PREFACE

Annual railway transport statistics in Canada are published in a series of six reports each of which covers specific aspects of the industry; services rendered, equipment available, traffic handled, the labour force involved and the financial aspects of railways operating in this country.

Statistics on railways have been collected and published in Canada since 1875, first by the Department of Railways and Canals until 1918, and Statistics Canada since its inception in 1918. During this time the data have been published in varying degrees of detail. Until 1950 one volume contained all this annual railway statistical data. In 1951 there were three; 1952-1957 there were five, and since 1958 six separate parts have been used to reflect these annual operations. The present report encompasses the following six parts which are not necessarily released in the order they are numbered.

Part

- I. Railway Transport – Summary Statistics (Five years)
- II. Railway Transport – Financial Statistics
- III. Railway Transport – Equipment, Track and Fuel Statistics
- IV. Railway Transport – Operating and Traffic Statistics
- V. Railway Transport – Commodity Statistics
- VI. Railway Transport – Employment Statistics.

Several other annual reports and four periodicals dealing with rail transportation are also available. A list of all titles published in this field is located on the outside back cover of each report.

Statistics Canada is indebted to the individual railway companies operating across the nation which have prepared and submitted their data for inclusion in this statistical series; to the Railway Association of Canada for its cooperation; and to the Railway Transport Committee of the Canadian Transport Commission, with which joint collection arrangements exist, for their promotion of the uniform accounting principles used for rail statistical purposes.

This report has been prepared by the Transportation Section of the Transportation and Communications Division of Statistics Canada. Any inquiries or comments respecting data contained herein, or to unpublished detail, should be forwarded to this Section.

SYLVIA OSTRY,
Chief Statistician of Canada.

PRÉFACE

Les statistiques annuelles du transport ferroviaire au Canada sont publiées dans six bulletins dont chacun traite d'un secteur particulier de cette branche d'activité: les services, le matériel, le fret transporté, la main-d'oeuvre et les aspects financiers de l'exploitation ferroviaire.

Les statistiques sur les chemins de fer ont été recueillies et publiées au Canada depuis 1875, tout d'abord par le ministère des Chemins de fer et canaux jusqu'en 1918, puis par Statistique Canada depuis sa création en 1918. Pendant cette période, les données ont été publiées d'une manière plus ou moins détaillée. Jusqu'en 1950, il n'y avait qu'un volume pour toutes ces données statistiques annuelles sur les chemins de fer. En 1951, il y en avait trois; de 1952 à 1957 il y en avait cinq; depuis 1958, le bulletin est divisé en six parties qui correspondent chacune à une des publications suivantes (il faut noter toutefois que ces publications ne paraissent pas nécessairement dans l'ordre).

Partie

- I. Transport ferroviaire – Résumé (cinq ans)
- II. Transport ferroviaire – Statistiques financières
- III. Transport ferroviaire – Statistiques du matériel, des voies et du carburant
- IV. Transport ferroviaire – Statistiques de l'exploitation et du trafic
- V. Transport ferroviaire – Statistiques des marchandises
- VI. Transport ferroviaire – Statistiques de l'emploi.

On peut aussi obtenir plusieurs autres bulletins annuels et quatre périodiques sur le transport ferroviaire. La liste de ces bulletins figure au dos de la couverture de chaque bulletin.

Statistique Canada remercie vivement les différentes sociétés ferroviaires du Canada qui ont établi des données et les lui ont remises pour qu'elles soient publiées dans les séries statistiques, l'Association des chemins de fer du Canada et le Comité des transports par chemin de fer de la Commission canadienne des Transports, qui, en vertu des accords existants, ont participé à la collecte des données et se sont employés à uniformiser les systèmes de comptabilité utilisés dans la statistique ferroviaire.

Ce bulletin a été préparé par la section des transports de la Division des transports et des communications de Statistique Canada. Les demandes de renseignements et les commentaires devront donc être adressés à cette dernière.

Le statisticien en chef du Canada,
SYLVIA OSTRY.

INTRODUCTION

Presented herein are revenue freight commodity statistics for the year 1972 as reported by all common carrier railways operating in Canada. Details are shown for 320 classes of commodities with individual company data provided for the 9 largest roads.

Statistical Analysis

Railways in Canada carried a total of 237.9 million tons of revenue freight during 1972 reflecting a small gain of 0.6% or 1.5 million tons over 1971. This marginal increase during a year of relatively high business activity in Canada was primarily due to labour difficulties at Quebec iron mines during the summer and a resulting decline of nearly 10 million tons of iron ore. Offsetting increases were recorded in a number of carload commodities including, wheat, coal, lumber and gypsum.

Following is a tabular analysis showing the composition of the above total rail carrying by type of traffic and by major commodity group.

La présente publication contient des données statistiques sur le trafic marchandises commercial de l'ensemble des sociétés ferroviaires pour l'année 1972. Les statistiques sont détaillées suivant une ventilation de 320 marchandises et des données séparées sont fournies pour les 9 principales compagnies de chemin de fer.

Analyse statistique

Les chemins de fer canadiens ont transporté en 1972 un total de 237.9 millions de tonnes de trafic marchandises, soit une légère augmentation de 0.6% (ou 1.5 millions de tonnes) par rapport à 1971. Cette faible augmentation, au cours d'une année d'activité commerciale assez intense au Canada, est attribuable principalement à des difficultés ouvrières dans les mines de fer du Québec pendant l'été et à la baisse de production d'environ 10 millions de tonnes de minerai de fer qui s'ensuivit. Des hausses compensatrices ont été enregistrées dans un bon nombre de marchandises à chargement y compris le blé, le charbon, le bois de construction et le gypse.

Le tableau suivant fournit une ventilation du volume total de marchandises transportées par genre de trafic et par groupe principal de marchandise.

Non-carload freight - Chargements de détail	1,432,551	1,334,839	+ 7.3
Grand - Total - Général	237,909,761	236,410,148	+ 0.6

Domestic loadings (including freight received from United States rail connections) rose by less than 0.5%, while receipts from U.S. railways were up 2.9%. A marked rise in the overhead movement of bituminous coal (from U.S. to U.S. points) contributed substantially to the latter increase.

Of the seven major commodity groups, special types of traffic recorded the largest gain in total carryings, rising 25.0%. Accounting for most of this increase was container and trailer piggyback freight.

Both non-carload movements (small shipments of less than a carload) and non-edible end products rose

Les chargements nationaux (y compris les marchandises en provenance d'un raccordement aux États-Unis) ont augmenté de 0.5%, alors que les marchandises en provenance des États-Unis ont augmenté de 2.9%. Une augmentation sensible du mouvement général des chargements de charbon bitumineux (en provenance des États-Unis et destinés à des localités américaines) a largement contribué à cette dernière augmentation.

Les transports spéciaux ont enregistré la plus forte hausse de marchandises transportées parmi les sept principaux groupes de marchandises, soit 25.0%. La plus grande partie de cette hausse est attribuable au trafic rail-route de marchandises en conteneur ou en remorque.

Le trafic des chargements de détail (petites livraisons de moins d'un chargement) et des produits finis non

by 7.3%. As in the previous year, motor vehicles and parts were mainly responsible for the increase in the latter category.

Food, feed, beverages and tobacco registered an increase of 6.8% as wheat and other grains continued their upward trend of the previous two years. Significant gains were also recorded for food preparations and related materials and malt and malt flour. Movements of sugar beets were notably lower in 1972.

Considerably heavier rail movements of cattle more than offset a decline of nearly 50% in swine, leaving the live animals category with a 6.6% increase over 1971.

A moderate rise of 4.9% was registered in the fabricated materials, inedible group with the volume of lumber carried by rail being a dominant factor in that increase. Paper, paper products, fertilizers and fertilizer materials, refined and manufactured gases fuel type (L.P.G.) also showed fairly sizeable gains.

Tonnage increases were recorded in movements of such inedible crude materials as bituminous coal, pulpwood chips and sulphur. These were not sufficient however, to offset the sharp decline in iron ore which resulted from strikes at iron mines in Quebec during the year. As a result, this commodity group showed an overall net decline of 5.5% in 1972.

Concepts and Methodology

A "common carrier" as referred to in this publication series refers to one which holds itself out to the general public to transport passengers and/or goods for compensation.

Railways serving both Canadian and United States points treat the American portion of their line as a U.S. rail connection for the purposes of these tabulations. Thus freight crossing the International Boundary, whether from or to a non-reporting U.S. railroad at that point, or carried by one of the respondents reporting in this series, appears as a receipt from or a delivery to a U.S. rail connection. Certain extensions of Canadian National and Canadian Pacific rail services in the United States (72 and 267 miles, respectively, in 1972) are, for statistical purposes, considered part of Canadian operations and included herein. These mileages include, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting U.S. carriers.

Freight interchanged between railways in Canada is shown in this report. These movements are included in the totals for individual railways but not in the

comestibles ont tous deux augmenté de 7.3 %. Comme c'était le cas l'année précédente, les véhicules automobiles et les pièces ont largement contribué à cette hausse.

Les aliments, les provendes, les boissons et le tabac ont enregistré une augmentation de 6.8 % alors que les chargements de blé et d'autres céréales poursuivaient leur tendance à la hausse des deux dernières années. Les ingrédients alimentaires et les ingrédients connexes, ainsi que le malt et la farine de malt, ont aussi enregistré des gains importants. Les betteraves à sucre ont accusé une baisse perceptible par rapport à 1972.

Des chargements ferroviaires beaucoup plus importants de bétail ont plus que contrebalancé une baisse de presque 50 % dans les chargements de porcs, la catégorie des animaux vivants accusant ainsi une hausse de 6.6 % par rapport à 1971.

Les chargements de demi-produits non comestibles ont enregistré une augmentation modérée de 4.9 % pour laquelle les chargements de bois de charpente transportés par rail sont largement responsables. Le papier, les produits du papier, les engrais et les gaz raffinés (combustible) ont aussi accusé des gains assez importants.

On a enregistré des augmentations du volume de matières brutes non comestibles telles que le charbon bitumineux, les copeaux de bois à pâtes et le soufre. Ces augmentations n'étaient cependant pas assez importantes pour contrebalancer la très forte baisse du minerai de fer, résultat des grèves des travailleurs des mines de fer du Québec au cours de l'année. Par conséquent, ce groupe de marchandise a accusé une baisse totale de 5.5 % en 1972.

Concepts et méthodologie

Dans le présent bulletin, un "transporteur public" est une société ferroviaire qui offre ses services au grand public pour le transport de personnes ou de marchandises moyennant rétribution.

Dans les tableaux ci-dessous, les sociétés ferroviaires qui desservent des localités au Canada et aux États-Unis considèrent la partie située aux États-Unis comme faisant partie de ce pays. Ainsi, une marchandise qui traverse la frontière internationale, en provenance ou à destination d'un chemin de fer américain non enquêté à cet endroit ou une marchandise transportée par l'un des enquêtés est inscrite comme une marchandise en provenance ou à destination d'un raccordement aux États-Unis. Certains prolongements du Canadien National et du Canadien Pacifique aux États-Unis (72 milles et 267 milles respectivement en 1972) sont considérés comme canadiens et inclus pour des fins statistiques. Dans la majorité des cas, il s'agit de mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

Ce bulletin tient compte des marchandises acheminées par plus d'une société ferroviaire au Canada. Ces mouvements sont compris dans les totaux de chaque

grand totals for all railways in order to avoid duplication. The tonnages shown for an individual railway therefore reflects the volume handled by that railway during the year and thus corresponds more closely to the financial data published in Parts I and II of this series. Table I gives a summary of freight traffic for the year and includes totals for the year under review and the previous year, excluding duplications. Total freight carried as shown herein does not take into account traffic handled in intermediate switching service, while total revenue tons carried appearing in Part IV of this annual series does include this type of movement. Consequently, these two figures differ to this extent.

With respect to *piggyback traffic*, it should be noted that the figures thus reported include only that traffic wherein a shipper submitted a trailer or a container as such, for shipment by rail. Not included under piggyback traffic is freight which was submitted by the shipper as loose merchandise and which the railways chose to move in a railway-owned container or trailer on a flat car rather than in, say, a box car. This latter traffic is included under various other commodity groups according to the nature of the merchandise involved.

The terms used in the columnar headings throughout this publication reflects the following instructions to the railways.

“Loaded” means: (a) revenue freight originated directly on the road of the respondent, including that received from private, non-reporting industrial sidings; (b) freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; (c) freight received from other modes of transport; (d) freight re-shipped following milling or fabrication at some point in transit; (e) idler or trailer cars.

“Received from other railways in Canada” means: traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

“Received from U.S. rail destined to Canadian points” means: traffic received from United States rail connections, or transported across the border by the respondent, destined to Canadian points.

société ferroviaire mais ne figurent pas dans le total général pour toutes les sociétés ferroviaires afin d'éviter tout double compte. Les tonnes totales de marchandises indiquées pour une société ferroviaire reflètent donc le volume manutentionné par cette société au cours de l'année; ils correspondent ainsi plus fidèlement aux données financières paraissant aux Parties I et II de cette série. Le Tableau I fournit un sommaire du trafic marchandises pour l'année et comprend le total général pour l'année de l'enquête et l'année précédente, mais évite le double décompte. Le total des marchandises transportées, comme il est indiqué ici, ne tient pas compte du trafic faisant l'objet de raccordements intermédiaires, tandis que les chiffres sur le poids total de fret payant transporté paraissant à la Partie IV de cette série annuelle comprennent ce genre de mouvement. En conséquence, ces deux chiffres diffèrent jusqu'à un certain point.

En ce qui concerne le *trafic rail-route* il est à noter que les chiffres contenus dans cette publication ne portent que sur le trafic pour lequel un expéditeur fait demande de livraison par voie ferrée d'une remorque ou d'un conteneur comme tel. Non compris sous la rubrique “trafic rail-route” les marchandises qui sont envoyées en vrac par l'expéditeur et que la société ferroviaire choisit de transporter dans un conteneur ou une remorque (dont le propriétaire est une société ferroviaire) sur un wagon plat plutôt que dans un wagon couvert, par exemple. Ce genre de trafic est compris sous divers autres groupes de produits selon la nature de la marchandise transportée.

Les expressions utilisées dans les en-têtes du présent bulletin proviennent des directives suivantes adressées aux sociétés ferroviaires.

“Chargées” signifie: a) transport commercial de marchandises effectué directement sur une ligne de l'enquête, y compris les marchandises provenant d'embranchements privés non enquêtés; b) marchandises provenant de voies d'aiguillage reliées à celles de l'enquête lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; c) marchandises provenant d'autres modes de transport; d) marchandises réexpédiées après usinage ou transformation en cours de route; e) wagons-allonges.

“Provenant d'autres sociétés ferroviaires du Canada” signifie: marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un transport ferroviaire antérieur est indiqué.

“Provenant de voies des États-Unis et destinées à des localités canadiennes” signifie: marchandises provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquête et destinées à des localités canadiennes.

“Received from U.S. rail destined to U.S. points” means: freight moving from United States rail connections to points in the United States (overhead traffic).

“Unloaded” means: (a) freight terminated directly on the road of the respondent, including that delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; (b) freight delivered to switching roads connecting with the respondent where there is no further line haul; (c) freight delivered to other modes of transport; (d) freight unloaded for milling or fabrication at some point in transit.

“Delivered to other railways in Canada” means: traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

“Delivered to U.S. rail” means: (a) traffic delivered to United States rail connections or transported across the border by the respondent; (b) deliveries to United States rail connections of freight originated in the U.S. and moved overhead through Canada.

To eliminate duplicate reporting and to uncover statistical gaps, the Statistics Canada uses the Canadian Standard Industrial Classification (S.I.C.) which provides a set of groups and classes suitable for the compilation of statistics related to different industries. The building block (reporting unit) which is fitted into the above structure is the “establishment”. An establishment can be defined as the smallest unit which is a separate operating entity capable of reporting principal elements of input and output. While the establishment is typically a factory, mine, store or similar unit and in most cases is a separate firm it may encompass two or more operating units which are not necessarily in the same location. It can also be an individual working on his own account.

Industry 503 (formerly 506), Railway Transport, as classified in the S.I.C. includes establishments primarily engaged in operating railways. The kinds of activities normally carried on by railway establishments embraces the operation of railway freight and passenger trains, commuter service (but not street railways), maintenance of way and structures, maintenance of equipment (including that carried on in railway shops) dining car and sleeping car services, express and the operation of railway terminal facilities. Road transportation services operated by railway establishments and providing pick-up and delivery for the freight or

“Provenant de voies des États-Unis et destinées à des localités américaines” signifie: marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

“Déchargées” signifie: a) marchandises livrées directement à partir d'une ligne de l'enquêté, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; b) marchandises livrées à des voies d'aiguillage reliées à celles de l'enquêté au point où à partir duquel plus aucun transport n'a eu lieu; c) marchandises livrées à d'autres modes de transport; d) marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

“Livrées à des chemins de fer du Canada” signifie: a) marchandises livrées directement à des raccordements ferroviaires du Canada et marchandises livrées à d'autres modes de transport (autres que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un autre transport ferroviaire subséquent est indiqué.

“Livrées à des chemins de fer des États-Unis” signifie: a) marchandises livrées à des raccordements ferroviaires des États-Unis ou transportées au-delà de la frontière par l'enquêté; b) livraisons à des raccordements ferroviaires des États-Unis de marchandises provenant des États-Unis et passant par le Canada.

Afin d'empêcher qu'il ait double déclaration et afin de découvrir les lacunes statistiques, Statistique Canada utilise la Classification des activités économiques (C.A.E.) qui fournit des groupes et des classes convenant au calcul de statistiques portant sur diverses activités économiques. Le groupe (unité déclarante) que l'on insère dans la structure ci-dessus est l'“établissement”. Un établissement peut se définir comme la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer les éléments utilisés et produits. Un établissement sera une usine, une mine, un magasin ou une unité semblable et la plupart du temps une entreprise séparée mais il peut englober deux unités ou plus qui ne sont pas nécessairement au même endroit. Il peut s'agir aussi d'une personne travaillant à son propre compte.

L'activité économique 503 (autrefois 506), transports ferroviaires, comprend, selon la C.A.E., les établissements dont l'activité principale est l'exploitation de chemins de fer. Les activités habituelles de ces établissements ferroviaires comprennent le transport de passagers et de marchandises, les services aux banlieues (mais ni les chemins de fer urbains ou ni les tramways), l'entretien de la voie et des ouvrages, l'entretien du matériel (y compris le travail effectué dans les ateliers des chemins de fer), les services de wagons-restaurants et de wagons-lits, les services de messageries et l'exploitation de terminus ferroviaires. Les services de transport routier exploités par

Express services of the railway are included in this industry but long distance trucking operations owned by railway companies are usually set up as separate establishments classified to the trucking industry.

As in previous years statistical details relating to individual railways have been confined to those with gross operating revenues of \$8 million or more annually. The remaining railways are grouped under "other" within the respective accounting classes defined in the Canadian Transport Commission's Uniform Classification of Accounts. These classes are outlined in *Railway Transport, Part II, Catalogue 52-208*.

des établissements ferroviaires et fournissant des services de ramassage et de livraison de marchandises ou les services de messageries des chemins de fer sont inclus dans cette activité économique. Toutefois, le camionnage interurbain effectué par des sociétés ferroviaires constitue habituellement un établissement séparé, classé avec le camionnage.

Comme pour les années passées, les données détaillées concernant des sociétés ferroviaires particulières ont été limitées aux entreprises qui avaient des recettes brutes d'exploitation de 8 millions de dollars ou plus par année. Les autres sociétés ferroviaires sont groupées sous la rubrique "autres" selon leur classe respective tel que définie dans la **Classification uniforme des comptes** de la Commission canadienne des transports. Ces classes sont décrites dans la publication intitulée *Railway Transport Part II* (catalogue 52-208).
