MONTHLY RAILWAY TRAFFIC REPORTS

FOR

YEAR ENDED DECEMBER 31, 1944.

The data in the following tables include only revenue freight carried by the Canadian railways and not the "on company service" freight which includes coal for locomotives, ties, ballast and other railway material. These data will consequently not check with data on imports although this freight will not affect the exports. Freight interchanged between Canadian roads is not duplicated in these tables, but freight unloaded and subsequently reshipped is counted each time it is billed out. Foreign connections include railways in the United States and boats cleared for, or entered from, foreign ports, and in this report all freight moved to ports on export rates has been shown as delivered to foreign connections. Although the railways report all grain delivered to the elevators at the head of the lakes as unloaded at stations in Canada and all grain received from the lake elevators as loaded at billing stations, the reports have been corrected from the elevator returns to show the deliveries to and receipts from foreign connections. Grain delivered to elevators at Montreal, Vancouver, and other ocean ports for export has been shown as delivered to foreign connections and adjustments have been made for grain taken out of these elevators for local consumption. Freight carried to ports on local rates has been reported as unloaded at stations although it might subsequently be exported by water routes. Grain unloaded at the elevators at the head of the lakes and later forwarded to Montreal by boat is reported as unloaded at stations in Ontario and does not again enter into the railway records, and consequently affects the net imports into the province. Also, western grain grown in Ontario will increase the imports of grain since it is reported out as flour. Other provinces are similarly affected but to a lesser degree.

These data cover only railway revenue freight and the differences between column 1, "freight loaded," and column 6, "freight unloaded," are the net imports and exports by rail into and out of the respective provinces. If the loadings exceed the unloadings the data show a net export and if the unloadings exceed the loadings the excess is an import, irrespective of how often the same freight is loaded or unloaded. Except for freight handled by water or highway, these data give a very complete picture of the movement of freight in Canada, and in the Prairie Provinces, where practically all freight is handled by rail, the net imports and exports cover almost all imports and exports into and out of these provinces.

A commodity may be imported in one form and exported in another form such as wheat and flour, pulp-wood and paper, etc., so that the net imports might be exported as other commodities.

Railways crossing the United States border consider their lines in the United States as foreign connections and show freight coming into Canada as received from foreign connections and freight crossing into the United States as freight delivered to foreign connections. Freight delivered to foreign connections includes exports from Canada and also intransit freight which has been received from foreign connections, rail and water, destined to foreign points and this is shown in column 3. This in-transit traffic is heaviest between Detroit and St. Clair River gateways and the Niagara River gateways. There is also a considerable traffic from the western states through to Quebec ports and a lesser amount from the Pacific coast.

Tons of revenue freight loaded at stations in Canada showed an increase for the sixth consecutive year, increasing from 56,583,935 tons in 1938 to 106,156,732 tons in 1944 or by 88 per cent. The increase over 1943 was 5.8 per cent, the smallest rate in the six years. Imports increased from 8,874,045 tons in 1938 to 22,824,032 tons in 1943 and decreased to 20,152,314 tons in 1944, and freight carried between foreign points also showed a decrease from 1943 of 1,242,046 tons or 4.2 per cent, but was 177 per cent greater than for 1938.

Loadings of wheat increased from 12,822,249 tons in 1943 to 18,711,646 tons, which was second only to the record of 18,919,881 tons loaded in 1928 and was almost four times the tonnage loaded in 1937. Loadings of hogs increased to 580,490 tons, an increase of 20 per cent over 1943 and 258 per cent over 1938 loadings. Loadings of bituminous coal decreased and imports also were down, the combined tonnage showing a decrease of 818,070 tons. Imports of anthracite coal declined by 312,620 tons or 7.4 per cent. Imports of other ores and concentrates declined from 3,184,285 to 1,544,508 tons. This was largely bauxite. Shipments of crude petroleum between foreign stations declined from 3,824,832 to 957,218 tons. This movement was affected by the completion of pipe lines to the United States - Atlantic ports, and also resumption of tanker service from Gulf ports. Imports by rail increased from 332,072 to 692,888 tons; the pipe line from Portland to Montreal showed an increase in oil handled from 11,175,188 barrels in 1943 to 16,494,947 barrels. Loadings of cordwood and other firewood increased from 1,173,123 to 1,380,102 tons and loadings of pulpwood and lumber also increased. Loadings of gasoline increased by 25,082 tons, imports declined by 92,806 tons and shipments between United States stations increased by 1,457,989 tons. Loadings of iron and steel (bar-sheet-structural-pipe) decreased from 1,609,872 to 1,246,637 tons and imports decreased from 1,070,696 to 686,334 tons. Loadings of automobiles and parts declined from 2,253,084 to 2,009,565 tons; this includes military trucks and parts. Beverages loaded increased to 550,202 tons from 488,833 tons in 1943 and 211,880 tons in 1938, and the tonnage unloaded at Canadian stations showed approximately the same rates of increase.

On pages 24 - 27 are two tables, one for the three Maritime Provinces and one for the four Western Provinces. The net exports and imports from and to these areas are the differences between loadings and unloadings, but the net movement to and from other provinces is the difference between freight originated, including loadings and receipts from foreign connections and freight terminated, including freight unloaded and delivered to foreign connections. If the freight originated in the Maritime Provinces exceeded the freight terminated the difference must have been carried westward, either for unloading in the other provinces or for delivery to foreign connections at a junction point in Quebec or provinces west. Also, if the terminated freight exceeded the originated, the difference came in across the Quebec boundary.

Prince Edward Island, Nova Scotia and New Brunswick: The eastward movement of wheat by rail into the Maritime Provinces decreased from 1,728,529 tons in 1943 to 1,625,161 tons; practically all of this was for export. The eastward movement of flour also declined from 588,482 to 483,134 tons. Most of the cheese moved into the provinces was for export which declined from 61,117 to 41,854 tons. Loadings of bituminous coal decreased from 5,515,441 to 5,217,897 tons. Most of this was unloaded at Maritime Province ports for forwarding by water, exports by rail amounting to only 332,976 tons. Loadings of pulpwood increased from 1,040,855 to 1,222,530 tons. Cement loadings increased from 1,382 to 43,285 tons. The unloadings of beverages increased from 58,089 tons in 1943 and 16,515 tons in 1938 to 69,491 tons and unloadings of fertilizers from 388,140 in 1943 and 152,923 in 1938 to 401,140 tons.

Manitoba, Saskatchewan, Alberta and British Columbia: Loadings of wheat in these provinces increased from 7,868,055 tons in 1943 to 13,950,350 tons; in the peak year 1928 it was 16,268,432 tons. Loadings of oats increased by 349,345 tons and barley decreased by 74,057 tons. With the exception of a small decrease for butter, all animal products showed substantially heavier loadings. Loadings of bituminous and lignite coal showed a drop of 921,930 tons or 14.4 per cent. Loadings of copper ore and concentrates showed only a slight decrease but other ores and concentrates were down by 165,061 tons and base bullion, matte, pig and ingot (non-ferrous metals) declined by 94,385 tons. Crude petroleum loadings decreased from 509,852 to 352,049 tons. Loadings of pulpwood increased from 172,567 to 231,842 tons and lumber from 2,151,328 to 2,189,683 tons. Gasoline and petroleum oils both showed lighter shipments. Loadings of agricultural implements and also automobiles and parts showed increases. Shipments of household goods and settlers' effects increased by 26 per cent, and unloadings of beverages increased by 27 per cent; restricted highway transportation would affect the rail movement of these commodities. Over 11 per cent more fertilizer was unloaded than in 1943 and increases were shown in loadings of newsprint paper, other paper, paperboard and wood pulp.

In all the above comparisons the eastward and westward tonnages are net movements, that is, a westward shipment would cancel an eastward shipment of the same tonnage and only excesses of westward tonnages over eastward tonnages, or vice versa, are considered.
