SHIPPING REPORT

1 9 3 9

The Shipping Report for years prior to the fiscal year ended March 31, 1938 was compiled by the Customs Division of the Department of National Revenue. This work was transferred to the Dominion Bureau of Statistics and the statistics for 1937-38 were compiled by the Bureau in an abridged form. This report for the fiscal year ended March 31, 1939 has been increased to include practically all the data formerly published. A few of the tables have been consolidated but the details have been shown.

Cargoes are shown only in tons of 2,000 pounds. The majority of cargoes are so reported and where reported in tons of 40 cubic feet they have been added to the tons weight. Crew were compiled only for inbound vessels. The difference for outbound vessels is small.

Ports have been arranged alphabetically, by provinces, and each minor port or harbour has been shown separately instead of being included or grouped with the major port having jurisdiction over its business, thus emphasizing the physical aspect of the traffic rather than the administrative aspect.

The arrivals and departures of the vessels operating between Sarnia, Ontario, and Port Huron, Michigan, across the St. Clair river as ferries, but without a Canadian ferry licence, have been omitted from the tables as in the case of licensed ferries at other ports.

Sea-going vessels calling at two or more ports are reported in from sea and out coastwise at the first port and in from sea at the second port. Also, vessels calling at two or more ports on an outbound voyage are reported departed sea-going at the first port, arrived coastwise and departed sea-going at the second port. Consequently the total arrivals and total departures at any port in any of the three services may not coincide. The difference in the number and tonnage of vessels in port at the beginning and end of the year will also affect the total of arrivals and departures.

RAPPORT DE LA NAVIGATION

1939

Antérieurement à l'année fiscale terminée le 31 mars 1938, le Rapport de la Navigation était préparé par la division des Douanes du ministère du Revenu National. Ce travail a été transféré au Bureau Fédéral de la Statistique et les statistiques de 1937-38 ont été compilées par le Bureau sous une forme plus condensée. Ce rapport de l'année fiscale terminée le 31 mars 1939 a été prolongé de manière à comprendre presque toutes les données publiées antérieurement. Quelques tableaux ont été consolidés mais les détails y sont montrés.

Les cargaisons sont indiquées en tonnes de 2,000 livres seulement. Elles sont en majeure partie déclarées de cette façon. Dans les cas où elles sont déclarées en tonnes de 40 pieds cubes elles sont ajoutées au poids en tonnes. Les équipages n'ont été calculés que pour les navires arrivant. La différence pour les navires en partance est peu importante.

Les ports ont été disposés par ordre alphabétique, par province, et chaque port ou havre secondaire a été indiqué séparément plutôt que compris ou groupé avec les plus importants ayant juridiction sur leur trafic. Ceci met en relief l'aspect physique du trafic plutôt que l'aspect administratif.

Les arrivées et les départs des navires faisant la navette entre Sarnia, Ontario, et Port-Huron, Michigan, et des ferryboats sur la rivière Ste-Claire ne détenant pas une patente canadienne ont été omis du rapport comme dans le cas des traversiers patentés dans les autres ports.

Les long-courriers faisant escale à deux ports ou plus sont inscrits au premier port comme arrivant de la haute-mer et comme caboteurs en partance, et au deuxième, comme arrivant de la haute-mer. De même, les navires en partance et faisant escale à deux ports ou plus sont inscrits au premier port comme partant pour la haute-mer, et au deuxième, comme caboteurs arrivant et comme long-courriers partant de ce même port pour la haute-mer. En conséquence les totaux d'arrivées et de départs à un port quelconque dans l'un ou l'autre des trois services peuvent bien ne pas coïncider. La différence dans le nombre et le tonnage des navires en mouillage dans un port au commencement et à la fin de l'année affecte de même les totaux des arrivées et des départs.
