SHIPPING REPORT

1938

The Shipping Report for previous years was compiled by the Customs Division of the Department of National Revenue. This work has been transferred to the Dominion Bureau of Statistics and the statistics will henceforth be compiled and published by the Bureau.

The present report is somewhat abridged, but the Bureau expects to be able to expand the statistics in future years.

Cargoes are shown only in tons of 2,000 pounds. The majority of cargoes are so reported and where reported in tons of 40 cubic feet they have been added to the tons weight. Also no segregation was made of vessels with cargoes and vessels in ballast, nor of steam and sail vessels. Crew were compiled only for inbound vessels. The difference for outbound vessels is small.

Ports have been arranged alphabetically, by provinces, and each minor port or harbour has been shown separately instead of being included or grouped with the major port having jurisdiction over its business, thus emphasizing the physical aspect of the traffic rather than the administrative aspect.

The arrivals and departures of the vessels operating between Sarnia, Ontario, and Port Huron, Michigan, across the St. Clair river as ferries, but without a Canadian ferry licence, have been omitted from the tables as in the case of licensed ferries at other ports.

Sea-going vessels calling at two or more ports are reported in from sea and out coastwise at the first port and in from sea at the second port. Also, vessels calling at two or more ports on an outbound voyage are reported departed sea-going at the first port, arrived coastwise and departed sea-going at the second port. Consequently the total arrivals and total departures at any port in any of the three services may not coincide. The difference in the number and tonnage of vessels in port at the beginning and end of the year will also affect the total of arrivals and departures.

RAPPORT DE LA NAVIGATION

1 9 3 3

Le Rapport de la Navigation était autrefois préparé par la division des Douanes du ministère du Revenu National. Ce travail a été transféré au Bureau Fédéral de la Statistique qui en fera désormais la compilation et en assurera la publication.

Le présent rapport a été quelque peu abrégé, mais le Bureau compte pouvoir amplifier les statistiques dans les années futures.

Les cargaisons sont indiquées en tonnes de 2,000 livres seulement. Elles sont en majeure partie déclarées de cette façon. Dans les cas où elles sont déclarées en tonnes de 40 pieds cubes elles sont ajoutées au poids en tonnes. Aucune distinction n'a été faite pour les vaisseaux portant cargaisons et les vaisseaux sur lest, ni pour les navires à vapeur ou à voile. Les équipages n'ont été calculés que pour les vaisseaux arrivant. La différence pour les vaisseaux en partance est peu importante.

Les ports ont été disposés par ordre alphabétique, par province, et chaque port ou havre secondaire a été indiqué séparément plutôt que compris ou groupé avec les plus importants ayant juridiction sur leur trafic. Ceci met en relief l'aspect physique du trafic plutôt que l'aspect administratif.

Les arrivées et les départs des vaisseaux faisant la navette entre Sarnia, Ontario, et Port-Huron, Michigan, et des traversiers sur la rivière Ste-Claire ne détenant pas une patente canadienne ont été omis du rapport comme dans le cas des traversiers patentés dans les autres ports.

Les océaniques faisant escale à deux ports ou plus sont inscrits au premier port comme arrivant de la haute-mer et comme caboteurs en partance, et au deuxième, comme arrivant de la haute-mer. De même, les vaisseaux en partance et faisant escale à deux ports ou plus sont inscrits au premier port comme partant pour la haute-mer, et au deuxième, comme caboteurs arrivant et comme océaniques partant de ce même port pour la haute-mer. En conséquence les totaux d'arrivées et de départs à un port quelconque dans l'un ou l'autre des trois services peuvent bien ne pas coïncider. La différence entre le nombre et le tonnage des vaisseaux en mouillage dans un port au commencement et à la fin de l'année affecte de même les totaux des arrivées et des départs.
