MOTOR CARRIERS

FREIGHT - PASSENGER

20-1750

1944

The motor carrier report for 1944 differs from the report for 1943 and 1942 in that data for certain carriers operating warehouses were excluded from the detail tables 5, 6, 7, 8 and 9, and their statistics were included in the new report issued on warehousing for 1944. To make the data comparable with 1943 and 1942 data in the summary Table 1 of this report they were included here also. Consequently data in Table 1 does not coincide with data in Tables 5, 6, 7, 8 and 9.

The following comparisons are made from Table 1. Revenues of large freight carriers increased from $39,409,036 in 1943 to $41,605,196 in 1944 or by 5.6 per cent. Total salaries and wages increased from $15,734,047 to $16,743,548 or by 6.4 per cent. The number of trucks and semi-trailer units showed slight decreases but trailers and buses showed increases. The passengers carried by these carriers decreased and freight also showed a decrease. The freight tonnage reported by motor carriers does not appear from the individual reports to be comprehensive and should be used with caution. Many carriers kept no records of tonnage carried and the tonnage reported by others varied greatly in comparison with revenues earned. Passenger traffic is undoubtedly more realistic although many carriers, especially the small carriers who accept cash fares instead of tickets find it difficult to accurately record such cash fares. These, however, will be a small percentage of the total.

Small freight carriers decreased in number from 426 to 384 and their revenues declined from $5,627,086 to $5,058,116 or by 10 per cent. Passenger motor carriers which includes both urban and inter-urban systems declined in number from 490 in 1943 to 479, but revenues increased from $30,984,433 to $35,044,292 or by 13.1 per cent and their payroll increased from $8,499,821 to $9,642,877 or by 13.5 per cent. The buses operated by these carriers increased from 2,945 to 3,055 but because the increases were practically all in the larger capacity buses the total seating capacity was increased around 6 per cent. Revenues of city systems increased from $9,866,622 in 1943 to $11,059,803 or by 12.1 per cent.

The city passengers carried by these systems increased from 127,950,276 to 134,409,818 or by 5 per cent, and the inter-urban passengers carried increased from 8,748,872 to 10,700,185 or by 22.3 per cent.

Motor carriers of all classes reported a total gross investment of $54,186,461 and earned a gross revenue of $81,707,604. The industry employed 18,630 persons exclusive of 931 working proprietors and had a payroll of $27,787,097.

Accidents in which vehicles of these carriers were involved, resulted in the death of 3 passengers, 6 drivers and helpers, 1 other employee, 24 pedestrians and 18 other persons, making a total of 52 persons, and in injuries to 717 passengers, 452 drivers and helpers, 162 other employees, 145 pedestrians and 155 other persons or a total of 1,631 persons. Where these accidents involved steam or electric railway trains or cars these casualties will appear also in railway accident data. No attempt is made in these reports to fix responsibility of accidents.

During the year 1,372 persons died from the results of motor vehicle accidents of all kinds and 20,228 were reported injured. Thus these motor carriers' vehicles were involved in accidents resulting in 3.8 per cent of the deaths and 8.1 per cent of the injuries.

Their fuel consumption was approximately 6 per cent of the total for all motor vehicles but because of the lower mileage per gallon their mileage would be considerably less than that percentage of the total mileage of all motor vehicles; the miles run is an important factor in the accident hazard.

These carriers operated 3,104 buses of which 287 were cars of 7 or less passenger capacity and 522 were 30 and over passenger capacity. Only 79 of these buses were reported as being equipped with diesel engines. These do not include buses operated by electric railway systems.

Of the 6,161 trucks and 1,957 tractor semi-trailer units operated, only 16 were reported as equipped with diesel engines and 24 per cent were 2 tons or less capacity.
