CARGOES LOADED FOR AND UNLOADED FROM FOREIGN COUNTRIES
1952 - 1964

INTRODUCTION

This publication contains statistics on the commodities transported between Canada and foreign countries. Data are also given on the registries of the vessels which carry these commodities.

Source

Shipping operating statistics are completed from reports made by operators or agents of vessels which arrive at, and depart from Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping Reports." At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

Operating data are collected from vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the Mackenzie River are not included in the survey.

The co-operation of shipping operators and agents in completing "Shipping Reports", and Customs and Excise Division of the National Revenue Department in collecting these reports has continued to be excellent.

Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry, and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another, and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port, or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a

foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne shipping or coastwise shipping will not always be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 also causes a disparity in the number of arrivals and departures. Those vessels which arrive in December and depart in January of the next year will be counted only as departures in the statistics of the year in which they depart. Similarly those vessels which arrive in December and depart in January of the next year will be counted only as arrivals in the statistics of the year in which they arrive.

If a vessel does not unload any freight, or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of cargo it might have on board.

For the purpose of this publication, Canadian ports have been grouped into three categories:

1. Atlantic and Lower St. Lawrence Ports, Montreal and below.
2. Great Lakes and Upper St. Lawrence Ports above Montreal.
3. Pacific Ports.

Appendix B is a list of the countries and geographic areas of origin or destination of the commodities which are loaded and unloaded at Canadian ports in international seaborne shipping, and of the countries of registry of the vessels which call at Canadian ports. These countries have been divided into Commonwealth countries.

Appendix C is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix C, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix C.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

It should be noted that, because of corrections made throughout the year, the figures contained in this publication will differ from those released as preliminary data in the monthly *Shipping Report*.

Because of shrinkage and other reasons, loading and unloading figures for a particular commodity do not always agree. For statistical purposes, however, they are required to be the same.

ANALYSIS OF DATA

Indicative of Canada's important role in world trade, the total tonnage of cargo loaded and unloaded in international seaborne shipping in 1964 expanded by 16,502,856 tons, or 14.4 per cent, to 131,088,967 tons. This volume establishes a new record, having eclipsed the 114,586,111 tons which were transported in 1963. It also marks the sixth successive year in which an increase has been recorded in international seaborne shipping.

Loadings

Cargoes loaded at Canadian ports for foreign countries topped last year's record high by rising 22.1 per cent, to 83,510,707 tons.

The United States was the destination of 51.6 per cent, or 43,065,566 tons, of all commodities loaded for foreign countries during 1964.

Shipments to the United Kingdom continued to rise, with 12,035,811 tons recorded in 1964. This was an increase of 828,275 tons over last year.

Ranking third in the amount of total tonnage received from Canada was Japan. Loadings for this country increased 9.3 per cent, to a total of 6,558,004 tons. Over one-half of this tonnage was made up of wheat (1,445,612 tons) and iron ore (1,933,693 tons).

Trade with the U.S.S.R. registered an increase again this year as a result of larger wheat shipments. Of the 2,884,133 total tons transported to the U.S.S.R. 94.8 per cent, or 2,733,622 tons, consisted of wheat.

Communist China increased in importance as a customer of Canada in world trade this year, receiving 2,069,264 tons of cargo. As in the case of the U.S.S.R., wheat was the dominating commodity, with 1,705,964 tons being reported.

Iron ore and concentrates continued to be the commodity loaded in greatest volume. During 1964 loadings of this commodity advanced by 8,317,781 tons, to a total of 34,380,976 tons.

Wheat loadings, second only to iron ore, increased by 2,205,501 tons, to 14,513,782 tons. Canada's wheat sales to Communist countries were the main contributing factor to this increase.

Other significant changes in commodity loadings were an increase of 355,292 tons of gypsum, to a total of 4,936,776 tons; an increase of 306,063 tons of lumber and timber, to a total of 3,970,195 tons; an increase of 350,908 tons of newsprint paper, to a total of 3,280,498 tons; a decrease of 106,540 tons of logs and round timber, to a total of 261,205 tons; and a decrease of 25,871 tons of rye, to a total of 198,781 tons.

Unloadings

Cargoes unloaded at Canadian ports from foreign countries set a new record during 1964, surpassing by 3.0 per cent the previous peak established in 1963. This year's total of 47,578,260 tons was higher by 1,370,037 tons than the previous year.

The tonnage of goods shipped from the United States to Canada in 1964 declined 1.1 per cent, to 27,858,576 tons. This tonnage, however, accounted for 58.6 per cent of all tonnage unloaded from foreign countries.

The most important commodity, by weight, unloaded from foreign countries continued to be bituminous coal. For the year under review 13,610,132 tons of this commodity were unloaded, representing an increase of 250,700 tons over 1963 figures. A considerable amount of this coal was used for the generation of electricity. Because this use is growing, it is likely that the amount of coal transported for this purpose will continue to expand.

Crude petroleum was the second largest commodity. Unloadings of this commodity aggregated 7,215,362 tons, which was down 563,175 tons from 1963. Unloadings from Venezuela amounted to 4,297,377 tons, which was an increase of 65,243 tons, while Iran's portion of the total declined by 621,317 tons, to 1,594,947 tons.

Iron ore and concentrates were in third place with decreased shipments recorded in 1964. Compared with the previous year, total unloadings of this commodity were down by 430,314 tons, to 6,078,428 tons.

Fuel oil unloading increased to 5,073,872 tons, which was a rise of 1,367,125 tons over tonnages recorded in 1963.

Aluminum ore and concentrates unloaded at Canada's aluminum producing cities—particularly Kitimat and Port Alfred—increased appreciably, rising 460,312 tons, to 2,474,280 tons.

Grains unloaded at Canadian ports were down considerably from 1963, with only 2,612,880 tons reported compared with 3,591,705 tons.

Vessel Registries

Canadian-registered vessels loading or unloading cargo in international seaborne shipping carried a smaller percentage of the total tonnage handled at Canadian ports in 1964 than in 1963. The 31,895,820 tons transported by these vessels although greater than the comparable 1963 figure, accounted for 24.3 per cent of the total, compared with 26.9 per cent last year.

Cargoes carried by the vessels of several countries of registry increased substantially in 1964. Vessels registered in Norway showed the most significant increase over the previous year, increasing by 3,670,842 tons. Liberian vessels transported 3,097,334 tons more than in 1963; United Kingdom, 2,442,807 tons more; Bermudian, 1,700,072 tons more; United States, 1,687,167 tons more; Canadian 1,033,017 tons more; and U.S.S.R., 864,481 tons more.

Statistical Highlights

The items in the following table provide a statistical picture of the highlights of international seaborne shipping:
