SHIPPING REPORT

1 9 5 0

REVIEW OF 1950 OPERATIONS

Commencing April 1, 1949, the collection of shipping statistics for the new province of Newfoundland had been undertaken, and data for the 9-month period, April to December only, was included in the 1949 Shipping Report. In this report, details for Newfoundland on an annual basis appear for the first time.

As a result of complete figures for Canada's 10th province and greater shipping activity generally, Canadian maritime commerce sailed on to higher levels of achievement. During 1950, customs officials reported 115,485 vessel arrivals in foreign and coasting service as compared with 112,577 in 1949 and 106,279 in 1948. It was, relatively, the busiest year since 1940 when a war-inspired peak of 124,453 arrivals was attained. Registered net tonnage of vessels arriving amounted to 98,883,946 tons, the heaviest on record and exceeding the previous maximum of 96,125,380 tons reported for 1949. The number of arrivals in foreign service, however, remained well below the immediate prewar years; the 1950 total was 31,420 or 27.2 p.c. of all arrivals and represented 43.3 p.c. of the total net tonnage reported for all arrivals (see table 2).

On the basis of total net registered tonnage of vessels arriving, the five major Canadian ports in order of size were Vancouver (15,677,586 tons), Montreal (8,768,187 tons), Victoria (8,269,299 tons), Halifax (4,198,016 tons) and Quebec (3,931,461 tons).

Table 4, which summarizes vessel arrivals and departures in foreign and coasting service by provinces and by rig, brings out the fact that sail and unrigged vessels play a rather insignificant role in Canadian shipping in all provinces except British Columbia. Due largely to the activity of barges, scows and other unrigged vessels in the lumber trade around Vancouver Island and the port of Vancouver, the number of arrivals of unrigged vessels in the province amounted to 13,828 or 25.6 p.c. of the total.

Tables 5 to 9 are concerned with vessels in foreign service only and give the details of foreign trade from the viewpoint of the registry of vessels, countries entered from and cleared for, kind and amount of cargo by Canadian ports and by country of origin and of destination.

In 1950, total imports into all Canadian ports amounted to 36,961,181 tons, an increase of 30.5 p.c. over the 1949 total of 28,319,334 tons but only slightly larger than the 1948 total of 36,844,187 tons. This fluctuation is partly explained by the effects of the general strike in the U. S. coal fields in 1949 which caused bituminous coal imports to vary from 18,496,265 tons in 1948 to 11,504,898 tons in 1949 and to recover to 15,946,596 tons in 1950. Other commodities which contributed to the large increase in total imports include petroleum oil and products, which increased 36.2 p.c. from 5,796,513 tons in 1949 to 7,896,145 tons in 1950, corn, iron ore, limestone and general merchandise. As can be seen from Table 9, the increase in total imports has been fairly evenly distributed among the three geographical regions - Atlantic up 34.2 p.c. Great Lakes 29.3 p.c., and Pacific 23.5 p.c.

Increases in exports of flour, corn, gypsum, other ores, lumber, newsprint and fish were reported in 1950 but due to offsetting decreases in such commodities as wheat, oats, rye, iron ore and logs, total exports declined from a total of 22,441,732 tons in 1949 to 21,227,930 tons in 1950, a decrease of 1,213,802 tons or 5.4 p.c. Wheat shipments alone were off 804,770 tons from the 1949 total of 5,058,030 tons. Table 8 shows that most of the drop in exports occurred in the Atlantic region. Trade with Newfoundland previous to April 1, 1949, was considered as foreign.

Conforming to the traditional pattern of previous years, the bulk of Canada's waterborne trade was with the United States and the United Kingdom which, together, accounts for 77 p.c. of both total imports and total exports. Waterborne trade with the United States was nearly two-thirds of the national total. Cargoes loaded for United States ports in 1950 weighed 11,682,991 tons and exceeded the 1949 total by 1,882,133 tons through increased shipments of gypsum, lumber and newsprint. Imports, which rose more sharply, reached 26,697,919 tons or 27.2 p.c. more than in 1949. Export trade with the United Kingdom was off considerably from 7,371,788 tons in 1949 to 4,667,070 tons in 1950, lower by 2,704,718 tons or 36.7 p.c. due to decreased loadings of wheat, iron ore, logs, lumber and general merchandise in line with planned reduction in dollar purchases. Imports, however, were higher by 767,179 tons over 1949 and totalled 1,760,504 tons to reflect striking evidence of British recovery in the export market.

The total number of "new" vessels arriving during the year was 85 of 19,706 registered net tons. Fifty of these, totalling 3,525 tons were in coastwise service and 35 aggregating 16,181 tons came in foreign service.

Canadian overseas trade, as illustrated in Tables 8 and 9 by country of destination and of origin, is carried in vessels of many different countries of registry but with ships of the United Kingdom, United States, Norway, Greece, Panama and Sweden carrying the bulk of our export and import trade. Less than one-fifth of cargo to and from overseas points is carried under the Canadian flag. World dollar shortages and competition from an increasing fleet of more efficient and faster foreign vessels have accentuated the problems facing Canadian operators. The cost of operating a Canadian flagship is the second highest in the world. Soft currency countries naturally strive to save dollars by furnishing their own vessels to carry imports and earn dollars to pay for exports by carrying same. However, the outlook for Canadian deep sea operators has improved considerably since the Korea outbreak.

Some inconsistencies are apparent in comparison with Trade of Canada data since many vessels do not report cargo in detail but simply as "general" or "mixed". This is particularly true of passenger-freight service where a great variety of foreign-manufactured products may be unloaded. Consequently, such tonnage details as those for autos, trucks and parts, chinaware, iron and steel, beverages, etc., unloaded at Atlantic and Lower St. Lawrence ports are incomplete. The total of "general" cargo unloaded at all ports during the year grossed 1,990,561 tons, of which 1,715,154 was shown for eastern ports.

SOURCE AND TREATMENT OF DATA

Shipping statistics are compiled from reports made by operators or agents of vessels arriving at and departing from Canadian ports for which there are customs officials. These officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. A description of the method of collecting and compiling the statistics is given in the report for 1941. Also included in that report are reproductions of the statistical form used for vessels in both coasting and in foreign service and reproductions of the cards used to analyse and compile statistics of vessels in foreign service and their cargoes, loaded and unloaded.

Coasting service includes vessels arriving from a Canadian port or departing for a Canadian port when no freight from a foreign port is unloaded or no freight for a foreign port is loaded. Under this definition a foreign vessel from a foreign country would be classed in coasting service when departing from a Canadian port for a second Canadian port, as well as vessels trading between Canadian ports. Foreign service includes vessels arriving from a foreign port as last port of call or departing for a foreign port as first port of call, or unloading freight from or loading freight for a foreign port. Vessels in foreign service include vessels classified in reports prior to 1941 as "sea-going" and "trading between Canada and the United States on lakes and rivers".

If a vessel does not unload any freight or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of freight it might have on board. Because of these definitions a vessel may arrive twice in foreign service and depart in coasting service on the same trip and, consequently, the number of departures and arrivals in either class of service will not always be the same. Vessels built in Canadian ports will also cause a disparity in the number of arrivals and departures. There are also certain customs regulations in respect to fishing vessels that are responsible for some difference in reports of departures and arrivals.

Beginning with the 1948 report Tables 8 and 9 were considerably expanded. Table 8 gives the country of destination, kind of cargo, registry of vessel, tonnage or tons measurement of cargo loaded for foreign countries and allocates by geographical regions of Canada. Table 9 shows country of origin of cargoes unloaded in foreign trade as well as kind or commodity, registry of vessel, tonnage or tons measurement of cargo and by geographical divisions, namely, Atlantic and Lower St. Lawrence, Great Lakes and Upper St. Lawrence and at Pacific ports.

Table 11 lists arrivals and departures of fishing vessels from customs ports only. Table 5 shows cargo tonnage of vessels by country of registry. Other statistics available on request but not

published in this report, include draft of vessels entering each port, vessels of each flag entering each port, etc.

In classifying vessels in coasting service as to size, all unrigged vessels, all tugs and sail fishing vessels were grouped with the vessels of 10 to 99 net registered tons. Also, all vessels of over 4,000 net tons in coastal service were grouped with vessels 4,000 to 4,999 tons. This accounts for the average tonnage of coasting vessels in these two groups being greater in some cases than the maximum of the group. The number of vessels in coasting service of over 4,999 net tons are few except on the Great Lakes and the unrigged, tugs and sail fishing vessels were grouped with these small vessels for convenience. All vessels in foreign service were classified in Tables 2 and 3 strictly according to their tonnages.

Cargoes:- Tables 6 to 9 include data on cargoes to and from foreign countries. Details of cargoes are shown only for the larger ports and when only one commodity was handled at these ports the commodity was shown and no total. Tonnages of each commodity listed are not complete in all cases. Considerable tonnage of these commodities is included under "General", but where vessels loaded or unloaded only one commodity or where vessels with general cargoes handled any of these commodities in large lots, the tonnage of the commodity was reported and compiled. Tonnage data were required to be reported in tons weight of 2,000 pounds or in tons measurement of 40 cu.ft., but because of the practice in previous years of reporting tons in long tons of 2,240 pounds there is a possibility that some vessels did not report their cargoes in short tons.

Vessel Tonnage:- Reports are not required from cargo vessels of less than ten net tons. Tugs and other vessels not designed to carry cargoes are required to report gross tons instead of net tons and these gross tons are added to net registered tons of other vessels in this report. These gross tons are a small percentage of the total and consequently the effect is small. No reports are required from such vessels of less than ten gross tons.

A list of the countries and geographical areas used for origin and destinations of vessels and of cargoes is included as an appendix. Also, as a second appendix is a list of the commodities used for classifying cargoes. By reference to these the meaning of such items as "ores - other", "West Indies - other", etc., is clarified.

(1) Includes the following vessels in Coasting Service

- (a) Vessels of 10 - 99 Registered Net Tons.
- (b) All unriggered vessels.
- (c) All tugs.
- (d) All sail fishing vessels.

(2) Includes all vessels of 4,000 Registered Net Tons or over in Coasting Service.

Fiji	Newfoundland	Dutch
Finland	New Zealand	French
France - Atlantic & English Chamel	Nicaragua	Yugoslavia - Czechoslovakia
France - Mediterranean	Nigeria	
French Equatorial Africa	Norway	
French Africa-Tunis, Algeria, Ivory Coast		

APPENDIX 2

COMMODITIES

Ballast

General

AGRICULTURAL PRODUCTS

Wheat

Corn

Oats

Barley

Rye

Flaxseed

Soya Beans

Other Grain - Peas

Grain N.O.S.

Flour - Grain

Nuts - Peanuts

Other Mill Products - Bran, etc.

Cotton - raw

Apples

Bananas

Other Fruit, fresh, frozen

Fruit, dried

Potatoes

Other Vegetables, fresh

Coffee

Tea

Cocoa - chocolate

Copra

Other Agricultural Products

Hay and Straw

Other Seeds - (Cloverseed)

ANIMALS AND ANIMAL PRODUCTS

Cattle and Calves

Other Live Animals

Dressed Meats, fresh, frozen

Dressed Meats, cured, salted

Eggs, Butter, Cheese, Milk Products

Wool

Hides, Leather

Skins - raw or undressed

Other Animal Products

MINE PRODUCTS

Coal - Anthracite

Coal - Bituminous

Coke

Iron Ore

Copper Ore and Concentrates

Bauxite

Asbestos - raw

Gypsum

Sulphur

Manganese Ore

Other Ores and Concentrates

MINE PRODUCTS - continued

Asphalt

Petroleum - crude

Salt

Sand, Gravel, Crushed Stone

Slate - Dimension and Block Stone

Limestone

Other Mine Products

FOREST PRODUCTS

Logs, Posts, Poles, Pit Props, Piling

Firewood - Hoggged Fuel

Pulpwood - Pulpwood Chips

Lumber, Timber, Box, Crate, Cooperage Material

Plywood

Containers, empty - Wood & Metal

Other Forest Products

MANUFACTURES AND MISCELLANEOUS

Gasoline

Petroleum Oils and other Petroleum Products

Pitch, Tar, Creosote

Vegetable Oils

Animal Oils

Fish Oils

Sugar, raw, refined

Molasses

Iron, pig, bloom

Scrap Iron and Steel

Iron and Steel (bar-sheet-structural-pipe)

Rails and Fastenings

Castings and Machinery

Aluminium, pigs, bars, rods, etc.

Cement

Brick

Lime and Plaster

Sewer Pipe, Drain Tile

Agricultural Implements

Autos, Trucks, Parts

Beverages

Fertilizers, all kinds

Newsprint Paper

Paper, other

Paperboard, Pulpboard, Wallboard

Wood Pulp, Pulp Screenings

Fish, fresh, frozen, cured

Canned Goods - all canned food products

Chinaware

Zinc, bars, etc.

Lead, bars, etc.

All other Freight N.O.S.
