PRELIMINARY REPORT
ON
STATISTICS OF STEAM RAILWAYS

1929

The small crop of western grain in 1929 and the decrease in shipments, resulting from both the light crop and the condition of the world market coupled with depressions in other industries, had a marked effect on the business done by the Canadian railways and on the gross and net revenues earned. Gross revenues, amounting to \$534,106,044, were less than the 1928 revenues by \$29,626,215, or 5.3 per cent, and with operating expenses reduced by only \$9,624,158, the net operating revenue was less than for 1928 by \$20,002,057, or 16.5 per cent.

The heavy traffic of 1928 continued through the first part of 1929 and new high records were made each month for January - August, but when the new grain began to move, in September, traffic fell off rapidly and continued light to the end of the year, so that, from an increase at the end of August of 9 per cent, the total at the end of the year was less than for 1928 by 3 per cent.

The estimated crops of Manitoba, Saskatchewan and Alberta were as follows:

	<u>1928</u> Bushels	<u>1929</u> Bushels
Wheat	544,598,000	276,664,000
Oats	297,676,000	141,620,000
Barley	112,624,000	79,787,000
Rye	13,158,000	11,982,000
Flaxseed	3,519,400	1,970,000
Total	<u>371,635,400</u>	<u>512,023,000</u>

The 1929 wheat crop was only slightly over half of the 1928 crop and, after making deductions for seed, feed, loss, etc., the quantity available for shipment would be less than half of the 1928 tonnage. The large carry-over from 1928 helped to maintain the tonnage for the first eight months, but the October shipments were only about one-third of those for October, 1928, and for November they dropped to less than one-fifth. For the four months, September - December, the total tonnage of wheat loaded at Canadian stations in 1929 amounted to only 4,168,124 tons as against 11,647,153 tons in 1928 and other grains showed somewhat similar decreases. Hay and straw were also light but potatoes increased by 51,557 tons. Bituminous coal, both loaded at Canadian mines and imported, showed large increases, the total tonnage being heavier than in 1928 by 1,104,621 tons, or 8.3 per cent, and coke was also heavier. Iron ore, other ores and concentrates and base bullion and matte all showed large increases. Clay, gravel, sand and crushed stone increased by 1,235,599 tons, or 15.8 per cent, asphaltum was heavier by 109,258 tons, or 29.5 per cent, pulpwood decreased by 1,139,264 tons but paper increased by 346,215 tons, and iron, pig and bloom, and bar and sheet iron, etc. also showed substantial increases. Although the decrease in total freight carried was only 3 per cent, the decrease in ton miles was 16 per cent and passenger traffic also decreased 4 per cent in passengers carried and 8 per cent in passenger miles.

With these decreases in traffic, both gross and net railway operating revenues decreased and after paying dividends and making deductions for reserves, etc., a debit balance of \$32,122,402 was carried to profit and loss as against a debit of \$9,192,149 the previous year. The interest charges for the year amounted to \$101,088,476 including \$32,690,545 accruing on Dominion Government advances to the Canadian National System. Dividends declared amounted to \$35,087,201, of which the Canadian Pacific paid \$34,276,904. The Canada Southern operated by the Michigan Central, the Wabash and other United States railways operating in Canada do not declare dividends on the Canadian portions of their systems.

During the year there was a net increase in the miles of road operated of 386 miles and in total track mileage of 411 miles. A total of 505 miles of new road was opened for operation, 672 miles were completed but not opened for traffic and 552.7 miles were under construction. This was exclusive of the Hudson Bay Railway which was not open for general traffic.

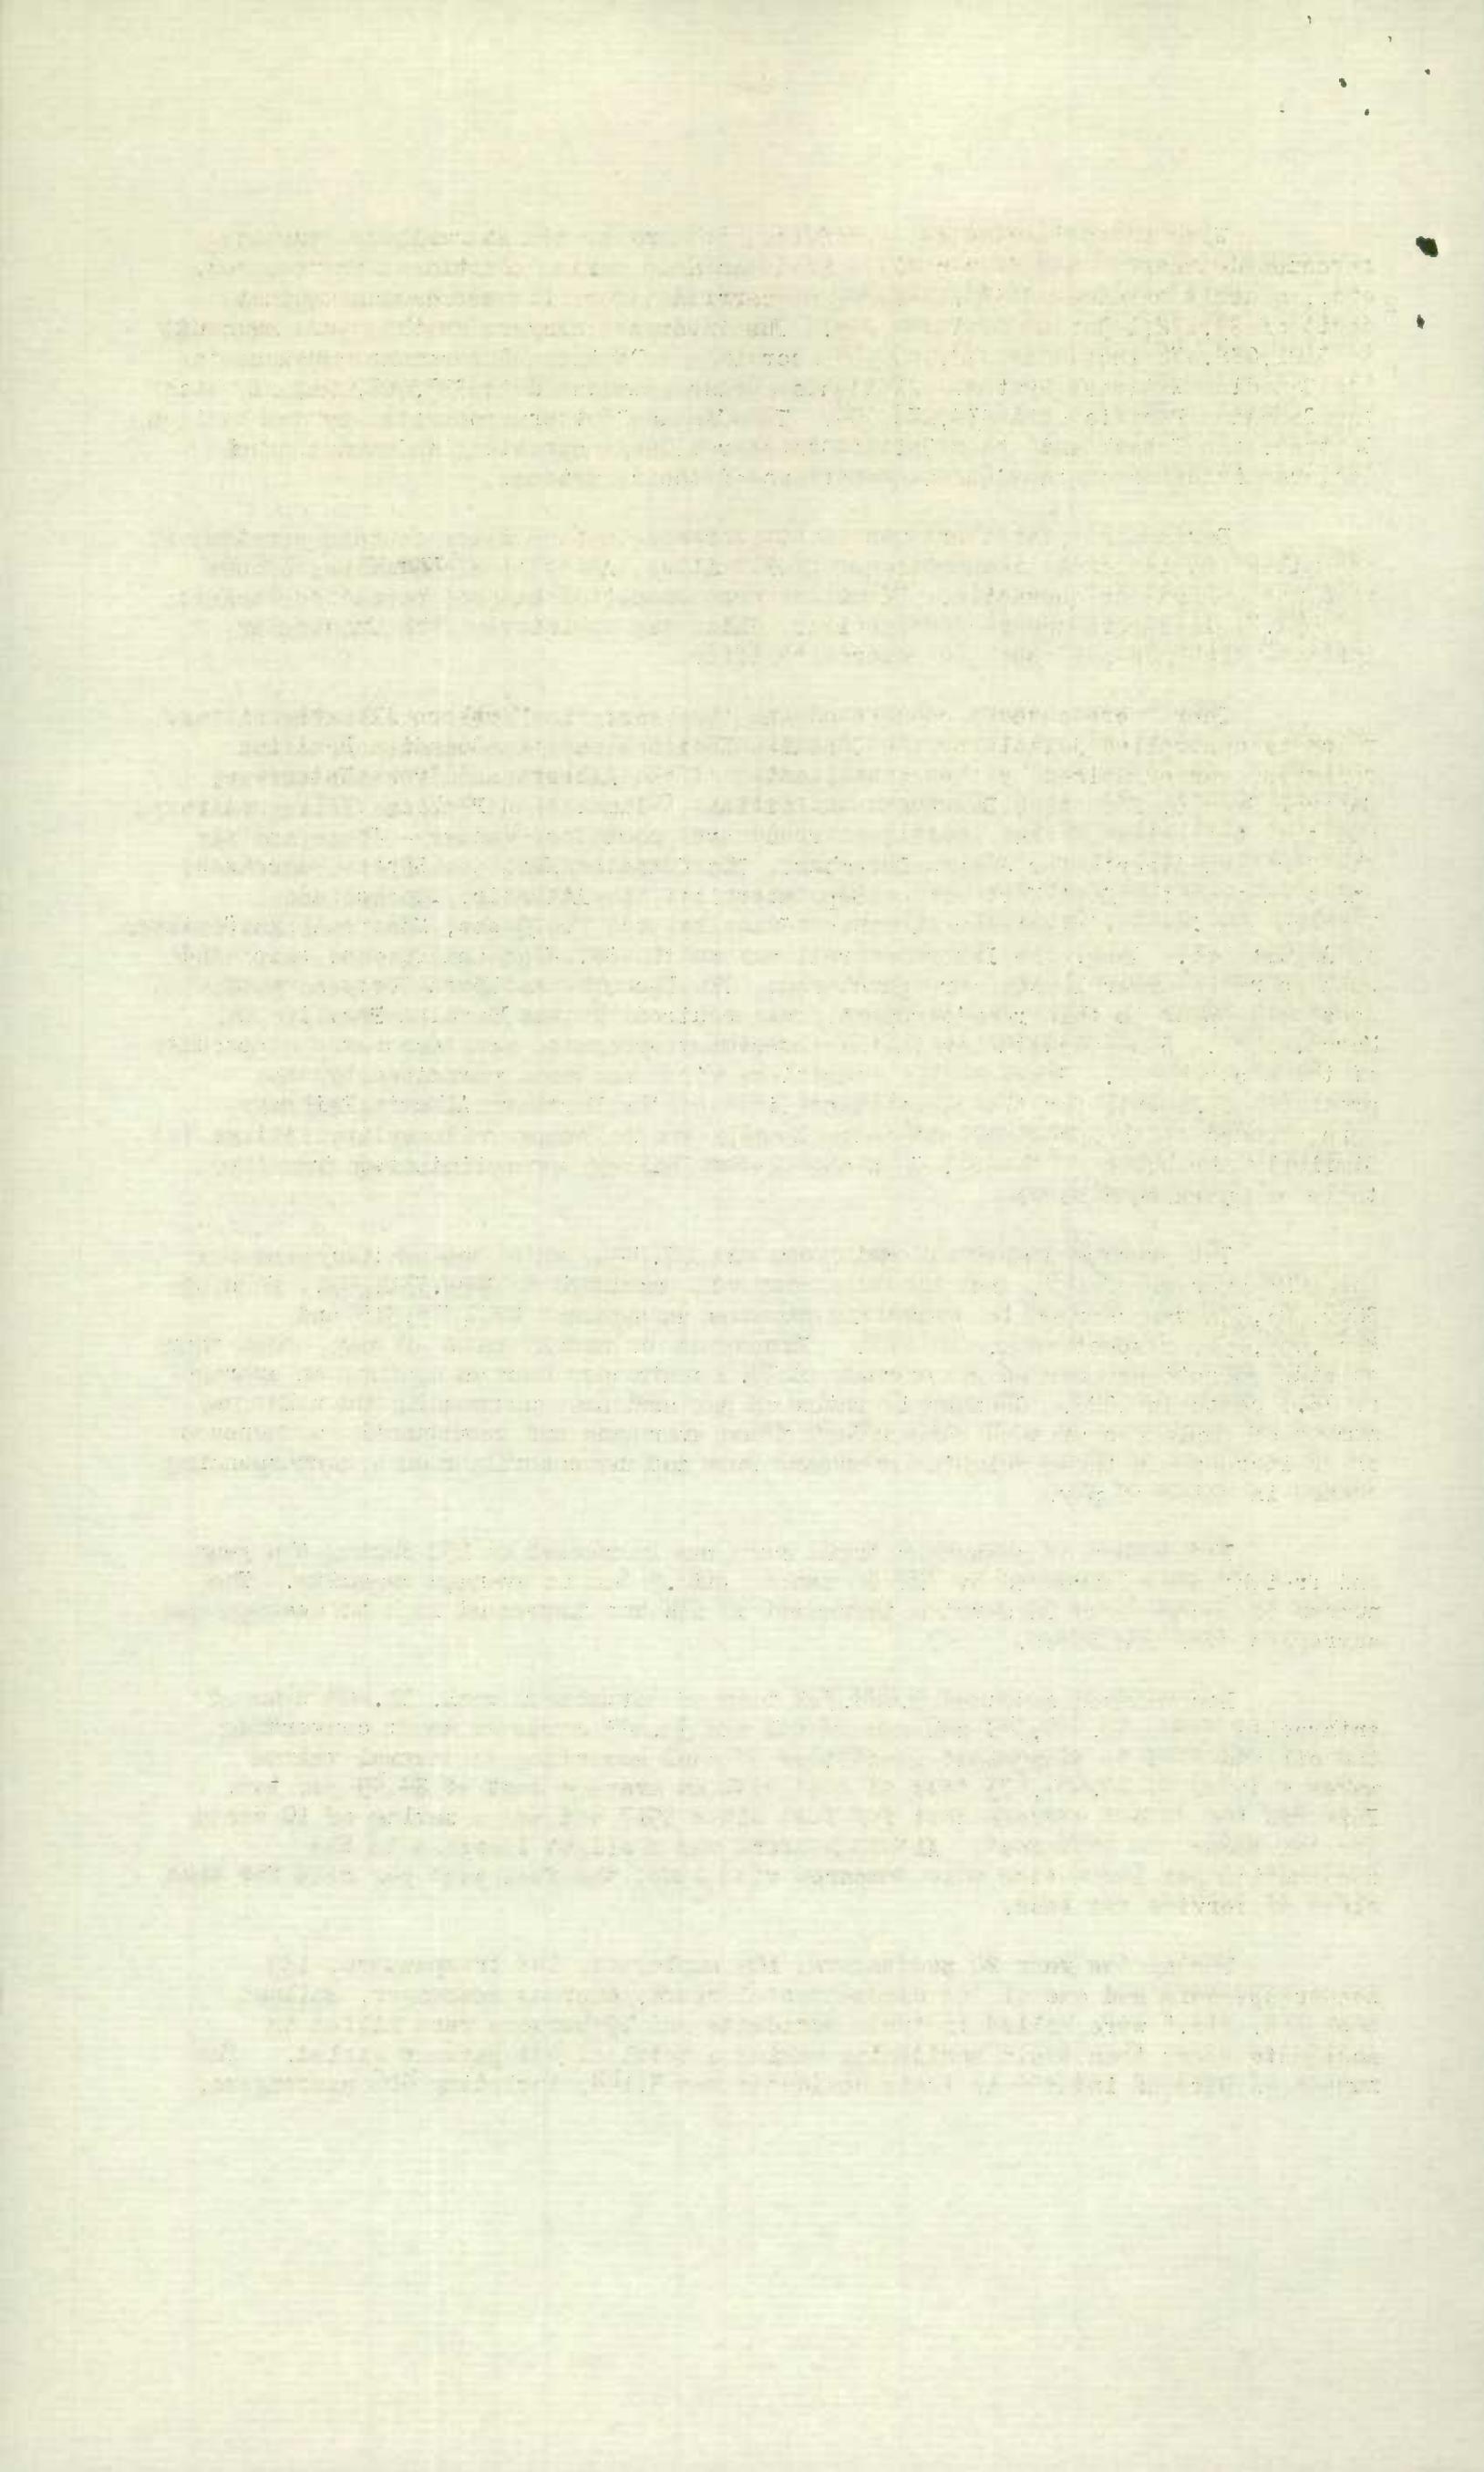

There were several changes during the year; the Northern Alberta railway, which is controlled jointly by the Canadian National and the Canadian Pacific railways, was organized by the consolidation of the Alberta and Great Waterways, Central Canada, Edmonton, Dunvegan and British Columbia and Pembina Valley railways and the statistics of the constituent roads are shown for January - June and for the Northern Alberta for July - December. The Canadian National System purchased and took over the Kent Northern on September 1st, the Atlantic, Quebec and Western and Quebec Oriental railways on June 1st and the Quebec, Montreal and Southern on August 1st. Also, the Inverness railway and the St. John and Quebec, which had been operated under lease, were purchased. The Lacombe and North Western which does not appear in this year's report, was acquired by the Canadian Pacific in March, 1928. Some adjustments in the investment accounts were necessary on account of these purchases. Some of the securities which had been guaranteed by the province of Alberta for the constituent lines of the Northern Alberta Railways were assumed by the province and consequently are no longer railway liabilities. Similarly the bonds of the St. John and Quebec Railway were eliminated from the table of guaranteed bonds.

The average number of employees was 137,846, which was an increase over the 1928 average of 138, and the total pay roll amounted to \$290,732,500, of which \$260,903,331 was charged to operating expenses as against \$287,775,315 and \$264,669,151, respectively, in 1928. Employees on hourly rates of pay, other than outside operations, earned an average of 75.1 cents per hour as against an average of 75.6 cents in 1928. Changes in rates of pay and also changes in the relative number of employees at each rate affect these averages and consequently a decrease or an increase in these weighted averages does not necessarily mean a corresponding change in rates of pay.

The number of passenger train cars was increased by 131 during the year and freight cars increased by 728 in number and .9 ton in average capacity. The number of locomotives in service decreased by 138 but increased in both average and aggregate tractive power.

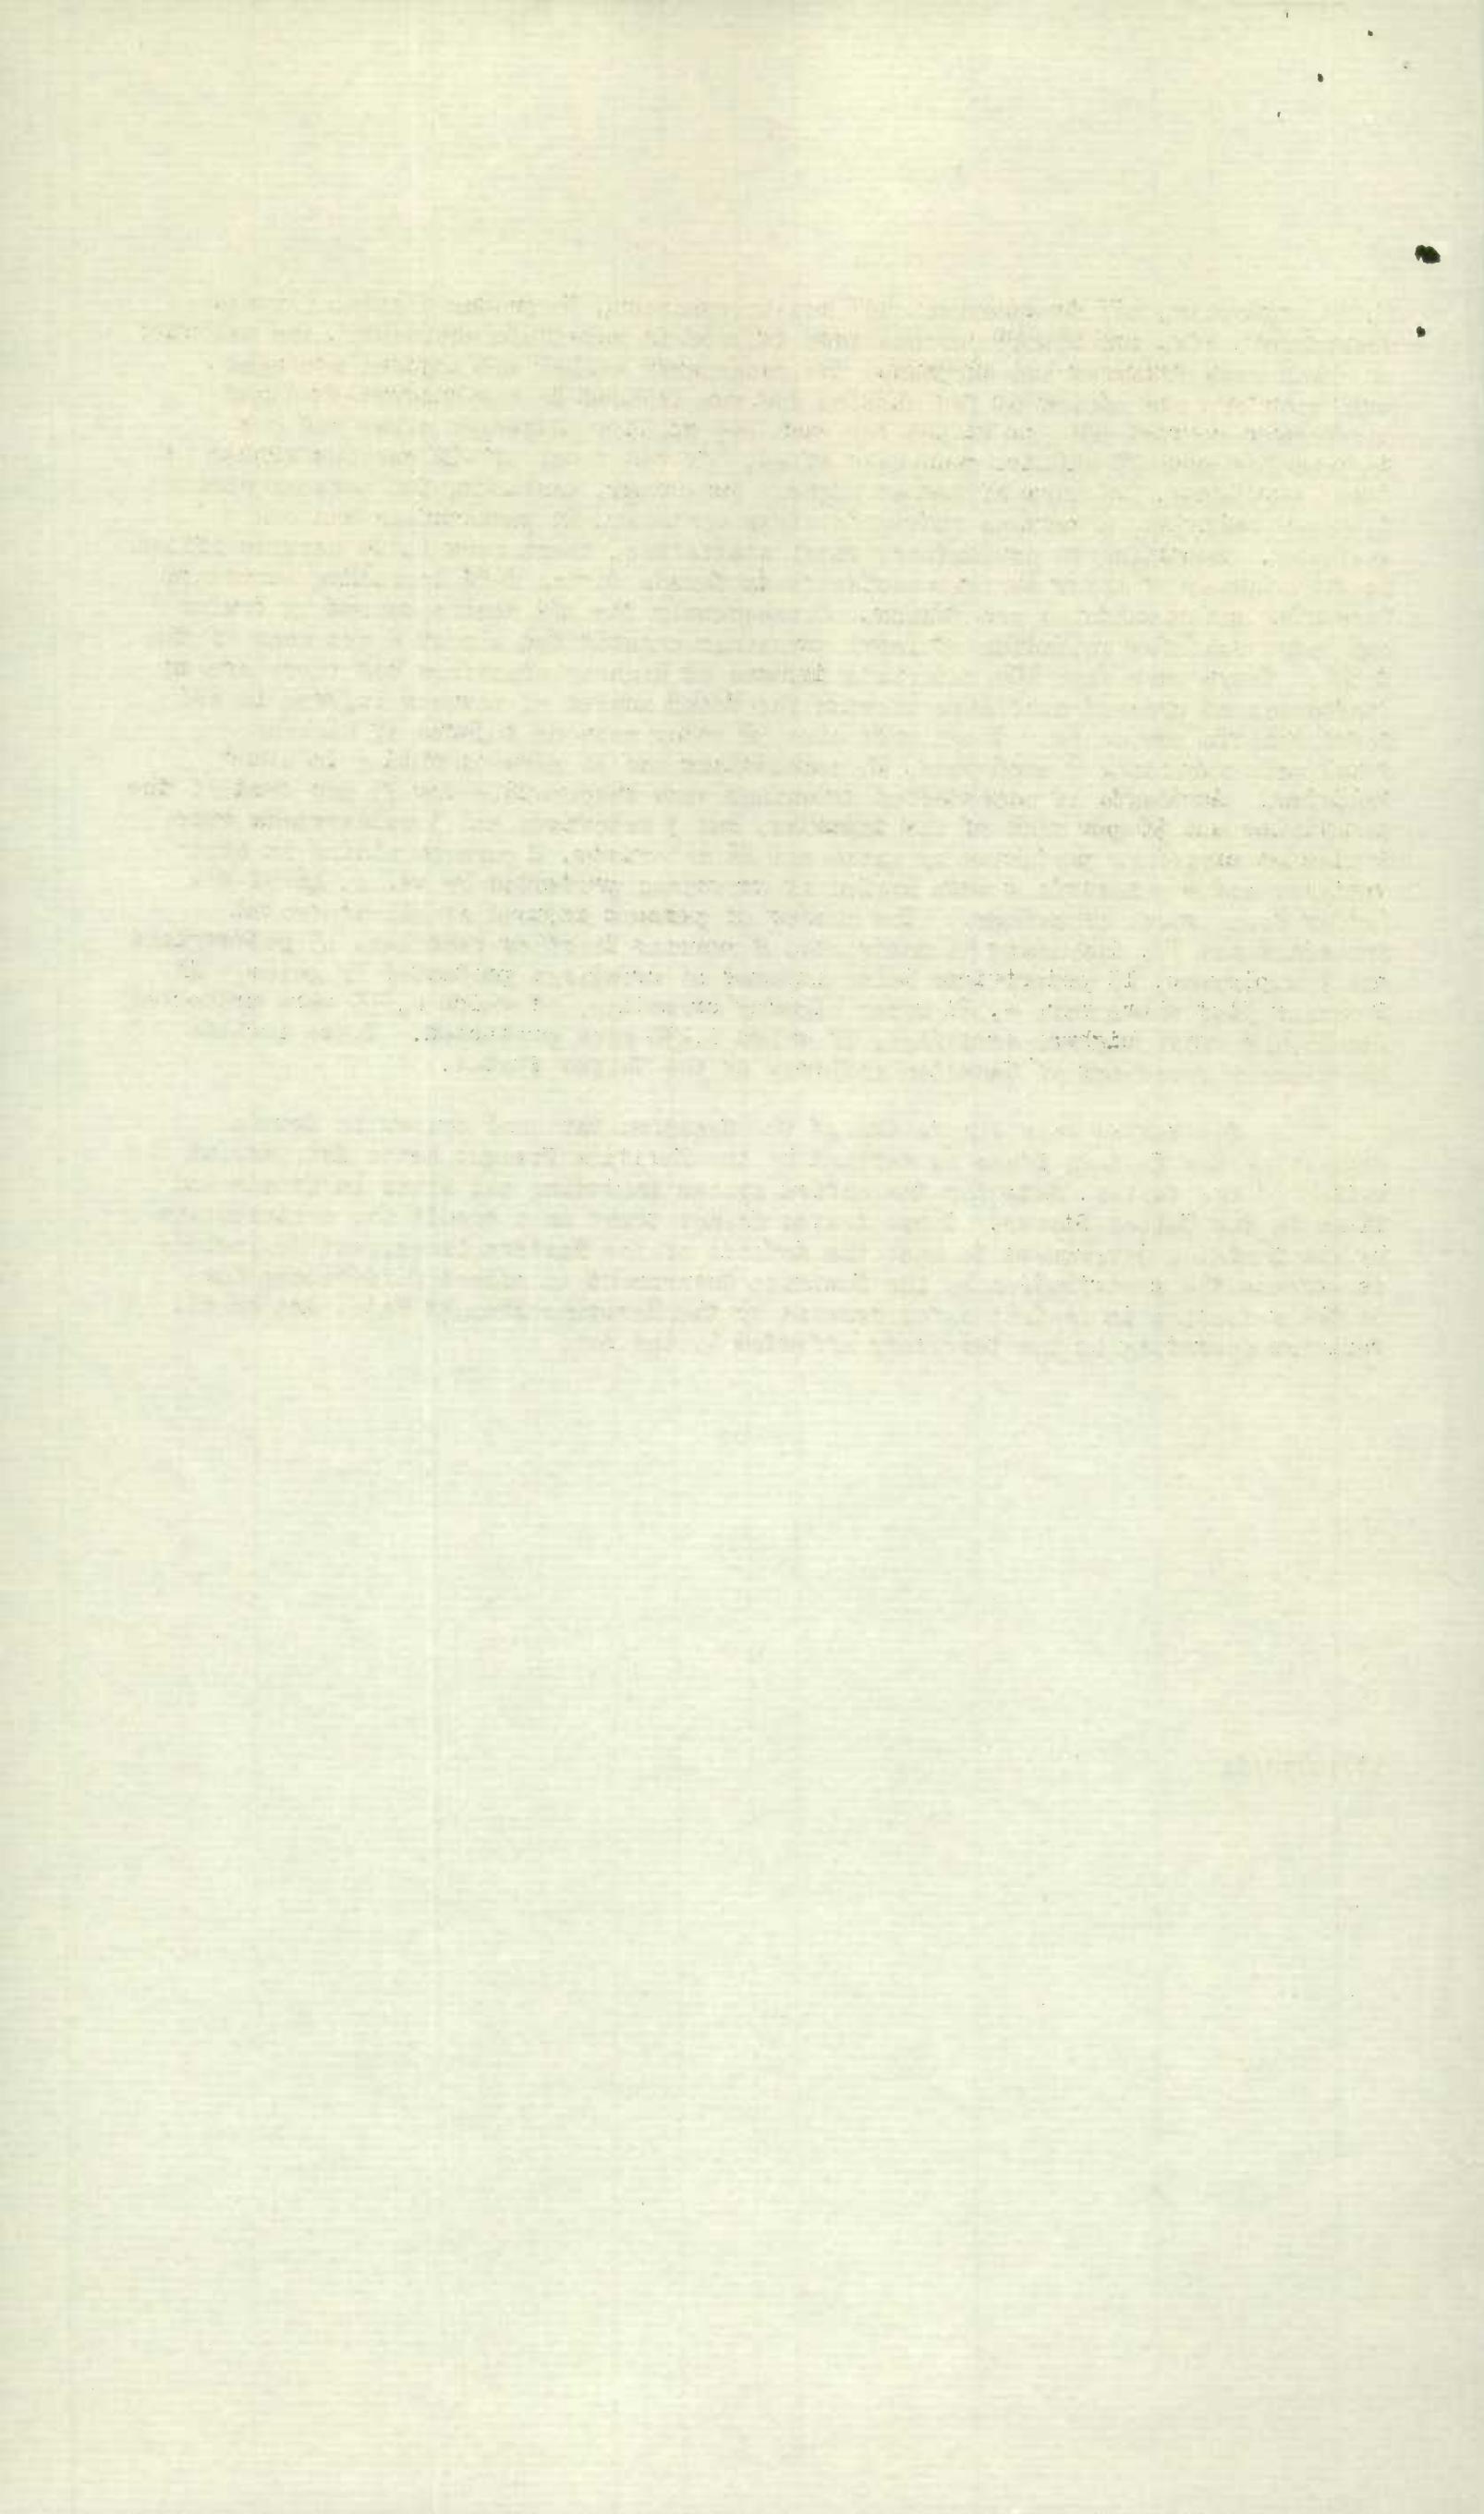

Locomotives consumed 9,628,711 tons of bituminous coal, 11,409 tons of anthracite coal, 63,796,548 gallons of oil and 35,683 cords of wood; converting the oil and wood to equivalent quantities of coal according to thermal values makes a total of 10,057,673 tons of coal with an average cost of \$4.49 per ton. This was the lowest average cost for fuel since 1917 and was a saving of 10 cents per ton under the 1928 cost. Although there was a slight increase in the consumption per locomotive mile compared with 1928, the fuel cost per mile for each class of service was less.

During the year 20 passengers, 104 employees, 148 trespassers, 139 non-trespassers and one of the class—"postal clerk, express messenger, pullman employee, etc." were killed in train accidents and 19 persons were killed in accidents other than train accidents, making a total of 431 persons killed. The number of persons injured in train accidents was 3,144, including 406 passengers,

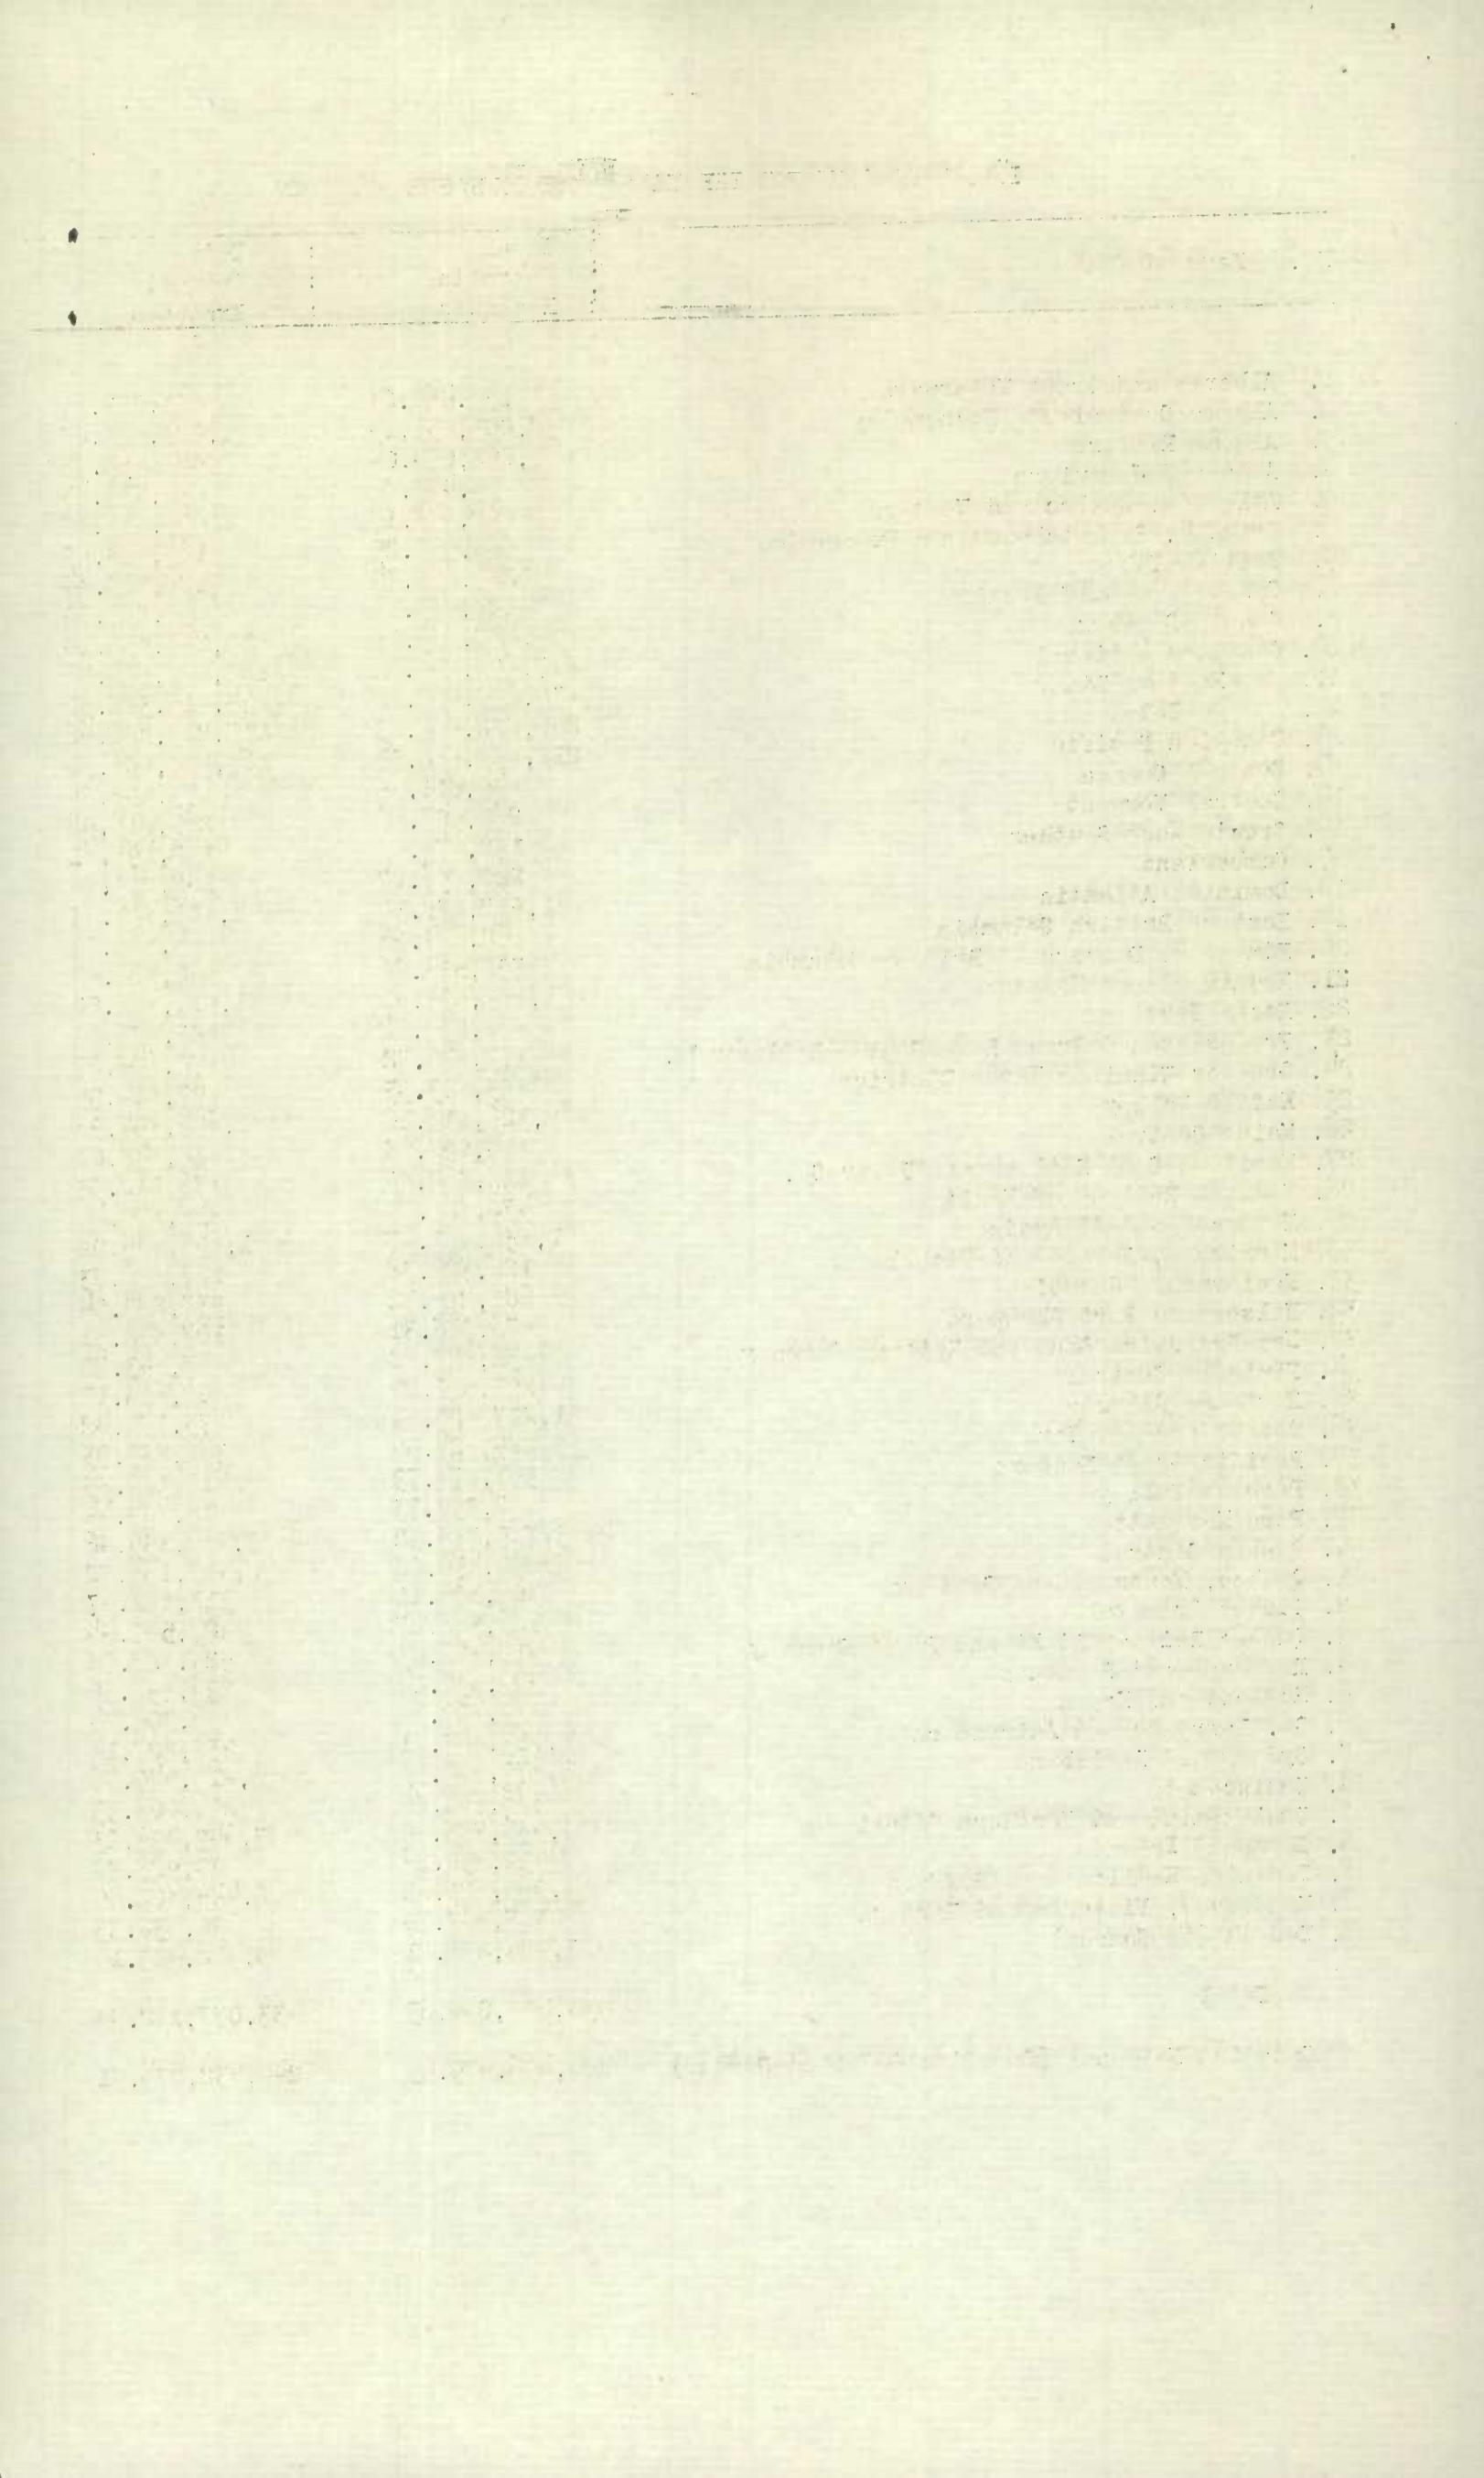

2,028 employees, 177 trespassers, 497 non-trespassers, 36 postal clerks, express messengers, etc. and 10,699 persons were injured in non-train accidents, the majority of which were trackmen and shopmen. The passengers killed and injured averaged approximately one killed in two million and one injured in one hundred thousand passengers carried and one killed for each 145 million passenger miles and one injured for each 71 million passenger miles. Of the total of 412 persons killed in train accidents, 128 were killed at highway crossings, including 102 persons riding in motor vehicles, 6 persons riding in other vehicles, 19 pedestrians and one employee. According to preliminary vital statistics, there were 1,294 persons killed in all classes of motor vehicle accidents in Canada during 1929 including accidents involving motor vehicles and trains. Consequently the 102 deaths caused by trains and motor vehicles colliding at level crossings constituted almost 8 per cent of the total. There were also 404 motorists injured at highway crossings but there are no statistics at present available showing the total number of persons injured in all motor vehicle accidents. There were also 52 other persons injured at highway crossings, including 6 employees, 25 pedestrians and 21 persons riding in other vehicles. Accidents at unprotected crossings were responsible for 75 per cent of the fatalities and 90 per cent of the injuries, but 3 motorists and 3 pedestrians were killed at crossings protected by gates and 16 motorists, 2 persons riding in other vehicles and 4 pedestrians were killed at crossings protected by bells, 16 of the latter being rural crossings. The number of persons injured at all protected crossings was 77, including 51 motorists, 8 persons in other vehicles, 15 pedestrians and 3 employees, 13 pedestrians being injured at crossings protected by gates. At December 31st there were 4,921 urban highway crossings, of which 1,338 were protected, and 26,418 rural highway crossings, of which 1,230 were protected. These include 224 highway crossings of Canadian railways in the United States.

The tables show statistics of the Canadian National System in Canada, separating the Eastern Lines as defined by the Maritime Freight Rates Act, and, at the bottom of the tables, data for the entire system including all lines in Canada and lines in the United States. These tables do not treat as a credit the contribution by the Dominion Government to meet the deficit of the Eastern Lines, but do include as revenue the contribution by the Dominion Government to offset differences due to the reduction in freight rates ordered by the Maritime Freight Rates Act on all railways operating in the territory affected by the Act.

INCOME ACCOUNT FOR THE YEAR ENDED DECEMBER 31, 1929
