SHIPPING REPORT, 1942

This report for the calendar year 1942 is the second report on Canadian shipping to be compiled from shipping reports made by vessels calling at Canadian ports at which there are customs officials of the Department of National Revenue. The first report was for the fiscal year ended March 31, 1941 and for the calendar year 1941. Subsequent reports will be for calendar years only. A description of the method of collection and a reproduction of the shipping report and punch cards used in collecting and compiling the data were included in that report and will not be repeated here.

Coasting service includes vessels arriving from a Canadian port or departing for a Canadian port when no freight from a foreign port is unloaded or no freight for a foreign port is loaded. Under this definition a foreign vessel from a foreign country would be classed in coasting service when departing from one Canadian port for a second Canadian port, as well as vessels trading between Canadian ports. Foreign service includes vessels arriving from a foreign port as last port of call or departing for a foreign port as first port of call, or unloading freight from or loading freight for a foreign port.

If a vessel does not unload any freight or does not load any freight it is classed as arriving or departing, respectively, in ballast, irrespective of the amount of freight it might have on board. Because of these definitions a vessel may arrive twice in foreign service and depart in coasting service on the same trip and, consequently, the number of departures and arrivals in either class of service will not always be the same. Vessels built in port will also cause a difference in arrivals and departures. There are also certain customs regulations in respect to fishing vessels that are responsible for some difference in reports of departures and arrivals.

Due to war conditions all statistics available from shipping reports were not compiled and some statistics compiled were not included in this report but are readily available to interested persons. These latter include draft of vessels entering each port, cargoes carried by vessels of each flag, vessels of each flag entering each port, etc.

Cargoes:- Tables 5, 6 & 7 include data on cargoes to and from foreign countries. Details of cargoes are shown only for the larger ports and when only one commodity was handled at these ports the commodity was shown and no total. Tonnages of each commodity listed are not complete in all cases. Considerable tonnage of these commodities is included under "General", but where vessels loaded or unloaded only one commodity or where vessels with general cargoes handled any of these commodities in large lots, the tonnage of the commodity was reported and compiled. Tonnage data were required to be reported in tons weight of 2,000 pounds or in tons measurement of 40 cu.ft., but because of the practice in previous years of reporting tons in long tons of 2,240 pounds there is a possibility that all vessels did not report their cargoes correctly.

Vessel Tonnage:- Reports are not required from cargo vessels of less than ten net tons. Tugs and other vessels not designed to carry cargoes are required to report gross tons instead of net tons and these gross tons are added to net registered tons of other vessels in this report. These gross tons are a small percentage of the total and consequently the effect is small. No reports are required from such vessels of less than ten gross tons.

SHIPPING, 1942.
