SHIPPING REPORT

Year ended December 31, 1954

SECTION III

The first two sections of the 1954 "Shipping Report", which have been released previously, contain the details of foreign or international seaborne shipping. The third, and final, section herewith presents eight tables which cover the coastwise trade and one which shows, (for both the coastwise and foreign service,) the number and registered net tonnage of vessels built in Canada during the year.

Tables 10 to 13 present the details of cargoes carried in the coasting trade. The totals are incomplete, however, as the data are received only from Canadian ports at which there is a collector of customs and excise. The shipping activity carried on at the numerous small ports across the country which do not have a resident customs collector is not available and therefore the totals are understated to this extent. This also results in a difference between the total amount of cargo loaded and unloaded. This report also excludes data concerning inland shipping, that is, traffic on inland lakes and rivers such as Lake Winnipeg, the Muskoka Lakes and the MacKenzie River.

The total amount of cargo unloaded at Canadian customs ports in the coasting trade totalled 29,913,637 tons in 1954, a decrease of 2,553,843 tons or 7.9 per cent from the 1953 total of 32,467,480 tons. The total tonnage unloaded at Atlantic and Lower St. Lawrence River ports was above the previous year but unloadings at Great Lakes and Pacific ports were lower. Cargoes unloaded at Great Lakes ports decreased to 10,875,206 tons from the 1953 total of 13,393,630 and Pacific ports reported unloadings of 4,958,433 tons as compared with 5,491,978 tons in 1953. Increases were reported for many individual commodities such as corn, flaxseed, coal, other metallic ores and concentrates, gypsum, pulpwood, gasoline and petroleum. These gains were, however, more than offset by major decreases for such commodities as wheat which declined to 6,381,158 tons from 8,000,750; barley which was down to 2,127,889 tons from 3,220,077; iron ore which fell to 793,622 tons from 1,120,113; oats, rye, other mill products, limestone, logs, lumber, woodpulp, cement and general.

Vessels of United Kingdom registry transported 2,188,396 tons or 7.3 per cent of the total amount of coastwise cargo unloaded and 1,955,808 tons or 7.6 per cent of the total loaded. In addition a small amount of cargo was carried by vessels of British West Indies registry and two German vessels were given permission to carry cargoes of fish oil from one Canadian port to another.

The number of vessel arrivals in the coasting trade during 1954 totalled 84,890 with an aggregate registered net tonnage of 64,291,085 tons as compared with 88,675 vessels of 67,417,391 tons in the previous year. Departures numbered 85,581 with a net tonnage of 60,247,848 as against 86,000 of 62,022,657 net tons in 1953. Of the total number of arrivals 43,925 or 51.7 per cent arrived "with cargo" to be unloaded while the remaining 40,965 arrived "in ballast". On the departure side, 40,142 or 46.9 per cent of the total were cleared "with cargo".

TABLE 10. Cargoes Loaded and Unloaded in Coastwise Service by Canadian Ports, by Commodities
