# RAILWAY TRANSPORT, 1956

## PART V

### (Freight Carried by Principal Commodity Classes)

This is the first of five parts to be issued under the title, "Railway Transport, 1956". Each of the remaining four sections will be released for publication as the material is processed. The five parts comprising this report are as follows:

- Part I — Comparative Summary Statistics, 1952-1956
- Part II — Financial and Employment Statistics, 1956
- Part III — Equipment, Track and Fuel Statistics, 1956
- Part IV — Operating and Traffic Statistics, 1956
- Part V — Freight Carried by Principal Commodity Classes, 1956

Commodities reported on in 1956 are those prescribed in the Canadian Freight Commodity Statistics Classification which became effective January 1, 1954.

Water-borne imports at lake or ocean ports, which previously appeared in the column, "Received from foreign connections", are included under the heading, "Loaded at points in Canada" in 1956. This change makes possible an analysis of traffic entering the country by rail from the United States, divided between goods destined to points in Canada and goods which merely pass through Canada.

Also, presented in this report for the first time are details concerning the volume of freight terminated at points in Canada and that delivered to United States rail connections. In addition, a column providing the number of carloads for each commodity has been included, thus giving a more detailed picture of the movement of freight in Canada. The column, "Received from other roads in Canada" has been eliminated from this report.

#### Table 1 Summary:

During 1956 a total of 189,608,272 tons of revenue freight were loaded in Canada or were received from U.S. rail connections, up 13.0 per cent from 167,862,156 tons in the previous year. The movement of mine products accounted for 41.2 per cent of the total in 1956 with 78,169,502 tons; manufactures and miscellaneous commodities, 28.1 per cent with 53,340,236 tons; agricultural products, 18.3 per cent with 34,770,962 tons; forest products, 10.0 per cent with 18,958,045 tons; less than carload (l.c.l.) freight, 1.2 per cent with 2,284,323 tons; and animals and animal products,

1.1 per cent with 2,085,204 tons. Freight unloaded by railways operating in Canada during 1956, including terminations at points in Canada as well as deliveries to U.S. rail connections, totalled 188,959,913 tons.

As in previous years, wheat of the agricultural products group was the commodity carried in greatest volume with a tonnage of 16,325,517, almost 5 million tons more than the 11,421,085 moved a year earlier. Other agricultural commodities carried in substantial quantities included: mill products, n.o.s. (not otherwise specified) 3,894,092 tons as against 2,901,298; barley 3,635,185 tons compared with 2,817,460; and agricultural products, n.o.s. 2,137,519 from 1,755,064 tons.

Only a slight increase in tonnage occurred in the movement of animals and animal products during the year with 2,085,204 tons loaded in comparison with 2,065,582 a year ago. Among commodities carried in greater volume were cattle and calves, butter, cheese and eggs, hides and animal products, n.o.s., while hogs, and edible packing house products n.o.s. were two showing declines in traffic.

Iron ore and concentrates and bituminous coal accounted for nearly half of the 78 millions tons of mine products transported by rail in 1956. Iron ore and concentrates rose significantly to 19,935,587 tons from 13,978,505 a year earlier, while the volume of bituminous coal increased slightly to 15,875,557 from 15,367,402. Other commodities, including copper-nickel (nickel) ore and concentrates, stone and rock, crude gypsum and mine products, not otherwise specified, were among those showing increases during 1956. Bauxite (aluminum) ore and concentrates and common sand and gravel were the two main commodities for which decreases were reported.

Of the 18,958,045 tons of forest products loaded by the industry, 8,353,301 tons were of lumber, timber, lath and shingles and 7,172,754 tons were pulpwood. This compares with 8,469,824 and 6,018,071 tons respectively in 1955.

All but three of the commodities in the manufactures and miscellaneous group registered increases over previous year tonnages. Those items moved in reduced volume were rubber, automobiles and parts and sugar. Commodity loadings showing greatest gains were gasoline, fuel oil, and iron and steel (bar, pipe, sheet or structural).

## RAILWAY TRANSPORT

TABLE 1. Summary of Railway Freight Traffic for the Year Ended December 31, 1956

Commodities	Originated					Terminated	
	Loaded at points in Canada	Loaded at points in Canada	Received from U.S. rail connections	Total 1956	Total 1955	Unloaded at points in Canada	Delivered to U.S. rail connections
	Carloads					Tons	
<b>Group I — Agricultural products:</b>							
Wheat .....	292,157	15,774,264	551,253	16,325,517	11,421,085	16,197,782	640,922
