#### RAILWAY TRANSPORT

#### 1952

#### PART I

(Comparative Summary Statistics 1948 to 1952)

Part I completes the annual report of railway statistics covering operations of Canada's railways during the year 1952. The 1952 report has been issued in five parts and contains the data formerly published under the title "Steam Railways". The report has been divided into parts in order that prepared data might be issued while other statistics were still being processed. It is expected that in future reports some sections will be available for publication at a considerably earlier date than was formerly possible.

The five sections of the report are titled:

Part I - Comparative Summary Statistics 1948-1952.

Part II - Financial and Employment Statistics.

Part III - Equipment, Way and Track, and Fuel Consumption Statistics.

Part IV - Operating and Traffic Statistics.

Part V - Freight Carried - By Principal Commodity Classes.

#### Track Mileage

The entry of Newfoundland into the Canadian Confederation on April 1, 1949 increased single track mileage by 705 miles but changes in railway mileage have been otherwise small during recent years with the total single track gaining by exactly 705.1 miles between 1948 and the end of 1952. During the five year period second track was reduced 7 miles to 2,488; industrial track gained 238 to 2,130 miles and yard track and sidings increased 350 miles to 10,720 to bring the mileage of all tracks up 1,286 miles to 58,291 miles.

#### Investments, Capital, etc.

Government aid to railways totalled \$218,893,583 to the end of 1952. This total has remained unchanged since 1938 and the "Steam Railways" report for that year contained a complete table showing for each railway the sum of payments of aid from their inception to the end of 1938. Land grants at December 31, 1952 totalled 47,640,167 acres of which approximately two-thirds represented Federal grants.

Investments in road and equipment amounted to \$4,123,433,559 at the end of 1952 against \$3,600,018,153 in 1948. In the same period railway capital advanced from \$3,250 million to \$3,715 million with a rise of \$831 million in stocks and a reduction of \$363 million in funded debt. Reserves of the railways were \$790,766,566 in 1952 with road and rolling stock accounting for some \$672 million and "other properties" for \$86 million.

#### Operations

Gross earnings of the railways in 1952 were \$1,172,158,665 with rail line freight revenue of \$941,947,985 being the largest single item. Rail line passenger and express revenues totalled \$90,712,586 and \$49,658,174 respectively. In 1948 gross earnings were \$875,832,290 and included \$698,724,709 for freight, \$83,511,260 for passengers and \$32,451,950 for express from rail line operations. Operating expenses rose from \$808,126,455 in 1948 to \$1,057,186,304 in 1952 and net operating revenue from \$67,705,835 to \$114,972,361. Taxes jumped from \$19,695,531 to \$40,263,395 leaving railway operating income of \$48,010,304 in 1948 and \$74,708,966 in 1952. A drop of some \$20 million in interest on debt occasioned by the Canadian National Railways Capital Revision Act, 1952 resulted in a further improvement in the net income of all railways. In 1948 there was a net loss of \$2,180,505, but by 1951 operations resulted in a net income of \$30.853,915 and this item again increased in 1952 when the net was \$42,571,637. Dividends paid in 1952 were \$26,505,017 against \$22,928,119 in 1948.

Operating statistics show that the average mileage of single track operated during 1948 was 42,306 and in 1952 was 42,980 miles. Use of track increased as evidenced by gains from 4,239 to 4,405 locomotive miles, from 3,132 to 3,260 train miles and from 1,396,500 to 1,592,146 revenue freight ton miles per mile of road. In 1952 empty freight cars represented 31.8 p.c. of the freight train cars in freight trains compared with 28.9 p.c. in 1948 but despite this, larger freight cars and longer trains brought the average revenue tonnage per freight train up from 708 to 767 tons. The average distance a ton of freight moved in 1948 was 381 miles while by 1952 it was up to 422 miles. Passenger traffic was down with 702 persons carried per mile of road in the latest year as contrasted to 905 per mile in 1948. Passenger miles per mile of road dropped from 82.193 in 1948 to 73,319 in 1952. Longer journeys were in evidence with a gain in the average distance per passenger from 90.8 to 104.5 miles.

Rail line revenues advanced in both freight and passenger hauls. Receipt for the movement of freight advanced from 1.183 to 1.377 cents per revenue ton mile; from 32.7 to 40.35 cents per loaded freight car mile and from \$8.38 to \$10.56 per freight train mile in the five-year interval. Passenger receipts per passenger mile were up from 2.40 to 2.88 cents and per passenger car mile from 36.47 to 39.84 cents. Gross earnings per mile of road operated were \$20,702 in 1948 and \$27,272 in 1952.

#### Equipment

Table 15 showing the numbers of freight cars in service by types and by years from 1948 to 1952 has been re-stated to provide greater detail. The classes 'flat'', 'stock'', 'tank' and 'refrigerator' cars remain unchanged. 'Box' cars have been separated into 'automobile' and 'box' cars and 'coal' cars have been subdivided into four groups 'ballast', 'gondola', 'hopper' and 'ore' cars. Most of the cars formerly reported undertheheading 'other' have now been included in the latter four classes. The table indicates that most classes of cars especially hopper cars have been built with increased capacity during the past five years. The capacity of automobile cars has remained virtually unchanged while that of tank cars has been reduced slightly. The average for all cars was up from 45.0 to 46.8 tons in the five year interval.

Baggage, express and postal cars increased from 1,677 in 1948 to 2,244 in 1952 but all other passenger service cars except sleeping cars dropped in number. The total was up from 6,099 to 6,328. Company service cars gained from 16,700 to 18,170.

The locomotive picture has changed sharply. In 1948 coaland oil burning steam locomotives numbered 4,340 but this had dropped to 4,014 by 1952. Since 1950 coal burning steam locomotives were reduced from 3,730 to 3,423 while those burning oil were up from 542 to 591. C. I. oil electric (diesel) locomotive which numbered 148 in 1948 increased more than five-fold to 763 in 1952. The total was up from 4,521 to 4,810 locomotives in service.

#### Fuel, Rails and Ties

Fuel consumption for locomotive purposes in tables 18 and 19 is shown in tons equivalent of coal. The total cost rose from \$103.4 million in 1948 to \$108.6 million in 1952. Due to the use of more efficient equipment the consumption per 100 locomotive miles was reduced for all classes of locomotives. The consumption of fuel oil and diesel oil by railways for non-locomotive purposes has increased sharply.

A grand total of 494,361 short tons on rails were laid during 1952 compared with 503,322 tons in 1950 however due to the construction of new lines such as the Lynn Lake extension in Manitoba the 1952 total of rails in new track was 32,948 compared with 14,189 tons. This tonnage does not include track laid on the Quebec, North Shore and Labrador Railway.

Cross-ties placed in track were approximately the same number as in recent years but a considerably reduced board footage of switch and bridge ties were laid. Purchases of cross-ties, both hardwood and softwood, in 1952 were much above those of the previous four years.

#### Accidents

Employee injuries numbered 7,019 in 1952 compared with 7,651 in 1951 and 9,980 in 1948. Time lost from these injuries was 187,171; 199,116 and 259,057 hours respectively for the years above. This indicates a steady improvement in safety consciousness among rail employees together with better accident prevention methods.

1952 was the worst accident year in the past five with 375 deaths from train accidents as contrasted to 362 in 1951, 299 in 1950, 302 in 1949 and 352 in 1948. There were two passengers and 61 employees killed in train accidents in 1952. Injured in the 3,128 train accidents which occurred during the year, were 3,156 persons of whom 2,430 were employees and 125 were passengers.

Non-train accidents took the lives of 18 persons including 13 employees in 1952. This type of accident caused injuries to 4,753 persons among which were 4,589 employees and 58 passengers.

Highway crossing accidents resulted in 185 of the 375 fatalities resulting from train accidents. Of the 375 victims 1 was an employee, 12 were pedestrians, 169 were motorists and 3 were riding in other than motor vehicles. Injured in highway crossing accidents were 33 employees and passengers, 8 pedestrians, 418 motorists and 8 persons in other than motor vehicles for a total of 467 such injuries. These figures indicate that approximately 50 p.c. of fatalities and 15 p.c. of the persons injured in train accidents during 1952 were the victims of highway crossing accidents.

#### **Highway Crossings**

At the end of 1952 there were 5,606 urban and 27,165 rural highway crossings on railways in Canada. Of the urban crossings 1,620 had some form of protection and of the rural points 1,758 were protected crossings. Thus 71.1 p.c. of urban and 93.5 p.c. of rural crossings were unprotected and at such crossings 133 persons lost their lives and 369 were injured during 1952.
