SUMMARY OF CANAL TRAFFIC

November, 1951

Canal traffic continued active during November as a new record of 3,344,711 tons of freight were reported through the Canadian systems compared with 3,279,726 tons in November of 1950 and 2,504,563 tons in the same period of 1949. There were 2,583 vessel passages against 2,522 one year earlier and 2,281 in November of 1949. Commodities moving in improved volume this November included barley, wheat, gasoline, crude oil, pulpwood, paper and sand, gravel and stone.

Sault Ste. Marie Canals - Canadian and United States Locks: Freight through the combined systems during November amounted to 10,270,412 tons against 10,876,102 tons in the corresponding month of 1950. However, the Canadian lock reported 425,179 tons compared with 329,155 tons a year previous. Total eastbound volume declined from 9,039,757 to 8,871,213 tons due mainly to a drop of 1,242,819 tons in iron ore to 6,253,687 tons. Wheat downbound increased from 916,352 to 1,754,452 tons or by 91 p.c. while crude oil mainly for Sarnia totalled 259,890 tons against none one year earlier. Scrap iron and steel posted gains. Total westbound freight dropped from 1,836,345 to 1,399,199 tons as soft coal shipments were reduced nearly half a million tons to 1,026,279 tons. Coke, salt, oil and gasoline showed gains. Stone doubled to 178,735 tons and other freight heading westward improved 7,000 tons to 83,012. Iron ore & steel were lighter. Total Vessel passages amounted to 2,140 against 2,241 one year earlier but the Canadian lock gained 30 at 349.

Welland Ship Canal: Total freight showed a slight gain over the same month of 1950 at 1,694,268 tons against 1,666,431 tons in the previous November and compares favourably with 1,279,347 tons in 1949. The current volume is well above the average for November. Vessel passages increased from 784 to 838.

Increased movements of barley, oats, rye, and wheat were indicated with the last up from 323,586 to 371,319 tons. Gasoline advanced from 75,784 to 120,630 tons and petroleum and other oils were 12,244 tons heavier at 148,699 tons. Pulpwood, woodpulp and paper shipments also improved. Sand, gravel & stone rose from 24,759 to 62,780 tons and other freight was up 6,785 tons to 185,307. The major recessions occurred in corn, soft coal off from 560,652 to 522,326 tons, coke, and in iron ore which dropped 82,630 tons to 83,014.

To November 30th, the season's freight through the Welland amounted to over 15,468,000 tons for a gain of some 1,380,000 tons or 9.8 p.c. over the similar period of 1950, indicating a record season for this important artery.

St. Lawrence Canals: Tonnage of freight passing during November was 1,181,413 against 1,245,732 tons in the corresponding month of 1950 and 924,708 tons in November, 1949. The decrease of 64,319 tons from 1950 was due mainly to lighter soft coal, corn and gas and oil shipments. Barley and rye showed gains while wheat advanced 79,453 tons to 321,509 tons. Pulpwood and paper were heavier with paper up from 19,959 to 26,027 tons.

Corn dropped from 36,366 to 5,308 tons, petroleum and other oils from 165,634 to 146,328 tons while soft coal at 215,811 tons was down 72,330 tons. Miscellaneous freight declined 13,781 tons to 171,976.

Cummulative traffic to the end of November on the St. Lawrence system was slightly under 1950 at 9,873,596 tons against 9,894,170 tons one year earlier. The heavy movements of corn, petroleum and other oils, iron and steel, sugar, iron ore and hard coal which occurred during 1950 were not matched this year.

The Ottawa, Richelieu and St. Peters Canals reported heavier freight traffic this November.
