STATISTICS OF STEAM RAILWAYS

1 9 4 2

One effect of the war on the railways has been to raise the revenues to the highest point in their history. Total operating revenue amounted to \$663,610,570 which was \$296,431,475, or 81 per cent, greater than the 1939 revenue. Freight revenue increased by \$216,960,590, or 76 per cent, and passenger traffic showed even greater rates of increase. Passenger revenues were larger than in 1939 by 153 per cent, sleeping car revenues increased by 122 per cent, parlour and chair car revenues by 108 per cent, express by 40.6 per cent, and even milk revenue increased by 25 per cent. Revenue from dining and buffet service increased from \$1,819,988 to \$5,825,211, or by 220 per cent, and hotel and restaurant revenues increased by 112 per cent. Mail revenue increased by only \$817,334, or 8.6 per cent.

Operating expenses increased from \$304,373,285 in 1939 to \$485,785,584, or by \$181,410,299 or 60 per cent. These operating expenses for 1942 include \$16,985,000 for maintenance of way and structures and of equipment which accrued but was not expended because of inability to secure the necessary materials and labour and the Canadian National Railway charged to operating expenses \$5,859,471 to offset increases in inventory values which it is anticipated will decline at the termination of the war.

Deferred maintenance charged to operating expenses in 1941 amounted to \$4,000,000, making the total accumulated fund at December 31, 1942, \$20,985,000, or 16.3 per cent of the total maintenance charges for 1939.

Taxes increased to \$34,886,660, an increase over 1941 of \$9,841,249, or 39 per cent, and an increase over 1939 taxes of \$24,884,376, or 249 per cent. These taxes do not include the refundable portion of the Dominion income and excess profits tax which was treated by the railways as an investment and carried in the general balance sheet as a deferred asset. For 1942 this asset amounted to \$269,271. Interest on funded and unfunded debt was reduced during the

year by \$2,446,449, or 3.1 per cent.

The miles of railway operated was reduced during the year by 102.7 miles. Freight traffic was heavier than in 1939 by 50,043,415 tons, or 59 per cent, and by 24,689,581,000 ton miles, or 78 per cent, for an increase in freight train miles of only 48 per cent.

As freight traffic increased delays to loading and unloading of freight increased at accelerated rates as indicated by the demurrage revenues in relation to car loadings and freight loadings and unloadings exclusive of merchandise.

	Demurrage Revenue	Car Loadings	Revenue Freight Loaded and Unloaded
	\$	Cars	Tons
1939 .....	305,908	1,902,417	117,581,834
1940 .....	504,830	2,159,835	156,171,690
Per cent increase over 1939 .....	68	13	16
1941 .....	1,131,647	2,455,747	160,840,635
Per cent increase over 1940 .....	124	15	18
1942 .....	2,807,794	2,635,065	177,465,185
Per cent increase over 1941 .....	148	7	10

Passenger traffic increased over 1939 by 27,114,306 passengers, or 133 per cent, and by 3,257,523,000 passenger miles, or 185 per cent. Excluding 11,468,219 commuters working in war plants outside of Montreal in 1942 and 144,312,000 passenger miles for them, the increase over 1939 traffic was 78 per cent in passengers carried and 176 per cent in passenger miles for an increase in total train miles including commuter trains of only 18 per cent and an increase in total passenger train car miles of 33 per cent.

The number of employees (average of 12 monthly counts) increased from 129,362 in 1939 to 157,740, or by 22 per cent, and the pay roll increased from \$200,373,668 to \$291,416,755, or by 45 per cent.

Each class of employee showed increases in average annual wages over 1939 wages and smaller increases in average hours worked. The increases in wages were due to cost-of-living

bonus and longer hours including overtime. Shifting dining and sleeping car employees from the hourly basis group to the daily basis group reduced the average annual wage of this latter group under "Transportation" although each class showed increases in wages. The wages of these employees which do not include tips paid by the public are below the average of all transportation employees. Consequently they reduce whichever group in which they are included.

Next to executives, general officers and assistants whose average salary increased from \$6,648 in 1939 to \$7,133, or by 7.3 per cent, road passenger engineers showed the highest average annual wage of \$3,890, an increase over 1939 average of 9.1 per cent for an increase in hours worked from 2,121 to 2,177, or 2.6 per cent.

The method used in counting employees gives approximately the number of full time positions and consequently the average annual wages are for full time employment and do not necessarily represent actual wages earned. They are computed on the same basis each year and are comparable from year to year.

Coal consumed by locomotives increased from 6,866,202 tons in 1939 to 10,613,774 tons or by 55 per cent, and fuel oil consumption increased from 47,139,196 to 71,890,235 gallons or by 52 per cent. The increase in bituminous coal was practically all United States coal.

Category	1939	1940	% Change
Coal consumed by locomotives	6,866,202 tons	10,613,774 tons	+55%
Fuel oil consumption	47,139,196 gallons	71,890,235 gallons	+52%
