STANDARD OF CARE

The standard of care is the level of care that a reasonably prudent professional would provide under the same or similar circumstances. This standard is objective and is based on the actions of other professionals in the same field. It is not based on the individual's own beliefs or the patient's expectations. The standard of care is a benchmark against which the professional's performance is measured. It is a legal concept that is used to determine whether a professional has acted negligently. The standard of care is a dynamic concept that changes over time as the profession evolves and as new information is discovered. It is a standard that is applied to all professionals in the same field, regardless of their individual skills or experience. ## INTRODUCTION

This publication presents statistics on the commodity and vessel traffic at Canadian ports in international seaborne shipping.

### Source

Shipping statistics are compiled from reports completed by operators or agents of vessels arriving and departing Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for the Dominion Bureau of Statistics in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

### Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports).

A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel's arrival and departure at ports on a voyage could vary between foreign or coastwise depending on which definition of service is applicable on entering or clearing a harbour. Because of this variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne or coastwise shipping need not necessarily be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 can also cause a disparity in the total number

arrived and departed. Vessels entering a port at the end of a year and clearing it the following January would only be counted as an arrival or departure for that year when the movement occurred.

A vessel is considered arriving or departing "in ballast" if cargo is neither unloaded or loaded at a port, regardless of the amount of in transit cargo that may be on board at the time.

Appendix A lists the Canadian ports for which shipping data are tabulated separately, and is derived from the names assigned to the areas of loading or unloading by the respondents. Because of space limitations, not all ports can be published and must then be grouped; however, information on those identified in the appendix as "Unpublished ports" can be obtained by forwarding a request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa. Appendix B consists of a commodity list, based on the *Standard Commodity Classification Manual* published by the Dominion Bureau of Statistics, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities whose names have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities.

The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

Some ports frequently engage in "lightering"; in cases where cargo is loaded or unloaded in the harbour rather than at a dock or wharf, the tonnage is included with the port totals. Where transshipments are made outside a harbour, or at mid-stream, the cargo handled is treated as a loading or unloading at the nearest port. Ports which have handled lightered commodities include Botwood, Goose Bay, Charlottetown, Bathurst, Campbellton, Chatham, Rimouski, Chicoutimi, Trois-Rivières, Varennes, and Rivière-du-Loup.

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

## ANALYSIS OF DATA

In 1966 several significant changes were evident in the statistics which measure international sea-borne shipping activity at Canadian ports.

Newfoundland ports handled 3,119,700 tons of cargo, or 523,442 tons less than the previous year, mainly because of the tonnage at Bell Island falling with the closing of the iron ore mine to less than one-half the 1,152,416 tons reported in 1965. Corner Brook in 1966 became the province's leading port in terms of volume, having loaded or unloaded 616,930 tons (594,453 tons in 1965), chiefly newsprint paper and fuel oil. Holyrood handled 108,764 tons more for a total of 403,764 tons, mostly fuel oil, while at St. John's, 306,270 tons were shipped or discharged during the year compared to 278,061 tons in 1965.

Ports in Prince Edward Island handled 229,306 tons, or 26.2 per cent over 1965, of which total Charlottetown accounted for 139,763 tons.

At Halifax during the year, 7,073,862 tons were loaded or unloaded, representing an increase of 129,268 tons over 1965 due to crude petroleum, gypsum and fuel oil, which made up more than three-quarters of the port's total. A contraction in gypsum exports led to a decline of 6.7 per cent, to 1,881,003 tons, at Hantsport. Sydney's tonnage rose by 13.7 per cent to 1,067,612 tons, with greater unloadings of bituminous coal compensating for a decrease in fuel oil receipts to about two-thirds of that reported in 1965. The total volume handled in Nova Scotia's international shipping advanced to 11,803,195 tons from 11,602,746 tons in the previous year.

A gain of 297,272 tons to 4,517,427 tons at Saint John was realized because of greater crude petroleum unloadings, which again made up more than fifty per cent of the total, and also wheat flour loadings which expanded to 232,753 tons from 41,558 tons in 1965. Dalhousie handled 728,150 tons, mostly newsprint, zinc and lead ores, or 23,434 tons more than the previous year, and together with Saint John accounted for better than ninety per cent of the New Brunswick total of 5,726,064 tons (182,407 tons or 3.3 per cent over 1965).

Receipts and shipments of corn at Quebec ports were considerably lower than in 1965, and were largely responsible for declines at several major ports, including Baie Comeau, Quebec and Trois-Rivières.

For this reason Baie Comeau handled 5,757,074 tons, down 4.7 per cent, despite gains of approximately ten per cent in wheat, over thirty per cent in bauxite, and over twenty per cent in newsprint loadings, aggregating somewhat under four hundred thousand tons in all. The volume of cargo at Quebec in international shipping was reduced by 10.3 per cent to 2,805,109 tons with appreciably less corn, somewhat more asbestos and newsprint, with wheat and fuel oil remaining almost unchanged. Trois-Rivières dropped to 2,786,914 tons from 3,316,735

tons with increases in the major commodities, wheat, asbestos, and newsprint, and declines in corn, soya beans and fuel oil.

Sept-Îles and Pointe Noire handled 17,509,134 tons of goods during the year compared to 17,256,135 tons in 1965, while Port Cartier shipped and received 9,390,613 tons in 1966 and 9,161,929 tons in the preceding year. Cargo at Contrecoeur rose to 1,415,752 tons from 889,563 tons in 1965 with iron ore advancing by 129,920 tons to 483,491 tons, and manganese ore by 261,794 tons to 603,241 tons.

Montreal handled 12,023,009 tons—4.5 per cent less than 1965 due to crude petroleum unloadings which slid to 811,225 tons from 2,174,413 tons. Wheat on the other hand rose by almost one million tons to 3,486,833 tons, and fuel oil moved slightly upward to 2,260,927 tons. Port Alfred loaded or received 3,518,185 tons, up 23.3 per cent from 1965 due to general increases in bauxite, newsprint, fuel oil and coke. Sorel also recorded an impressive increase in cargo handled, to 2,590,845 tons from 2,058,217 tons in 1965 as a result of more wheat movements at the port. The total volume of goods in international shipping at all Quebec ports amounted to 58,523,770 tons in 1966, some 772,227 tons higher than the previous year.

Of Ontario's total of 32,740,435 tons (a reduction of 1.7 per cent from 1965), Hamilton handled 7,511,375 tons, down from the previous year's 8,046,696 tons primarily because of lesser American iron ore receipts; coal into the harbour eased to 3,157,117 tons from 3,205,618 tons, while fuel oil rose to 142,845 tons from 113,110 tons in 1965. Some 3,851,176 tons of goods (6.2 per cent less than 1965) moved into or from Port Arthur-Fort William in international shipping during the year, of which 2,036,007 tons (down almost four hundred thousand tons from 1965) consisted of iron ore traffic to the United States. Foreign movements of coal, newsprint and rye rose above the previous year while barley, oats and wheat declined.

Sault Ste. Marie received or shipped 3,838,094 tons of cargo, a decline of under three per cent from the previous year due to less waterborne coal being imported. Commodities crossing Toronto's waterfront totalled 3,382,728 tons, a decline of 17.1 per cent from the previous year due to coal decreasing to 1,770,145 tons from 2,396,528 tons and fuel oil to 224,245 tons from 283,438 tons. Port Colborne handled 1,897,677 tons of cargo, some 213,774 tons or 12.7 per cent more than 1965 due to expansions in dolomite shipments, to 1,360,133 tons from 1,009,324 tons, and coal imports, to 236,229 tons from 207,405 tons.

Increased coal receipts at Port Credit, making up the greater part of the total, resulted in an annual volume of 2,327,778 tons compared to only 1,524,746 tons throughout 1965. In 1966 the tonnage at Sarnia advanced to 1,557,766 tons from 1,376,423 tons, an increase again prompted by coal unloadings which

usually approach two-thirds of the total. Chemical and synthetic rubber exports rose at that port, as did combined unloadings of sand and gravel, dolomite, and limestone—the other significant commodities in terms of volume. At Windsor, goods aggregated 1,969,939 tons, up 349,496 tons or 21.6 per cent over 1965; most major items increased, including coal, up 265,791 tons to 1,033,885 tons, sand and gravel, up 188,126 tons to 372,261 tons, and limestone, up 32,494 tons to 246,569 tons, although salt loadings fell to 258,060 tons from 427,983 tons in 1965.

At Churchill the volume of cargo declined to 674,297 tons from 761,024 tons, corresponding to a decline in wheat exports.

Vancouver received or shipped 12,268,210 tons during 1966, an increase of 8.0 per cent over the previous year's 11,357,798 tons; among major export staples were: wheat, which rose with improved Asian sales to 4,246,672 tons from 3,688,822 tons in 1965; lumber and timber, to 1,155,753 tons from 1,342,790 tons; and fertilizer and fertilizer materials n.e.s., to 1,100,011 tons from 773,171 tons. Coal shipments to

Japan from Port Moody and Vancouver totalled 1,011,282 tons this year and 924,777 tons in 1965. At New Westminster's docks, 1,479,588 tons of commodities were loaded or discharged, which represents a gain of 264,110 tons or 21.7 per cent over 1965, as a result of greater loadings of forestry products and wheat.

Victoria handled 1,191,848 tons during 1966—3.6 per cent more than the previous year; movements of wheat and pulpwood rose while the port's leading commodity, lumber and timber, dropped to 363,064 tons from 418,377 tons in 1965. Prince Rupert handled more wheat, pulpwood and fuel oil for a gain of 147,793 tons or 16.4 per cent to 1,032,132 tons. Freight into and from West Coast ports in international shipping advanced 5.3 per cent over 1965 to 24,190,554 tons.

The number of vessel arrivals and departures in international shipping at all Canadian ports remained fairly constant, at 58,536 in 1966 and 58,526 in 1965, while the registered net tonnage of these craft rose to 202,170,079 tons from 199,454,149 tons.
