CHART-1

CARGOES LOADED FOR AND UNLOADED FROM FOREIGN COUNTRIES 1957-1967

INTRODUCTION

This publication presents statistics on the commodity and vessel traffic between Canada and foreign countries.

Source

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for the Dominion Bureau of Statistics in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

Treatment of Data

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports).

A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 can cause a disparity in the total number arrived and departed. Vessels entering a port at the end of a year and clearing it the following January would only be counted as an arrival or departure for that year when the movement occurred.

A vessel is considered arriving or departing "in ballast" if cargo is neither unloaded or loaded

at a port, regardless of the amount of in transit cargo that may be on board at the time.

In this publication, Canadian ports have been grouped into three regions:

- (1) Atlantic and Lower St. Lawrence River Ports, Montreal and below;
- (2) Great Lakes and Upper St. Lawrence River Ports, above Montreal; and
- (3) Pacific Ports.

The registry of the vessel involved in the carriage of Canada's foreign trade is published in the first two tables for the United Kingdom, Denmark, Federal Republic of Germany, Greece, Italy, the Netherlands, Norway, Sweden, Liberia, Japan, Panama, the United States and Canada; other registries are grouped due to relatively lesser importance in terms of volume handled, as well as space limitations in this publication.

Appendix B comprises a list of the countries and geographic areas of origin or destination of the commodities handled at Canadian ports in international seaborne shipping. Appendix C consists of a commodity list, based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities which have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities.

The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

ANALYSIS OF DATA

The value of domestic exports during the hundredth year of Canada's nationhood totalled \$11,112 million, more than one billion dollars greater than 1966. For the year 1868, early records indicate the value of exports was \$48.5 million. The gross national product for 1967 was set at \$62.1 billion, and imports stood at \$11,081 million.

Exports transported by water carriers were valued at \$4.49 billion, about one per cent less than the corresponding 1966 total. In terms of physical volume, 54,721 vessel arrivals and departures were reported for the movement of 80,025,191 tons of exports (down 4.7 per cent from 1966's 83,987,072 tons) and 50,234,931 tons of incoming goods (down 5.3 per cent from 53,020,249 tons).

Loadings

Canada's most important trading partner, the United States, was the destination of 41,089,981 tons of waterborne merchandise, or somewhat over one half of the total. Exports by all modes of transport were valued at almost \$7.1 billion (up from 1966's \$6.0 billion due in large part to automobiles and parts), while the waterborne segment amounted to \$889 million.

Exports of iron ore were heaviest in volume, 17,698,365 tons moving to U.S. Great Lakes ports (17,359,380 tons in 1966) and 7,429,781 tons to that country's Atlantic and Gulf coast (8,316,717 tons in 1966). U.S. purchases of this raw material were \$292 million.

Traffic to American ports on the Great Lakes totalled 22,224,180 tons in 1967, up 130,000 over 1966. Canadian vessels carried 16,076,120 tons compared to 5,013,127 tons aboard American craft. Salt exports by water almost doubled at 961,980 tons, and cement pushed ahead 13,000 to 270,227 tons, while most of the other bulk products declined. Dolomite was reduced by 242,511 tons to 1,114,938 tons, pig iron by 38,150 tons to 270,526 tons, pulpwood by 40,520 tons to 189,859 tons. Waterborne newsprint fell to 663,224 tons from 808,783 tons; Canadian producers are facing a greater domestic newsprint capacity in the United States.

Some 14,560,920 tons were sent to the U.S. Atlantic coast ports; this represents a 2,000,000 ton decline due to iron ore and gypsum traffic. Gypsum decreased to 3,862,730 tons from 4,707,791 tons, and newsprint by 37,000 to 1,006,010 tons. More lumber and timber was brought from Canada's Pacific coast; 1,452,492 tons were carried in 1967 against 1,276,691 tons in the previous year. A growing return cargo is phosphate rock from Florida. Most of this 14.6 million ton transportation market is serviced by lines other than Canadian or American.

In the west, 4,060,379 tons were sent to U.S. mainland Pacific ports (from 3,821,732 tons in 1966). The main components of this traffic were limestone at 1,315,836 tons (1,169,150 tons in

1966), pulpwood at 973,516 tons (757,739 tons), newsprint at 715,295 tons (816,026 tons) lumber and timber at 226,015 tons (192,665 tons). Following these were hogged fuel, pulp and logs, all lower than 1966. Canadian vessels transported 2,948,753 tons while American vessels accounted for only 474,781 tons.

Alaska received 203,452 tons, up from 1966's 194,488 tons due to fuel oil, while Hawaii received 41,050 tons, down 23,000 due chiefly to less newsprint.

The United Kingdom has historically played an important role in Canadian trade, and in 1967, purchased goods at a cost of \$1,169 million (\$1,123 million in 1966). In physical terms, the United Kingdom received 9,732,830 tons, a betterment of six per cent over 1966's 9,182,313 tons. Iron ore constituted 3,198,306 tons of the total, rising appreciably over the 2,396,187 tons shipped in the previous year. Wheat movements, worth \$123 million, decreased by 46,000 to 1,843,491 tons, while corn activity diminished by over 146,000 tons. Lumber and timber (at \$64 million) declined to 1,172,673 tons from 1,183,138 tons in 1966, while newsprint advanced to 387,448 tons from 379,158 tons; pulp was down to 293,443 tons from 375,471 tons.

Japan is becoming an increasingly important factor in Canadian trade, in 1967 purchasing goods at \$572 million against \$394 million in 1966. Tonnage moved forward to 8,617,213 from 7,222,072 tons in 1966, barley and rye to 373,432 tons from 229,399 tons, logs to 502,670 tons from 204,286 tons, copper ore to 388,394 tons from 235,905 tons, lumber and timber to 727,220 tons from 460,003 tons, and pulp to 333,189 tons from 297,564 tons. Among other sizeable increases are aluminum, zinc ore, petroleum and coal products; potash was one of the few declines, down 74,000 to 399,094 tons. Wheat (\$107 million) was down 72,000 to 1,408,987 tons. In 1964 Japan became the third largest steel producer in the world; in 1967, 1,159,427 tons of coal (up 148,145 tons) and 1,939,247 tons of iron ore (up 49,800 tons) were shipped to supply this industry; the value was \$31 million.

The Netherlands received 3,895,942 tons of goods from Canada through the year, and 3,352,582 tons in 1966. Iron ore moved upwards to 1,423,438 tons from 1,008,601 tons, wheat to 840,063 tons from 677,291 tons, and fertilizer materials to 326,150 tons from 212,017 tons; pulpwood and corn were lower.

Italy was the destination of 3,004,324 tons (2,576,889 tons in 1966), of which 1,771,031 tons consisted of iron ore, which had risen appreciably. Corn and barley traffic was lower, while wheat shipments advanced 55,000 to 356,339 tons.

A higher level of iron ore exports to West Germany led to an increase of almost one-quarter to 1,464,701 tons for that country. Larger quantities of zinc ore and concentrates to Belgium partly offset a decline in wheat which was a significant factor in pulling the country's total down to 1,369,325 tons.

Shipments to Communist China fell to 1,142,571 tons from 2,799,007 tons in 1966 with a sharp decline in wheat sales; trade was worth \$91 million. Similarly, traffic with other Communist countries was down, for example Bulgaria receiving no wheat against 113,006 tons in 1966. The U.S.S.R. was shipped 1,498,408 tons of wheat in 1967 and 4,218,671 tons in 1966. Exports to eastern Europe were valued at \$184 million.

Loaded in greatest volume in Canada's trade was iron ore at 34,023,030 tons (32,909,924 tons in 1966), followed by wheat at 10,464,062 tons (15,807,704 tons), lumber and timber at 4,394,258 tons (3,856,972 tons), and gypsum at 3,862,730 tons (4,709,891 tons).

Unloadings

Imports from the United States in 1967 were valued at eight billion dollars. Water transport operations are generally confined to low cost, heavy products requiring minimum transport expenses. From the American Great Lakes during the year some 22,311,825 tons were received, a decline of almost 3.3 million tons due to iron ore and corn—the former commodity had fallen to 2.5 million from 4.4 million tons with greater use of domestic supplies by Canadian steel concerns.

Coal is another staple shipping item on the Lakes, and in 1967, a total of 14,806,470 tons entered Canadian ports from the U.S.; this was 200,000 tons below the 1966 level. Of other major commodities, limestone was only 14,000 lower at 1,108,157 tons, soyabeans slid to 687,832 tons from 848,475 tons, and wheat to 533,258 tons from 756,991 tons in the previous year. Canadian vessels transported 17,321,030 tons or 77.6 per cent of the traffic with the U.S. Great Lakes, while American-registered craft handled 2,670,510 tons or 12.0 per cent.

From ports situated on the U.S. Atlantic and Gulf coasts, some 2,288,901 tons were received, or approaching 400,000 tons more than 1966. Although coal fell by one-third to 415,000, alumina and phosphate rock advanced, and unlike 1966, crude petroleum was imported in the amount of 488,780 tons.

U.S. Pacific ports shipped 1,598,337 tons (1,380,309 tons in 1966), increases being reported for fuel oil, sand and gravel which totalled 817,337 tons and 412,910 tons respectively. Alaskan ports sent 306,024 tons, largely pulp and asbestos, while Hawaii provided 6,929 tons, most in the form of crude molasses.

Venezuela supplied 6,761,471 tons (down 3,000 tons from 1966) of which crude petroleum made up 3,920,285 tons and fuel oil 2,662,042 tons. Volume from the Netherlands Antilles advanced one million to 4,129,318 tons; fuel oil amounted to 3,728,637 tons.

Trinidad and Tobago loaded 1,839,291 tons for Canada, the total being 217,637 tons lower than 1966 due particularly to crude petroleum and fuel oil. Alumina and bauxite summed to 1,365,725 tons in 1967 and 1,377,119 tons in 1966. Guyana sent 456,332 tons and 411,189 tons of this commodity in the two years.

The United Kingdom was the source of 1,026,045 tons of merchandise including automobiles, distillery products, machinery and a wide variety of finished goods worth \$673 million. The previous year 945,935 tons were transported, with a value of \$645 million. One of the few bulk imports from the United Kingdom was fuel oil, which totalled 218,625 tons in 1967.

Japanese exports to Canada rose to \$305 million from \$253 million in 1966. The physical volume contracted to 479,791 tons from 540,455 tons due to lesser incoming steel bars, plate and structural shapes (down 60,000 to 141,986 tons).

The greatest inward tonnage was reported for coal at 15,221,754 tons (15,654,652 tons in 1966), followed by fuel oil at 8,422,120 tons (7,850,162 tons), crude petroleum at 7,323,662 tons (6,912,389 tons), alumina at 3,148,648 tons (3,088,987 tons), and iron ore at 2,982,626 tons (5,038,741 tons).

Vessel Registries

Canadian-registered vessels carried 38,775,758 tons or 29.8 per cent of the nation's foreign commerce in 1967, against 41,867,888 tons or 30.6 per cent in 1966. Liberian vessels handled 16,167,168 tons or 12.4 per cent (17,789,582 tons or 12.9 per cent in 1966), Norwegian 15,202,892 tons or 11.7 per cent (14,726,555 tons; 10.7 per cent), United Kingdom 13,582,808 tons or 10.4 per cent (13,332,529 tons; 9.7 per cent), and American 9,280,706 tons or 7.1 per cent (6,851,738 tons; 5.0 per cent).
