SHIPPING REPORT

1952

8504-518

17-7-53

RE-ORGANIZATION

This is the first section of the 1952 "Shipping Report" and includes the details of cargoes loaded and unloaded in foreign service. It contains four tables which are equivalent to tables 8 and 9 and summaries of the 1951 report, the tables which are considered to be the most important. Section 2, which will be released shortly, will contain all other tables which pertain to foreign or international seaborne shipping while Section 3 will present all tables relating to the coastwise trade including cargo data. This is the first year that cargoes carried in the coastwise trade are available.

Previous to 1952, a complete statistical picture of Canada's shipping activity was not available due to insufficient detail of the coastwise and inland segments of the industry. The Bureau's annual "Canal Statistics" gives an analysis of traffic moving between Canadian ports but only that portion which was required to use the facilities of one or more of the canal systems. Also, some records of coastwise traffic were maintained by the National Harbours Board and certain Harbour Commissioners and Boards of Trade. In addition, special surveys were made for the Canadian Maritime Commission each year on cargoes carried into the St. Lawrence River - Great Lakes system by the principal Canadian shipping companies.

The great bulk of the cargo moving, however, between pairs of Canadian ports on the Atlantic and Pacific coasts and on certain Great Lakes and the St. Lawrence River were not reported. As a result, early in 1951 an inter-departmental committee, representing all interested parties, was set up to look into the problem.

It was forthwith, decided to make an attempt to secure the details of cargoes carried in the coastwise trade as it would provide another statistic towards the measurement of interprovincial trade in Canada and as it would be important to know the pattern of the coasting trade in case of an emergency.

Due to the excellent co-operation received from the customs officials of the Department of National Revenue in Ottawa and, particularly, at the ports in the instruction of shipping officers in the new procedure of reporting the coastwise trade, these new data were collected beginning in January, 1952.

The committee also, deemed the time to be an excellent one in which to re-examine the entire "Shipping Report" from the viewpoint of utility and manner of presentation with the object of greater efficiency in the method of processing the returns and the earlier release of available data.

The following changes and innovations were made, therefore, to attain these objectives:

1. All forms and schedules used were re-designed to facilitate coding and Hollerith punch card procedures and to obtain details of coastwise cargoes.
2. The term "foreign" as used in foreign shipping was changed to "International Seaborne Shipping" to conform with the United Nations Standard definition which reads as follows; "-- a consignment of goods will be said to have moved in international sea-borne traffic if after having loaded (or unloaded) in (at) a port or country A, it made a sea voyage to (from) a port of another country B and was there unloaded (or loaded)". Under this definition, the Great Lakes including the St. Lawrence River waterway is classed as a sea.
3. The list of countries of origin or destination has been enlarged to conform to Canada's growing foreign trade activities and the list of commodities was revised to follow more closely the Bureau's "Standard Industrial Classification Manual".
4. Table 6, which shows "Vessels in Foreign Service, by countries Entered From and Cleared For"; the summary to table 2, which lists vessel arrivals by size groups; and the arrival side of tables 10 and 11, the number and net tonnage of tugs and fishing vessels, of the 1951 report were dropped. The summary to table 3, vessel departures by size of vessel, and the departure side of table 4, vessel departures by rig, were combined to form one table while the arrival side of table 4 was considered unnecessary and discontinued.
5. Three new tables were added to present a picture of the coastwise trade.
6. The report is to be released in three sections as its size has grown to the point of unwieldiness and in order to release the more important data as early as possible.

REVIEW OF 1952 OPERATIONS

The total tonnage of cargoes loaded at Canadian customs ports in international seaborne shipping, or for foreign countries, during 1952, amounted to 32,564,915 short tons, a new record and 5,285,116 tons or 19.4 per cent above the 1951 total of 27,279,799 tons. All three geographic regions reported greater activity than in the previous year. The Pacific region reported the greatest rate of increase, advancing 30.2 per cent to 8,518,173 tons as compared with 6,542,523 in 1951. The Atlantic coast ports followed with an improvement of 18.1 per cent to 17,933,184 tons against 15,186,823 while total loadings at all Great Lakes ports rose to 6,113,558 tons from 5,550,453, a gain of 10.1 per cent. A number of commodities participated in the general advance including wheat which weighed 9,077,612 tons, a gain of 37.1 per cent over the 1951 total of 6,620,022 tons; barley which advanced to 2,194,360 tons, more than double the 1,002,246 tons loaded in the preceding year; flour up to 617,007 from 342,583 tons; logs, posts, etc. at 989,908 tons against 283,074; iron ore, newsprint, rye, pig iron and

aluminium. Declines were reported for other mill products, bituminous coal, sand, pulpwood, lumber, woodpulp and gypsum which was down to 2,566,837 tons from the 1951 total of 2,931,630 tons.

The total weight of cargoes unloaded from foreign countries also advanced to a new peak to 38,756,206 tons exceeding the 1951 total of 38,269,394 tons by only 1.3 per cent. Unloadings at the Great Lakes and Pacific areas were higher in the year under review while the Atlantic coast region registered a decline to 11,638,690 tons from 11,857,690. Declines were reported for the following commodities: bituminous coal which totalled 14,812,861 tons as compared with 15,823,878 tons in the previous year; corn was down to 136,007 from 309,859 tons; limestone dropped to 677,345 tons from 885,783; crude petroleum, soya beans, sand and chemical products. These decreases were, however, more than offset by gains reported for the following: iron ore advanced 10.7 per cent to a volume of 4,465,416 tons from 4,033,301; wheat rose to 402,956 tons from 205,830, gasoline was up to 704,384 from 423,368 tons; and Alberta crude oil advanced to 2,868,917 tons from 1,913,607. Other gains were recorded for bauxite, cement, fertilizers, petroleum oils, and iron and steel.

As expected, the bulk of Canada's waterborne trade was with the United States and the United Kingdom which, together, accounted for 62.3 per cent of total exports and 80.9 per cent of total imports. Cargoes loaded for United States ports during 1952 totalled 12,416,657 tons an advance of 958,878 tons or 6.5 per cent over the 1951 total of 11,657,779 tons while imports or unloadings rose 3.9 per cent to 30,085,202 tons from 28,959,102. Exports to the United Kingdom also show an advance over the previous year rising to 7,863,175 tons from 7,138,683 while imports were down to 1,249,752 from 1,568,911 tons.
