G.S. Wrong, B.Sc., Chief, Transportation and Public Utilities Branch

SUMMARY
OF
MONTHLY RAILWAY TRAFFIC REPORTS
FOR
YEAR ENDED DECEMBER 31, 1932

The data in the following tables include only revenue freight carried by the Canadian railways and not the "On company service" freight which includes coal for locomotives, ties, ballast and other railway material. These data will consequently not check with data on imports although this freight will not affect the exports. Freight interchanged between Canadian roads is not duplicated in these tables, but freight unloaded and subsequently reshipped is counted each time it is billed out. Foreign connections include railways in the United States and boats cleared for, or entered from, foreign ports, and in this report all freight moved to ports on export rates has been shown as delivered to foreign connections. Although the railways report all grain delivered to the elevators at the head of the lakes as unloaded at stations in Canada and all grain received from the lake elevators as loaded at billing stations, the reports have been corrected from the elevator returns to show the deliveries to and receipts from foreign connections. Grain delivered to elevators at Montreal, Vancouver and other ocean ports for export has been shown as delivered to foreign connections and adjustments have been made for grain taken out of these elevators for local consumption. Freight carried to ports on local rates has been reported as unloaded at stations although it might subsequently be exported by water routes. Grain unloaded at the elevators at the head of the lakes and later forwarded to Montreal by boat is reported as unloaded at stations in Ontario and does not again enter into the railway records, and consequently affects the net imports into the province. Also western grain grown in Ontario will increase the imports of grain since it is reported out as flour. Other provinces are similarly affected but to a less degree.

These data cover only railway revenue freight and the differences between column 1, freight loaded, and column 6, freight unloaded, are the net imports and exports by rail into and out of the respective provinces. If the loadings exceed the unloadings the data show a net export and if the unloadings exceed the loadings the excess is an import, irrespective of how often the same freight is loaded or unloaded. Except for freight handled by water, these data give a very complete picture of the movement of freight in Canada, and, in the Prairie Provinces where practically all freight is handled by rail, the net imports and exports cover all imports and exports into and out of these provinces.

A commodity may be imported and exported in another form such as wheat and flour, pulpwood and paper, etc., so that the net imports might be exported as other commodities.

Railways crossing the United States border consider their lines in the United States as foreign connections and show freight coming into Canada as received from foreign connections and freight crossing into the United States as freight delivered to foreign connections. Freight delivered to foreign connections includes exports from Canada and also in-transit freight which has been received from foreign connections, rail and water, destined to foreign points and which is shown in column 3. This in-transit traffic is heaviest between Detroit and St. Claire river gateways and the Niagara river gateways. There is also a considerable traffic from the western states through to Quebec ports and a lesser amount from the Pacific Coast.

There were a few changes made in the classification effective January 1, 1932, all but one being subdivisions of classes, the exception being "canned meats" which was included with "dressed meats." The other changes are listed below.

Changes in Commodity Classification

1931	1932
Classification	Classification
Butter and Cheese	A - Butter B - Cheese
Other Ores and Concentrates	A - Copper Ore and Concentrates B - Other Ores and Concentrates
Clay, Gravel, Sand, Stone (crushed)	A - Sand and Gravel B - Stone (crushed, ground, broken) C - Clay is included with "Other Mine Products"
Logs, Posts, Poles, Cordwood	A - Logs, Posts, Poles and Piling B - Cordwood and other Firewood
Refined Petroleum and its Products	A - Gasolene B - Petroleum Oils and Other Petroleum Products (except asphalt and gasoline)
Paper, Printed Matter, Books	A - Newsprint Paper B - Other Paper C - Paper board, Pulpboard and Wallboard (paper) D - Printed matter and books are included with "Other Manufactures and Miscellaneous"

Because of reductions in practically all other industries, railway traffic was lighter than for several years amounting to only 60,468,093 tons, as against 73,837,245 tons in 1931, 95,833,228 tons in 1930, 114,600,778 tons in 1929 and 119,227,758 tons in 1928. Agricultural products, especially wheat, have continued to move in good volume, but mine products decreased from a peak of 42,404,330 tons in 1929 to 19,506,498 tons in 1932. Sand and gravel and coal were the principal items to show large reductions in 1932. Forest products, especially pulpwood, have been light for the past two years, and the total tonnage in 1932 was approximately one-third of the peak reached in 1928. Manufactures and miscellaneous freight dropped from a peak of 32,069,170 tons in 1929 to 14,373,612 tons in 1932, many of the commodities decreasing to a third and a fourth of the peaks reached in 1928 and 1929, and agricultural implements decreased from 552,067 tons in 1928 to 139,697 tons in 1931 and 57,632 tons in 1932. Although automobile tonnage was reduced from 2,598,011 in 1929 to 774,139 in 1932, gasolene and other refined petroleum products decreased only by 6,650 tons, or about one-fifth of one per cent.

The eastward movement of freight in the three Maritime Provinces during 1932 exceeded the westward movement by 115,353 tons, whereas during 1931 the net export to the other provinces was 82,588 tons. The largest reversal was a net eastward movement of forest products of 36,696 tons, as against a net westward movement in 1931 of 79,733 tons. This was due to a light movement of lumber out of the Maritime Provinces being more than offset by shipments into the provinces of 44,874 tons of pulpwood. Total loadings in the Maritime Provinces declined from 7,649,289 tons in 1931 to 5,679,409 tons and unloadings from 6,777,255 tons in 1931 to 5,166,928 tons.

The export of wheat from the western provinces amounted to 8,795,293 tons as against 7,305,297 tons in 1931, but all other grains showed smaller exports. The exports of hogs amounted to 23,045 tons as against 23,550 tons in 1931, but there were large reductions in the exports of horses and cattle and calves. Exports of forest products decreased from 526,796 tons in 1931 to 267,540 tons. This does not include forest products floated to tide-water and exported from British Columbia ports, but includes only freight handled by the railways. The net movement was out of the western provinces, amounting to 9,830,486 tons, of which 9,933,014 tons were agricultural products. The greater part of this net export moved eastward, either for the eastern provinces or for export to foreign countries via eastern ports. Total loadings in the western provinces amounting to 21,692,759 tons were only one per cent less than in 1931, but the unloadings decreased from 13,639,382 tons in 1931 to 11,862,273 tons, or by 13 per cent. The term "Eastern Canada" in these tables includes Ontario, Quebec and the three Maritime Provinces.
