STATISTICS OF STEAM RAILWAYS

20-1100

1 9 4 6

Operating revenues of steam railways in Canada during 1946 registered further decline from the record levels experienced during the war years. Total earnings at \$718,501,764 represent a decrease of \$56,469,596 or 7.3 p.c. from 1945 and were \$78,135,022 or 9.8 p.c. below the all time peak of 1944. The reduction in operating expenses from 1945 was limited to \$7,968,090 at \$623,529,472 and net operating revenues were consequently reduced from \$143,473,798 to \$94,972,292.

Some declines in tax accruals, principally in Canadian Pacific Railway income tax account, reduced total taxes from \$30,777,455 to \$24,500,296, but net hire of equipment and joint facilities rent increased \$503,271 over 1945 at \$10,870,568. Non-operating income (principally C.P.R.) decreased by \$2,372,394 and interest on funded and unfunded debt by \$2,716,067 from 1945. Annual interest charges have shown annual decreases from 1940 when the total stood at \$79,786,267 compared with \$69,122,464 in 1946 and reflect reduction in railway debt and reduced interest rates. Dividend payments totalled \$22,407,922 as against \$22,577,695 in 1945 and \$5,313,532 in 1940. Investments in railways and miscellaneous during the year were valued at only \$1,947,022 in 1946 compared with \$1,799,465 in 1945 and \$19,100,499 in 1940.

Whereas during the five previous years the Canadian National System had earned cash surpluses which were applied to reduce capital loans from the Dominion Government, in 1946 a cash deficit of \$8,961,570 (which was met by direct payments by the Dominion Government) was reported and other debits brought the total deficit of the system to \$9,417,954 for the year. However the cash surpluses for the period 1941 to 1945 had totalled \$112,257,609.

Due to wartime shortages of labour and materials, the railways were unable to expend the normal amounts on the maintenance of plant and equipment and by charges against operating expenses built up deferred maintenance reserves, which amounted to \$66,689,347 at the end of 1945. During 1946 the Algoma Central and Hudson Bay Railway eliminated that reserve while the Canadian National System charged \$6,000,000 to its reserve, and the grand total was reduced by \$6,893,546 to \$59,795,801. However, total depreciation reserves were increased by 10 p.c. from \$387,544,008 to \$426,271,981, insurance revenue rose by \$610,940 and other reserves were reduced to give a net total of \$523,764,052 compared with \$493,963,692 in 1945.

There was a small reduction in the miles of railroad in operation at the end of the year. The decline of under 15 miles in C.N.R. and 3.4 miles in C.P.R. resulted in a net loss of 17.3 miles with a total of 42,345 miles of road remaining in operation as at December 31, 1946.

Freight traffic declined 12.7 per cent in revenue ton miles from 1945 at 55,310,307,842 and revenue freight train miles were reduced by 3.6 per cent with considerably less traffic flowing to the Eastern Seaboard. As repatriation was largely completed, the number of passengers carried declined from 53,407,845 in 1945 to 43,405,177 or by 18.7 per cent. The easing and removal of gasoline and tire rationing also had a definite effect on railway passenger volume. Revenue passenger train miles were reduced by 2.9 per cent and passenger train car miles by 7.1 per cent. Some reductions are possible in freight service when traffic declines but to a lesser extent in scheduled passenger service. Further, a more efficient use of the available freight cars was indicated during 1946 when the ratio of loaded car miles was 69.3 per cent of the total freight car miles compared with 67.6 per cent in 1945 and 67.5 per cent in 1939.

While the labour force employed in all phases of railway operations declined slightly from 180,603 to 180,383, the pay roll increased by 6.7 per cent to \$396,856,901 as against \$371,814,379. The number of employees was based on counts made each month, and is thus approximately the number of full-time positions and not the total of all persons appearing on the pay roll. The pay roll is the total amount paid exclusive of commissions to some express and telegraph employees and averaged \$2,200.08 per full-time employee in 1946 as against \$2,058.74 in 1945, up nearly 6.9 p.c.

Pages 14 and 15 give the average yearly wages paid to each class of employee and were calculated by dividing the total wages paid for the class by the monthly count of employees. Where fluctuations in numbers were considerable, counts were taken four times each month. Daily and hourly averages were computed by dividing the total wages by the total time worked, and are thus weighted averages. Changes in the composition of the labour force reflect decline in passenger traffic between 1945 and 1946. Increases occurred in the number of clerks, office boys, messengers, etc., maintenance and regular apprentices, freight handlers, road freight conductors and other freight employees while declines were noted in the number of sectionmen, labourers, dining and sleeping car help, constables, road passenger conductors and brakemen, etc., and in some other groups.

Average annual earnings in the general and miscellaneous class rose from \$2,155 in 1945 to \$2,311, in maintenance of way and structures from \$1,587 to \$1,724, in maintenance of equipment from \$1,966 to \$2,084 and in transportation from \$2,542 to \$2,674. These average salaries and wages compare very favourably with any other industry in Canada.

A remarkable passenger safety record was established by Canadian railways during 1946 when only 2 passengers were killed in train accidents as against 10 in 1945. Number of passengers injured declined from 360 to 349. However there were 90 employees killed compared with 71 in 1945, of which 51 were trainmen, and 2,844 employees were injured. In addition 89 trespassers and 123 other persons were killed. In all some 304 persons were killed and 3,780 injured in accidents involving trains.

Highway crossings fatalities illustrate the necessity for greater care and protection with 19 killed at protected crossings and 94 at unprotected crossings, principally motorists, while 442 persons were injured compared with 470 in 1945.

Moreover there were 23 persons killed in non-train accidents around shops, freight sheds, etc., and 8,858 injured. This was a decided improvement over 1945 when 42 persons were killed and 10,741 injured.

Reflecting the serious amount of time lost due to accidents, some 294,258 days were lost during 1946 as against 331,667 days in 1945 with nearly all classes of employees registering improvement.

^{1/} Includes United States lines of the Canadian National and Canadian Pacific Railways.

^{2/} Does not include the Canadian lines of the Pere Marquette Railway.

^{3/} Of the increase during 1940, \$48,134,205 was not charged to operating expenses but resulted from the increase in book value of investment in equipment to bring it up to original cost of units then in service.

^{4/} Of the increase during 1942, \$74,728,521 was not charged to operating expenses but resulted from the increase in book value of investment in road property to bring it up to original cost of property then owned.

x - Manitoba Railway Company purchased by Canadian National Railways, September, 1946.

1/ Exclusive of stock aggregating \$204,133,292 held by the Canadian National Railways.
Includes Capital Liabilities of Lines in the United States.

2/ Includes \$295,438,229 consolidated Debenture Stock.

3/ Investment in Road and Equipment.

4/ Advanced by the Province of Ontario on which no interest has been charged.

5/ \$25,000,000 issued, \$40,000 paid up.

6/ Advances by the province of British Columbia and
\$62,489,480 accrued interest.

7/ Represents all divisions of the company.

8/ Held by C. N. Railways.
