CHART-1

CARGOES LOADED FOR AND UNLOADED FROM FOREIGN COUNTRIES 1954 - 1965

INTRODUCTION

This publication contains statistics on the commodities transported between Canada and foreign countries. Data are also given on the registries of the vessels which carry these commodities.

Source

Shipping operating statistics are completed from reports made by operators or agents of vessels which arrive at, and depart from Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping Reports." At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

Operating data are collected from vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the Mackenzie River are not included in the survey.

The co-operation of shipping operators and agents in completing "Shipping Reports", and Customs and Excise Division of the National Revenue Department in collecting these reports has continued to be excellent.

Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a

foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for a foreign port is loaded. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne shipping or coastwise shipping will not always be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 also causes a disparity in the number of arrivals and departures. Those vessels which arrive in December and depart in January of the next year will be counted only as departures in the statistics of the year in which they depart. Similarly those vessels which arrive in December and depart in January of the next year will be counted only as arrivals in the statistics of the year in which they arrive.

If a vessel does not unload any freight, or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of cargo it might have on board.

For the purpose of this publication, Canadian ports have been grouped into three categories:

1. Atlantic and Lower St. Lawrence Ports, Montreal and below.
2. Great Lakes and Upper St. Lawrence Ports above Montreal.
3. Pacific Ports.

Appendix B is a list of the countries and geographic areas of origin or destination of the commodities which are loaded and unloaded at Canadian ports in international seaborne shipping, and of the countries of registry of the vessels which call at Canadian ports. These countries have been divided into Commonwealth countries.

Appendix C is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix C, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix C.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

ANALYSIS OF DATA

Reflecting the generally favourable conditions in foreign markets of Canadian products, and business activity and demands in Canada, the total tonnage of cargo loaded and unloaded at Canadian ports in international seaborne shipping during 1965 expanded by 4,701,194 tons, or 3.6 per cent, to 135,790,161 tons over the tonnage handled in 1964. Since 1959, tonnages handled in international seaborne shipping at Canadian ports have steadily increased; this year's total represents the record high.

Loadings

Tonnages loaded at Canadian ports for foreign countries slipped slightly, by 1.6 per cent to 82,145,421 tons, from the 83,510,707 tons shipped last year.

During 1965, the United States accounted for 49.9 per cent or 40,964,195 tons of all commodities loaded with foreign countries as their destination. Shipments to the United States were lower (43,065,566 tons or 51.6 per cent of total loadings at Canadian ports in 1964), due mainly to a decline in iron ore loadings.

Shipments to the United Kingdom decreased by 446,731 tons or 3.7 per cent to 11,589,080 tons in 1965; 14.1 per cent of all loadings in international seaborne shipping were destined to the United Kingdom. Major components of these shipments were iron ore (3,457,029 tons), wheat (2,227,700 tons) and lumber and timber (1,446,619 tons).

Ranking third in the volume of goods received from Canada was Japan, loadings for which increased slightly by 1.4 per cent to 6,648,390 tons (8.1 per cent of total loadings for foreign areas). Almost two thirds of this tonnage was made up of iron ore (1,955,955 tons), wheat (1,308,210 tons) and bituminous coal (924,777 tons).

Shipments to the Netherlands increased 21.1 per cent this year to 3,455,720 tons from 2,853,648 tons in 1964. Commodities loaded for Belgium and Luxembourg rose 44.9 per cent to 2,211,592 tons from 1,526,755 tons in 1964 due mainly to expansions in the volume of wheat as well as iron, zinc and lead ores. Italy also recorded an appreciable increase of 21.0 per cent, with loadings for that nation growing to 1,848,306 tons from 880,852 tons in 1964.

The letters "n.e.s." which are found in the commodity listing mean "not elsewhere specified".

It should be noted that, because of corrections made throughout the year, the figures contained in this publication will differ from those released as preliminary data in the monthly *Shipping Statistics*.

Because of shrinkage and other reasons, loading and unloading figures for a particular commodity do not always agree. For statistical purposes, however, they are required to be the same.

Among those countries for which declines in tonnages loaded were reported were the U.S.S.R., receiving 3,233,911 tons (3,735,410 tons in 1964), and Communist China, receiving 1,733,263 tons (2,069,264 tons in 1964). The decline is accounted for by lower wheat sales and shipments than the record attained in 1964. Shipments of sulphur to the U.S.S.R. this year amounted to only 5,725 tons compared to 131,103 tons last year.

Iron ore and concentrates continued to be the commodity loaded in greatest volume. However, in 1965 loadings of this commodity declined 920,057 tons to 33,460,919 tons; in 1964 loadings had increased 31.9 per cent or 8,317,781 tons.

Wheat loadings, which were second largest in volume, also declined in 1965 to 13,457,870 tons from 14,513,782 tons in the previous year which experienced greater shipments to Communist countries.

Other appreciable changes in commodity unloadings included: limestone, an increase of 687,876 tons to 1,067,862 tons; fertilizers, an increase of 247,553 tons to 862,789 tons; pulpwood, a decrease of 308,278 tons to 1,828,023 tons; dolomite, a decrease of 211,940 tons to 1,009,324 tons; and wheat flour, a decrease of 332,040 tons to 494,339 tons.

Unloadings

Cargoes unloaded at Canadian ports from foreign countries increased by 6,066,480 tons or 12.8 per cent to a new record of 53,644,740 tons.

The tonnage of cargo shipped from the United States to Canada during 1965 increased by 2,073,328 tons or 7.4 per cent to 29,931,904 tons, which accounted for 55.8 per cent of all unloadings at Canadian ports in international seaborne shipping. Greater unloadings of bituminous coal constitute a major cause for this change.

Unloadings of cargo originating in Venezuela totalled 7,593,595 tons, up 26.2 per cent from the 6,018,359 tons reported last year. Major increases were recorded for crude petroleum at 4,621,417 tons (4,297,376 tons in 1964); and fuel oil at 2,840,643 tons (1,593,078 tons in 1964).

The Netherlands Antilles shipped 3,588,773 tons of cargo to Canada this year, compared to 2,799,956 tons in 1964. Fuel oil shipments increased by 804,892 tons or 32.8 per cent to 3,259,395 tons.

Among those countries which recorded significant changes in the volume of goods shipped to Canada were: Belgium and Luxembourg, an increase of 58.5 per cent to 777,862 tons from 490,715 tons in 1964; Japan, an increase of 45.1 per cent to 513,222 tons from 353,696 tons; British Guiana, an increase of 37.5 per cent to 490,090 tons from 357,040 tons; United Kingdom, an increase of 13.3 per cent to 1,240,572 tons from 933,902 tons; and Iran, a decrease of 13.1 per cent to 1,386,976 tons from 1,595,043 tons.

The commodity unloaded in greatest volume at Canadian ports in international seaborne shipping in 1965 continued to be coal, of which a substantial amount is used by thermal generating stations to satisfy Ontario's increasing power requirements. Unloadings of this commodity expanded 12.5 per cent to 15,306,625 tons from 13,610,132 tons reported in 1964.

Ranking second by volume of unloading was crude petroleum, which rose by 703,003 tons or 9.7 per cent to 7,918,365 tons this year. The greater part of this increase originated in Venezuela.

During 1965 fuel oil displaced iron ore and concentrates as the commodity unloaded in third largest volume. Shipments of fuel oil to Canada

rose 47.0 per cent to a total of 7,458,567 tons while iron ore declined 10.6 per cent to 5,434,652 tons compared to the previous year.

Substantial changes were evident this year in the unloadings of a number of other commodities: limestone, an increase of 415,719 tons to 1,267,017 tons; logs, an increase of 233,559 tons to 365,533 tons; manganese ore, an increase of 273,740 tons to 306,578 tons; and gasoline, a decrease of 110,545 tons to 196,268 tons.

Vessel Registries

Canadian-registered vessels loading or unloading cargo in international seaborne shipping carried 9.2 per cent more tonnage, and a greater share of the total volume handled at Canadian ports in 1965 than in 1964. A total of 34,825,588 tons, or 25.6 per cent of aggregate tonnage was carried aboard Canadian-registered vessels, compared to 31,895,820 tons or 24.3 per cent in 1964.

During 1965 vessels of Liberian registry transported 18,203,076 tons or 13.4 per cent of total cargo handled at Canadian ports in international seaborne shipping, compared with 17,587,969 tons or 13.4 per cent in 1964. British vessels hauled 17,592,779 tons or 13.0 per cent as against 16,416,673 tons or 12.5 per cent in 1964; Norwegian, 16,605,871 tons or 12.2 per cent (17,377,936 tons or 13.3 per cent in 1964); and American, 7,889,797 tons or 5.8 per cent (10,161,839 tons or 7.8 per cent in 1964).
