SHIPPING REPORT

1952

Section III

INTRODUCTION

The first two sections of the 1952 "Shipping Report", which have been released for some time, contained nine tables of data on foreign or international seaborne shipping. This the third, and final section, presents seven tables which cover the coastwise trade and a new table to show the number of new vessels built during the year for both the coastwise and foreign service.

Tables 10 to 13 are also new tables which present details of cargo carried in the coasting trade for the first time. The totals are incomplete, however, as the data are received only from Canadian ports at which there is a collector of customs and excise. The activity carried on at the numerous small ports across the country which do not have a resident customs collector is not available, and the totals are therefore understated to this extent. This also explains the difference between the total loadings, which amounted to 27,574,359 short tons, and total unloadings which aggregated 30,869,866 tons. This report also excludes all inland shipping; that is, Traffic on inland lakes and rivers such as Lake Winnipeg, the Muskoka Lakes and the MacKenzie River.

The twelve most important commodities transported by coastwise shipping from the standpoint of volume were wheat; barley; gasoline; petroleum oils and other petroleum products; pulpwood and pulpwood chips; bituminous coal; general or mixed freight; logs, posts, poles, pitprops and piling; iron ore; sand; oats; and cement. Shipments of the first seven commodities, mentioned above, each exceeded two million short tons. The volume of wheat unloaded, alone, amounted to 8,040,403 tons.

The number of vessel arrivals in coastwise service during the year under review totalled 79,722 with an aggregate registered net tonnage of 56,776,504 tons as compared with 86,571 vessels of 60,802,798 tons in the previous year. Departures numbered 81,639 with a net tonnage of 57,876,563 as against 84,591 of 55,609,082 tons in 1951. Of the total number of arrivals, 41,579 or 52.2 per cent arrived "with cargo" to be unloaded while the remaining 38,143 arrived "in ballast". On the departure side, 41,295 or 50.6 per cent of the total were cleared "with cargo".
