DOMINION BUREAU OF STATISTICS

OTTAWA - CANADA

Published by Authority of the Hon. Gordon Churchill, Minister of Trade and Commerce

SUMMARY OF CANAL STATISTICS

APRIL, 1958

April statistics relate to the period between the opening of navigation on the various canals and the end of April. In 1958, opening dates for the three major canals were later than in the previous year, the first vessel passing through the Welland Ship Canal on April 1 (as against March 30 last year), the Canadian lock at Sault Ste Marie on April 8 (April 5) and the St. Lawrence Canals on April 14 (April 10). Statistics presented for the Canso Canal, which remained open throughout the winter months, include 42 vessels and 18,709 tons of cargo representing traffic during January, February and March.

Freight transported through all Canadian canals during the period was down by 30 p.c., dropping to 2,117,417 tons from 3,011,831 in 1957. Decreased shipments of bituminous coal and iron ore through the Welland and St. Lawrence systems were mainly responsible for this decline. The number of vessel passages and registered net tonnage dropped to 1,518 and 2,126,089 from 1,725 and 2,748,123 respectively.

Sault Ste. Marie Canals - Canadian and United States Locks: Freight traffic through the Canadian lock declined 14,795 tons to 69,647 from 84,442 tons in April 1957. The amount of freight carried through the combined system fell to 1,137,537 tons from 5,024,750 due to a lower volume of iron ore, bituminous coal and wheat. The decline in iron ore shipments alone accounted for 76 p.c. of the decrease.

Welland Ship Canal: The volume of freight carried through the Welland Ship Canal amounted to 1,371,702 tons, a decrease of 751,105 tons or 35 per cent from the April 1957 total of 2,122,807 tons. Shipments of bituminous coal fell to 567,061 tons from 996,569, iron ore to 61,738 tons from 185,522, crude petroleum to 13,130 tons from 144,276 and full oil to 52,339 tons from 85,485. However, increases were recorded for a few commodities including oats, barley and gasolene. The number of vessels declined to 593 from 830 while the registered net tonnage fell to 1,363,350 from 1,943,907.

St. Lawrence Canals: Due mainly to declines in iron ore and bituminous coal, shipments of freight through the St. Lawrence canals were down by 26 p.c., totalling 592,-585 tons as against 799,156 in April last year. Increases were registered in wheat shipments which rose to 232,124 tons from 185,984 and barley which advanced to 73,204 tons from 22,868. Vessel passages numbered 576 totalling 541,711 net tons as against 641 vessels of 598,953 tons in April, 1957.

Prepared in the Transportation and Public Utilities Section Public Finance and Transportation Division.
