INTRODUCTION

This publication presents preliminary statistics on the carriage of goods by the marine mode of transport in Canadian coastal waters, the Great Lakes and the St. Lawrence Seaway. This activity is alternatively described as domestic or coastwise shipping.

The information on coastwise shipping is collected by means of a series of reporting forms. These are completed by agents or operators of vessels and forwarded to Statistics Canada for editing, compilation and processing. These reporting forms are described as "Shipping Reports" and are explained under "Methodology". Shipping reports give details on the port, the vessel and the cargo transported. Information collected on these variables is combined to form the data base for coastwise shipping.

Preliminary figures are published on a quarterly basis in this publication and annual figures are made available in **Coastwise Shipping Statistics** (Catalogue 54-210).

A list of Canadian Ports for which shipping data are available is shown at the end of this publication. British Columbia Ports, n.e.s., have been grouped by geographical areas of operation.

The published list of commodities is based on the Standard Commodity Classification published by Statistics Canada. There are 217 categories of goods identified; non-specific categories such as general cargo and containerized freight are included in this list.

Since the program to collect international data by means of the "Shipping Report" was cancelled in 1978, a new data base was completed from the A6 General Declaration form of Revenue Canada. These data are published in **International Vessel Traffic Statistics** (Catalogue 54-004 quarterly) commencing with the first quarter of 1979 and annually under the same title in Catalogue 54-209.

Other water transportation data are made available on an occasional basis in the **Water Transport Service Bulletin** (Catalogue 54-003). Requests for data requirements which are not covered by these publications should be addressed to the Chief, Surface and Marine Transport Section, Transportation and Communications Division, Statistics Canada, Ottawa, K1A 0V1, (613) 996-9274.

INTRODUCTION

Cette publication présente des statistiques provisoires sur le transport maritime de marchandises dans les eaux côtières canadiennes, les Grands Lacs et la voie maritime du Saint-Laurent. On parle également de cabotage pour désigner la navigation nationale.

Les renseignements sur la navigation nationale sont recueillis au moyen d'une série de formules remplies par les agents ou les exploitants de navires et transmises à Statistique Canada en vue du contrôle, du rassemblement et du traitement des données. Une explication du contenu de ces "Rapports sur la navigation" figure à la section "Méthodologie". Les rapports de navigation servent à recueillir des renseignements sur le port, le navire et la cargaison transportée, qui sont alors totalisés pour produire la base de données sur la navigation nationale.

Les chiffres provisoires sont publiés chaque trimestre dans cette publication et les chiffres annuels paraissent dans **Statistiques du cabotage** (n° 54-210 au catalogue).

Une liste des ports canadiens pour lesquels on dispose des données sur la navigation est publiée dans la dernière partie de cette publication. Les ports habituellement désignés sous Ports de la Colombie-Britannique, n.d.a., ont été regroupés par région géographique d'opération.

La liste des marchandises faisant l'objet des statistiques est fondée sur la Classification type des produits publiée par Statistique Canada et comprend 217 catégories de produits identifiés ainsi que des catégories non déterminées comme les cargaisons générales et les marchandises conteneurisées.

Depuis que le programme de collecte de données internationales au moyen du "Rapport sur la navigation" a été annulé en 1978, une nouvelle base de données a été produite à partir de la formule de déclaration générale A6 de Revenu Canada. Ces données paraissent dans la publication trimestrielle **Statistique du trafic maritime international** (n° 54-004 au catalogue), à compter du premier trimestre de 1979 et dans la publication annuelle du même titre (n° 54-209 au catalogue).

D'autres données sur le transport par eau paraissent à l'occasion dans le **Bulletin de Service transport par eau** (n° 54-003 au catalogue). Les demandes de renseignements qui ne figurent pas dans ces publications doivent être adressées au chef de la Section des transports de surface et maritimes, Division des transports et des communications, Statistique Canada, Ottawa, K1A 0V1, (613) 996-9274.

Background

The Transportation and Communications Division of Statistics Canada is responsible for the collection of marine statistics at the national level. Until the survey year 1979, coastwise shipping data were extracted from the S.1 Shipping Report and published in the monthly report, **Shipping Statistics** (Catalogue 54-002). Annual **Shipping Reports, Part III, IV and V** (Catalogue 54-204, 54-206 and 54-207) were published annually until 1978. Although these annual publications were discontinued during the 1978 survey year as a result of the reduction in government expenditures, the data are available on request.

Survey Objectives

The coastwise shipping data base was established to provide basic vessel and cargo data for the use of federal and provincial government departments, shipping firms, consultants, interested associations and businesses concerned with trade, industry and transport and to:

record the pattern of domestic commodity movements;

measure the quantity of domestic cargo handled at Canadian ports;

identify the ports of origin and destination of domestic commodity movements;

assist in transportation studies; and

provide information for the presentation of briefs, submissions and inquiries to regulatory authorities and/or commissions.

Survey Concepts

Vessel

A vessel is classed as being in coastwise shipping when:

it is of Canadian registry, sails between two Canadian ports and loads or unloads no foreign freight; or

it is of foreign registry, but is granted a waiver by the Canadian Transport Commission to engage in coasting service.

Only data relating to those vessels which are engaged in port-to-port transportation of goods have been included; data relating to the intraport movements of goods have been excluded.

Historique

La division du transport et des communications de Statistiques Canada est l'organisme gouvernemental responsable de la ceuillette des données sur le transport maritime à l'échelle nationale. Jusqu'à l'année d'enquête 1979, les données étaient recueillies à l'aide du questionnaire S.1 Rapport sur la navigation et elles étaient publiées dans le rapport mensuel, **Statistiques maritimes** (n° 54-002, au catalogue). Les publications annuelles, **Transport maritime parties III, IV et V** (n° 54-204, 54-206 et 54-207, au catalogue) étaient publiées jusqu'à l'année 1978. Même si ces publications annuelles ont cessé de paraître en raison des restrictions budgétaires du gouvernement fédéral, les données peuvent être obtenues sur demande.

Objectifs de l'enquête

La base de données sur la navigation nationale a été constituée afin de fournir des renseignements essentiels aux ministères fédéraux et provinciaux, aux entreprises maritimes, aux conseillers et aux associations et entreprises intéressées au commerce, à l'industrie et aux transports. Voici les autres objectifs poursuivis:

établir un schéma des mouvements nationaux de marchandises;

mesurer le volume des cargaisons nationales manutentionnées dans les ports canadiens;

identifier les ports d'origine et de destination des marchandises nationales;

aider aux études sur le transport; et

fournir des renseignements à l'appui de mémoires, comptes rendus et requêtes adressés aux autorités ou aux commissions investies d'un pouvoir de réglementation.

Concepts de l'enquête

Navires

Entrent dans la catégorie de la navigation nationale:

les navires immatriculés au Canada qui naviguent entre deux ports canadiens sans charger ni décharger de fret étranger; ou

les navires immatriculés à l'étranger qui détiennent une autorisation de cabotage de la Commission canadienne des transports.

Seules les données relatives aux navires transportant des marchandises d'un port à un autre sont présentées ici; on n'a pas tenu compte des données sur les mouvements de marchandises effectués dans le même port.

A vessel is considered arriving or departing "in ballast" if cargo is neither loaded nor unloaded at a port.

Coastwise shipping data are collected for vessels calling at coastal, St. Lawrence River, Great Lakes, Hudson Bay and Arctic Ocean ports. Waters such as Lake Winnipeg and the Mackenzie River are not included.

The "gross registered tonnage" of a vessel is the capacity in cubic feet of the spaces within the hull and of the enclosed spaces above the deck divided by 100.

The "net registered tonnage" of a vessel is the gross registered tonnage less the space, expressed in tons, that is used for the accommodation of personnel, propelling machinery and fuel.

Cargo

The cargo is loaded and unloaded at Canadian ports. Domestic cargoes which are loaded in one navigational season but not discharged until the following season are recorded in the following year's annual report. This is particularly important in the movements of grains.

"General cargo" refers to the commodities which were not specifically identified on the reporting forms. Bulk shipments are not included with general cargo. Bulk shipments usually refer to commodities that are loose or in mass such as all grains, cement, coke, petroleum, liquids carried in tanks, ores and minerals, pig iron, scrap iron and steel, logs, raw sugar and pulpwood.

Commodity weights are shown in metric tonnes (1 000 kg). **Selected commodities** refers to commodities for which the tonnage handled in the previous year was 1 000 000 tonnes or more.

Port

The ports must be located within Canadian geographic limits.

Some ports frequently engage in "lightering" where the cargo is loaded in the harbour rather than at a dock or wharf and the tonnage is included with the port totals.

Un navire est considéré comme entrant ou sortant "sur lest" si des marchandises ne sont ni chargées ni déchargées à un port.

Les données sur la navigation nationale sont recueillies pour les navires qui font escale aux ports côtiers et à ceux du Fleuve Saint-Laurent, des Grands Lacs, de la Baie d'Hudson et de l'océan Arctique. Certaines eaux comme le lac Winnipeg et le Fleuve Mackenzie ne font pas partie du champ de l'enquête.

La "jauge brute au registre" correspond à la capacité en pieds cubes de la coque et de l'espace fermé au-dessus du pont, divisée par 100.

La "jauge nette au registre" d'un navire correspond au nombre de tonnes brutes au registre, moins les quartiers de l'équipage, la salle des machines et les réservoirs de mazout.

Cargaison

Les marchandises sont chargées et déchargées dans les ports canadiens. Les marchandises de cabotage chargées pendant une saison de navigation, mais non déchargées avant la saison suivante, sont prises en compte dans le rapport annuel de l'année suivante. Ce point est très important lorsqu'on étudie le commerce des céréales.

Les "marchandises générales" sont celles qui ne peuvent être identifiées avec précision sur la formule de navigation. Les livraisons en vrac qui ne sont pas des marchandises générales, s'entendent habituellement de marchandises pêle-mêle, sans emballage ni arrimage; en voici des exemples: toutes les céréales, le ciment, le coke, le pétrole, les liquides transportés dans des réservoirs, le minerais et minéraux, la fonte en gueuses, les déchets de fer et d'acier, les billes de bois, le sucre brut et le bois à pâte.

Les quantités sont indiquées en tonnes métriques (1 000 kg). **Marchandises sélectionnées** désignent les marchandises dont le tonnage manutentionné l'année précédente a atteint ou dépassé 1 000 000 tonnes.

Port

Les ports doivent être situés dans les limites géographiques du Canada.

Dans certains ports, les marchandises sont fréquemment embarquées ou débarquées "par allège" plutôt qu'à un dock ou un quai. Le tonnage est alors compris dans le tonnage total du port.

The terms "origin" and "destination" refer to the ports of loading and unloading and not to terminating points of the goods or shipments.

Canadian ports have been grouped into three regions:

Atlantic, Arctic waters, northern Manitoba, northern Ontario, northern Quebec and the Lower St. Lawrence River ports (Montréal and below);

Great Lakes and Upper St. Lawrence River ports (above Montréal); and

Pacific ports.

Selected ports refers to Canadian ports which handled 1 000 000 tonnes or more of cargo the previous year.

Survey Universe

For each vessel entering or leaving a Canadian port in coastwise shipping, a report to record this activity must be completed and filed with Statistics Canada. However, reports are not required for movements of:

cargo vessels under 15 net registered tons;

tugs or other vessels under 15 gross registered tons;

Canadian naval or fishing vessels; and

ballast movements for members of the Council of Marine Carriers who report on the S.4 report.

Survey Methodology

The Reporting Forms

The following shipping reports are used to obtain coastwise shipping statistics:

The S.1 Domestic Shipping Report. This is the principal form used for data collection. Agents or operators of vessels arriving at or departing from Canadian ports complete this report for each vessel within the universe. The S.1 Shipping Report includes vessel information, such as: name, country of registry, net and gross tonnage; and cargo information, such as: commodity description, tonnage and ports where cargoes were loaded and unloaded. These variables constitute the data base for coastwise shipping statistics.

Les termes "origine" et "destination" ne concernent que les ports de chargement et de déchargement et pas nécessairement le point de déchargement final (qui peut être à l'intérieur des terres).

Les ports canadiens ont été groupés en trois régions:

Les ports de l'Atlantique, de l'Arctique, du nord du Manitoba, du nord de l'Ontario, du nord du Québec et du bas Saint-Laurent (le port de Montréal et ceux qui sont situés en aval de celui-ci);

les ports des Grands Lacs et du haut Saint-Laurent (en amont de Montréal); et

les ports du Pacifique.

Ports sélectionnés désignent les ports canadiens où 1 000 000 tonnes ou plus de marchandises ont été manutentionnées l'année précédente.

Univers de l'enquête

Un rapport doit être rempli et envoyé à Statistique Canada pour chaque caboteur qui entre dans un port canadien ou qui le quitte. Sont toutefois dispensés de cette déclaration:

les cargos d'une jauge nette au registre inférieure à 15 tonnes;

les remorqueurs ou autres navires d'une jauge brute au registre inférieure à 15 tonnes;

les navires de la marine canadienne et les bateaux de pêche; et

les mouvements de navire à lège pour les membres du **Council of Marine Carriers** qui complètent une formule S.4.

Méthodologie de l'enquête

Les formules de déclaration

Les rapports suivants sur la navigation servent à recueillir les données sur le cabotage:

La formule, S.1 Rapport sur la navigation en eaux intérieures. Ce rapport est la principale formule utilisée pour la collecte des données. Les agents ou exploitants de navires qui arrivent à un port canadien ou le quittent doivent remplir ce rapport pour chaque navire de l'univers. Le rapport sur la navigation S.1 recueille des renseignements sur le navire tels que le nom, le pays d'immatriculation, la jauge nette et brute et des données sur les marchandises (description de la cargaison, le tonnage et ports d'embarquement et de débarquement). Ces variables constituent la base de données pour la statistique de la navigation nationale.

The S.3 Shipping Report. This report is used for vessels making several calls along a regular route. Each report covers one round-trip voyage. These reports are specifically used for vessel movements along the coast of Newfoundland, or between Newfoundland and the mainland.

The S.4 Towboat and Ferry Operators Shipping Report. This report was implemented January 1st, 1979 and is used by the members of the Council of Marine Carriers on the west coast (operators of tugs, barges, scows and ferries) to report domestic cargo movements on a monthly basis. They are not required to report ballast movements and in the case of a tug-barge/scow unit, only the barge/scow report is required.

Collection

Shipping reports are completed in duplicate and filed with the Collector of Customs at the time of vessel departure. When vessels call at non-customs ports, the shipping reports covering these calls are taken or mailed to the nearest Collector of Customs. The original copies are then mailed daily to Statistics Canada, Ottawa by the customs officials of Revenue Canada.

Processing

Upon receipt, in the Surface and Marine Transport Section of the Transportation and Communications Division, the documents are manually sorted and edited for consistency and reliability of reported data. Selected fields are then coded to facilitate data processing.

The coding and editing procedures involve assignment of numeric codes to all ports and commodities, checking for consistency of information in comparison to previous trends and port activities, the use of reference materials for missing or questionable data and the follow-up of questionable reports by telephone. In this case, either the shipping companies or customs offices involved are contacted.

Reliability and Limitations of the Data

Developments to improve existing shipping reports as a means to collect better coast-wise shipping statistics have begun with the implementation of the S.4 Towboat and Ferry Operators Shipping Report. This report was designed for a specific type of operation and is presently used by the members of the Council of Marine Carriers on the west coast

La formule S.3. Ce rapport est utilisé par les navires qui font plusieurs escales sur leur itinéraire régulier. Chaque rapport vise un voyage aller-retour, plus particulièrement les mouvements le long de la côte de Terre-Neuve ou ceux entre Terre-Neuve et le continent.

La formule S.4 - Exploitants de remorqueurs et de traversiers. Ce rapport a été implanté le 1^{er} janvier 1979. Il est utilisé par les membres du Council of Marine Carriers de la côte ouest (opérateurs de remorqueurs, de chalands, de péniches et de traversiers) pour rapporter mensuellement leur mouvement côtiers de marchandises. Ils ne sont pas obligés de rapporter les mouvements à lège et seul le rapport chaland/péniche est exigé dans le cas d'une unité remorqueur-chaland/péniche.

Collecte

Les rapports sur la navigation sont remplis en double exemplaire et remis au receveur de la douane au moment du départ du navire. Lorsqu'un navire fait escale à un port non douanier, la formule doit être remise ou postée au plus proche receveur de la douane. Chaque jour, les douaniers de Revenu Canada envoient par la poste l'original des rapports à Statistique Canada, Ottawa.

Traitement

Dès réception des documents, la Section des transports de surface et maritimes de la Division des transports et des communications les trient et les vérifient afin d'en déterminer l'uniformité et la fiabilité. Certaines zones du questionnaire sont alors codées afin de faciliter le traitement des données.

Lors du codage et du contrôle des données, on attribue des codes numériques à tous les ports et à toutes les marchandises, on vérifie l'uniformité des renseignements sur les tendances et les activités portuaires par rapport aux déclarations précédentes et l'on utilise des documents de référence lorsqu'il manque des chiffres ou que les données sont douteuses; dans le cas des rapports peu fiables, on effectue un suivi téléphonique en communiquant avec la société de navigation ou le bureau de douane en cause.

Fiabilité et limites des données

Le développement de différents moyens pour améliorer les rapports maritimes actuels pour collecter de meilleures statistiques sur le cabotage a débuté avec l'implémentation de la formule S.4 Exploitants de remorqueurs et traversiers. Cette formule a été conçue pour ce genre d'opération spécifique et est présentement utilisée par les membres du Council of Marine Carriers sur la

(operators of tugs, barges, scows and ferries) to report domestic cargo movements on a monthly basis. They are not required to report ballast movements and in the case of a tug-barge/scow unit, only the barge/scow is required. If the reports' evaluation is satisfactory then the use of this report will be considered for expansion to other carriers in other regions offering these services.

While every effort has been made to remove methodological and clerical errors, the statistics contained in this report should be used with caution and due allowance for their limitations. Although the data are considered representative of coast-wise activity, the figures are known to understate shipping activity as well as distort specific commodity figures. Generally, the factors contributing to these problems can be grouped into the following broad categories. (For other related limitations refer to the section on "Concepts".)

Incomplete Coverage

Shipping reports are not submitted for all vessel arrivals and departures at Canadian ports. It is estimated that 10% of all shipping reports are missing principally due to the poor response of particular carriers.

Data on cargo and vessel movements for vessels not in the universe are excluded from this publication. This has a significant impact on shipping activity for such ports as the North Arm Fraser River Harbour where most of the vessels providing marine transportation are of a size which excludes them from the universe.

Distortion in the Data

The term "general cargo" is considered by some respondents to be synonymous with "miscellaneous". Consequently, general cargo figures tend to be inflated and commodity data may be somewhat lower than actual.

Commodity descriptions tend to reflect rate and tariff classifications which may differ from the commodity groupings contained in the Standard Commodity Classification. Some distortions of the data may result from judgement decisions by respondents or editors. In addition, some commodity information and tonnage are reported as aggregated summaries of the cargo and it is therefore difficult to code this type of information to precise commodity groups.

côte ouest (opérateurs de remorqueurs, de chalands, de péniches et de traversiers) pour rapporter mensuellement leur mouvement côtiers de marchandises. Ils ne sont pas obligés de rapporter les mouvements à lège et seul le rapport chaland/péniche est exigé dans le cas d'une unité remorqueur-chaland/péniche. Si les résultats sont satisfaisants alors l'utilisation de ce rapport pourra être éventuellement étendue à d'autres transporteurs qui offrent le même genre de service dans leurs régions.

Même si l'on a tenté par tous les moyens possibles d'éliminer les erreurs de méthodologie et de traitement, l'utilisateur devrait se servir des statistiques contenues dans ce bulletin avec beaucoup de circonspection. Bien qu'en principe les chiffres représentent l'activité dans les ports, on sait qu'en réalité ils la sous-estiment et faussent les données sur certaines marchandises. Dans l'ensemble, les causes de ces problèmes peuvent être groupées dans les catégories ci-dessous. (La rubrique portant sur les "Concepts" de l'enquête explique les autres limites.)

Champ d'observation incomplet

Les rapports sur la navigation ne sont pas remis pour tous les mouvements de navires dans les ports canadiens. On estime qu'il manque 10% des rapports, principalement à cause de la piètre collaboration de certains transporteurs.

Les données sur les mouvements des cargos et des navires qui ne font pas partie de l'univers ne sont pas comprises dans cette publication. Ce champ d'observation limité a un effet important sur les données des ports comme celui de l'embranchement nord du fleuve Fraser, où la plupart des navires qui y accostent ont une jauge inférieure à celle des navires compris dans l'univers.

Distortion des données

Certains enquêtés estiment que l'expression "marchandises générales" est synonyme de "divers". Par conséquent, les chiffres relatifs aux marchandises générales tendent à être gonflés et les données sur chaque marchandise, quelque peu sous-estimées.

Les appellations de marchandises tendent à s'inspirer des nomenclatures douanières qui peuvent différer des groupes de la Classification type des produits; dans certains cas, les données peuvent être faussées parce que l'enquêté ou le vérificateur doit prendre une décision. En outre, certains chiffres de marchandises et de tonnage représentent un groupement de marchandises; il est donc difficile d'effectuer le codage selon le groupe précis de produits.

The conversion of some units to other measurements can lead to distortion of the data when precise knowledge of the commodity in question is unknown (e.g., specific gravity for liquid commodities).

Analysis

In the fourth quarter of 1982, domestic shipping at Canadian ports totalled 36 402 195 t. Vessels arriving and departing in domestic shipping during this period amounted to 13,535 with a net registered tonnage of 42.5 million tons. Vessel arrivals numbered 6,881 with a net registered tonnage of 21,619,930 tons and vessel departures totalled 6,654 with a net registered tonnage of 20,892,459 tons. Of the total vessel movements in domestic shipping, 8,959 or 66.2% were cargo movements.

Newfoundland ports handled 24.8% of the total vessel movements in this period, followed by Quebec ports, which handled 21.5%. It should be noted that vessel arrivals and departures at British Columbia ports are understated as the S.4 Towboat and Ferry Operators Shipping Report does not require any reporting of ballast movements by the members of the Council of Marine Carriers.

Traffic by Region

For the purpose of presenting information in this report, Canada has been divided into three maritime regions: the Atlantic, the Great Lakes and the Pacific.

The Atlantic region handled the largest amount of domestic cargo, 14 626 133 t, or 40.2% of all cargo. Québec handled 75.7%, followed by Nova Scotia with 11.4%, New Brunswick with 7.4%, Newfoundland with 4.7%, and Prince Edward Island with 0.8%. The major commodities handled were fuel oil, wheat and crude petroleum.

The Great Lakes region ranked second in terms of cargo, handling 11 544 266 t or 31.7% of all cargo. The major commodities handled were wheat, barley and fuel oil.

The Pacific region ranked third in terms of cargo, handling 10 231 796 t or 28.1% of all cargo. The major commodities handled were logs, pulpwood and sand and gravel.

L'utilisation de facteurs de conversion peut entraîner des écarts parce qu'il n'est pas facile de convertir certaines unités sans connaître les caractéristiques techniques des marchandises en cause (par ex., la densité des liquides).

Analyse

Au quatrième trimestre de 1982, les ports canadiens ont manutentionnés 36 402 195 t de marchandises de cabotage. Dans la même période, il y a eu 13,535 arrivées et départs de navires dont la jauge nette au registre s'est établie à 42.5 millions de tonnes. Les arrivées de navires se sont chiffrées à 6,881 jaugeant 21,619,930 tonnes nettes au registre, tandis que les départs se sont chiffrés à 6,654 jaugeant 20,892,459 tonnes nettes au registre. On a relevé 8,959 mouvements de marchandises, ce qui représente 66.2% du total des mouvements de navires en régime de cabotage.

Les ports de Terre-Neuve ont été les plus achalandés avec 24.8% de tous les mouvements de navires; viennent ensuite ceux de Québec avec 21.5%. Il convient de signaler que le nombre d'arrivées et de départs de navires dans les ports de Colombie-Britannique est inférieur à ce qu'il devrait être en réalité étant donné que la formule S.4 - Exploitants de remorqueurs et de traversiers, ne demande pas aux membres du Council of Marine Carriers d'enregistrer les mouvements sur lest.

Trafic par région

Aux fins de la présentation des données dans le présent bulletin, le Canada a été divisé en trois régions maritimes: l'Atlantique, les Grands Lacs et le Pacifique.

C'est la région de l'Atlantique qui a manutentionné le plus fort volume de marchandises de cabotage, soit 14 626 133 t ou 40.2% du total, dans lequel le Québec est intervenu pour 75.7%, la Nouvelle-Écosse, 11.4%; Nouveau-Brunswick, 7.4%; Terre-Neuve, 4.7%; l'Île-du-Prince-Édouard, 0.8%. Les principales marchandises manutentionnées ont été le mazout, le blé et le pétrole brut.

La région des Grands lacs vient au deuxième rang pour le volume de marchandises manutentionnées, avec 11 544 266 t ou 31.7% du total. Les principales marchandises manutentionnées ont été le blé, l'orge et le mazout.

La région du Pacifique vient au troisième rang pour le volume de marchandises manutentionnées avec 10 231 796 t, soit 28.1% de l'ensemble du trafic canadien. Les principales marchandises manutentionnées ont été les billes, le bois à pâte et le sable et graviers.

The percentage of cargo loaded and unloaded in each region is as follows: Atlantic, 26.4% and 54.0%; Great Lakes, 45.4% and 18.0%; and the Pacific, 28.2% and 28.0%, respectively.

Cargoes Unloaded

The commodities which made up the highest volume of cargo unloaded in coastwise shipping in this period and their respective tonnages were as follows: wheat, 3 643 731 t; fuel oil, 2 462 788 t; logs, 2 434 298 t; barley, 1 373 688 t; and iron ore and concentrates, 1 105 085 t. These five commodities represented 60.5% of the total cargo unloaded in domestic shipping in the fourth quarter of 1982.

Port Activity

The ports which handled the highest volume of cargo in coastwise shipping in this period and their respective tonnages handled were as follows: Thunder Bay, 6 003 312 t; Montréal, 3 407 250 t; Québec, 2 186 571 t; Port Cartier, 1 409 361 t; East Coast Vancouver Island, 1 348 865 t; North Arm Fraser River, 1 223 487 t; Halifax, 1 061 698 t. These ports handled 45.7% of the total cargo handled in domestic shipping. The first five ports handled 39.4% of the total cargo handled.

The major commodities handled at Thunder Bay were wheat, 3 517 295 t loaded; barley, 1 276 570 t loaded and bituminous coal, 455 373 t loaded. The majority of the wheat and barley were unloaded at Québec, Port Cartier, Montréal and Baie Comeau. All of the bituminous coal was unloaded at Nanticoke.

The port of Montréal loaded 782 161 t of crude petroleum and 484 316 t of fuel oil. The crude petroleum was unloaded at Saint John, 429 512 t and Halifax, 352 649 t. Québec, Halifax and Port Alfred unloaded 44.3% of the fuel oil. The major commodities unloaded were wheat, 746 374 t and fuel oil, 416 787 t. Of the total wheat unloaded, 700 022 t were loaded at Thunder Bay, and of the total fuel oil unloaded, 80 681 t were loaded at Québec and 72 680 t were loaded at Halifax.

The major commodity handled at Québec was wheat 97.1%, or 865 897 t was unloaded from Thunder Bay. The major commodity loaded was fuel oil. Of the 349 174 t loaded, the majority was unloaded at Montréal, 80 681 t and Sarnia, 36 945 t.

Le pourcentage de marchandises chargées et déchargées se répartit comme suit selon la région: région de l'Atlantique, 26.4% et 54.0%; région des Grands Lacs, 45.4% et 18.0%; région du Pacifique, 28.2% et 28.0%, respectivement.
