STATISTICS OF STEAM RAILWAYS

1947

Earnings of Canadian railways during 1947 rebounded to \$785,177,920, an increase of \$66,676,156 or 9.3 p.c. over the preceding year. This total is second only to the peak of \$796,636,786 recorded in 1944. Operating expenses, however, rose more rapidly advancing from \$623,529,472 in 1946 to a new high of \$690,821,048 or by \$67,291,575, up 10.8 p.c., and compare with \$634,774,021 in 1944. Thus expenses have risen some \$56,000,000 over 1944 while earnings declined \$11,758,645. The difference between operating revenues and expenses shows net revenues of \$94,356,875 earned in 1947 against \$94,972,292 in 1946 and \$161,862,765 in 1944, indicating that the railways retained considerably less of each dollar earned with which to pay interest, taxes, dividends and other expenses. Moreover, taxes rose from \$24,500,296 in 1946 to \$26,342,165 in 1947, up 7.5 p.c., while hire of equipment and joint facilities rent increased from \$10,870,568 to \$15,385,257. Considerable of this item accrued to United States lines for freight car rentals. Non-operating income improved \$7,449,145 to \$40,597,079 and interest payments were some \$3 million lighter at \$66,106,580. Dividends distributed, principally Canadian Pacific, were about \$22,500,000 compared with \$22,407,922 in 1946. The Canadian Pacific reported non-operating income of over \$25,000,000. Cash deficits of the Canadian National totalled \$16,685,179, and include interest payments of \$20,002,435 on Dominion Government loans. The total interest burden of the system was \$44,120,207, including U. S. lines. Sixteen of the 32 railways operating in Canada reported favourable net results during 1947 with total credits of some \$41,811,000, while the balance of the roads had debits of \$23,662,000. Consequently, the net corporate income of all lines stood at \$18,149,697, an improvement of \$4,957,585 over 1946. American lines operating in Canada had credits of \$6,401,210 in 1947 against debits of \$457,585 or a net of \$5,943,625. The United States lines of the Canadian National produced a net income of \$88,045 during the year, due mainly to higher freight rates in effect across the border.

Mileage of single track operated declined 13 miles as at December 31st compared with one year earlier and extended 42,322 miles. The decrease was mainly in Alberta.

Part of the deferred maintenance and construction work planned for 1947 was carried out but scarcities of materials and rising prices exerted a restraining pressure. Deferred maintenance reserves which had been \$50,795,801 at the end of 1946 declined to \$52,940,770. Total reserves, including depreciation, amounted to \$558,495,621 at the end of 1947 against \$523,764,052 one year earlier. Total revenue train mileage increased from 123,495,819 miles in 1946 to 127,745,290 in the year under review. Freight train revenue mileage rose by nearly 4,585,000 miles to 82,377,565 miles while passenger service at 45,367,725 registered a minor decline of 333,151 miles from 1946. Revenue freight tonnage up 9.9 p.c., advanced to 152,855,820 tons moving 60,143,053,000

ton miles compared with 139,256,125 tons moved 55,510,308,000 ton miles in the preceding year. The number of passengers continued to decline from the war-time peaks and totalled 40,941,387 against 45,405,177 in 1946, down over 6 p.c. The average length of journey also decreased. The reduction in revenue passenger train miles was not commensurate with the decline in the volume of traffic and the ratio of operating expenses consequently increased.

A more efficient use of available rolling stock is reflected in the ratio of loaded freight car miles to empty freight car miles, the ratio having been 2.307 to 1 during 1947 against 2.256 one year earlier.

The number of railway employees, including those in express and communication departments and outside operations, rose from 180,383 to 184,415 or by 2.2 p.c., while salaries and wages advanced from \$396,856,901 to \$429,843,142 or by 8.3 p.c. over 1946. The number of employees is the average based on counts made each month, and represents approximately the number of full-time positions and not the count of all persons whose names appeared on the pay roll during the year. Thus an employee working only half a year is counted as half an employee. The total pay roll, however, is the total money paid, exclusive of commissions paid to some express and telegraph employees. It does not include the value of meals, accommodation, uniforms and other supplies and services supplied to employees.

Average yearly wages paid in each class appearing in Table 3 were calculated by dividing total wages paid for the class by the average of the counts of employees made monthly. For classes which fluctuate considerably, counts were made by the larger systems four times each month. The daily or hourly averages were computed by dividing the total wages for the group by total time worked, and consequently are true weighted averages. Rates were calculated to the nearest cent, while annual earnings were to the nearest dollar.

The average salary or wages received by the 184,415 employees ranging from executive to apprentice was \$2,351 in 1947 against \$2,200 one year earlier, an average increase of \$151 or 6 p.c., and compares very favourably with the average wage paid by any industry in Canada. Responding to the impact of peace, the average number of female employees declined from 11,263 in 1946 to 10,576.

Average wages paid to the general and miscellaneous group rose from \$2,311 to \$2,438 in 1947, up 5.5 p.c., while the average days worked declined by 1 to 307 for the year. The number of employees in this group increased by 622, principally in the "clerk" class, to 25,965. Divisional officers increased from an average salary of \$4,137 to \$4,532, while executives and general officers earned \$8,576 compared with \$7,896, up 6.1 p.c.

Wages of maintenance of way and structures employees advanced to \$69,543,804 from \$65,878,571 against a decline in numbers of 450 to 37,763. Average earnings were \$1,842 compared with \$1,724 in 1946, up 6.8 p.c., while average hours worked increased by 30 during the year.

Maintenance of equipment employees averaged \$2,196 in 1947 against \$2,084 in the preceding year with hourly rates up about 6 cents. Total pay roll for the group climbed to \$98,187,920 compared with \$90,285,222, up 8.7 p.c., while the average number of employees rose from 43,323 to 44,718.

The "transportation" employees accounted for 38 p.c. of total pay roll, earning \$162,446,582, an increase of 8.8 p.c. or \$13,114,730 over the preceding year. Average earnings rose from \$2,674 to \$2,810, while employees numbered 1,966 more at 57,813. Increases were mainly in the number handling freight while employees in dining car and other passenger classes declined.

The express department was more active with 4,247 employees earning \$9,655,273 compared with 3,957 collecting \$8,421,796 during 1946. Communications reported 7,380 employees, an increase of 250 with total wages of \$14,984,076 against \$13,429,253.

Total pay roll charged to operating expenses rose to \$391,621,188, up nearly 8.7 p.c. from \$360,442,472 so debited in the preceding year.

There were 34 passengers killed in train accidents during the year compared with only 2 in 1946. The Labor Day collision at Dugald, Manitoba, accounted for 30 of these fatalities. Passenger deaths were restricted to three of the thirty-two lines operating. A total of 151 persons met death at railway crossings during 1947 compared with 113 in 1946 and twenty eight of these fatalities occurred at protected crossings, 16 happening in urban areas. The majority were riding in motor vehicles. In addition ~~346~~⁵⁰¹ persons suffered injuries at crossings against 442 one year earlier.

Decided improvement over preceding years is reflected in the number of days employees were absent due to injuries, the total having been 265,470 days during 1947 compared with 294,258 in 1946 and 331,667 days in 1945. Per employee, 1.43 days were lost in 1947 due to injuries.

There were 77 employees killed in accidents resulting from the movement of trains compared with 90 in 1946, and 26 other employees, mostly shopmen and trackmen, met death during 1947 in non-train accidents against 23 in the preceding year. The fatality rate per thousand railway employees thus stood at 0.558 for the year compared with 0.605 in 1946.

1/ Includes United States lines of the Canadian National and Canadian Pacific Railways.

2/ Does not include the Canadian lines of the Pere Marquette Railway.

3/ Of the increases during 1942, \$74,728,521 was not charged to operating expenses but resulted from the increase in book value of investment in road property to bring it up to original cost of property then owned.
