RAILWAY TRANSPORT STATISTICS

Catalogue number

Title

Periodical

52-001 Carloadings (Four times a month)

Cars of revenue freight loaded in Canada by eastern and western divisions, by commodity, comparative and cumulative totals. Railway cars loaded in piggyback service and three-year summary of all loadings and tonnages. One issue each month includes chart, index and summary of piggyback loadings.

52-002 Railway Freight Traffic (Quarterly)

Revenue freight carried by railways in Canada, originated, terminated, received from and delivered to United States rail connections, by commodity and by province.

52-003 Railway Operating Statistics (Monthly)

Financial and operating statistics of class I and II railways in Canada, including separate details of Canadian National and Canadian Pacific Railways.

Annual

52-201 Canadian National Railways

Financial and operating statistics of the entire system from 1923,

52-202 Canadian Pacific Railway Company

Financial and operating statistics of the entire system from 1923.

52-204 Railway Express

Financial, operating, employment and mileage statistics of raflway express companies.

52-205 Railway Freight Traffic

Summary of year's issues of quarterly report 52-002; with supplementary regional distribution and net movement of commodities.

52-206 Railway Operating Statistics

Summary of year's issues of monthly report 52-003; separate detail for Canadian National and Canadian Pacific Railways.

52-207 Railway Transport: Part I

Comparative summary statistics.

52-208 Railway Transport: Part II

Financial statistics.

52-209 Railway Transport: Part III

Equipment, track and fuel statistics.

52-210 Railway Transport: Part IV

Operating and traffic statistics.

52-211 Railway Transport: Part V

Freight carried by principal commodity classes.

52-212 Railway Transport: Part VI

Employment statistics.

Occasional

52-501 Railway Employees and Their Compensation

Comparative data relating to all classes of employees; 1926 to 1951. Reference paper No. 38.

In addition to the selected publications listed above, the Dominion Bureau of Statistics publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from the Dominion Bureau of Statistics, Ottawa 3.

PREFACE

Annual railway transport statistics in Canada are published in a series of six reports each of which covers specific aspects of the industry; services and equipment available, traffic handled, the labour force involved and the financial aspects of railways operating in this country.

Statistics on railways have been collected and published in Canada since 1875, first by the Department of Railways and Canals until 1918, and by the Dominion Bureau of Statistics since its inception in 1918. During this time the data have been published in varying degrees of detail. Until 1950 one volume contained all railway statistical data. In 1951 there were three; 1952-1957 there were five, and since 1958 six separate parts have been required to reflect these annual operations. The present report encompasses the following six parts which are not necessarily released in the order they are numbered.

- Part I. Railway Transport Summary Statistics (Five years)
 - II. Railway Transport Financial Statistics
 - III. Railway Transport Equipment, Track and Fuel Statistics
 - IV. Railway Transport Operating and Traffic Statistics
 - V. Railway Transport Commodity Statistics
 - VI. Railway Transport Employment Statistics

Several other annual reports and three periodicals dealing with rail transportation are also available. A list of all titles published in this field is located on the inside cover of each report.

The Dominion Bureau of Statistics is indebted to the individual railway companies operating across the nation which have prepared and submitted their data for inclusion in this statistical series; to the Railway Association of Canada for its cooperation; and to the Railway Transport Committee of the Canadian Transport Commission, with which joint collection arrangements exist, for their promotion of the uniform accounting principles used for rail statistical purposes.

This report has been prepared by the Transportation Section of the Transportation and Public Utilities Division of Dominion Bureau of Statistics. Any inquiries or comments respecting data contained herein, or to unpublished detail, should be forwarded to this Section.

WALTER E. DUFFETT.

Dominion Statistician.

RAILWAY TRANSPORT

1968

PART VI

(Employment Statistics)

Introduction

Employment data contained in this report pertain to common carrier railways operating in Canada during 1968. A "common carrier" refers to a railway which holds itself out to the general public to transport passengers and/or goods for compensation.

The statistics presented in this publication have been reported in accordance with the Uniform Canadian Classification of Railway Employees which was introduced January 1, 1964.

The structure of the Uniform Canadian Classification of Railway Employees is designed to classify all rail occupations primarily on the nature of work done, into major and minor occupational classes, within functions. The latter means that all supervisory, professional and clerical positions are classified to the functional groups (road maintenance, equipment and transportation) with which they are associated rather than being included in the General group as was the case in the previous classification used between 1956 and 1963, See page 23 for definitions of railway functions.

A reconciliation key is presented on pages 19 to 23 of this report showing the relationship between reporting divisions in the Canadian Classification of Railway Employees and their Compensation (1956) and occupational classes in the Uniform Canadian Classification of Railway Employees (1964). While many of the individual occupational classes in the various functions are directly comparable, it has been necessary to group other classes to afford the best possible bridge between the two classifications.

For the average number of employees two methods of counting are permissible under the Uniform Canadian Classification of Railway Employees. These are based on: (a) a mid-month count of employees on payroll, or (b) the sum of the total number of employees who work a specified number of days in the first semi-monthly pay period divided by two, plus all employees paid once a month. Prior to 1964, the count of employees was taken at fixed date each month, although the Canadian National Railways adopted the alternative method noted above for reporting from 1963. Monthly and

annual comparisons of CNR counts, taken both ways, have indicated that method tends to reduce employee averages by about three per cent.

In the 1968 statistics presented herein, the Canadian National Railways employee average was based on the method of counting mentioned in (b) above, while the Canadian Pacific Railway Company continues their count on the former midmonth basis.

Service hours paid for are shown separately herein, by occupation, in accordance with the Uniform Canadian Classification of Railway Employees. The number of hours actually worked, details of which were given by individual occupational class prior to 1964 under the heading "time on duty", are now available by functional group totals only and are presented in the following table:

Function	Hours actually worked, 1968
General	32, 245, 750
Road maintenance	46, 449, 524
Equipment maintenance	56, 219, 390
Transportation	101, 792, 864
Total	236, 707, 528
Other operations	35, 788, 192
Grand total	272, 495, 720

Hours paid for include time actually worked plus vacations, holidays, and leaves of absence, when paid for, and apply to all employees, including enginemen and trainmen paid on the basis of trips or miles run and employees paid at piece rates.

Under "Total compensation" is the gross amount paid to employees and charged to operating, capital and other accounts and other companies and individuals including vacations, holidays and leaves of absence, with pay and before deductions

for income tax, unemployment insurance contributions, etc. Total compensation does not include retroactive wage increases (see table on page 7) or certain fringe benefits.

In view of the alternative methods now in use to count employees and the new classification principle implemented in 1964, caution should be exercised in making historical comparisons with pre-1964 railway employment statistics.

To eliminate duplicate reporting and to uncover statistical gaps, the Dominion Bureau of Statistics uses the Canadian Standard Industrial Classification (S.I.C.).

The Standard Industrial Classification (Catalogue No. 12-501) provides a set of groups and classes suitable for the compilation of statistics related to different industries. The building block (reporting unit) which is fitted into the above structure is the "establishment". An establishment can be defined as the smallest unit which is a separate operating entity capable of reporting principal elements of input and output. While the establishment is typically a factory, mine, store or similar unit and in most cases is a separate firm, it may encompass two or more operating units which are not necessarily in the same location. It can also be an individual working on his own account.

Industry 506, Railway Transport, as classified in the S.I.C. includes establishments primarily engaged in operating railways. The kinds of activities normally carried on by railway establishments embraces the operation of commuter service (but not street railways), maintenance of way and structures, maintenance of equipment (including that carried on in railway shops) dining car and sleeping car services, freight, express and the operation of railway terminal facilities. Road transportation services operated by railway establishments and providing pick-up and delivery for the freight or express services of the railway are included in this industry but long distance trucking owned by railway companies is usually set up as separate establishments classified to the trucking industry. The Railway Transport Industry (506) is represented in this report by occupational classes numbered 1-79 plus class 80.

Telecommunications services provided the public by railways are included, in detail, in S.I.C. Industry 544 Telephone Systems and 545 Telegraph and Cable Systems. Highway Transport (Rail) Operations are classified to S.I.C. Industry 507 Truck Transport and Outside Operations, as shown herein, are treated as separate industries and establishments and included under various S.I.C. codes. Hotels, for example, which are included under Outside Operations, are classified to S.I.C. Industry 875 Hotels Restaurants and Taverns

Grand totals of divisions 1 to 83 throughout this report include details relating to employees residing outside Canada whose salaries and wages are charged to Canadian operations.

Statistical Analysis

Employment in companies conducting railway, express, highway transport (rail) services, telecommunications and other operations relevant to all railways in Canada averaged 137,671 in 1968 or 8.4 per cent less than the 150,218 persons recorded in 1967. This decline continues a downward trend; the cumulative decrease from 1956 to 1968 was 36 per cent, an annual average fall of 2.6 per cent. Total compensation, at \$936 million was less than the 1967 total of \$942 million but \$156 million more than in 1956. The average rate per hour was \$3.10, a rise of 24 cents on the previous year. Compared with 1956 it was up \$1.34, an average annual increment of 4.8 per cent.

The average of salaries and wages for all employees was \$6,801 in 1968, compared with \$6,274 in the previous year. The proportion of salaries and wages charged to operating expenses increased from 87.8 per cent in 1967 to 88.2 per cent in the year under review.

In the field of labour relations the major railways concluded settlements with various unions during 1968. One of these, with the Brotherhood of Locomotive Firemen and Enginemen, provided for wage increases over a three year period of 24 percent for passenger firemen and hostlers and 15 percent to 18 percent for firemen in freight and yard services. Agreement with the non-operating unions was reached late in the year calling for a two-year contract with wage increases of 6½ percent January 1, 1969 and 6½ per cent January 1, 1970 based on 1969 rates. In both cases settlements provided for improved vacations and other fringe benefits.

The 1968 average number of employees of the Canadian National system was 78,657, a reduction of 8.8 per cent on the 1967 average. The number of service hours paid for declined by the same amount, although total compensation fell by only 1.7 per cent. Average hourly pay increased from \$2.87 to \$3.10 and the annual pay from \$6,381 to \$6,878. The ratio of salaries and wages charged to operating expenses was 87 per cent. Included in occupational class 83 are 312 employees operating the Government of Ontario "Go" commuter service.

The decrease in the number of Canadian Pacific employees was a little higher than that for the other major network, falling to 48,626 from 53,547 or 9.2 per cent. Service hours paid for declined 8.5 per cent yet total compensation was virtually unchanged. The rate per hour jumped 26 cents to \$3.08 and the annual pay \$608 to \$6,658. The "operating" ratio was 89 per cent,

Class II railways also employed fewer people although the fall from 9,914 to 9,862 was much less than that recorded by Class I roads. Service hours paid for declined slightly (1.4 per cent) but total compensation increased, by 4.9 per cent, as a result of a 20 cents per hour gain in pay. The average annual pay in 1968 was \$6,968, up \$359 on the previous year. The proportion of salaries and wages charged to operating expenses was 92 per cent.

The following table shows the relative increase in railway salaries and wages, by function in 1967 and 1968. Averages of the years 1956, 1957 and 1958 have been used as a base in the calculation of this index.

The chart on page 6 shows the change in the number of employees by function over the decade ending 1968, during which time the "Total" fell by

Index of Average Salaries and Wages of Class I and II Railways, 1967 and 1968

	Ind	ex
Function	1967	1968
General	170.3	185.8
Road maintenance	182.7	198.7
Equipment maintenance	165.8	180.4
Transportation	151.0	161.8
Other operations	171.9	187.3

a little more than a quarter. Compared with 1959 there has been an absolute and relative increase in the numbers employed in "Transportation". The greatest decreases occurred in the numbers employed in "General" and "Other operations" functions; each of which is down to almost half the 1959 level.

July 28, 1969.

DEFINITIONS OF RAILWAY FUNCTIONS

GENERAL - Includes all functions or departments except those separately defined below. Included in this group are such departments as; Research and Development, Accounting and Finance, Personnel and Labour Relations, Purchases and Stores, Sales, Traffic, Investigation, etc.

ROAD MAINTENANCE-This function is responsible for the construction and maintenance of all track and structures and signal installations.

EQUIPMENT MAINTENANCE - This function is responsible for the maintenance and servicing of all motive power, car, shop and power plant equipment.

TRANSPORTATION (NON-TRAIN AND TRAIN) - This function is responsible for scheduling, dispatching and operating trains and other ancillary services, the operation of terminal facilities and the distribution of cars and motive power. This function is also responsible for the movement of merchandise by means of the integration of express and less carload operations.

EXPRESS - This function is responsible for non-integrated express operations.

HIGHWAY TRANSPORT (RAIL) - This function is responsible for non-integrated cartage and highway services ancillary to rail operations.

TELECOMMUNICATIONS - This function is responsible for all telecommunications operations.

OUTSIDE OPERATIONS-This function includes such operations as hotels which are operated both as to revenues and expenses separate and apart from actual rail operations.
