CARGOES LOADED FOR AND UNLOADED FROM FOREIGN COUNTRIES 1952 - 1963

INTRODUCTION

This publication contains statistics on the commodities transported between Canada and foreign countries. Data are also given on the registries of the vessels which carry these commodities.

Source

Shipping statistics are compiled from reports made by operators or agents of vessels which arrive at, and depart from, Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping Reports". At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

The co-operation of shipping operators, shipping agents, and the Customs and Excise Division of the National Revenue Department in collecting the statistics contained in this publication has continued to be excellent.

Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or-British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with

final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international sea-borne shipping or coastwise shipping will not always be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 also causes a disparity in the number of arrivals and departures. Those vessels which arrive in December and depart in January of the next year will be counted only as departures in the statistics of the year in which they depart. Similarly, those vessels which arrive in December and depart in January of the next year will be counted only as arrivals in the statistics of the year in which they arrive.

If a vessel does not unload any freight, or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of cargo it might have on board.

For the purposes of this publication, Canadian ports have been grouped into three categories:

- (1) Atlantic and Lower St. Lawrence Ports, Montreal and below
- (2) Great Lakes and Upper St. Lawrence Ports above Montreal
- (3) Pacific Ports

Appendix B is a list of the countries and geographic areas of origin or destination of the commodities which are loaded and unloaded at Canadian ports in international shipping, and of the countries of registry of the vessels which call at Canadian ports. These countries have been divided into Commonwealth countries and other countries.

Appendix C is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix C, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix C.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

ANALYSIS OF DATA

Reflecting Canada's increasing participation in world trade and the buoyant condition of the Canadian economy, the total tonnage of cargo loaded and unloaded in international seaborne shipping in 1963 rose 12,431,013 tons, or 12.2 per cent, to a record high of 114,586,111 tons.

Loadings

Cargoes loaded at Canadian ports for foreign countries reached a new high of 68,377,888 tons, which was 13.5 per cent above the 1962 record of 60,269,779 tons.

Canada's strong trade links with the United States are evident in the fact that slightly over one-half (50.8 per cent), or 34,738,947 tons, of commodities loaded for foreign countries were destined for American ports.

The United Kingdom became more important in 1963 as the destination of cargoes loaded at Canadian ports. Tonnages loaded for the United Kingdom amounted to 10,207,536 tons, which was an increase of 1,061,238 tons over 1962 shipments.

Shipments to the U.S.S.R. increased from a negligible amount in 1962 to 2,581,980 tons, as a result of initial shipments made in the last quarter of 1963 under the agreement covering wheat purchases.

Loadings for Japan increased 1,189,295 tons, to a total of 6,000,426 tons. Of this total, iron ore and concentrates accounted for 1,658,442 tons, and wheat loadings amounted to 1,357,868 tons.

Shipments to Communist China decreased 723,408 tons, to a total of 1,431,793 tons, because of a drop in the quantity of wheat and barley loadings.

Iron ore and concentrates continued to be the most important commodity, by weight, loaded for foreign countries. In 1963 loadings of this commodity increased 1,797,977 tons, to a total of 26,063,195 tons.

Wheat loadings, which amounted to 12,308,281 tons, expanded by 3,337,772 tons, primarily because of shipments to the U.S.S.R.

Other significant changes in commodity loadings were an increase of 482,214 tons of gypsum, to a total of 4,581,484 tons; an increase of 605,795 tons of lumber and timber, to a total of 3,664,132 tons; an increase of 243,312 tons of pulpwood, to a total of 2,069,980 tons; a decrease of 245,291 tons of dolomite loadings for the United States, to a total of 994,114; and a decrease of limestone shipments to the United States of 273,231 tons to a total of 176,646 tons.

Unloadings

Cargoes unloaded at Canadian ports from foreign countries amounted to a new record of 46,208,223 tons, which was an increase of 10.3 per cent over the 1962 total of 41,885,319 tons.

The heavy flow of commodities from the United States to Canada increased by 4,691,954 tons, and accounted for 28,179,592 tons, or 60.9 per cent of total unloadings.

Bituminous coal, which recorded the heaviest tonnage of unloadings, amounted to 13,359,432 tons. This increase of 2,484,292 tons was largely due to a greater demand for coal for use in the production of electricity in Ontario.

Unloadings of crude petroleum from Iran were recorded as 2,216,264 tons, which was an increase of 381,793 tons, while unloadings from Venezuela were down 706,667 tons, to a total of 4,232,134 tons.

Unloadings of iron ore and concentrates increased to 6,508,742 tons from the 5,813,857 tons which were unloaded in 1962.

Com unloadings were up to 2,204,719 tons, which was an increase of 510,011 tons.

Unloadings of soyabeans increased to 879,247 tons from 734,911 tons in the previous year.

Vessel Registries

The percentage of all tonnages handled at Canadian ports in international seaborne shipping which were loaded into or unloaded from Canadian-registered vessels increased slightly in 1963. A total of 30,862,803 tons, or 26.9 per cent of total tonnages was carried in vessels of Canadian registry, compared to 26.2 per cent in 1962. More than 99 per cent of the cargo carried by these Canadian vessels was transported to or from the United States.

Cargoes carried by the vessels of several countries of registry increased substantially in 1963. Vessels registered in Canada transported 4,131,194 tons more than in 1962; Norway, 3,673,559 tons more; Bermuda, 1,828,588 tons more; Bahamas, 632,587 tons more; and Japan, 504,824 tons more. Cargoes transported by vessels of U.S.S.R. registry also expanded considerably. During 1963, 1,118,894 tons of cargo were carried in vessels of U.S.S.R. registry, compared to 3,739 tons in 1962.

July 1964.
