# SHIPPING REPORT

Year ended December 31, 1955

## INTRODUCTION

This is the first section of the 1955 "Shipping Report" which presents the details of cargoes loaded and unloaded at Canadian customs ports in international seaborne or foreign shipping. It contains four tables, the first two of which show cargoes loaded by country of destination and by commodities, while tables three and four show similar data for cargoes unloaded from foreign countries. Section II which will be released shortly, will contain a number of other tables pertaining to foreign shipping while Section III will cover all available data relating to the coastwise trade including details of cargoes.

Previous to 1952, a complete statistical picture of Canada's shipping activity was not available due to insufficient detail of the coastwise and inland segments of the industry. The Bureau's annual "Canal Statistics" gives an analysis of traffic moving between Canadian ports but only that portion which used the facilities of one or more of the canal systems. Also, some records of coastwise traffic were maintained by the National Harbours Board and certain Harbour Commissioners and Boards of

Trade. In addition, special surveys were made for the Canadian Maritime Commission each year on cargoes carried into the St. Lawrence River—Great Lakes system by the principal Canadian shipping companies.

The great bulk of the cargo moving, however, between pairs of Canadian ports on the Atlantic and Pacific coasts and on certain Great Lakes and the St. Lawrence River were not reported. As a result, early in 1951 an inter-departmental committee, representing all interested parties, set up to look into the problem, decided to attempt to secure the details of cargoes carried in the coastwise trade as it would provide another statistic towards the measurement of interprovincial trade in Canada and as it would be important to know the pattern of the coasting trade in case of an emergency.

With the excellent assistance of the Department of National Revenue whose customs officials instructed shipping officers in the new procedure of reporting their coastwise activities, these new data were collected beginning in January, 1952.

## SOURCE AND TREATMENT OF DATA

Shipping statistics are compiled from reports made by operators or agents of vessels arriving at and departing from Canadian ports at which there are customs officials. These officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau.

Customs regulations regarding coastwise vessels were revised in April, 1955, to permit owners or masters of such vessels who obtain coasting licenses to enter and leave port without clearing at customs. Thus no longer is the owner or master required to present a shipping report directly to customs officials but instead may mail his report to the customs officials at the port concerned if it is more convenient. This new procedure has given the Bureau the task of ensuring that all licensed coasting vessels continually report all their shipping activities. Failure to submit shipping reports can result in the cancellation of a vessel's coasting license by the Department of National Revenue.

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call or departs for a foreign port as first port of call; (2) cargo is loaded for a foreign port or unloaded from a foreign port; (3) the registry of the vessel is other than Canada or the United Kingdom even though the vessel may have arrived at one Canadian port from another or departed from a Canadian port for another.

Coasting service includes vessels of Canadian or United Kingdom registry only, which arrive at one Canadian port from another or depart from one Canadian port for another and when no freight from a foreign port is unloaded or no freight for a foreign port is loaded.

If a vessel does not unload any freight or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of freight it might have on board. Because of these definitions a vessel may arrive twice in foreign service and depart in coasting service on the same trip, and, consequently, the number of departures and arrivals in either class of service will not always be the same. Vessels built in Canadian ports will also cause a disparity in the number of arrivals and departures. There are also certain customs regulations in respect to fishing vessels that are responsible for some difference in reports of departures and arrivals.

Beginning with the 1948 report Tables 1 and 3 were considerably expanded. Table 1 gives the country of destination, kind of cargo, registry of vessel, tonnage of cargo loaded for foreign countries and allocated by geographical regions of Canada, namely, Atlantic and Lower St. Lawrence, Great Lakes and Upper St. Lawrence and at Pacific ports. Table 3 shows country of origin of cargoes unloaded in foreign trade as well as kind or commodity, registry of vessel, tonnage of cargo and by geographical divisions.

In classifying vessels in coasting service as to size, all unrigged vessels, all tugs and sail fishing vessels were grouped with the vessels of 10 to 99 net registered tons.

Tables 2 and 4 include data on cargoes to and from foreign countries. Tonnages of each commodity listed are not complete in all cases. Considerable tonnage of these commodities is included under "General", but where vessels loaded or unloaded only one commodity or where vessels with general cargoes handled any of these commodities in large lots, the tonnage of the commodity was reported and compiled. Tonnage data are required to be reported in tons weight of 2,000 pounds or in tons measurement of 40 cu. ft., but because of the practice in previous years of reporting tons in long tons of 2,240 pounds there is a possibility that some vessels did not report their cargoes in short

tons. As of 1951, cargoes reported in tons measurement have been added to those reported in tons weight.

Reports are not required from vessels of less than ten net tons. Tugs and other vessels not designed to carry cargoes are required to report gross tons instead of net tons and these gross tons are added to net registered tons of other vessels in this report. These gross tons are a small percentage of the total and consequently the effect is insignificant.

A list of the countries and geographical areas used for origin and destination of vessels and cargoes is included as an appendix to Section III. Also, as a second appendix, there is a list of the commodities used for classifying cargoes. By reference to these the meaning of such items as "Ores—other, West Indies—other, etc." is clarified.

### REVIEW OF 1955 OPERATIONS

Cargoes loaded at Canadian customs ports for foreign countries established a new record in 1955 with a total of 39,502,714 short tons. This was an increase of 28 per cent above 1954 loadings of 30,730,355 tons and 21 per cent above the previous record of 32,564,915 reached in 1952. Loadings at Atlantic and lower St. Lawrence river ports were up by almost 46 per cent, rising to 24,719,979 tons from 16,960,293 in 1954. Great Lakes and St. Lawrence river ports above Montreal also recorded an increase with a total of 6,359,084 tons as against 4,959,342 in the previous year, up 28 per cent. Loadings at Pacific Coast ports, however, fell off to 8,423,651 tons from 8,810,720, down by 4 per cent.

Iron ore accounted for most of the increase with total loadings of 13,739,589 tons, more than doubling the 1954 tonnage of 6,076,307. Other major increases included bituminous coal, raw asbestos, gypsum, salt, limestone, pulpwood, newsprint paper, iron and steel, rails and fastenings, cement, petroleum oils and other petroleum products, and fertilizers. Coal shipments increased to 261,172 tons from 15,540 in the previous year, up by 245,632 tons, gypsum rose to 3,135,052 tons from 2,785,278, up 349,774 tons, pulpwood was up by 231,848 tons, to 1,834,508 from 1,602,660, iron and steel shipments rose to 204,156 tons from 14,965 and fertilizers to 216,852 from 48,004 tons.

Grain shipments generally declined. Wheat dropped from 5,611,370 tons in 1954 to 5,187,847, corn shipments were down by some 73,000 tons, oats dropped from 459,277 to 96,526 tons and barley from 1,520,043 to 1,331,603 tons. Other commodities registering decreases included copper ore and concentrates, quartzite, lead and zinc ore, logs, posts, poles and piling down from 481,298 to 378,287 tons, lumber, timber, box and cooperage material from 2,586,740 to 2,441,394 tons, and other non-ferrous metal products from 112,647 to 60,519 tons.

Cargoes unloaded from foreign countries totalled 35,880,782 tons, compared with 32,274,166

in 1954. This was an increase of 11 per cent over the previous year but 7 per cent below the 1952 record. Total unloadings in the Atlantic and lower St. Lawrence river area rose to 13,050,607 tons from 12,487,668 and in the Great Lakes area to 20,944,184 tons from 17,670,912, but in the Pacific area cargoes unloaded declined to 1,885,991 tons from 2,115,586. Heavier shipments were recorded for bituminous coal which weighed 13,674,184 tons as against 12,372,250 in 1954 and for iron ore which increased to 4,763,016 tons from 3,147,033. Increases also were recorded in unloadings of bauxite, which rose to 2,873,886 tons in 1955 from 2,723,250 in the previous year, in sulphur which increased to 361,830 tons from 290,906, in cement, to 204,422 tons from 104,564, and in petroleum oils and petroleum products which rose to 3,888,459 tons from 3,507,760.

Unloadings of crude petroleum dropped to 2,401,901 tons from 2,927,538 in 1954. Corn, barley and flaxseed also recorded decreases. Anthracite coal unloaded amounted to 256,477 tons compared with 288,883 in 1954, fertilizers dropped to 343,394 from 445,807 and sand and gravel to 404,031 from 451,936.

Following previous trends the largest part of Canada's waterborne commerce was with the United States and the United Kingdom. These two countries combined accounted for 74.7 per cent of the total cargo tonnage loaded and 73.7 per cent of total tonnage unloaded. Cargoes loaded for United States ports during 1955 advanced to a total of 20,215,464 tons from 13,652,067 in 1954, an increase of 6,563,397 tons or 48.1 per cent. Unloadings rose by 11 per cent to a total of 25,165,319 tons, compared with 22,618,270 in 1954. Shipping between Canada and the United Kingdom also increased. Cargoes loaded for United Kingdom ports totalled 9,312,079 tons in 1955 as against 7,900,482 in 1954, up by 1,411,597 tons or 17.8 per cent, while unloadings rose to 1,274,649 tons from 1,268,801.
