# SHIPPING REPORT

Year ended December 31, 1953

## SECTION III

The first two sections of the 1953 "Shipping Report", which have been released previously, contain the details of foreign or international seaborne shipping. The third, and final, section herewith presents eight tables which cover the coastwise trade and one which shows, (for both the coastwise and foreign service,) the number and registered net tonnage of vessels built in Canada during the year.

Tables 10 to 13 present the details of cargoes carried in the coasting trade. The totals are incomplete, however, as the data are received only from Canadian ports at which there is a collector of customs and excise. The shipping activity carried on at the numerous small ports across the country which do not have a resident customs collector is not available and therefore the totals are understated to this extent. This also results in a difference between the total amount of cargo loaded and unloaded. This report also excludes data concerning inland shipping, that is, traffic on inland lakes and rivers such as Lake Winnipeg, the Muskoka Lakes and the Mac Kenzie River.

The total amount of coastwise cargo unloaded amounted to 32,467,480 tons, a gain of 1,597,614 tons or 5.2 per cent over the 1952 total of 30,869,866 tons. The total tonnage unloaded at Atlantic and Lower St. Lawrence River ports and at Pacific ports show an increase over the previous year while unloadings at Great Lakes ports decreased to 13,393,630 tons from 14,379,733 as shipments of gasoline dropped to 771,176 tons from 1,843,566 due to pipe line activity. Decreases were also reported for wheat, barley, pulpwood and general. Increases were reported for wheat, corn, barley, coal, iron ore, gasoline and petroleum at Atlantic Coast ports; and logs, posts, etc., sand, firewood, cement, paper and general at Pacific ports.

Vessels of United Kingdom registry carried 1,754,427 tons or 5.4 per cent of the total amount of cargo unloaded and 1,817,845 or 6.4 per cent of that loaded. In addition a small amount of coastwise freight was transported in vessels of British West Indies and United States registry.

The number of vessel arrivals in coastwise service during 1953 totalled 88,675 with an aggregate registered net tonnage of 67,417,391 tons as compared with 79,722 vessels of 56,776,504 tons in the previous year. Departures numbered 86,000 with a net tonnage of 62,022,657 as against 81,639 of 57,876,563 net tons in 1952. Of the total number of arrivals, 44,793 or 50.5 per cent arrived "with cargo" to be unloaded while the remaining 43,882 arrived "in ballast". On the departure side, 44,142 or 51.3 per cent of the total were cleared "with cargo".
