RAILWAY TRANSPORT

1960

PART IV

(Operating and Traffic Statistics)

Presented in this report are operating and traffic statistics of all common carrier railways in Canada.

Canadian National Railways data, relative to both Canadian and United States operations, previously appearing in this and other parts of the Railway Transport Report, have been discontinued with this issue due to the unavailability of detailed information. C.N.R. System financial and operating statistics covering the years 1923 to date are presented in the report entitled, "Canadian National Railways".

Passenger and Freight Traffic

Passenger traffic on railways in Canada in 1960 continued its unbroken postwar decline. The number of revenue persons carried during the year under review dropped 6.9 per cent to 19,497,233 from 20,939,928 and passenger-miles totalled 2,263,794,875 in contrast to 2,445,654,114 a year earlier. The average passenger journey, at 116 miles, was fractionally shorter than in 1959.

The volume of revenue freight moved by rail in Canada, measured in ton-miles, declined 3.7 per cent to 65,444,784,480 during 1960 from 67,956,540,372 a year earlier and the revenue tonnage handled dropped to 178,841,002 from 186,293,633. The latter figures include 20,374,634 and 20,107,417 tons, respectively, carried by more than one railway. The average length of haul increased slightly to 366 miles in 1960 from 365 the previous year. Gross ton-miles performed by freight train cars totalled 146,062,923,497, down from 149,840,757,791. Train hours run in freight service numbered 3,152,478 in contrast to 3,454,714 in 1959.

Passenger and Freight Car Mileage

Passenger car miles travelled in revenue service during 1960 totalled 344,995,828, a 6.1 per

cent decline from 367,551,267 in 1959. Comparable mileages registered by the various classes of passenger cars during 1960 and (1959) were as follows: motor unit cars, 10,784,809 (11,005,864); coaches, 77,917,455 (82,944,322); sleeping, parlour and observation cars, 90,818,724 (97,613,311); dining cars, 15,113,634 (15,498,145); express cars, 82,563,376 (89,573,583); other head-end cars, 65,141,213 (68,262,665); and other passenger cars, 2,656,617 (2,653,377). An additional 7,144 (36,558) passenger car miles were performed in company or work train service.

Freight car miles in transportation service aggregated 3,255,743,976 in the year under review, down from 3,327,478,100 a year earlier. Of the 1960 total, loaded freight cars accounted for 2,033,423,040 miles, empty freight cars for 1,156,869,163 miles and cabooses for 65,451,773 miles. By comparison, the 1959 breakdown shows 2,109,385,501 miles loaded, 1,148,639,177 miles empty and 69,453,422 miles run by cabooses. A total of 12,104,988 (13,229,403 in 1959) freight car miles were performed in work train service.

Train and Locomotive Mileage

Train miles run in transportation service in 1960 aggregated 98,380,182, down 7.7 per cent from 106,563,378 in 1959. The 1960 total comprised 63,887,230 freight train miles (68,351,068 in 1959) and 34,492,952 (38,212,310) passenger train miles.

Locomotive miles (exclusive of switching) amounted to 93,607,977 in 1960 (102,690,676 in 1959) of which 995,193 (9,648,306) were performed by steam-powered motive equipment and 92,349,336 (92,767,665) miles by diesel locomotives. Other classes of power produced 263,448 miles in 1960 as compared with 274,705 a year earlier. Locomotive miles run in train and yard switching operations totalled 30,437,957 as against 31,686,707 in 1959.

September 27, 1961.
