PREFACE

Annual railway transport statistics in Canada are published in a series of six reports each of which covers specific aspects of the industry; services rendered, equipment available, traffic handled, the labour force involved and the financial aspects of railways operating in this country.

Statistics on railways have been collected and published in Canada since 1875, first by the Department of Railways and Canals until 1918, and Statistics Canada since its inception in 1918. During this time the data have been published in varying degrees of detail. Until 1950 one volume contained all this annual railway statistical data. In 1951 there were three; 1952-1957 there were five, and since 1958 six separate parts have been used to reflect these annual operations. The present report encompasses the following six parts which are not necessarily released in the order they are numbered.

Part

- I. Railway Transport – Summary Statistics (Five years)
- II. Railway Transport – Financial Statistics
- III. Railway Transport – Equipment, Track and Fuel Statistics
- IV. Railway Transport – Operating and Traffic Statistics
- V. Railway Transport – Commodity Statistics
- VI. Railway Transport – Employment Statistics.

Several other annual reports and four periodicals dealing with rail transportation are also available. A list of all titles published in this field is located on the outside back cover of each report.

Statistics Canada is indebted to the individual railway companies operating across the nation which have prepared and submitted their data for inclusion in this statistical series; to the Railway Association of Canada for its cooperation; and to the Railway Transport Committee of the Canadian Transport Commission, with which joint collection arrangements exist, for their promotion of the uniform accounting principles used for rail statistical purposes.

This report has been prepared by the Surface Transport Section of the Transportation and Communications Division of Statistics Canada. Any inquiries or comments respecting data contained herein, or to unpublished detail, should be forwarded to this Section.

SYLVIA OSTRY,
Chief Statistician of Canada.

PRÉFACE

Les statistiques annuelles du transport ferroviaire au Canada sont publiées dans six bulletins dont chacun traite d'un secteur particulier de cette branche d'activité: les services, le matériel, le fret transporté, la main-d'oeuvre et les aspects financiers de l'exploitation ferroviaire.

Les statistiques sur les chemins de fer ont été recueillies et publiées au Canada depuis 1875, tout d'abord par le ministère des Chemins de fer et canaux jusqu'en 1918, puis par Statistique Canada depuis sa création en 1918. Pendant cette période, les données ont été publiées d'une manière plus ou moins détaillée. Jusqu'en 1950, il n'y avait qu'un volume pour toutes ces données statistiques annuelles sur les chemins de fer. En 1951, il y en avait trois; de 1952 à 1957 il y en avait cinq; depuis 1958, le bulletin est divisé en six parties qui correspondent chacune à une des publications suivantes (il faut noter toutefois que ces publications ne paraissent pas nécessairement dans l'ordre).

Partie

- I. Transport ferroviaire – Résumé (cinq ans)
- II. Transport ferroviaire – Statistiques financières
- III. Transport ferroviaire – Statistiques du matériel, des voies et du carburant
- IV. Transport ferroviaire – Statistiques de l'exploitation et du trafic
- V. Transport ferroviaire – Statistiques des marchandises
- VI. Transport ferroviaire – Statistiques de l'emploi.

On peut aussi obtenir plusieurs autres bulletins annuels et quatre périodiques sur le transport ferroviaire. La liste de ces bulletins figure au dos de la couverture de chaque bulletin.

Statistique Canada remercie vivement les différentes sociétés ferroviaires du Canada qui ont établi des données et les lui ont remises pour qu'elles soient publiées dans les séries statistiques, l'Association des chemins de fer du Canada et le Comité des transports par chemin de fer de la Commission canadienne des Transports, qui, en vertu des accords existants, ont participé à la collecte des données et se sont employés à uniformiser les systèmes de comptabilité utilisés dans la statistique ferroviaire.

Ce bulletin a été préparé par la Section des transports de surface de la Division des transports et des communications de Statistique Canada. Les demandes de renseignements et les commentaires devront donc être adressés à cette dernière.

Le statisticien en chef du Canada,
SYLVIA OSTRY.

INTRODUCTION

Presented herein are revenue freight statistics for the year 1973 as reported by all common carrier railways operating in Canada. Details are shown for 320 classes of commodities with individual data provided for nine of the larger companies.

Statistical Analysis

The volume of freight carried by all railways in 1973 totalled 265.9 million tons, an increase of 28.0 million tons or 11.8% over 1972. This improvement in traffic occurred notwithstanding labour difficulties which interrupted regional traffic flows on a rotating basis throughout most of the summer and a nationwide strike which affected the operations of seven major railways (including Canadian National and Canadian Pacific) from August 23 to September 2.

A tabular analysis follows showing the composition of the above total rail freight hauled, by type of traffic and by major commodity group.

La présente publication contient des données statistiques sur le trafic marchandises commercial de l'ensemble des transporteurs publics ferroviaires en activité au Canada. Les statistiques sont détaillées suivant une ventilation de 320 classes de marchandises; neuf des plus grandes entreprises font l'objet de données individuelles.

Analyse statistique

Le volume de marchandises transportées par l'ensemble des chemins de fer en 1973 a atteint 265.9 millions de tonnes, soit 28.0 millions de tonnes ou 11.8 % de plus qu'en 1972. Cette amélioration a eu lieu en dépit des grèves tournantes qui ont bouleversé les transports régionaux pendant la plus grande partie de l'été et en dépit d'une grève nationale qui a fait cesser les opérations de sept grandes entreprises (y compris le Canadien National et le Canadien-Pacifique) du 23 août au 2 septembre.

Voici un tableau indiquant la composition du total ci-dessus de marchandises transportées, par genre de trafic et par principal groupe de marchandises.

	Tons - Tonnes		Change - Variation %

Grand - Total - Général	265,945,725	237,909,761	+ 11.8

Loadings in Canada at 240.0 million tons were up 12.4% from the preceding year and traffic received from United States connections rose 6.0% to 26.0 million tons. Of the latter tonnage 16.8 million (12.7 million tons in 1972) were destined to Canadian points. The remaining 9.2 million tons received from the U.S. in 1973 (11.1 million a year earlier) moved intransit through Canada. Not included in the above table are 38.3 million tons of freight interchanged between Canadian lines in 1973 and 36.6 million tons in 1972.

Crude materials, which in 1973 accounted for 52.0% of all traffic carried by rail, registered the largest gain over the previous year with a 23.9% increase to

Les chargements au Canada (240.0 millions de tonnes) étaient en progression de 12.4 % par rapport à l'année précédente et les marchandises reçues de raccordements aux États-Unis ont augmenté de 6.0 % pour atteindre 26.0 millions de tonnes. Sur ce dernier tonnage, 16.8 millions de tonnes (12.7 millions en 1972) étaient à destination de points situés au Canada. Les 9.2 millions d'autres tonnes en provenance des États-Unis en 1973 (11.1 millions un an plus tôt) sont passées en transit par le Canada. Le tableau ci-dessus ne prend pas en compte 38.3 millions de tonnes de marchandises transportées par plus d'un chemin de fer canadien en 1973, contre 36.6 millions de tonnes en 1972.

Les matières brutes, qui en 1973 représentaient 52.0 % de l'ensemble des marchandises transportées par chemin de fer, ont enregistré l'accroissement le plus

138.2 million tons. This increase was due primarily to a heavier volume of iron ore movements (19.9 million tons over 1972). It should be noted however that 1972 shipments of this commodity were down as a result of labour difficulties at iron mines in Northeastern Quebec.

Non-carload freight (small shipments of less than a carload) were up 15.5% and special types of traffic rose 14.8%. A sharp increase in mixed carload freight and a moderate rise in containerized loadings were mainly responsible for the improvement registered in the latter category.

Inedible end products, again reflecting higher volume movements of motor vehicles, engines and parts, increased 10.7% and fabricated materials were up by 5.3%. Gains in potash, kerosene, refined and manufactured gases (L.P.G.), cement and woodpulp were dominant factors in the latter increase. Carrying of lumber were below the year earlier level.

The only two major commodity groups showing declines were live animals with a 15.3% drop and food, feed, beverages and tobacco, down 11.1%. Lighter loadings of cattle were mainly responsible for the decrease in the first instance, while a reduction in the haulage of wheat and other grains accounted for the greater share of the decline in the latter category.

Concepts and Methodology

A "common carrier" as referred to in this publication series refers to one which holds itself out to the general public to transport passengers and/or goods for compensation.

Railways serving both Canadian and United States points treat the American portion of their line as a U.S. rail connection for the purposes of these tabulations. Thus freight crossing the International Boundary, whether from or to a non-reporting U.S. railroad at that point, or carried by one of the respondents reporting in this series, appears as a receipt from or a delivery to a U.S. rail connection. Certain extensions of Canadian National and Canadian Pacific rail services in the United States (72 and 267 miles, respectively, in 1973) are, for statistical purposes, considered part of Canadian operations and included herein. These mileages include, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting U.S. carriers.

Freight interchanged between railways in Canada is shown in this report. These movements are included in the totals for individual railways but not in the

considérable sur l'année précédente, atteignant 138.2 millions de tonnes, soit une augmentation de 23.9%. Cette augmentation était due surtout à un accroissement du volume de minerai de fer (19.9 millions de tonnes de plus par rapport à 1972). À noter toutefois que les livraisons de 1972 de cette marchandise avaient été faibles en raison des conflits du travail survenus aux mines de fer du nord-est québécois.

Les chargements de détail (petites livraisons de moins d'un chargement complet) étaient en augmentation de 15.5% et les transports spéciaux, de 14.8%. Une augmentation marquée des marchandises en chargement mixte et une augmentation modérée des chargements conteneurisés sont les principales causes de la progression qu'a connue cette dernière catégorie.

Les produits finis non comestibles, traduisant encore une fois un accroissement du volume des mouvements de véhicules à moteur, de moteurs et de pièces, ont augmenté de 10.7% et les demi-produits ont progressé de 5.3%. Des accroissements dans la potasse, le kérosène, les gaz raffinés et manufacturés (G.P.L.), le ciment et la pâte à papier ont été des facteurs dominants de cette dernière augmentation. Les transports de bois de construction ont été inférieurs au niveau de l'année précédente.

Les deux seuls autres grands groupes de marchandises à avoir accusé des baisses sont les animaux vivants (- 15.3%) et les aliments, provendes, boissons et tabacs (- 11.1%). La diminution des chargements de bovins a été la principale cause de la diminution dans le premier cas, tandis qu'une réduction dans les transports du blé et d'autres céréales représentaient le principal facteur de la baisse dans la dernière catégorie.

Concepts et méthodologie

Dans le présent bulletin, un "transporteur public" est une société ferroviaire qui offre ses services au grand public pour le transport de personnes ou de marchandises moyennant rétribution.

Dans les tableaux ci-dessous, les sociétés ferroviaires qui desservent des localités au Canada et aux États-Unis considèrent la partie située aux États-Unis comme faisant partie de ce pays. Ainsi, une marchandise qui traverse la frontière internationale, en provenance ou à destination d'un chemin de fer américain non enquêté à cet endroit ou une marchandise transportée par l'un des enquêtés est inscrite comme une marchandise en provenance ou à destination d'un raccordement aux États-Unis. Certains prolongements du Canadien National et du Canadien Pacifique aux États-Unis (72 milles et 267 milles respectivement en 1973) sont considérés comme canadiens et inclus pour des fins statistiques. Dans la majorité des cas, il s'agit de mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

Ce bulletin tient compte des marchandises acheminées par plus d'une société ferroviaire au Canada. Ces mouvements sont compris dans les totaux de chaque

grand totals for all railways in order to avoid duplication. The tonnages shown for an individual railway therefore reflects the volume handled by that railway during the year and thus corresponds more closely to the financial data published in Parts I and II of this series. Table I gives a summary of freight traffic for the year and includes totals for the year under review and the previous year, excluding duplications. Total freight carried as shown herein does not take into account traffic handled in intermediate switching service, while total revenue tons carried appearing in Part IV of this annual series does include this type of movement. Consequently, these two figures differ to this extent.

With respect to *piggyback traffic*, it should be noted that the figures thus reported include only that traffic wherein a shipper submitted a trailer or a container as such, for shipment by rail. Not included under piggyback traffic is freight which was submitted by the shipper as loose merchandise and which the railways chose to move in a railway-owned container or trailer on a flat car rather than in, say, a box car. This latter traffic is included under various other commodity groups according to the nature of the merchandise involved.

The terms used in the columnar headings throughout this publication reflects the following instructions to the railways.

"Loaded" means: (a) revenue freight originated directly on the road of the respondent, including that received from private, non-reporting industrial sidings; (b) freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; (c) freight received from other modes of transport; (d) freight re-shipped following milling or fabrication at some point in transit; (e) idler or trailer cars.

"Received from other railways in Canada" means: traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

"Received from U.S. rail destined to Canadian points" means: traffic received from United States rail connections, or transported across the border by the respondent, destined to Canadian points.

société ferroviaire mais ne figurent pas dans le total général pour toutes les sociétés ferroviaires afin d'éviter tout double compte. Les tonnes totales de marchandises indiquées pour une société ferroviaire reflètent donc le volume manutentionné par cette société au cours de l'année; ils correspondent ainsi plus fidèlement aux données financières paraissant aux parties I et II de cette série. Le tableau I fournit un sommaire du trafic marchandises pour l'année et comprend le total général pour l'année de l'enquête et l'année précédente, mais évite le double décompte. Le total des marchandises transportées, comme il est indiqué ici, ne tient pas compte du trafic faisant l'objet de raccordements intermédiaires, tandis que les chiffres sur le poids total de fret payant transporté paraissant à la partie IV de cette série annuelle comprennent ce genre de mouvement. En conséquence, ces deux chiffres diffèrent jusqu'à un certain point.

En ce qui concerne le *trafic rail-route* il est à noter que les chiffres contenus dans cette publication ne portent que sur le trafic pour lequel un expéditeur fait demande de livraison par voie ferrée d'une remorque ou d'un conteneur comme tel. Non compris sous la rubrique "trafic rail-route" les marchandises qui sont envoyées en vrac par l'expéditeur et que la société ferroviaire choisit de transporter dans un conteneur ou une remorque (dont le propriétaire est une société ferroviaire) sur un wagon plat plutôt que dans un wagon couvert, par exemple. Ce genre de trafic est compris sous divers autres groupes de produits selon la nature de la marchandise transportée.

Les expressions utilisées dans les en-têtes du présent bulletin proviennent des directives suivantes adressées aux sociétés ferroviaires.

"Chargées" signifie: a) transport commercial de marchandises effectué directement sur une ligne de l'enquêté, y compris les marchandises provenant d'embranchements privés non enquêtés; b) marchandises provenant de voies d'aiguillage reliées à celles de l'enquêté lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; c) marchandises provenant d'autres modes de transport; d) marchandises réexpédiées après usinage ou transformation en cours de route; e) wagons-allonges.

"Provenant d'autres sociétés ferroviaires du Canada" signifie: marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un transport ferroviaire antérieur est indiqué.

"Provenant de voies des États-Unis et destinées à des localités canadiennes" signifie: marchandises provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquêté et destinées à des localités canadiennes.

"Received from U.S. rail destined to U.S. points" means: freight moving from United States rail connections to points in the United States (overhead traffic).

"Unloaded" means: (a) freight terminated directly on the road of the respondent, including that delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; (b) freight delivered to switching roads connecting with the respondent where there is no further line haul; (c) freight delivered to other modes of transport; (d) freight unloaded for milling or fabrication at some point in transit.

"Delivered to other railways in Canada" means: traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

"Delivered to U.S. rail" means: (a) traffic delivered to United States rail connections or transported across the border by the respondent; (b) deliveries to United States rail connections of freight originated in the U.S. and moved overhead through Canada.

To eliminate duplicate reporting and to uncover statistical gaps, the Statistics Canada uses the Canadian Standard Industrial Classification (S.I.C.) which provides a set of groups and classes suitable for the compilation of statistics related to different industries. The building block (reporting unit) which is fitted into the above structure is the "establishment". An establishment can be defined as the smallest unit which is a separate operating entity capable of reporting principal elements of input and output. While the establishment is typically a factory, mine, store or similar unit and in most cases is a separate firm it may encompass two or more operating units which are not necessarily in the same location. It can also be an individual working on his own account.

Industry 503 (formerly 506), Railway Transport, as classified in the S.I.C. includes establishments primarily engaged in operating railways. The kinds of activities normally carried on by railway establishments embraces the operation of railway freight and passenger trains, commuter service (but not street railways), maintenance of way and structures, maintenance of equipment (including that carried on in railway shops) dining car and sleeping car services, express and the operation of railway terminal facilities. Road transportation services operated by railway establishments and providing pick-up and delivery for the freight or

"Provenant de voies des États-Unis et destinées à des localités américaines" signifie: marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

"Déchargées" signifie: a) marchandises livrées directement à partir d'une ligne de l'enquête, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; b) marchandises livrées à des voies d'aiguillage reliées à celles de l'enquête au point où à partir duquel plus aucun transport n'a eu lieu; c) marchandises livrées à d'autres modes de transport; d) marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

"Livrées à des chemins de fer du Canada" signifie: a) marchandises livrées directement à des raccordements ferroviaires du Canada et marchandises livrées à d'autres modes de transport (autres que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un autre transport ferroviaire subséquent est indiqué.

"Livrées à des chemins de fer des États-Unis" signifie: a) marchandises livrées à des raccordements ferroviaires des États-Unis ou transportées au-delà de la frontière par l'enquête; b) livraisons à des raccordements ferroviaires des États-Unis de marchandises provenant des États-Unis et passant par le Canada.

Afin d'empêcher qu'il ait double déclaration et afin de découvrir les lacunes statistiques, Statistique Canada utilise la Classification des activités économiques (C.A.E.) qui fournit des groupes et des classes convenant au calcul de statistiques portant sur diverses activités économiques. Le groupe (unité déclarante) que l'on insère dans la structure ci-dessus est l'"établissement". Un établissement peut se définir comme la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer les éléments utilisés et produits. Un établissement sera une usine, une mine, un magasin ou une unité semblable et la plupart du temps une entreprise séparée mais il peut englober deux unités ou plus qui ne sont pas nécessairement au même endroit. Il peut s'agir aussi d'une personne travaillant à son propre compte.

L'activité économique 503 (autrefois 506), transports ferroviaires, comprend, selon la C.A.E., les établissements dont l'activité principale est l'exploitation de chemins de fer. Les activités habituelles de ces établissements ferroviaires comprennent le transport de passagers et de marchandises, les services aux banlieues (mais ni les chemins de fer urbains ou ni les tramways), l'entretien de la voie et des ouvrages, l'entretien du matériel (y compris le travail effectué dans les ateliers des chemins de fer), les services de wagons-restaurants et de wagons-lits, les services de messageries et l'exploitation de terminus ferroviaires. Les services de transport routier exploités par

express services of the railway are included in this industry but long distance trucking operations owned by railway companies are usually set up as separate establishments classified to the trucking industry.

Statistical details relating to individual railways have been confined to those with gross operating revenues of \$10 million or more annually. The remaining railways are grouped under "other" within the respective accounting classes defined in the Canadian Transport Commission's Uniform Classification of Accounts. These classes are outlined in *Railway Transport, Part II*, Catalogue 52-208.

des établissements ferroviaires et fournissant des services de ramassage et de livraison de marchandises ou les services de messageries des chemins de fer sont inclus dans cette activité économique. Toutefois, le camionnage interurbain effectué par des sociétés ferroviaires constitue habituellement un établissement séparé, classé avec le camionnage.

Les données détaillées concernant des sociétés ferroviaires particulières ont été limitées aux entreprises qui avaient des recettes brutes d'exploitation de 10 millions de dollars ou plus par année. Les autres sociétés ferroviaires sont groupées sous la rubrique "autres" selon leur classe respective tel que définie dans la Classification uniforme des comptes de la Commission canadienne des transports. Ces classes sont décrites dans la publication intitulée *Transport ferroviaire partie II*, catalogue 52-208.
