# SHIPPING REPORT

Year ended December 31, 1955

## SECTION III

The first two sections of the 1955 "Shipping Report", which have been released previously, contain the details of foreign or international seaborne shipping. The third, and final, section herewith presents eight tables which cover the coastwise trade and one which shows, (for both the coast wise and foreign service), the number and registered net tonnage of vessels built in Canada during the year. This last mentioned table is a compilation of new vessels reporting a first departure from a Canadian port.

Tables 10 to 13 present the details of cargoes carried in the coasting trade. The totals are incomplete, however, as the data are received only from Canadian ports at which there is a collector of customs and excise. The shipping activity carried on at the numerous small ports across the country which do not have a resident customs collector is not available and therefore the totals are understated to this extent. This also results in a difference between the total amount of cargo loaded and unloaded. This report also excludes data concerning inland shipping, that is, traffic on inland lakes and rivers such as Lake Winnipeg, the Muskoka Lakes and the MacKenzie River.

Cargoes unloaded in coasting trade at Canadian customs ports rose to a total of 33,541,442 tons in 1955 from 29,913,637 in 1954, an increase over the previous year of 3,627,805 tons or 12 per cent. Increases were recorded in all three coastal areas. Unloadings at Atlantic and lower St. Lawrence river Ports increased by 11.6 per cent, to 15,714,208 tons from 14,079,998 in the previous year. Tonnage unloaded in the Great Lakes section was up by 10.8 per cent, rising to a total of 12,048,616 tons from 10,875,206 while Pacific Coast ports recorded an increase of 16.5 per cent with a total of 5,778,618 tons unloaded as compared with 4,958,433 in 1954. Unloadings of iron ore increased by 1,469,639 tons amounting to 2,263,260 tons in 1955 as against 793,622 in 1954. The tonnage of petroleum oils and other petroleum products unloaded was up by 699,269 tons, increasing to 4,019,177 from 3,319,908, while pulpwood unloadings recorded an increase of 633,457 tons, rising to 3,523,740 tons from 2,890,283 in 1954. Amongst other commodities showing increases were crude petroleum, up from 65,397 tons in 1954 to 270,925, logs, posts, poles and piling from 1,381,766 to 1,698,902, flax, rye, lumber, wood pulp, cement, sand and gravel. Decreases were recorded in wheat, from 6,381,158 tons unloaded in 1954 to 6,164,023 in 1955, in barley from 2,127,889 to 1,993,811 and in bituminous coal from 2,289,384 tons in 1954 to 1,956,342 in 1955.

Of the total cargo tonnage handled in coastwise trade vessels of the United Kingdom registry carried 1,599,499 tons or 4.7 per cent of the total unloaded and 1,521,735 tons or 5.0 per cent of the total loaded. Vessels of British West Indies registry unloaded 229,540 tons and loaded 110,529 while a very small percentage was transported by vessels of German and United States registry.

Vessel arrivals in the coasting trade numbered 86,010 in 1955 with an aggregate registered net tonnage of 67,228,840 as compared with 84,890 vessels and 64,291,085 tons in 1954. Departures numbered 85,190 with a net tonnage of 64,889,982 as against 85,581 vessels of 60,247,848 net tons in the previous year. Of the total arrivals 41,022 vessels or 48 per cent arrived "with cargo" to be unloaded while the remaining 44,988 arrived "in ballast". Of the departures a total of 36,539 vessels or 43 per cent cleared "with cargo".
