SUMMARY

OF

MONTHLY RAILWAY TRAFFIC REPORTS

FOR

YEAR ENDED DECEMBER 31, 1931

The data in the following tables include only revenue freight carried by the Canadian railways and not the "On company service" freight which includes coal for locomotives, ties, ballast and other railway material. These data will consequently not check with data on imports although this freight will not affect the exports. Freight interchanged between Canadian roads is not duplicated in these tables, but freight unloaded and subsequently reshipped is counted each time it is billed out. Foreign connections include railways in the United States and boats cleared for, or entered from, foreign ports, and in this report all freight moved to ports on export rates has been shown as delivered to foreign connections. Although the railways report all grain delivered to the elevators at the head of the lakes as unloaded at stations in Canada and all grain received from the lake elevators as loaded at billing stations, the reports have been corrected from the elevator returns to show the deliveries to and receipts from foreign connections. Grain delivered to elevators at Montreal, Vancouver and other ocean ports for export has been shown as delivered to foreign connections and adjustments have been made for grain taken out of these elevators for local consumption. Freight carried to ports on local rates has been reported as unloaded at stations although it might subsequently be exported by water routes. Grain unloaded at the elevators at the head of the lakes and later forwarded to Montreal by boat is reported as unloaded at stations in Ontario and does not again enter into the railway records, and consequently affects the net imports into the province. Also western grain grown in Ontario will increase the imports of grain since it is reported out as flour. Other provinces are similarly affected but to a less degree.

These data cover only railway revenue freight and the differences between column 1, freight loaded, and column 6, freight unloaded, are the net imports and exports by rail into and out of the respective provinces. If the loadings exceed the unloadings the data show a net export and if the unloadings exceed the loadings the excess is an import irrespective of how often the same freight is loaded or unloaded. Except for freight handled by water, these data give a very complete picture of the movement of freight in Canada, and, in the prairie provinces where practically all freight is handled by rail, the net imports and exports cover all imports and exports into and out of these provinces.

A commodity may be imported and exported in another form such as wheat and flour, pulpwood and paper, etc., so that the net imports might be exported as other commodities.

Railways crossing the United States border consider their lines in the United States as foreign connections and show freight coming into Canada as received from foreign connections and freight crossing into the United States as freight delivered to foreign connections. Freight delivered to foreign connections includes exports from Canada and also in-transit freight which has been received from foreign connections, rail and water, destined to foreign points and which is shown in column 3. This in-transit traffic is heaviest between Detroit and St. Claire river gateways and the Niagara river gateways. There is also a considerable traffic from the western states through to Quebec ports and a lesser amount from the Pacific Coast.

Total freight loaded at Canadian stations during 1931 amounted to 51,735,251 tons, which was 14,236,493 tons less than for 1930 and 32,300,760 tons less than for 1928. Over 43 per cent of the decrease from 1930 tonnage loaded was in mine products, other ores and concentrates, which included copper ore, lead ores, etc., decreasing by 2,375,960 tons and clay, gravel, sand and stone (crushed), which is largely gravel and stone for roads and concrete work, decreasing by 2,273,156 tons. Receipts from foreign connections also showed large reductions, imports decreasing by 4,874,864 tons and in-transit freight by 2,884,626 tons. Imports of anthracite coal decreased by 856,181 tons, bituminous coal by 1,278,679 tons and coke by 407,704 tons. Imports of refined petroleum and its products, which is largely gasoline, decreased by 200,174 tons, iron, pig and bloom, decreased by 20,786, or from 32,942 to 12,156 tons. Imports of agricultural implements and vehicles other than autos decreased from 63,349 tons to 11,779 tons and automobiles decreased from 118,227 tons to 69,428 tons. Imports of fertilizers were more than cut in half and wood pulp imports decreased from 19,476 tons to 6,020 tons. The larger decreases in the in-transit freight included 516,446 tons of anthracite coal, 110,859 tons of lumber, 87,188 tons of sugar, 159,162 tons of bar and sheet iron, structural iron and iron pipe, 92,383 tons of castings, machinery and boilers and 381,270 tons of automobiles.

Prince Edward Island.—Potatoes constitute more than half of the tonnage (54.3 p.c.) originated on the island and fertilizer is the next heaviest commodity. There was a decrease in the potato tonnage of 37,203 tons, or 22 per cent, but the tonnage of fertilizer increased by 3,947 tons. Tonnage of bituminous coal unloaded decreased by 18,739 tons and clay, gravel, sand and stone unloaded was lighter by 57,433 tons. Total freight loaded amounted to 243,158 tons which was a decrease from 1930 tonnage of 50,234 tons, the tonnage unloaded decreased by 113,192 tons and the net imports by rail decreased by 62,958 tons.

Nova Scotia.—The total tonnage loaded at Nova Scotia stations amounted to 5,786,663 tons, which was less than in 1930 by 1,549,473 tons, and unloadings also decreased by 1,412,953 tons. Over 72 per cent of the freight originated was bituminous coal and these shipments decreased by 1,084,444 tons. The deliveries of wheat to foreign connections through Nova Scotia ports showed a slight increase from 590 tons in 1930 to 1,845 tons, but were still well below the deliveries of 41,890 tons in 1929. Deliveries of flour increased from 61,141 to 69,566 tons. The loadings of apples dropped from 126,900 tons in 1930 to 78,128 tons and the net exports by rail from the province dropped from 118,066 to 73,875 tons. The tonnage of clay, gravel, sand and stone, (crushed) loaded increased from 228,934 tons in 1930 to 291,872 tons and the unloadings also increased from 228,641 tons to 274,365 tons. Loading of salt also increased by 4,795 tons and the net exports increased by 5,960 tons. All forest products showed large decreases, the total loadings amounting to only 270,077 tons as against 477,488 tons in 1930. Loadings of sugar decreased by 7,000 tons; also loadings of iron, pig and bloom, rails and fastenings, bar and sheet iron, castings machinery and boilers all showed large decreases. Cement, lime and plaster, and sewer pipe showed heavier loadings and liquor and beverages almost doubled in tonnage. Fish (fresh, frozen, cured) decreased from 31,198 tons to 23,455 tons, loaded, and net exports dropped from 25,129 to 20,755 tons.

New Brunswick.—The heaviest commodity handled by the railways from New Brunswick stations was potatoes, 146,537 tons being loaded and 171,624 tons being received from foreign connections, making a total of 318,161 tons originated as against 407,119 tons in 1930. Pulp-wood, which had first place in 1930, decreased from 457,053 tons in 1930 to 214,156 tons and lumber dropped from 418,447 to 303,292 tons. All forest products showed large decreases, total loadings decreasing from 1,064,421 tons to 607,970 tons, and receipts from foreign connections decreasing from 32,182 to 14,345 tons. Imports of fresh fruits, other than apples, through New Brunswick ports amounted to 30,270 tons as against 31,564 tons in 1930. This was largely bananas forwarded from Saint John. Refined petroleum and its products loaded amounted to 46,802 tons, an increase of 9,980 tons over the 1930 tonnage. Sugar loadings decreased by 9,333 tons, fertilizers increased by 4,101 tons and paper by 17,693 tons, or from 83,430 to 101,123 tons.

Quebec.—Total freight loaded at Quebec stations amounted to 7,966,254 tons, which was a decrease of 1,896,631 tons from the 1930 loadings. Receipts from foreign connections also decreased, imports by 554,618 tons and in-transit freight by 367,116 tons. Unloadings were lighter than in 1930 by 1,974,917 tons and deliveries to foreign connections declined by 1,030,185

tons. Unloadings of wheat, amounting to 206,263 tons, increased by 32,538 tons and deliveries to foreign connections increased by 183,551 tons. This was western grain carried by rail to Montreal and Quebec for export. Bituminous coal loaded, increased by 106,623 tons, but anthracite coal loaded and received from connections showed a total decrease of 452,778 tons. Loadings of pulpwood fell from 1,194,779 tons in 1930 to 669,666 tons, loadings of ties dropped by almost 50 per cent and lumber decreased from 950,060 tons to 709,522 tons. Refined petroleum and its products loaded at Quebec stations increased by 20,414 tons, cement loadings increased by 27,518 tons and unloadings increased by 101,497 tons. The net export of paper dropped from 994,630 to 936,209 tons and net exports of wood pulp decreased by 32,703 tons.

Ontario.—As stated previously, the greater part of the grain unloaded at Ontario ports is western grain unloaded at Fort William-Port Arthur. Wheat unloaded amounted to 3,492,939 tons which was an increase of 507,156 tons, but deliveries to foreign connections decreased by 929,339 tons. These deliveries were also largely deliveries to the elevators at Fort William-Port Arthur and later forwarded to Buffalo. Net imports of potatoes showed a decrease of 37,480 tons. Loadings of live stock, meats, eggs and butter and cheese all showed substantial decreases, eggs dropping from 8,749 to 2,774 tons. Net imports of anthracite coal decreased by 438,058 tons, or 21 per cent, and bituminous coal imports declined by 860,985 tons. Loadings of clay, gravel, sand and stone dropped from 3,894,483 to 2,176,847 tons and unloadings were less by 1,703,270 tons. Pulpwood tonnages, both loadings and unloadings, were light, loadings being down by 744,752 tons. Automobiles loaded at Ontario stations declined from 207,263 to 105,169 tons, imports dropped from 111,013 to 65,797 tons and the shipments across Ontario between United States points dropped from 1,306,145 to 925,458 tons, making a decrease in the total tonnage originated of 527,997 tons.

Manitoba.—Freight loaded at Manitoba stations amounted to 3,763,454 tons which was a decrease from 1930 of 1,161,820 tons. There was a net export of 899,648 tons of agricultural products and 31,184 tons of animal products and a net import of 894,002 tons of mine products, mostly coal. Forest products showed a net export of 31,376 tons as against 73,919 tons in 1930, and manufactures and miscellaneous freight showed a net import of 178,556 tons, refined petroleum and its products showing an import of 168,648 tons. This was largely gasoline, but was 34,142 tons less than the imports for 1930.

Saskatchewan.—Wheat tonnage originating in Saskatchewan was 61 per cent of the total originated tonnage for the province. It amounted to 3,949,086 tons as against 4,219,880 in 1930. Oats was the second heaviest commodity, amounting to 348,709 tons, which was an increase of 138,190 tons over 1930 tonnage. The net exports of agricultural products amounted to 4,057,816 tons and animal products exported amounted to 79,007 tons. Net imports of bituminous coal amounted to 166,804 tons and of lignite coal amounted to 638,893 tons. Unloadings of clay, gravel, sand and stone amounted to only 62,676 tons as against 329,029 tons in 1930. Tons of lumber unloaded also showed a decrease of 76,573 and the net import of refined petroleum and its products dropped from 76,544 tons in 1930 to 49,086 tons. Only 1,642 tons of automobiles were imported as against 8,987 tons in 1930 and 36,071 tons in 1928.

Alberta.—Loadings of wheat at Alberta stations amounted to 3,611,010 tons which was 320,530 tons more than in 1930. Oats, barley and flour also showed heavier loadings than in 1930. Net imports of apples increased by 3,955 tons but other fresh fruit, potatoes and other fresh vegetables showed smaller imports. Loading of bituminous coal was heavier than in 1930 by 5,905 tons, but lignite coal was lighter by 725,034 tons. The tonnage of clay, gravel, sand and crushed stone unloaded amounted to 696,639 tons, or 60,825 tons more than in 1930, and loadings were heavier also. Unloadings of lumber and cooperage stock decreased by 76,493 tons. Refined petroleum and its products showed a decrease of 92,471 tons in loadings and a decrease of 77,981 tons in unloadings. Cement showed increases in loadings, unloadings and exports.

British Columbia.—Wheat delivered to foreign connections at British Columbia ports amounted to 2,128,108 tons, which was an increase of 81,303 tons over the 1930 deliveries, but was less than the 1929 and 1928 exports. Exports of oats, barley and rye also showed increases over 1930 exports. Apples loaded, amounted to 87,887 tons, which was 16,457 tons less than in 1930, and other fresh fruit also showed a decrease of 1,300 tons loaded. Shipments of bituminous coal increased from 866,768 tons to 915,744 tons and net exports increased by 92,930

tons. Loadings of other ores and concentrates, which include silver-lead-zinc ore to the smelter at Trail, dropped from 1,282,344 tons in 1930 to 435,012 tons. The tonnage of forest products loaded at British Columbia stations was less than in 1930 by 923,740 tons and less than half the tonnage of 1929. The largest decrease was 631,156 tons in logs, posts, poles and cordwood. Automobiles unloaded amounted to 8,077 tons as against 13,213 tons the previous year and 21,204 tons in 1929. Paper, printed matter and books showed an increase in tonnage loaded of 21,089 and the net exports also increased by 21,627 tons.

As an appendix to the summary tables, two tables are attached, one combining the three Maritime Provinces, Prince Edward Island, Nova Scotia and New Brunswick, showing the freight loaded and unloaded, the net imports and exports and also the movement of freight by rail to and from the other provinces. The second table treats the four western provinces, Manitoba, Saskatchewan, Alberta and British Columbia in the same manner.

There is some trade between the western and the eastern provinces by way of the Panama canal, but the greater part of it is by rail; the Panama canal records show a total of only 33,700 tons west-bound and 76,832 tons east-bound. There is a considerable tonnage of freight carried by vessels between the Maritime Provinces and Quebec and Ontario, but there are no records compiled showing the magnitude of this traffic. The data in these tables, as explained previously, include only railway revenue freight.

Maritime Provinces.—The movement of wheat was into the Maritime Provinces to the extent of 268,424 tons. Corn moved westward. The greater part of this was South African and Argentine corn. Westward shipments included apples, amounting to 20,496 tons, other fresh fruit, including imported bananas, amounting to 26,557 tons, and potatoes, amounting to 145,263 tons. A large portion of these potato shipments was from the United States for points in Michigan and Pennsylvania, leaving Canada at Niagara river ports, Windsor and Sarnia. The greater part of the 3,901,404 tons of bituminous coal unloaded at Maritime Province ports was later forwarded by boat, much of it to Quebec ports. Only 409,315 tons were hauled west by rail. Although lumber moved westward, there was a movement into the Maritime Provinces of logs, posts, poles and cordwood, ties and pulpwood. The westward movement of sugar amounted to 42,072 tons. Only 18,053 tons of iron, pig and bloom, and 2,682 tons of rails and fastenings moved west by rail; larger quantities were shipped west by water as shown by the canal reports. The westward movement of paper and wood pulp amounted to 183,021 tons and 36,381 tons, respectively.

Western Provinces.—Over half of the freight loaded in the western provinces was agriculture products, total freight amounting to 21,938,512 tons and agriculture products amounting to 11,048,266 tons, and the net exports of all freight from the western provinces amounted to 8,299,130 tons. The principal imports included fresh fruit, other than apples, 70,325 tons; coal, 68,224 tons; coke, 67,107 tons; crude petroleum, 399,950 tons; salt, 42,429 tons; refined petroleum and its products, 219,754 tons; sugar, 29,488 tons; bar and sheet iron, structural iron and iron pipe, 48,533 tons; castings, machinery and boilers, 28,104 tons; bricks, 11,653 tons, sewer pipe and drain tile, 6,507 tons; agricultural implements, 6,654 tons; automobiles, 18,183 tons; furniture, 10,586 tons; liquors and beverages, 8,119 tons; and canned goods, 24,618 tons. In the manufactures and miscellaneous group, paper and fish were the only heavy exports. The major part of these imports came from Ontario and provinces east and the remainder was received from foreign connections at western province stations. The coal imported was largely United States coal carried from Lake Erie ports to Fort William-Port Arthur by boat and from there to Manitoba stations by rail. There was also a considerable tonnage of other commodities carried by rail from eastern Canada to the western provinces that was foreign freight imported at ports in eastern Canada. The term "eastern Canada" in these tables includes Ontario, Quebec and the Maritime Provinces.

RÉSUMÉ

DES

RAPPORTS MENSUELS SUR TRANSPORTS COMMERCIAUX

POUR

L'ANNÉE TERMINÉE LE 31 DÉCEMBRE 1931

Les données des tableaux qui suivent couvrent seulement les transports commerciaux des chemins de fer canadiens et non pas les transports en service, c'est-à-dire le charbon pour les locomotives, les traverses, le ballast et autres matériaux de chemins de fer. Par conséquent, ces données ne peuvent coïncider avec celles des importations tandis qu'elles sont en concordance avec celles des exportations. Les chargements échangés entre les chemins de fer canadiens ne sont pas comptés doublement dans ces tableaux, mais les marchandises déchargées et plus tard réexpédiées sont comptées pour chaque fois qu'elles ont été expédiées. Les connexions étrangères comprennent les chemins de fer des Etats-Unis et les bateaux en partance pour des, ou arrivant de, ports étrangers, et dans le présent rapport toutes les marchandises transportées à des ports de sortie aux taux d'exportation sont inscrites comme livrées à des connexions étrangères. Bien que le rapport des chemins de fer montre que tout le grain livré aux élévateurs à la tête des lacs comme déchargé à des stations au Canada et tout le grain pris aux élévateurs des lacs comme chargé à des points canadiens de départ, des corrections ont été faites à l'aide des rapports même des élévateurs montrant que les arrivages et les départs étaient de ou pour des connexions étrangères. Le grain livré aux élévateurs de Montréal, Vancouver et autres ports océaniques pour exportation est classé comme livré à des connexions étrangères et des ajustements ont été faits pour en exciper le grain pris à ces élévateurs pour la consommation domestique. Les marchandises transportées aux ports à des taux locaux sont classées comme déchargées aux stations locales, bien qu'elles puissent être ensuite exportées par eau. Le grain déchargé aux élévateurs à la tête des lacs et plus tard expédié à Montréal par eau est classé comme déchargé à des stations en Ontario et ne figure plus dans les rapports des chemins de fer; il affecte en conséquence le chiffre net des importations de la province. De même, le grain de l'ouest moulu dans l'Ontario augmente les chiffres d'importations de grain parce qu'il est exporté comme farine. Les autres provinces sont affectées de la même manière au même sujet mais sur une moindre échelle.

Ces données couvrent seulement les transports commerciaux et les différences entre la colonne 1, marchandises chargées, et la colonne 6, marchandises déchargées, sont les chiffres nets des importations et exportations par chemin de fer pour chaque province respectivement. Si les chargements dépassent les déchargements c'est une indication d'un surplus net d'exportations et si les déchargements dépassent les chargements c'est qu'il y a un surplus d'importations, quel que soit le nombre de fois que les mêmes marchandises aient été chargées ou déchargées. En dehors des marchandises transportées par eau, ces données donnent un aperçu complet du mouvement des marchandises au Canada et dans les Provinces des Prairies, où tous les transports se font par chemin de fer, le chiffre net des importations et exportations par chemin de fer est synonyme des importations et exportations totales de la province.

Tel que noté plus haut, une marchandise peut être importée sous une forme et exportée sous une autre comme le blé et la farine, le bois de pulpe et le papier, etc., de sorte que les importations nettes peuvent être ensuite exportées sous une autre forme.

Les chargements effectués aux gares canadiennes en 1931 s'élèvent à 51,735,251 tonnes, donc à 14,236,493 et 32,300,760 tonnes de moins qu'en 1930 et 1928. Plus de 43 p.c. de la diminution sur 1930 se rapporte aux produits miniers, les minerais et concentrés (y compris les minerais de

cuivre et de plomb) ayant fléchi de 2,375,960 tonnes, et l'argile, le gravier, le sable et la pierre concassée de 2,273,156. Notons que la dernière diminution se rapporte surtout au gravier et à la pierre utilisés dans la voirie et les travaux de bétonnage. Les arrivages de l'étranger accusent également de fortes réductions, dont 4,874,864 tonnes pour l'importation et 2,884,626 pour le transport en transit. Les importations d'anthracite, de houille grasse et de coke ont baissé de 856,181, 1,278,679 et 407,704 tonnes respectivement et celles du pétrole et de ses dérivés (dont la gazoline est le plus important) de 200,174 tonnes; le fer (en gueuses et en loupes) est tombé de 32,942 tonnes à 12,156 et a donc diminué de 20,786 tonnes. Les instruments aratoires et les véhicules autres que les automobiles venant de l'étranger ont baissé de 63,349 tonnes à 11,779 et les automobiles de 118,227 à 69,428. Les importations d'engrais ont diminué de plus de la moitié et celles de pulpe de 19,476 tonnes à 6,020. Les principales diminutions du transport en transit comprennent: anthracite, 516,446 tonnes; bois, 110,589 tonnes; sucre, 87,188 tonnes; fer en barres et tôles, fer de charpente et tuyaux de fer, 159,162 tonnes; moulages, machines et chaudières, 92,383 tonnes; automobiles, 381,270 tonnes.

Île du Prince-Edouard.—Les pommes de terre forment plus de la moitié, soit 54,3 p.c. du tonnage chargé dans cette province et sont suivies des engrais. Alors que les chargements des premières ont diminué de 37,203 tonnes, ou de 22 p.c., ceux des engrais ont augmenté de 3,947 tonnes. Les déchargements de houille grasse ont baissé de 18,739 tonnes et ceux de l'argile, de gravier, de sable et de pierre de 57,433. Les chargements globaux s'étant élevés à 243,158 accusent une baisse de 50,234 comparativement à 1930. Les déchargements ont diminué de 113,192 tonnes et les importations par chemin de fer de 62,958.

Nouvelle-Ecosse.—Le total des chargements se montant à 5,786,663 tonnes, la réduction comparativement à 1930 est de 1,549,473 tonnes. Quant aux déchargements, ils ont diminué de 1,412,953 tonnes. La houille grasse qui constitue plus de 72 p.c. des chargements accuse une diminution de 1,084,444 tonnes. Bien que le transport du blé à destination de l'étranger passant en transit par les ports de la province ait augmenté un peu comparativement à 1930 (1,845 tonnes contre 590), il est loin d'atteindre le chiffre de 1929 (41,890 tonnes). Les arrivages de farine qui étaient de 61,141 tonnes ont augmenté à 69,566. Les chargements de pommes ont baissé de 126,900 tonnes (1930) à 78,128, et les exportations par voie ferrée de 118,066 à 73,875, tandis que ceux d'argile, de gravier, de sable et de pierre concassée qui étaient de 228,641 tonnes en 1930 ont atteint à 274,365 tonnes, contre 228,641 en 1930. Quant au sel, les chargements ont augmenté de 4,795 tonnes et les exportations de 5,960 tonnes net. Les chargements de produits forestiers ont fléchi beaucoup: de 477,488 tonnes qu'ils étaient en 1930, ils ont baissé à 270,077. Les chargements de sucre ont diminué de 7,000 tonnes, et ceux de fer (en gueuses et en loupes), de rails et plaques d'accouplement, de fer en barres et en tôles, de moulages, de machines et de chaudières accusent tous de fortes réductions. Par contre les chargements de ciment, de chaux et de plâtre et de tuyaux d'égout ont augmenté et ceux de liqueurs et boissons ont presque doublé. Les chargements de poisson (frais, congelé, fumé) ont tombé de 31,198 tonnes à 23,455 et les exportations de 25,129 à 20,755 tonnes net.

Nouveau-Brunswick.—Ce sont les pommes de terre qui, en tonnage, constituent la marchandise la plus importante manutentionnée par les chemins de fer de la province, les chargements se chiffrent par 146,537 tonnes et les arrivages étrangers à 171,624, ce qui forme un total de 318,161, contre 407,119 en 1930. Le bois à pulpe, qui en 1930 détenait la première place avec 457,053 tonnes, a baissé à 214,156 et le bois d'œuvre de 418,447 tonnes à 303,292. Tous les produits forestiers accusent, sans exception, des diminutions notables, les chargements ayant baissé de 1,064,421 tonnes à 607,970, et les arrivages étrangers de 32,182 tonnes à 14,345. Les importations de fruits frais, à l'exclusion des pommes, via les ports de la province se montent à 30,270 tonnes, contre 31,564 en 1930. Cette entrée se compose en grande partie de bananes venant de Saint John. Le pétrole, avec ses dérivés, a atteint 46,802 tonnes, accroissement de 9,980 tonnes comparativement au tonnage de 1930. Les chargements de sucre ont baissé de 9,333 tonnes, tandis que les engrais ont augmenté de 4,101 et le papier de 17,793 (101,123 tonnes, contre 83,430).

Québec.—Les chargements effectués dans la province, se chiffrant par 7,966,254 tonnes, accusent une diminution de 1,896,631 tonnes comparativement à 1930. Les arrivages étrangers ont également baissé, les importations ayant diminué de 554,618 tonnes et la marchandise en transit de 367,116. Les déchargements ont baissé de 1,974,917 tonnes et les expéditions à

l'étranger de 1,030,185. Les déchargements de blé ont atteint 206,263 tonnes, ce qui constitue un accroissement de 32,538, et les expéditions à l'étranger ont augmenté de 183,551 tonnes. Il s'agit ici de blé de l'Ouest transporté par chemin de fer à Montréal et Québec, d'où se fait l'exportation. Les chargements de houille grasse ont augmenté de 106,623 tandis que l'antracite chargé et reçu de l'étranger est tombé de 452,778 tonnes. Les chargements de bois à pulpe, qui étaient de 1,194,779 tonnes en 1930, sont tombés à 669,666, le bois d'œuvre a diminué de 950,060 tonnes à 709,522, et les traverses de chemin de fer accusent un fléchissement de près de 50 p.c. Les chargements de pétrole et de ses dérivés ont augmenté de 20,414 tonnes et ceux de ciment de 27,518 tonnes. Quant aux déchargements de ciment, ils se chiffrent par 101,497 tonnes. Les exportations de papier ont baissé de 994,630 à 936,209 tonnes et celles de pulpe ont diminué de 32,703 tonnes.

Ontario.—La plupart du grain déchargé dans les ports ontariens consiste, comme nous l'avons déjà dit, d'arrivages à Fort William et Port Arthur. Les déchargements de blé s'élèvent à 3,492,939 tonnes, soit à 507,156 de plus qu'en 1930. Les expéditions à l'étranger ont par contre diminué de 929,339 tonnes. La majeure partie de ces expéditions est formée également par les livraisons aux élévateurs de Fort William et Port Arthur qui sont réexpédiées subséquemment à Buffalo. Les importations de pommes de terre accusent une diminution de 37,480 tonnes. Les chargements de viande, de bétail, d'œufs, de beurre et de fromage ont tous baissé beaucoup, les œufs seuls de 8,749 à 2,774 tonnes. Les importations d'antracite et de houille grasse ont fléchi de 438,058 tonnes (21 p.c.) et 860,985 tonnes respectivement. Les chargements d'argile, de gravier, de sable et de pierre sont tombés de 3,894,483 tonnes à 2,176,847 et les déchargements ont subi une réduction de 1,703,270 tonnes. Le fléchissement du tonnage de pulpe—chargements et déchargements—est de 744,752 tonnes. Les automobiles chargés dans la province ont baissé de 207,263 à 105,169 tonnes, les importations de 111,013 à 65,797 et les expéditions américaines en transit de 1,306,145 tonnes à 925,458, ce qui constitue une diminution globale de 527,997 tonnes pour les automobiles seulement.

Manitoba.—S'étant élevés à 3,763,454 tonnes, les chargements manitobains accusent donc un fléchissement de 1,161,820 tonnes. Les exportations de produits agricoles ont atteint 899,648 et celles de produits animaux 31,184 tonnes net. Les importations de produits miniers, dont le plus important est le charbon, se chiffrent par 894,002 tonnes. Les exportations de produits forestiers se montent à 31,376 tonnes, contre 73,919 en 1930, et les importations de produits manufacturés et marchandises diverses à 178,556 tonnes. Les importations en pétrole raffiné se chiffrent, avec ses dérivés, dont la gazoline est le plus important, par 168,648 tonnes, soit par 34,142 de moins qu'en 1930.

Saskatchewan.—Le tonnage du blé équivaut à 61 p.c. des chargements effectués dans la province et s'élève à 3,949,086 tonnes, contre 4,219,880 en 1930. Puis vient l'avoine avec 348,709 tonnes, soit 138,190 de plus qu'en 1930. Les exportations respectives de produits agricoles et de produits animaux sont de 4,057,816 et 79,007 tonnes. Les importations de houille grasse et de lignite ont atteint 166,804 et 638,893 tonnes respectivement. Les déchargements d'argile, de gravier, de sable et de pierre ne s'élèvent qu'à 62,676 tonnes, contre 329,029 en 1930, et ceux de bois ont également fléchi de 76,573 tonnes. De 76,544 tonnes qu'elles étaient en 1930, les importations de pétrole raffiné et de ses dérivés sont tombées à 49,086. Les importations d'automobiles ne sont que de 1,642 tonnes, contre 8,987 et 36,071 en 1930 et 1928 respectivement.

Alberta.—3,611,010 tonnes de blé ont été chargées dans l'Alberta, soit 320,530 de plus que l'année précédente. Les chargements d'avoine, d'orge et de farine accusent également des accroissements. Les importations de pommes ont augmenté de 3,955 tonnes, tandis que celles d'autres fruits frais, de pommes de terre et autres légumes frais ont baissé. Les chargements de houille grasse dépassent de 5,905 tonnes le chiffre de 1930, mais ceux de lignite ont diminué de 725,034. Le tonnage d'argile, de gravier, de sable et de pierre concassée s'élève à 696,639 tonnes, c'est-à-dire à 60,825 tonnes de plus qu'en 1930; les chargements ont également augmenté. Les déchargements de bois d'œuvre et de matériel de tonnellerie ont baissé de 76,493 tonnes et ceux de pétrole, avec ses dérivés, de 77,981 tonnes. Les chargements de ce dernier ont fléchi de 92,471 tonnes. Le ciment accuse des accroissements tant en chargements qu'en déchargements et exportations.

Colombie Britannique.—Les livraisons de blé effectuées aux ports de cette province et destinées à l'étranger se chiffrent par 2,128,108 tonnes, dépassant ainsi de 81,303 tonnes le total de 1930; elles ne sont toutefois pas aussi considérables qu'en 1929 et 1928. Les exportations

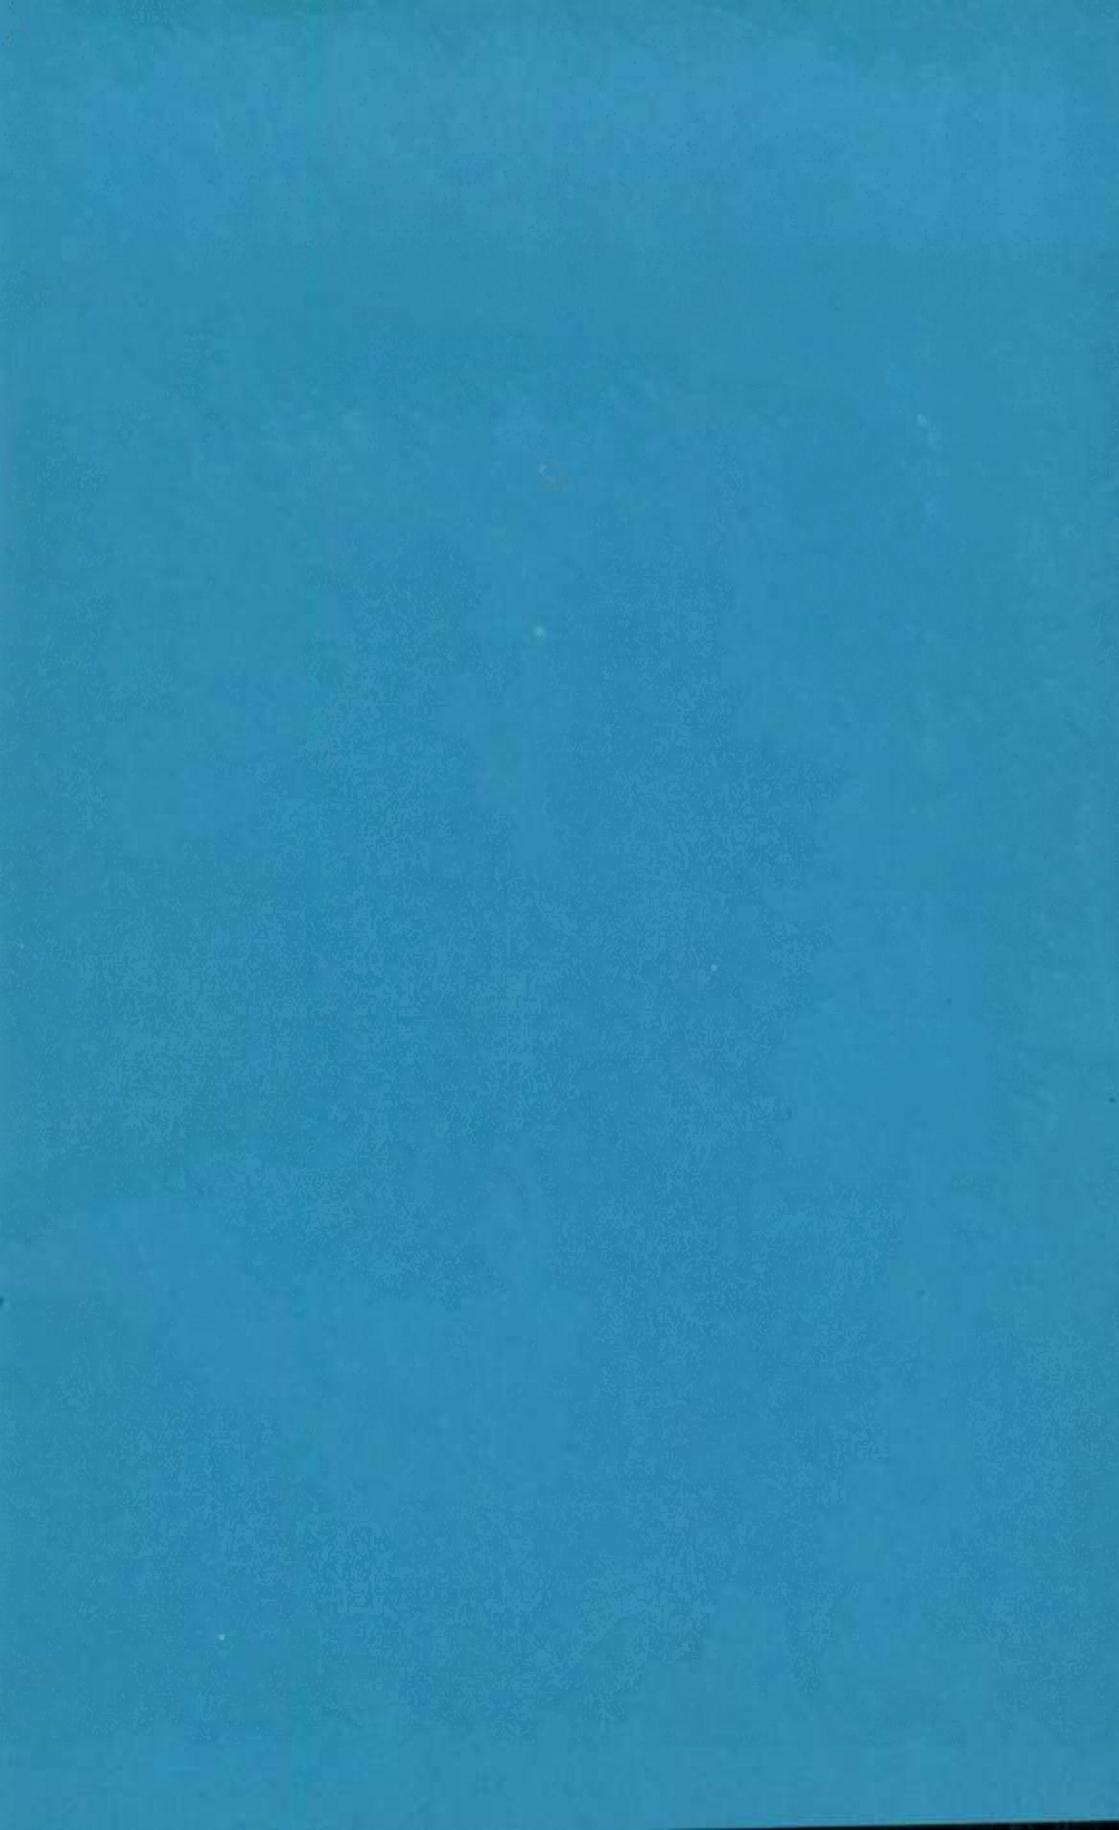

d'avoine, d'orge et de seigle sont également plus fortes qu'en 1930. Les chargements de pommes s'élèvent à 87,887 tonnes, soit à 16,457 de moins que l'année précédente. Quant aux autres fruits frais, la diminution est de 1,300 tonnes en tout. Les expéditions de houille grasse ont augmenté de 866,768 tonnes à 915,744 et les exportations accusent une augmentation de 92,930 tonnes. Les chargements de minerai, figurant sous la rubrique «autres minéraux et concentrés», ce qui comprend les minéraux d'argent-plomb-zinc expédiés à la fonderie de Trail, ont baissé de 1,282,344 tonnes à 435,012. Les chargements de produits forestiers ont diminué de 923,740 tonnes et ne se montent même pas à la moitié du chiffre de 1929. Ce sont les billes, les poteaux, les perches et le bois de chauffage qui ont baissé le plus, soit de 631,156 tonnes. Les déchargements d'automobiles sont de 8,077 tonnes, contre 13,213 et 21,204 en 1930 et 1929 respectivement. Le papier, les imprimés et les livres ont augmenté de 21,089 tonnes en chargements et de 21,627 tonnes en exportations.

L'appendice à la fin des tableaux comporte deux tableaux additionnels où figurent séparément pour les Provinces Maritimes (Île du Prince-Édouard, Nouvelle-Ecosse et Nouveau-Brunswick) et les Provinces de l'Ouest (Manitoba, Saskatchewan, Alberta, Colombie Britannique) les chargements et déchargements, le chiffre net des importations et exportations, ainsi que le trafic en transit interprovincial.

Il y a quelque peu de trafic entre les Provinces de l'Ouest et celles de l'est via le canal de Panama, mais la majeure partie se fait par voie ferrée. Le total passé par le canal est composé de 33,700 tonnes allant vers l'ouest et 76,832 vers l'est. Bien que le tonnage de marchandises que transportent les bâtiments faisant le service entre les Provinces Maritimes, le Québec et l'Ontario soit assez élevé, on ne dispose pas de chiffres à l'aide desquels on pourrait en établir le volume. Les chiffres qui figurent aux tableaux ne comprennent, comme nous l'avons déjà dit, que les transports commerciaux des chemins de fer.

Provinces Maritimes.—Le mouvement du blé se dirige vers les Provinces Maritimes, les arrivages s'y chiffrant par 268,424 tonnes. Le maïs, dont la plus forte proportion vient de l'Afrique-Sud et de l'Argentine, est dirigé vers l'ouest. Les expéditions destinées aux endroits situés dans cette direction comprennent des pommes (20,496 tonnes), d'autres fruits frais, y compris des bananes importées (26,557 tonnes), et des pommes de terre (145,263 tonnes). Bon nombre de ces dernières sont de provenance américaine: à destination du Michigan et de la Pensylvanie, ces expéditions retournent aux Etats-Unis via Windsor et Sarnia, ports situés à l'intérieur du Canada. La plus forte partie des 3,901,404 tonnes de houille grasse déchargée dans les ports des Provinces Maritimes sont réexpédiées par bateau aux ports de Québec. Il n'y a que 409,315 tonnes qui ont été expédiées vers l'ouest par rail. Bien que les transports de bois soient dirigés en général vers l'ouest il y a eu des arrivages de billes, poteaux, perches, bois de chauffage, traverses et bois à pulpe. Le mouvement du sucre vers l'ouest est de 42,072 tonnes. Les expéditions vers l'ouest de fer (en gueuses et loupes) et de rails (et éclisses) ne se montent qu'à 18,053 et 2,682 tonnes respectivement; les quantités expédiées dans la même direction sur les canaux sont plus considérables. Le mouvement vers l'ouest de papier et de pulpe se chiffre par 183,021 et 36,381 tonnes respectivement.

Provinces de l'Ouest.—Plus de la moitié des chargements est constituée de produits agricoles, le grand total s'élevant à 21,938,512 tonnes et les produits agricoles à 11,048,266. Le grand total des exportations est de 8,299,130 tonnes. Voici les importations principales: Fruits frais, pommes non comprises, 70,325 tonnes; houille, 68,224 tonnes; coke, 67,107 tonnes; pétrole brut, 399,950 tonnes; sel, 42,429 tonnes; pétrole raffiné et dérivés, 219,754 tonnes; sucre, 29,488; fer en barre et en lame, fer de charpente et tuyaux de fer, 48,533; inoulages, machines et chaudières, 28,104; briques, 11,653; tuyaux d'égout et tuiles à drain, 6,507; instruments aratoires, 6,654; automobiles, 18,183; meubles, 10,586; liqueurs et boissons, 8,119; aliments en boîte, 24,618 tonnes. Sous la rubrique «articles manufacturés et marchandises diverses», le papier et le poisson constituent les seules exportations importantes. La plupart des importations viennent de l'Ontario et des autres provinces de l'Est, le reste vient de connexions étrangères situées dans les provinces de l'Ouest. La plus forte partie du charbon importé vient des Etats-Unis via les ports du lac Érié par eau à Fort William et Port Arthur d'où les expéditions à destination du Manitoba se font par voie ferrée. En plus, un tonnage important d'autres marchandises venant de l'Est a été transporté par rail à destination des provinces de l'Ouest; il s'agit ici de marchandises étrangères importées via les ports de l'Est canadien. La désignation «Est du Canada» se rapporte aux provinces d'Ontario et de Québec et aux Provinces Maritimes.
