SUMMARY OF CANAL STATISTICS

NOVEMBER 1967

An analysis of November canal data revealed several important changes and developments:

This month goods transported through the St. Lawrence Canals aggregated 6,320,711 tons, 3.1 per cent less than the 6,522,225 tons recorded during November 1966. Vessel passages, at 949, were down by 34 transits, although the registered net tonnage of these craft rose by slightly over two per cent to 4,260,490 tons.

Freight through the Welland declined by 4.4 per cent to 6,980,071 tons from 7,303,062 tons in November 1966; vessels using the system dropped by one hundred to 923 passages.

In November, wheat shipments through the St. Lawrence Canals, at 1,075,052 tons, were 181,790 tons lower than in 1966; however, in the previous month the difference between the two years was over forty per cent. With the exception of barley (which was lower than in November 1966, but has a year-to-date total of 1,330,443 tons compared to 1,263,939 tons in the corresponding period of 1966), other grains were uniformly down. As an example, cumulative movements of corn through the St. Lawrence Canals amounted to 1,878,962 tons this year against 3,272,973 tons in 1966 and 3,642,400 tons in 1965.

The volume of steel products through the St. Lawrence Canals this month advanced to 620,493 tons from 488,402 tons in November 1966 and to 557,903 tons from 427,361 tons through the Welland, the larger portion being destined for the United States.

Iron ore through the St. Lawrence Canals, at 1,898,162 tons exceeded that of November 1966 by 130,812 tons, while the volume handled by the Welland Canal contracted by 149,209 tons to some 1,580,956 tons due to a decline in American ore traffic. Of other significant commodities, fuel oil through the St. Lawrence section rose to 336,434 tons from 279,747 tons in the previous year, while coal on the Welland jumped to 1,227,210 tons from 852,832 tons, and through the same network salt movements fell to 122,884 tons from 188,470 tons.

For the period ending November 30, the cumulative total of goods shipped through all Canadian canals stood at 95,144,993 tons, 11.7 per cent less than the 107,707,915 tons recorded at this time in 1966.

Page 1 of 1

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

2. The second part of the document outlines the procedures for handling discrepancies. It states that any variance between the recorded amounts and the actual amounts should be investigated immediately. The responsible parties should identify the cause of the error and take corrective action to prevent it from recurring.

3. The third part of the document provides a detailed breakdown of the financial data for the period. It includes a table showing the total revenue, expenses, and net profit. The data is presented in a clear and concise manner, making it easy to understand and analyze.

4. The final part of the document concludes with a summary of the key findings and recommendations. It highlights the areas where the organization is performing well and identifies the areas that need improvement. The recommendations are based on the analysis of the data and are designed to help the organization achieve its financial goals.
