne une diminution de 378,914 tonnes, l'orge de 557,670 tonnes, le seigle de 219,923 tonnes et le lin de 71,597 tonnes, les trois derniers item ne donnant un chiffre égal qu'à la moitié de celui de 1928.

Le tonnage de chevaux a augmenté de 101,738 tonnes en 1928 à 118,530 tonnes, mais le bétail et les veaux ont diminué de 58,574 tonnes et les porcs de 41,512 tonnes. Les viandes fraîches montrent un accroissement de 7,822 tonnes ou 1·7 pour cent. La plus forte partie de

ce tonnage est en transit en Ontario. Les chargements aux stations canadiennes de viandes apprêtées ou salées montrent un déclin de 9,649 tonnes, soit 15·6 pour cent. Le beurre et le fromage donnent des diminutions dans les chargements et dans le tonnage en transit, mais les importations étrangères ont augmenté de 8,476 tonnes.

Les transports d'anthracite ont augmenté de 351,164 tonnes, soit 7·3 pour cent; ceux de charbon bitumineux de 1,413,900 tonnes ou 10·7 pour cent; ceux de coke de 233,110 tonnes; tandis que le lignite montre un déclin de 56,215 tonnes. Le minerai de fer, autres minerais et concentrés, métaux communs et loupes ou saumons donnent tous de fortes augmentations par suite d'une plus grande activité dans les mines canadiennes. L'argile, le gravier, le sable et la pierre concassée donnent une augmentation de 1,235,373 tonnes ou 16 pour cent. Ce tonnage est en majeure partie du sable, du gravier et de la pierre pour fins de construction, particulièrement pour construction de grandes routes. Le pétrole brut, presque tout importé, a augmenté de 134,646 tonnes ou 16·7 pour cent, et l'asphalte de 110,265 tonnes. Ce dernier est employé sur une grande échelle dans la voirie. Les chargements et les importations de sel ont été plus légers de 19,238 tonnes qu'en 1928.

Les billots, les poteaux, les piquets et le bois de chauffage ont augmenté de 99,582 tonnes, soit seulement 25 pour cent, mais le bois à pulpe donne un déclin de 1,095,302 tonnes, les expéditions aux connections étrangères étant plus légères de 673,617 tonnes. La pulpe de bois montre un déclin de 55,804 tonnes, mais le papier, livres et imprimés, qui consistent surtout de papier, donnent une augmentation de 350,821 tonnes. Ces fluctuations proviennent surtout de la réduction dans les exportations de bois à pulpe et pulpe de bois, une plus grande quantité de bois à pulpe étant transformée en papier dans les papeteries canadiennes, et d'une augmentation dans l'exportation de papier.

Le pétrole raffiné et ses dérivés, comprenant la gazoline, ont augmenté de 451,588 tonnes sur 1928. Le fer en barre et en tôle, à charpente et les tuyaux de fer donnent une avance de 449,282 tonnes, les importations augmentant de 200,479 tonnes. Le ciment a augmenté de 224,541 tonnes, ou 15 pour cent, les marchandises en transit s'étant accrues de 51,722 tonnes, les importations de 4,558 tonnes, et les chargements de 188,261 tonnes. Une augmentation dans la construction d'édifices, de grandes routes, de barrages, de docks, etc., est responsable de l'accroissement de 140,949 tonnes dans le tonnage déchargé. La brique et la pierre artificielle donnent des déclins dans les chargements et les tonnages en transit, mais montrent une augmentation de 63,893 tonnes ou 37 pour cent dans les importations. Les instruments agricoles sont plus légers de 65,665 tonnes. Les importations ont fléchi de 37,833 tonnes et les livraisons à des connections étrangères ont augmenté de 37,403 tonnes, tandis que le tonnage déchargé aux stations canadiennes a décrû de 92,482 tonnes. Le tonnage des automobiles et camions automobiles a augmenté de 182,418 tonnes. Environ 75 pour cent de ce tonnage consiste en transports transitoires la plupart entre Détroit et les ports de la rivière Ste-Claire et les débouchés du Niagara. Les chargements aux stations canadiennes ont augmenté de 54,031 tonnes et les importations ont diminué de 6,500 tonnes. Les articles de ménage, consistant en grande partie d'effets de colons, ont reculé de 12,080 tonnes et les liqueurs et boissons ont fléchi de 11,053 tonnes. Le tonnage des engrains livrés aux connections étrangères est plus lourd de 12,550 tonnes, mais la quantité déchargée aux stations canadiennes a diminué de 18,834 tonnes. Le tonnage de poisson se chiffre à 109,189 tonnes; ceci ne comprend pas le poisson expédié par messageries, mais seulement les transports par fret. Le total des articles manufacturés et divers se chiffre à 32,069,170 tonnes, contre 29,783,281 tonnes en 1928. De cette augmentation de 2,285,889 tonnes, les transports transitoires ont contribué 645,903 tonnes, les importations 657,828 tonnes et les chargements aux stations canadiennes 982,158 tonnes. La seule diminution extraordinaire dans le tonnage, en outre du grain, provient du bois à pulpe, quoique le bétail sur pied, le bois, les instruments agricoles, la pulpe de bois et les marchandises non énumérées donnent tous des diminutions substantielles. Le déclin dans les marchandises non énumérées s'est produit entièrement dans l'Ontario, le Manitoba, la Saskatchewan et l'Alberta et est indubitablement le résultat de la faible récolte de grain réduisant le pouvoir d'achat des Provinces des Prairies, les diminutions survenant presque entièrement d'août à décembre. Le total des articles manufacturés donne une augmentation substantielle dans le tonnage des chargements, des importations et des marchandises en transit.

Île du Prince-Edouard.—Les pommes de terre constituent une plus forte proportion (59 p.c.) des transports commerciaux qu'en 1928 ou 1927, se chiffrant à 156,687 tonnes, soit 17,670 tonnes de plus qu'en 1928. Le chiffre net des exportations par chemin de fer, se chiffrant à 108,390 tonnes, est inférieur à 1928 par 21,706 tonnes, le tonnage déchargé aux stations de l'Île du Prince-Edouard s'élevant à 48,297 tonnes contre seulement 8,921 en 1928. Les importations de houille bitumineuse ont augmenté de 60,623 tonnes en 1928 à 65,855 tonnes et les importations d'argile, gravier et pierre concassée ont monté de 20,363 tonnes à 20,738 tonnes. Les tonnages d'engrais, chargés, déchargés et importés donnent tous des déclins. Les chargements sont légèrement inférieurs mais les déchargements ont augmenté de 1,627 tonnes.

Nouvelle-Ecosse.—La majeure partie du tonnage des chemins de fer provenant de la Nouvelle-Ecosse consiste en charbon bitumineux qui forme 80 pour cent du tonnage total en 1927, 75 pour cent en 1928 et 73 pour cent en 1929. Quoique le pourcentage ait diminué, le tonnage a augmenté, s'élevant à 6,009,267 tonnes ou 435,086 tonnes de plus qu'en 1928. Les pommes ont augmenté de 16,162 tonnes et les exportations nettes de 15,808 tonnes. Les viandes fraîches donnent un accroissement de 850 tonnes dans les déchargements mais les viandes fumées et salées enregistrent un déclin de 101 tonnes. Le beurre et le fromage montrent une avance de 8,837 tonnes dans le tonnage importé aux ports de la Nouvelle-Ecosse. Du total de 12,895 tonnes chargées et reçues de connections étrangères, 910 tonnes seulement ont été déchargées à des stations de la Nouvelle-Ecosse, le restant étant expédié à d'autres provinces. Les chargements et déchargements de coke sont inférieurs à ceux de 1928 mais le chiffre net des exportations a augmenté de 7,449 tonnes. Les minerais et concentrés autres que le fer, chargés aux stations de la Nouvelle-Ecosse ont augmenté de néant en 1927 et de 56 tonnes en 1928 à 18,048 tonnes en 1929. L'argile, le gravier, le sable et la pierre concassée ont augmenté de 227,864 tonnes. Les chargements de bois de pulpe donnent une avance de 43,270 tonnes, mais les billots, poteaux, etc., le bois de sciage et de construction, etc., et les autres produits forestiers enregistrent des déclins de 40,591 tonnes, 21,629 tonnes et 11,837 tonnes respectivement. Le pétrole raffiné et ses dérivés ont avancé de 34,187 tonnes ou 37 pour cent. Le sucre donne une diminution de 5,148 tonnes dans les chargements et de 8,451 tonnes dans les importations aux ports de la Nouvelle-Ecosse. Le fer en gueuse ou en bille a diminué de 22,687 tonnes et les rails de 12,445 tonnes. Le fer en barre, en feuille, de construction et les tuyaux de fer donnent une augmentation de 22,407 tonnes dans les chargements et de 10,380 tonnes dans les arrivages de connections étrangères. Le chiffre net des importations de ciment s'élève à 57,528 tonnes, soit une avance de 27,671 tonnes. La brique et la pierre artificielle ont augmenté de 23,590 tonnes, mais la chaux et le plâtre ont diminué de 8,979 tonnes. Les déchargements d'automobiles se montrent à 14,522 tonnes et les livraisons à des connections étrangères à 15,389, des augmentations de 2,162 tonnes et 2,393 tonnes respectivement. Les chargements d'engrais se chiffrent à 42,721 tonnes et les exportations nettes à 18,074 tonnes. Le poisson, frais, congelé, ou fumé, donne une faible diminution dans les chargements mais une augmentation de 927 tonnes dans les exportations nettes. Les chargements sont plus lourds de 837,653 tonnes, le charbon étant responsable de plus de 50 pour cent de cette augmentation, et les déchargements ont augmenté de 945,824 tonnes. Aussi, les importations venant de, et les livraisons aux, connections étrangères sont plus élevées en 1928 qu'en 1927.

Nouveau-Brunswick.—Plus de 40 pour cent des marchandises expédiées du Nouveau-Brunswick consistent en produits forestiers, 13 pour cent en produits miniers, moins d'un pour cent en produits animaux, 16 pour cent en produits agricoles et 30 pour cent en articles manufacturés et produits divers. Les pommes de terre sont l'item le plus lourd des produits agricoles, les chargements s'élevant à 184,127 tonnes ou une augmentation de 13,534 tonnes et les livraisons à des connections étrangères se chiffrant à 274,422 tonnes. Les chargements de charbon bitumineux donnent 124,583 tonnes, une avance de 7,143 tonnes et les importations nettes se chiffrant à 294,007 tonnes, un excédent de 22,042 tonnes sur les importations de 1928. L'argile, le gravier, le sable et la pierre concassée donnent une avance de 112,063 dans les chargements et de 107,348 dans les déchargements. Les produits forestiers donnent une réduction dans les chargements de 29,585 tonnes, due presque entièrement à des expéditions légères de bois à pulpe qui ont reculé de 52,483 tonnes. Les livraisons de bois à pulpe à des connections étrangères ont aussi diminué de 38,998 tonnes. Les livraisons de bois de sciage à des connec-

tions étrangères via le Nouveau-Brunswick ont aussi diminué de 76,581 tonnes, mais les déchargements à des stations du Nouveau-Brunswick ont augmenté de 35,788 tonnes. Les déchargements de pétrole raffiné et ses dérivés se sont accrus de 14,636 tonnes ou 28 pour cent. Les déchargelements de ciment, de brique et pierre artificielle ont augmenté de 21,418 tonnes ou 66 pour cent, et de 17,647 tonnes ou 98 pour cent respectivement. Les déchargegments d'engrais ont baissé de 8,952 tonnes ou 16 pour cent. Les chargements de papier ont monté de 8,516 tonnes ou 34 pour cent et ceux de pulpe de bois ont avancé de 12,221 tonnes ou 14 pour cent. Quoique les exportations nettes par chemin de fer aient diminué de 2,864, ceci, comme il est expliqué plus haut, ne signifie pas que les papeteries du Nouveau-Brunswick aient exporté moins de pulpe de bois: la papeterie d'Edmundston en exporte de grandes quantités par pipe-line.

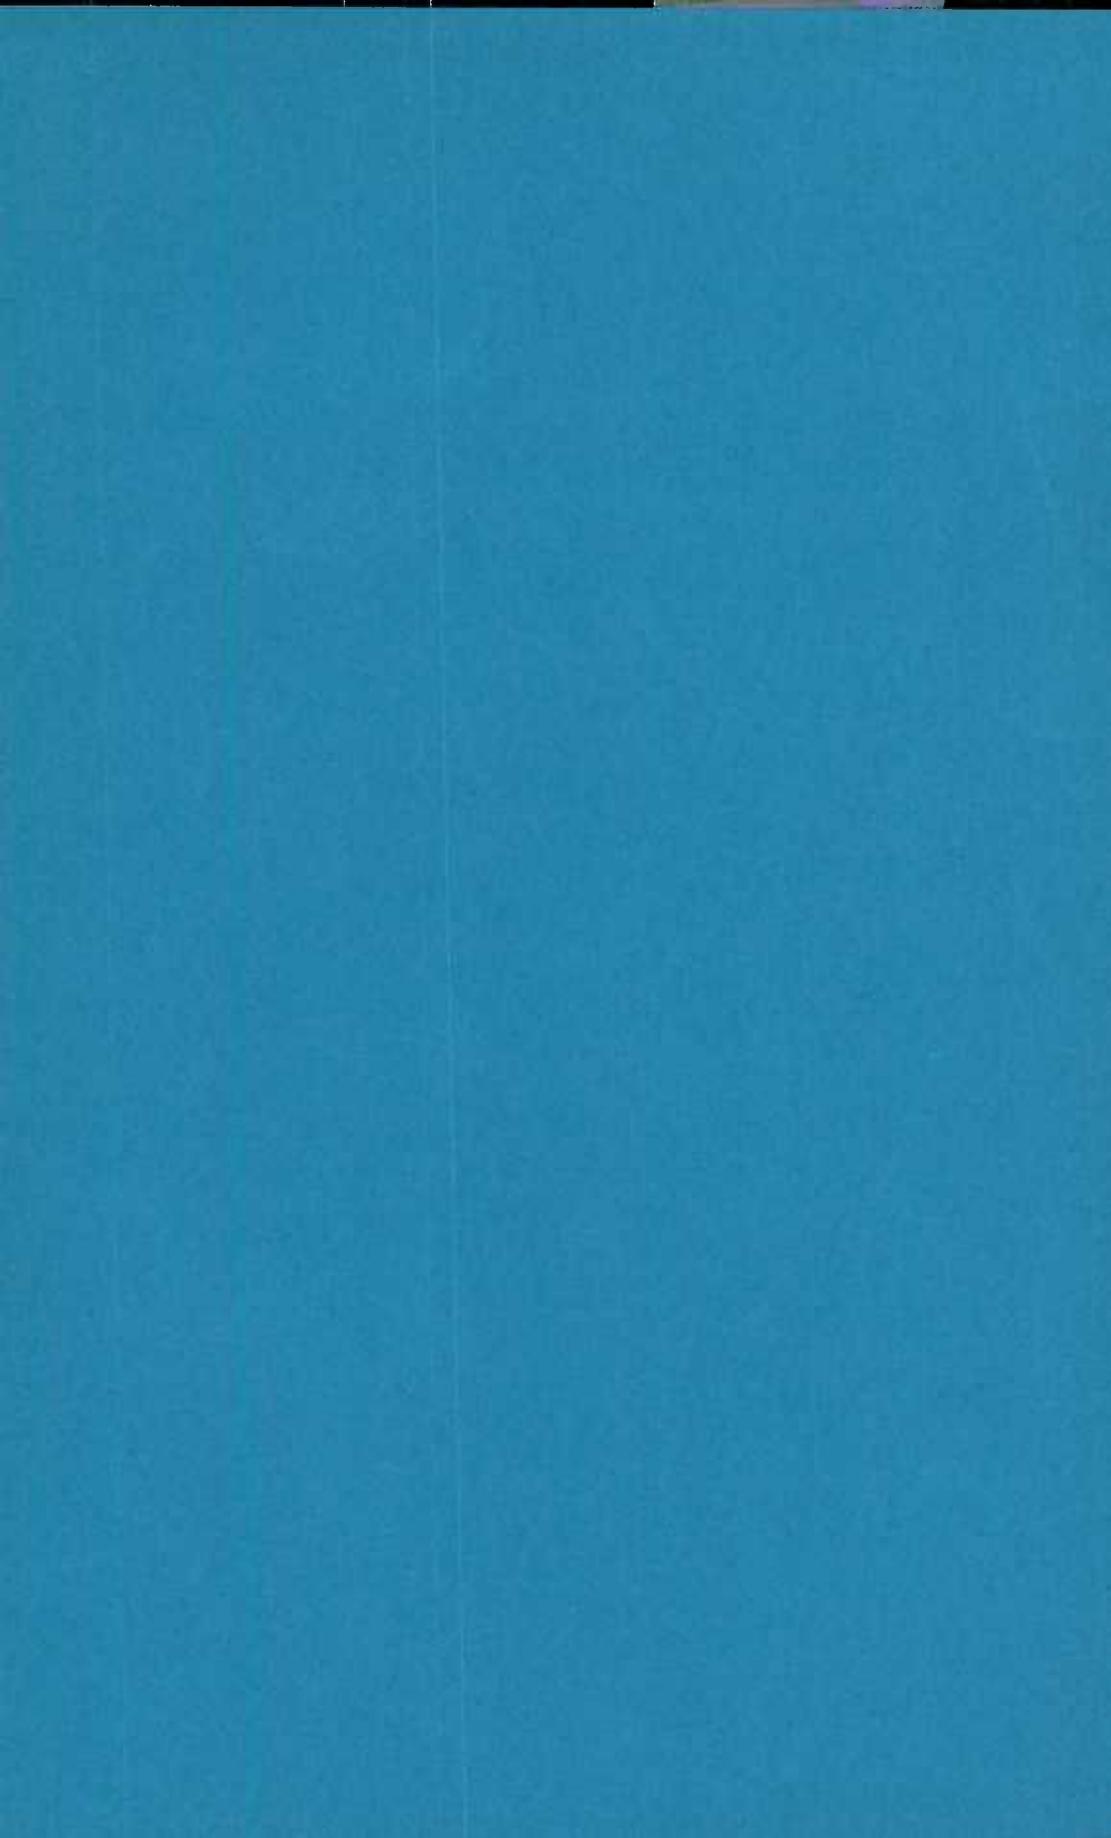

Québec.—Les produits agricoles forment seulement 7 pour cent des marchandises chargées et reçues de connections étrangères à des stations du Québec, mais ils constituent 14 pour cent des déchargegments et 28 pour cent des livraisons à des connections étrangères. Ceci est dû au fort mouvement de grain de l'ouest à Montréal et à Québec. Les déchargegments de blé sont inférieurs à 1928 de 325,082 tonnes, soit 48 pour cent, et les livraisons à des connections étrangères ont reculé de 488,468 tonnes ou 47 pour cent. Le maïs, l'avoine, l'orge, le seigle et la farine donnent tous de fortes diminutions dans les déchargegments et livraisons à des connexions étrangères. Les chargements de foin et de paille ont baissé de 53,894 tonnes et les exportations nettes de 65,812 tonnes ou 62 pour cent. Les chargements de pommes de terre sont de 60,552 tonnes et les déchargegments de 119,532 tonnes, donnant une importation nette de 58,930 tonnes, ou 20,665 tonnes de moins qu'en 1928. Les livraisons de beurre et fromage à des connections étrangères se chiffrent à 38,132 tonnes, soit 1,007 tonnes de plus qu'en 1928. Les importations d'anthracite par chemin de fer ont reculé de 54,032 tonnes et celles de charbon bitumineux de 187,081 tonnes. Les chargements d'autres minéraux et concentrés donnent une augmentation de 54,383 tonnes et une avance en exportations nettes de 32,786 tonnes. Les exportations nettes d'asphalte ont monté de 55,029 tonnes en 1928 à 95,054 tonnes. On enregistre des déclins dans les chargements de produits forestiers de même que dans les livraisons à des connections étrangères, la plus forte diminution étant dans le bois à pulpe qui donne des chargements plus légers de 283,918 tonnes ou 14 pour cent, et des livraisons à des connections étrangères moindres de 161,128 tonnes ou 19 pour cent. Les chargements de pétrole raffiné et ses dérivés donnent une augmentation de 96,450 tonnes et le fer en barre et en feuille, de construction et les tuyaux de fer une avance de 44,536 tonnes ou 32 pour cent. On enregistre un déclin de 77,035 tonnes ou 22 pour cent dans les chargements de brique et pierre artificielle. Les exportations de papier se chiffrent à 1,128,203 tonnes, une augmentation de 33,461 tonnes ou 3 pour cent, mais les exportations de pulpe de bois ont baissé de 105,745 tonnes.

Ontario.—Le total des chargements aux ports d'Ontario donne une augmentation de 313,872 tonnes et les marchandises reçues de connections étrangères pour des points canadiens ont augmenté de 1,520,962 tonnes, mais les marchandises en transit reçues à des points de l'Ontario ont diminué de 47,804 tonnes. Les déchargegments sont de 897,420 tonnes plus légers et les livraisons à des connections étrangères ont reculé de 3,046,843 tonnes. La forte diminution de ce dernier item est due aux livraisons légères à la tête des lacs, de grain pour Buffalo, les livraisons de blé à des connections étrangères déclinant de 2,651,883 tonnes ou plus de 88 millions de boisseaux. Les marchandises en transit reçues aux ports d'Ontario s'élèvent à 13,828,247 tonnes, soit 81 pour cent du total des transports en transit par chemin de fer, au Canada. Les principaux item de marchandises en transit reçues à des ports d'Ontario sont les automobiles, 1,951,123 tonnes; le charbon bitumineux, 1,160,042 tonnes; divers produits ouvrés, 2,507,761 tonnes. Le grain, la farine, les produits de salaisons, le bois de sciage, les machineries, le fer en barre et en feuille, ont aussi été transportés en quantités considérables à travers le Canada. Quoique 47 pour cent des transports par chemins de fer canadiens aient été chargés à des stations d'Ontario ou reçues de connections étrangères à des ports d'Ontario, seulement 21 pour cent ont été chargés à des stations d'Ontario et environ un sixième de ces chargements était du grain de l'ouest réexpédié de Fort William et l'ort Arthur et des ports de la Baie Georgienne. La récolte légère de l'ouest a affecté les chargements dans l'Ontario, les réduisant de 1,077,161 tonnes ou 41 pour cent sur 1928. Les chargements de billots ont reculé de 32,434 tonnes ou 22 pour cent, et les déchargegments de 30,311 tonnes. Les déchargegments d'anthracite ont diminué de 131,951 tonnes, mais le charbon bitumineux a augmenté de 463,094 tonnes.

Les chargements de minerais et concentrés autres que le fer donnent une avance de 822,119 tonnes ou 47 pour cent, et les déchargements ont excédé les chargements de 14,168 tonnes. L'argile, le gravier, le sable et la pierre concassée constituent 9 pour cent des transports provenant d'Ontario et ont augmenté de 632,776 tonnes au cours de l'année. Le tonnage de bois à pulpe a diminué de 561,515 tonnes, et les exportations de 175,126 tonnes. Les déchargements de pétrole raffiné ont augmenté de 72,826 tonnes ou 6.8 pour cent. L'exportation nette d'instruments aratoires donne une augmentation de 12,692 tonnes et les automobiles de 9,060 tonnes sur 1928. Les chargements de papier ont augmenté de 133,191 tonnes et les livraisons à des connections étrangères de 255,338 tonnes.

Manitoba.—Au cours de 1929 les chargements de blé aux stations de Manitoba ne sont que de la moitié de ceux de 1928 et l'avoine, l'orge, le seigle et le lin donnent des diminutions de 40,35, 26 et 40 pour cent respectivement. La plus forte partie de cette baisse est survenue en octobre, novembre et décembre. Au cours de ces mois seulement 185,919 tonnes de blé ont été chargés en 1929 contre 850,434 tonnes en 1928. Les chargements de bétail et de veaux sont de 10,551 tonnes inférieurs à 1928 et les porcs ont aussi décliné de 6,669 tonnes, mais les chevaux et les moutons donnent des augmentations. Les importations de charbon bitumineux ont baissé de 24,475 tonnes, mais les chargements de lignite ont augmenté de 23,682 tonnes et les déchargements de 93,446 tonnes. Les chargements d'argile, de gravier, de sable et de pierre concassée se chiffrent à 948,898 tonnes, ce qui est presque égal au tonnage de blé et plus lourd qu'en 1928 par 80,862 tonnes. La pierre en dalles ou en blocs a aussi augmenté de 24,881 tonnes. Les chargements de bois à pulpe sont plus légers par 113,479 tonnes et les exportations sont de 78,190 tonnes moins élevées, indiquant qu'une plus forte partie de ce bois a été transformée en papier au Manitoba. Les importations nettes de pétrole et ses dérivés se sont accrues de 27,699 tonnes. Les chargements et les déchargements d'automobiles donnent des augmentations de 5,870 et 5,037 tonnes respectivement. Les chargements, déchargements et exportations nettes de ciment présentent tous des augmentations substantielles. Les chargements d'instruments agricoles ont fléchi de 14,878 tonnes, les importations ont baissé de 16,962 tonnes et les déchargements de 15,544 tonnes. Les chargements de papier ont monté de 10,569 tonnes et les exportations de 11,118 tonnes. Les chargements et déchargements de marchandises non énumérées sont plus légers qu'en 1928.

Saskatchewan.—Le total de marchandises chargées et reçues de connections étrangères aux stations de Saskatchewan se chiffre à 7,048,100 tonnes contre 11,489,728 tonnes en 1928. Cette diminution de 4,441,628 tonnes ou 38.7 pour cent est due presque entièrement au grain; les produits agricoles constituent 82 pour cent du tonnage total en 1928 et 70 pour cent en 1929, le seul blé étant 71 pour cent et 55 pour cent respectivement en 1928 et 1929. La diminution dans les chargements de blé est de 4,278,879 tonnes ou 142,629,300 boisseaux. Pour les six mois mars-août les chargements sont plus lourds qu'en 1928 mais pour janvier et février il ne sont que 39 pour cent du tonnage de 1928 et lors des premiers transports de la nouvelle récolte en septembre on enregistre de fortes diminutions, les chargements de novembre ne donnant que 350,376 tonnes comparativement à 1,800,119 tonnes en novembre 1928. D'autres grains montrent des fluctuations quelque peu similaires, mais tous ont donné de fortes diminutions au cours des mois d'automne. Les chargements et les exportations de farine présentent toutefois des augmentations de 45,750 et 39,153 tonnes respectivement. Les chargements de chevaux, de moutons et de porcs sont plus lourds, mais les bêtes à cornes et les veaux ont décliné de 9,013 tonnes. Les chargements de lignite sont de 34,250 tonnes plus lourds et les déchargements ont monté de 195,717 tonnes. Les importations ont aussi augmenté de 161,197 tonnes, tandis que les importations de charbon bitumineux ont baissé de 200,542 tonnes. Le danger existe de voir les agents locaux enregistrer ces charbons incorrectement et quoiqu'on prenne beaucoup de soin pour éviter des erreurs, il est probablement plus sûr de considérer le tonnage combiné comme charbon mou chargé et déchargé. Les importations de pétrole brut, via les ports de la Saskatchewan, sont de 82,593 tonnes plus lourdes qu'en 1928 et les déchargements ont augmenté de 33,812 tonnes. Les déchargements d'asphalte ont aussi avancé de 27,913 tonnes. Les chargements de pétrole raffiné et ses dérivés ont augmenté de 14,088 tonnes et les déchargements de 10,631 tonnes. Les déchargements d'automobiles ont monté de 13,631 tonnes. Les chargements d'instruments agricoles ont fléchi de 16,382 tonnes et les importations nettes de 19,344 tonnes.
