TRANSPORTATION AND PUBLIC UTILITIES BRANCH
OTTAWA

ECONOMIC & STATISTICAL
DIVISION

APR 15 1954

Dominion Statistician, R.H. COATS, LL.D., FR.S.C., F.S.S. (Hon.)

Chief, Transportation and Public Utilities Branch, G.S. Wrong, B.Sc.

THE HIGHWAY AND THE MOTOR VEHICLE IN CANADA, 1939.

The statistics in this report were collected from the highway and motor vehicle officials of the several provinces and the Dominion departments of Public Works and Mines and Resources with the exception of those for highways of British Columbia which were extracted from the published report of the provincial department of Public Works for the year ended March 31 - 1939. This provincial report, as is more or less common to all provincial reports, does not make clear distinctions between construction and maintenance and consequently the allocation for British Columbia as made in this report is subject to revision.

All rural roads in Prince Edward Island, Nova Scotia and New Brunswick are under the jurisdiction of the provinces, in Quebec the province constructs and maintains all improved roads, in Ontario the province has been assuming responsibility of an increasing mileage of highway and subsidizes rural municipalities for highway expenditures when work is up to certain standards, and in the four western provinces the principal roads are under the jurisdiction of the provinces. Consequently the expenditures reported by the provinces include the bulk of the expenditures on rural roads.

The Dominion Government subsidized mine roads, the Trans-Canada Highway and certain other roads constructed by the provinces; Ontario subsidized certain county and township roads and the municipalities contributed towards work done by the province in the eastern provinces. The Dominion Government also constructs and maintains roads in national parks. All these expenditures are shown in the respective provinces in Table 4. The lower portion of the Table shows the net expenditures by each class of government in each province, the grand total for the year being \$91,845,805.

The Dominion expenditures were for the fiscal year ended March 31, 1940 and the provincial expenditures were for their respective fiscal years as shown in the Table. The Dominion Government subsidies were those reported by the provinces as received for the work done.

Highway Debt.

The table below shows the debt incurred for highways and the interest, sinking fund and principal payments for the year. In some provinces debentures have been issued for highway purposes and in others a portion of the total debt outstanding chargeable to highways was estimated, and interest and sinking fund payments were also estimated by the provincial authorities.

Table 1.

PROVINCIAL HIGHWAY DEBT
1939

Province	Fiscal Year Ended	Highway Debt Outstanding	Interest Accrued during Year	Sinking Fund Payments	Payment of Capital
Prince Edward Island		Not available			
Nova Scotia	30/11/39	61,422,253	2,229,469	297,861	Nil
New Brunswick	31/10/39	74,016,817	2,829,428	424,129	545,000
Quebec	30/ 6/39	100,106,289	(2) 3,213,412	-	-
Ontario	31/ 5/40	313,542,031	(2) 15,677,102	-	-
Manitoba	30/ 4/40	(4) 23,244,420	859,332	104,000	Nil
Saskatchewan	30/ 4/40	33,818,920	(1) 1,617,694	(1) 135,633	Nil
Alberta	31/ 3/40	(3) 39,650,000	1,100,730	Nil	50,000
British Columbia	31/ 3/40	39,847,742	1,797,943	45,360	214,449
Total		685,648,472	29,325,110	1,007,083	809,449

(1) Paid during year

(2) At average rate of all debt.

(3) Cumulative net capital cost

(4) Includes \$5,169,000 for unemployment relief works

Revenues from toll bridges and ferries were reported by Nova Scotia, New Brunswick, Quebec and British Columbia, as shown below. The Quebec data includes public toll bridges operated by municipalities and companies in addition to those operated by the province and also includes the bridge across the St. Lawrence at Montreal (Jacques Cartier) operated by the National Harbour Board, and the highway portion of the Canadian National bridge (Victoria) across the St. Lawrence at Montreal.

	Total	Nova Scotia	New Brunswick	Quebec	British Columbia
Revenues	\$1,620,183	\$ 84,327	\$ 14,158	\$1,388,737	\$ 132,961
Operating expenses..	881,570	87,555	47,402	727,115	-

MOTOR VEHICLES

Registrations.

The motor vehicle registrations include all motor vehicles which require a license to operate on the public highways and consequently include privately owned and publicly owned vehicles. The total includes motor cycles as well as motor vehicles with four or more wheels but it does not include electric street cars nor trackless trolley buses. The greatest concentration of motor vehicles is in Ontario and this province also has by far the largest mileage of paved highways.

New registrations include all motor vehicles registered for the first time in the respective provinces and consequently are not exclusively new cars. Saskatchewan and Alberta do not make this segregation and Alberta does not require trailers to secure licenses. In Table 5 the total numbers of trucks and trailers licensed are shown and in Table 6 trucks and trailers are shown classified according to weight for two provinces. In Quebec the weight used is the tare weight or weight of the vehicle, whereas in Ontario the gross weight or the weight of the vehicle plus the weight the vehicle is licensed to carry is used. It should be noted that a truck designed to carry 5 tons may be licensed for 4 tons.

Neither of these classifications give a clear idea of the carrying capacity of the vehicles but they are far more informative than only the total number licensed.

Over 90 per cent of the trailers in both provinces were small trailers under one ton used mostly by farmers. Similar classifications for the other provinces are not available.

All the provinces exercise some control over operation of motor vehicles in common carrier business, the control in some provinces being more strict over motor buses than over motor trucks. The provinces grant certain reciprocal privileges to motor vehicles registered in other provinces and this accounts for vehicles registered outside the respective provinces operating under Public Service licenses.

Table 7 shows the registrations of motor vehicles in municipalities as far as these statistics are available from provincial compilations.

Revenues.

Total revenues increased from \$67,475,045 in 1938 to \$79,915,560 or by \$12,440,515 or 18.4 per cent. The large increase was in the gasoline tax which rose from \$41,247,346 to \$51,954,360 or by 26 per cent. The rate in Quebec and Ontario was increased from 6 cents to 8 cents per gallon on April 1, 1939, raising the tax for the year by \$2,332,075 or 31 per cent in Quebec and by \$6,601,570 or 36 per cent in Ontario. The gasoline tax act was revised in Saskatchewan on April 1, 1939 and although the rate per gallon remained unchanged the total tax was increased by \$937,507 or 51 per cent. These gasoline taxes do not include the commissions paid to the gasoline vendors for collecting the tax which is deducted from the tax paid by the consumer. For all provinces they amounted to \$851,002.

The taxable gasolene is principally motor fuel although in some provinces gasolene for other uses is taxed either at the full rate or a reduced rate. The latter was effected by refunding only a portion of the tax paid on gasolene used for certain purposes in Manitoba, Alberta and British Columbia. In Manitoba the refund rate was increased on April 1, 1940 to equal the tax rate. Diesel oil used in motor vehicles is not taxed in all provinces. As yet the use of diesel engined vehicles is limited in the provinces not taxing this fuel.

The sales of gasolene and diesel oil as reported by the provincial taxing authorities are shown in tables 9, 10, 11, 12 and 13. Net sales include gasolene on which the fuel tax is levied and not refunded and is almost entirely motor vehicle fuel. Gasolene which is handled by two or more selling agents is not duplicated in the gross sales. Refunds of the tax are made after the sale, sometimes as long as six months after. Consequently it is not feasible to compile monthly net sales of gasolene. The deductions from gross sales to compute net sales include all gasolene on which the tax was exempt at time of sale and on which the tax was refunded during the year.

Motor Vehicle Accidents.

Motorists are required to report accidents in most of the provinces, but comprehensive statistics are not available in all cases. The Vital Statistics Branch of the Bureau compiles statistics on all deaths from motor vehicle accidents and these are shown in Tables 15 to 18. A direct comparison of such statistics for provinces is of little value due to differences in size, population, motor vehicle density, etc., but to put them on somewhat the same basis the average number of deaths per 10,000 registered motor vehicles has been computed and tabulated in Table 17. Although this treatment puts the data on a better footing than the raw figures it still gives no weight to differences in use of motor vehicles, differences in climate, roads, tourist cars, etc., all of which are factors in accidents.

Statistics in Table 18 include victims of accidents outside these municipalities who have been taken to hospitals in the cities and died within the municipalities, and consequently will not check with Table 20 which deals only with accidents in these municipalities as recorded by the urban police.

As an appendix to this report is a table showing the expenditures by urban municipalities in Canada during 1939 on streets, sidewalks, bridges, and culverts, and the mileage of each class of pavement in these municipalities. The footnote to the table explains the scope of the census.
