## INTRODUCTION

This publication presents statistics on the commodity and vessel traffic at Canadian ports in international seaborne shipping.

### Source

Shipping statistics are compiled from reports completed by operators or agents of vessels entering and leaving Canadian ports. All vessels are required to submit reports excepting naval or fishing vessels, and craft of less than fifteen registered net tons. Customs officials act as agents for Statistics Canada in collecting forms at customs ports; returns for non-customs ports are forwarded through the nearest customs office. Operating data are collected for vessels calling at coastal and Great Lakes ports, but regions such as Lake Winnipeg and the MacKenzie River are not included in the survey.

### Treatment of Data

Only data relating to those vessels which are engaged in port-to-port transportation of goods and/or passengers for compensation have been included; all intra-port movements have been excluded.

The term "international seaborne shipping" is used for vessels classed as being in foreign service, that is when (1) the vessel arrives from or departs for a foreign port; or (2) cargo is loaded for or unloaded from a foreign port; or (3) the registry of the vessel is other than Canadian or British Commonwealth (even though the vessel may have sailed between two Canadian ports).

A vessel is classed as being in coasting service if (1) it is of Canadian or British Commonwealth registry, sails between two Canadian ports, and loads or unloads no foreign freight; or if (2) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel's arrival and departure at ports on a voyage could vary between foreign or coastwise depending on which definition of service is applicable on entering or clearing a harbour. Because of this variety that is possible in vessel movements, the number of arrivals and departures in either international seaborne or coastwise shipping need not necessarily be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 can also cause a disparity in the total number arrived and departed. Vessels entering a port at the end of a year and clearing it the following January would only be counted as an arrival or departure for that year when the movement occurred.

La présente publication contient la statistique de la navigation maritime internationale portant sur le trafic maritime (marchandises et navires entrés et sortis) des ports canadiens.

### Source

Les statistiques sur la navigation sont établies d'après les données fournies par le personnel ou les agents des navires qui entrent dans les ports canadiens ou qui en sortent. Aucune déclaration n'est requise des navires de forces navales, des bateaux de pêche, ni d'embarcations jaugeant moins de quinze tonnes nettes. Les douaniers agissent à titre d'agents de Statistique Canada et recueillent les formules aux ports douaniers; les déclarations pour les ports non douaniers sont acheminées au bureau douanier le plus proche. Les données d'exploitation sont recueillies pour les navires faisant escale aux ports côtiers et des Grands Lacs, mais certains endroits, comme le lac Winnipeg et le fleuve MacKenzie ne sont pas compris dans le champ de l'enquête.

### Traitement des données

Seules les données qui se rapportent aux navires effectuant le transport d'un port à l'autre, de marchandises et de passagers payants, sont indiquées ici; on n'a pas tenu compte des mouvements dont le lieu de départ et d'arrivée est le même port.

L'expression "navigation maritime internationale" englobe trois catégories de bâtiments ou de cargaisons: (1) les navires en provenance ou à destination d'un port étranger, (2) les cargaisons embarquées ou débarquées qui sont destinées à des pays étrangers ou qui en proviennent, (3) les navires immatriculés ailleurs qu'au Canada ou que dans un pays du Commonwealth (même si le navire a navigué entre deux ports canadiens).

La "navigation nationale" englobe: (1) les navires immatriculés au Canada ou dans un pays du Commonwealth qui naviguent entre deux ports canadiens sans embarquer ni débarquer de fret étranger; et (2) les navires immatriculés ailleurs, mais qui détiennent un permis de cabotage.

En raison de la variété des mouvements possibles, l'arrivée et le départ d'un navire peuvent très bien entrer, la première, dans la catégorie de la "navigation maritime internationale" et, le second, dans celle de la "navigation nationale", ou vice versa.

Le fait, d'autre part, de prendre l'année civile comme période de référence rend raison des différences qui pourraient exister entre le nombre total de navires entrés et le nombre total de navires sortis. Les navires qui entrent dans un port à la fin de l'année et qui n'en sortent qu'en janvier de l'année suivante ne sont comptés que comme une entrée ou une sortie pour l'année durant laquelle le mouvement s'est produit.

A vessel is considered arriving or departing "in ballast" if cargo is neither unloaded or loaded at a port, regardless of the amount of in transit cargo that may be on board at the time.

Appendix A lists the Canadian ports for which shipping data are tabulated separately, and is derived from the names assigned to the areas of loading or unloading by the respondents. Appendix B consists of a commodity list, based on the *Standard Commodity Classification Manual* published by Statistics Canada, into which all cargo types are grouped; reference to this appendix will enable users to obtain a complete description of those commodities whose names have been necessarily abbreviated in the tables.

The term "general cargo" in this publication refers only to commodities which were not specifically identified in shipping reports; it is not intended to indicate any distinction between bulk and other commodities.

The letters "n.e.s." found in the commodity listing mean "not elsewhere specified".

Some ports frequently engage in "lightering"; in cases where cargo is loaded or unloaded in the harbour rather than at a dock or wharf, the tonnage is included with the port totals. Where transhipments are made outside a harbour, or at mid-stream, the cargo handled is treated as a loading or unloading at the nearest port. Ports which have handled lightered commodities include Botwood, Goose Bay, Charlottetown, Bathurst, Campbellton, Chatham, Rimouski, Chicoutimi, Trois-Rivières, Varennes, and Rivière-du-Loup.

All volume data are presented in tons of 2,000 pounds.

It should be noted that due to corrections made throughout the year, statistics contained in this publication may differ from that released as preliminary data in the monthly *Shipping Statistics*.

Un navire est considéré entré ou sorti, "sur le lest" si la cargaison n'est ni embarquée ni débarquée à un port, nonobstant la quantité de marchandises en transit qui se trouve à bord.

L'Appendice A comprend la liste des ports canadiens pour lesquels on calcule séparément les statistiques sur la navigation. Cette liste est établie en fonction des zones d'embarquement et de débarquement indiquées par les déclarants. L'Appendice B présente la liste des marchandises, basée sur le *Standard Commodity Classification Manual* publié par Statistique Canada et dans lequel sont énumérés tous les genres de marchandises; les utilisateurs désireux de connaître la description complète des marchandises — qu'il nous a fallu nécessairement abréger dans les tableaux — feraient bien de consulter cette liste.

L'expression "Marchandises diverses" s'applique, dans la présente publication, uniquement aux marchandises qu'on n'a pas dénommées avec précision dans les questionnaires; on ne fait pas de distinction entre les marchandises en vrac et les autres marchandises.

Les lettres "n.d.a." dans la liste des marchandises signifient "non dénommé ailleurs".

Dans certains ports, les marchandises sont fréquemment embarquées ou débarquées "par allège" plutôt qu'à un dock ou un quai; le tonnage est alors compris dans le tonnage total du port. Dans le cas de transbordements à l'extérieur d'un port, ou au milieu du courant, l'embarquement ou le débarquement est compté pour le port le plus proche. Les ports de Botwood, Goose Bay, Charlottetown, Bathurst, Campbellton, Chatham, Rimouski, Chicoutimi, Trois-Rivières, Varennes et Rivière-du-Loup ont procédé à l'embarquement et au débarquement de marchandises "par allège".

Toutes les données pondérales sont présentées en tonnes de 2,000 livres.

Il est à noter qu'en raison de corrections effectuées pendant l'année, les statistiques de la présente édition peuvent différer de celles qui ont été publiées à titre préliminaire dans le bulletin mensuel *Shipping Statistics*.

## ANALYSIS OF DATA

Foreign shipping at Canadian harbours increased 1.3% to 166,554,126 tons from 164,390.086 tons in 1970. The number of vessels engaged in the transportation of this merchandise declined from 51,272 to 50,239; the average registered net tonnage rose to 4,549 from 4,244.

Harbour traffic in Newfoundland dropped 14.3% to 2,949,834 tons from 3,440,712 tons in 1970. Contributing to the decline was pulpwood at 119,315 tons (233,502 tons in 1970) fuel oil at 424,072 tons (510,127 tons) and newsprint at 506,565 tons (679,068 tons). Shipments of phosphate rock at Long Harbour at 127,742 tons was 59% lower than in 1970. However, crude petroleum unloaded at Holyrood advanced to 763,767 tons 29% above the figure of the previous year.

The overall total for Nova Scotia increased 26%. Over 50% of the total of 15,771,196 tons handled, consisted of crude petroleum and fuel oil at Halifax and Port Hawkesbury. The combined loadings at Hantsport and Little Narrows of gypsum totalling 2,083,578 tons equalled last year's figure.

Some growth in international shipping at New Brunswick ports is noted, the tonnage handled reaching 7,789,548 tons compared to 6,705,153 tons the previous year. The crude petroleum at Saint John totalled 3,843,385 tons compared to 2,565,564 tons in 1970; raw sugar was also higher at 320,578 tons (250,589 tons) as was fuel oil at 439,829 tons (306,598 tons). Increased transcontinental rail rates in the United States has brought about a sharp reduction in the flow of California citrus fruit shipments through this port.

The tonnage for the Province of Quebec declined almost 10%. At Baie Comeau the grains (barley, corn, rye, wheat, flaxseed, rapeseed and soyabeans) totalled 4,061,360 tons compared to 4,853,699 tons in 1970. This combined with lower shipments of pulpwood and alumina and bauxite ores accounted for the 13% drop in this port's activities. The eight week longshoremen's strike at Montreal, Quebec City and Trois Rivieres commencing May 17th affected the overall total cargo handled. At the port of Trois Rivieres imports and exports declined almost 43%. Grain unloadings totalled 151,583 tons compared to 770,934 tons in 1970. Shipments of wheat at Montreal rose to 2,052,827 tons, somewhat higher than last year's figure of 1,398,528 tons. This was

## ANALYSE DES DONNÉES

Le trafic-marchandises international dans les ports canadiens a augmenté de 1.3 % pour atteindre 166,554,126 tonnes contre 164,390.086 tonnes en 1970. Le nombre de navires affectés au transport de ces marchandises est tombé de 51,272 à 50,239, et la jauge nette moyenne au registre est passée de 4,244 à 4,549 tonnes.

L'activité portuaire à Terre-Neuve a diminué de 14.3 %, tombant à 2,949,834 tonnes (contre 3,440,712 tonnes en 1970). Le bois à pâte (119,315 tonnes contre 233,502 tonnes en 1970), le mazout (424,072 tonnes contre 510,127 tonnes en 1970) et le papier journal (506,565 tonnes contre 679,068 tonnes en 1970) ont contribué à cette baisse. Les expéditions de roches phosphatées (127,742 tonnes) à partir du port de Long Harbour ont baissé de 59 % par rapport à 1970; par contre, les arrivages de pétrole brut au port de Holyrood ont atteint 763,767 tonnes, soit une augmentation de 29 % par rapport à l'année précédente.

Le chiffre global pour la Nouvelle-Écosse a augmenté de 26 %. Le pétrole brut et le mazout manutentionnés dans les ports de Halifax et de Port Hawkesbury composaient plus de 50 % de l'ensemble des manutentions dans la province (15,771,196 tonnes). Le total des chargements de gypse dans les ports de Hantsport et de Little Narrows s'est élevé à 2,083,578 tonnes, soit le même chiffre qu'en 1970.

Le transport maritime international dans les ports du Nouveau-Brunswick a enregistré une augmentation, le tonnage des marchandises manutentionnées atteignant 7,789,548 tonnes contre 6,705,153 tonnes en 1970. À Saint-Jean, le trafic du pétrole brut a totalisé 3,843,385 tonnes à comparer à 2,565,564 tonnes en 1970; le sucre brut (320,578 tonnes contre 250,589 tonnes en 1970) et le mazout (439,829 tonnes contre 306,598 tonnes en 1970) ont également enregistré une augmentation. La hausse des tarifs des chemins de fer transcontinentaux aux États-Unis a entraîné une forte réduction du mouvement des expéditions de citrons de Californie par l'intermédiaire de ce port.

Le trafic dans les ports de la province de Québec a diminué de près de 10 %. À Baie Comeau, la baisse des expéditions de grains (orge, maïs, seigle, blé, lin, colza et soya) soit 4,061,360 contre 4,853,699 tonnes en 1970, ainsi que celle des expéditions de bois à pâte et d'alumine et minerai de bauxite ont compté dans la diminution de 13 % des activités de ce port. La grève de huit semaines déclenchée le 17 mai, par les débardeurs de Montréal, de Québec et de Trois-Rivières a altéré le total global des cargaisons manipulées. Le port de Trois-Rivières a accusé une baisse de près de 43 % des importations et des exportations. Le déchargement des céréales n'a totalisé que 151,583 tonnes par rapport aux 770,934 tonnes de 1970. Les expéditions de blé de Montréal ont été plus élevées que celles de 1970

offset by a drop in barley shipments by a like amount. Petroleum and coal products at 2,216,871 tons is 282,085 tons less than in 1970, and asbestos at 134,399 tons is 213,458 tons below the previous year's total. However the overall port total of 11,004,928 tons was only 215,092 tons lower than 1970. The Golden Eagle oil refinery at St. Romuald (included with the port of Quebec) was built to accommodate tankers of up to 300,000 tons. Crude petroleum and fuel oil movements of 2,349,438 tons were the main contributors to the increased tonnage at the port of Quebec.

Lower iron ore requirements by the United States steel industry were responsible in large part for the 3,659,058 ton drop in Sept Iles-Pointe Noire harbour total. This condition also had a bearing on the lower shipments of iron ore at Contrecoeur and Port Cartier.

Ontario's lake ports handled 32,662,860 tons of cargo during 1971, a 6.6% decline from 1970, lesser shipments of bituminous coal and iron ore movements being the main contributors. These two commodities were the main contributors to the lower port total at Hamilton of 6,008,738 tons (6,970,902 tons). The 30.6% drop at Sault Ste Marie was due to a 16.5% decline in bituminous coal imports and lower receipts of limestone.

Wheat shipments through Churchill were below the previous year's total. However, this was offset by greater shipments of barley.

The West Coast ports registered a 27.4% increase in foreign traffic for a total of 38,711,420 tons against 30,379,626 tons in 1970. The port of Vancouver (including Roberts Bank) reached an all time high tonnage of 24,985,072 in international trade. Wheat exports at 5,817,219 tons increased by 1,886,211 tons over 1970 and bituminous coal at 6,063,154 tons almost doubled the previous year's loadings of 3,716,024 tons. Greater quantities of flaxseed at 242,806 tons (180,008 tons), rapeseed at 764,854 tons (492,014 tons), pulpwood at 632,255 tons (287,010 tons), lumber and timber at 1,321,964 tons (935,717 tons) and potash at 2,121,877 tons (1,190,720 tons) also contributed to the increase.

Logs and pulpwood tonnages at Victoria rose to 610,270 tons from 193,854 tons a year earlier. Of this total, 309,947 tons of logs were received

(2,052,827 tonnes contre 1,398,528 tonnes. En contre-partie, les expéditions d'orge ont accusé une baisse d'une quantité semblable. Les dérivés du pétrole et du charbon ont totalisé 2,216,871 tonnes, soit 282,085 tonnes de moins qu'en 1970, et l'amiante 134,399 tonnes, soit 213,458 tonnes de moins que le total de l'année précédente. Cependant, le trafic total du port avec 11,004,928 tonnes a accusé une baisse de seulement 215,092 tonnes par rapport à 1970. La raffinerie de pétrole Aigle d'Or à St. Romuald (comprise avec le port de Québec) a été construite afin de recevoir les grands pétroliers de jusqu'à 300,000 tonnes. Le trafic du pétrole brut et du mazout (2,349,438 tonnes) a été le principal facteur de l'augmentation du tonnage du port de Québec.

La baisse de la demande en minerai de fer de la part de l'industrie sidérurgique des États-Unis a été en grande partie responsable de la diminution de 3,659,058 tonnes du total du trafic du port de Sept-Îles Pointe Noire; elle a également contribué à la baisse des expéditions de minerai de fer des ports de Contrecoeur et de Port Cartier.

En Ontario, le total des marchandises manutentionnées dans les ports des Grands lacs a été de 32,662,860 tonnes en 1971, soit une diminution de 6.6 % par rapport à 1970, en raison surtout d'une baisse des expéditions de charbon bitumineux et de minerai de fer. La diminution du trafic total du port d'Hamilton (6,008,738 contre 6,970,902 tonnes en 1970) est imputable à ces deux marchandises. La baisse de 30.6 % enregistrée à Sault-Sainte-Marie a été causée par une diminution de 16.5 % des importations de charbon bitumineux et à une réduction des arrivages de pierre calcaire.

Les expéditions de blé par Churchill ont été inférieures à celles de l'année précédente; en contre-partie, cependant, les expéditions d'orge ont augmenté.

Le volume du commerce international dans les ports du littoral ouest du Canada a augmenté de 27.4 % pour atteindre 38,711,420 tonnes contre 30,379,626 tonnes en 1970. Le port de Vancouver (y compris Roberts Bank) a atteint un chiffre sans précédent de 24,985,072 tonnes en trafic international. Les exportations de blé ont augmenté de 1,886,211 tonnes par rapport à 1970 pour atteindre 5,817,219 tonnes; quant au charbon bitumineux, avec un trafic de 6,063,154 tonnes, il a presque doublé les chargements de 1970 (3,716,024 tonnes). Ont aussi contribué à cette augmentation générale les progressions enregistrées dans le trafic de graines de lin (242,806 tonnes contre 180,008 tonnes en 1970), de graines de colza (764,854 tonnes contre 492,014 tonnes en 1970), de bois à pâte (632,255 tonnes contre 287,010 tonnes en 1970), de bois de construction et de sciage (1,321,964 contre 935,717 tonnes en 1970) et de potasse (2,121,877 contre 1,190,720 tonnes).

A Victoria, le trafic des billes et du bois à pâte est passé de 193,854 tonnes en 1970 à 610,270 tonnes. De ce total 309,947 tonnes de billes provenaient

from U.S. Pacific ports, and this combined with increased shipments of hogged fuel and pulp accounted for an increase in the port's total of 490,088 tons this year.

While the port total at New Westminster was slightly lower than the previous year due to lesser shipments of forest products, this was offset by increased break bulk items such as iron and steel products. Nanaimo on the other hand shipped greater quantities of logs, also lumber and timber, to bring the port total to 1,304,624 tons from 1,037,361 tons a year earlier.

des ports de la côte Pacifique des États-Unis. Ces arrivages, en plus de la progression des expéditions de bois débité en copeaux et de pate sont responsables de l'augmentation de 490,088 tonnes du trafic du port cette année.

Alors qu'à Westminster le trafic du port était légèrement plus faible que celui de l'année précédente en raison du ralentissement des expéditions de produits de la forêt, il y a eu en contre-partie augmentation du trafic des matières pondéreuses en vrac comme les produits du fer et de l'acier. À Nanaimo d'autre part, les expéditions de billes, ainsi que de bois de construction et de sciage ont progressé, faisant ainsi passer le trafic total du port à 1,304,624 tonnes contre 1,037,361 tonnes en 1970.
