Shipping Report - Part III

1963

ERRATA

Subsequent to the publication of this part of the Shipping Report, it was discovered that some of the I.B.M cards containing data on pulpwood movements had been excluded from the tabulations. The following revisions, therefore, will have to be made:

Page 254 - Analysis of Data.

In the opening paragraph change - 1,008,551 tons to 2,350,336 tons  
2.3 per cent to 5.4 per cent  
44,777,971 tons to 46,119,756 tons

Please delete the following paragraphs:

"During 1963 three ports recorded substantial decreases in the amount of pulpwood movements. These ports were Forestville, P.Q., Quebec, and Cornerbrook."

"The 651,275 tons of pulpwood loaded at Forestville in 1962 had shrunk to 39,575 tons in 1963. Similarly, the 768,854 tons of the same commodity unloaded at Quebec a year earlier decreased to 240,081 tons in 1963. Also, Cornerbrook handled loadings of 78,841 tons of pulpwood, compared to 606,182 tons in 1962."

"Pulpwood was another forest product which was unloaded in lesser quantities in 1963. The 6,620,488 tons of this commodity which were unloaded in 1962 had declined to 6,119,125 tons a year later."

The last paragraph noted above is to be replaced by the following:

"Pulpwood, another forest product was unloaded in greater quantities in 1963. The 6,620,488 tons of this commodity which were unloaded in 1962 had increased to 7,460,910 tons a year later."

Page 255 - In the paragraph commencing "Of the total cargo..."  
39,934,109 tons becomes 41,275,894 tons, and  
89.2 per cent becomes 86.6 per cent.

## INTRODUCTION

This publication contains statistics on the commodities transported between Canadian ports. Data are also given on the number and registered net tonnage of vessel arrivals and departures in coastwise shipping.

### Source

Shipping statistics are compiled from reports made by operators or agents of vessels which arrive at and depart from Canadian ports. With the exception of vessels of less than fifteen registered net tons, naval vessels, and fishing vessels, all vessels are required to complete "Shipping reports". At ports where there are customs officers these officials act as agents for the Dominion Bureau of Statistics in collecting the reports and forwarding them to the Bureau. The reports which record the activity at non-customs ports are forwarded through the nearest customs office.

The co-operation of shipping operators, shipping agents, and the Customs and Excise Division of the National Revenue Department in collecting the statistics contained in this publication has continued to be excellent.

### Treatment of Data

A vessel is classed as being in foreign service when (1) it arrives from a foreign port as last port of call, or departs for a foreign port as first port of call; or (2) cargo is loaded for a foreign port, or unloaded from a foreign port; or (3) the registry of the vessel is other-than-Canadian or British Commonwealth (even though the vessel may have arrived at one Canadian port from another, or departed from one Canadian port for another).

A vessel is classed as being in coasting service when (1) it is of Canadian or British Commonwealth registry; and (2) it arrives at one Canadian port from another, or departs from one Canadian port for another; and (3) it unloads no freight from a foreign port, or loads no freight for a foreign port; or (4) it is of foreign registry, but is granted a waiver to engage in coasting service.

A vessel from a foreign port calling at two Canadian ports with foreign freight for the second port will be in foreign and out coasting at the first port and in foreign at the second port. Also, a vessel calling at two Canadian ports on a voyage to a foreign port and having loaded freight at the first port for a foreign port is out foreign at the first port and in coasting and out foreign at the second port. A vessel calling at several Canadian ports with final destination a foreign port is in coasting service into each port. It also is in coasting service out of each port except the last port, unless freight for

a foreign port is loaded. Because of the variety that is possible in vessel movements, the number of arrivals and departures in either international sea-borne shipping or coastwise shipping will not always be the same.

Beginning the count of vessel arrivals and departures on January 1 and ending it on December 31 also causes a disparity in the number of arrivals and departures. Those vessels which arrive in December and depart in January of the next year will be counted only as departures in the statistics of the year in which they depart. Similarly, those vessels which arrive in December and depart in January of the next year will be counted only as arrivals in the statistics of the year in which they arrive.

If a vessel does not unload any freight, or does not load any freight, it is classed as arriving or departing, respectively, "in ballast", regardless of the amount of cargo it might have on board.

Appendix B is a list of the Canadian ports for which shipping data are tabulated separately. Because of space limitations, data for the complete list of ports is not published in either Part II or Part III of the "Shipping Report". Those ports for which data are not published are listed separately. Information on these ports can be obtained by forwarding a request to the Chief, Transportation Section, Dominion Bureau of Statistics, Ottawa.

Appendix C is the list of commodities into which all cargoes which are loaded or unloaded at Canadian ports are grouped. This list is based on the "Standard Commodity Classification Manual" published by the Dominion Bureau of Statistics.

Because of space limitations, the description of the commodities which are listed in the tables are often abbreviated or incomplete. Reference to Appendix C, however, will enable users to obtain the complete description.

Also because of space limitations, the headings in the list of commodities have been excluded from the tables. The commodities, however, are listed in the tables in the same order as they appear in Appendix C.

The term "general cargo" which appears in the list of commodities refers to only those commodities which are not identified in the "Shipping Reports" as specific commodities. The term is not intended to indicate the distinction between bulk and other commodities.

The letters "N.E.S." which are found in the commodity listing mean "not elsewhere specified".

## ANALYSIS OF DATA

During 1963 the level of activity in coastwise shipping increased by 1,008,551 tons, or 2.3 per cent, to a total of 44,777,971 tons, compared to 1962. The tonnage of cargo unloaded in 1963, however, is below the record year of 1961, when 46,416,518 tons were unloaded.

In 1963 there were significant changes in coastwise shipping activity at several Canadian ports:

The amount of wheat transported in 1963 increased considerably, particularly affecting three ports—Baie Comeau, Montreal, and Port Arthur-Fort William.

In 1962 Baie Comeau unloaded 622,327 tons of wheat from other Canadian ports. A year later this figure had risen to 1,016,968 tons. As a result of handling more wheat and other commodities, the total tonnage recorded at Baie Comeau expanded from 943,551 tons to 1,625,171 tons.

Montreal unloaded 2,813,547 tons of wheat in 1963, compared to 1,720,102 tons in 1962. Partly offsetting this increase was a sharp decline in the amount of bituminous coal handled at Montreal. Handlings of this commodity decreased to 781,456 tons (consisting of loadings of 295,196 tons and unloadings of 486,260 tons), compared to 1,539,007 tons (consisting of loadings of 488,096 tons and unloadings of 1,050,911 tons).

Port Arthur-Fort William figures also showed a substantial increase in the amount of wheat loadings. Compared to the 5,171,255 tons loaded in 1962, 7,260,245 tons were loaded a year later. This constituted a new record.

Contrary to most ports, which recorded increases in the amount of wheat handled, Kingston experienced a decline. In 1962, 641,909 tons of this commodity were handled, but a year later the figure was only 275,233 tons.

During 1963 three ports recorded substantial decreases in the amount of pulpwood movements. These ports were Forestville, P.Q., Quebec, and Cornerbrook.

The 651,275 tons of pulpwood loaded at Forestville in 1962 had shrunk of 39,575 tons in 1963. Similarly, the 768,854 tons of the same commodity unloaded at Quebec a year earlier decreased to 240,081 tons in 1963. Also, Cornerbrook handled loadings of 78,841 tons of pulpwood, compared to 606,182 tons in 1962.

Harmac, B.C. recorded a substantial increase in the handling of pulpwood. In 1963 this port unloaded 860,810 tons, in contrast to the 546,046 tons it had unloaded a year earlier.

Two other British Columbia ports recorded large increases in 1963. As a result of increases in total loadings and unloadings, New Westminster and

Vancouver experienced new highs in coastwise shipping activity. New Westminster figures increased from 2,320,678 tons to 2,649,892 tons, while Vancouver tonnages rose from 7,293,457 tons to 7,825,761 tons.

A decline in bituminous coal loadings at Sydney, N.S., amounting to 490,975 tons, accounted for a decrease in the total tonnage handled at this port, which amounted to 1,164,524 tons in 1963 compared to 1,655,499 tons in 1962.

In 1963 there were also significant changes in the amounts of several commodities which were transported in coastwise shipping:

Wheat registered the most sizeable increase, expanding from unloadings in 1962 of 6,591,426 tons to unloadings in 1963 of 8,606,772 tons. The reason for this large increase was the greater demand at lower St. Lawrence River ports for wheat for transshipment to overseas ports.

The tonnage of logs and round timber which were unloaded in coastwise shipping decreased from 4,301,118 tons to 4,016,773 tons. A significant decline in the Pacific area accounted for this decrease.

Pulpwood was another forest product which was unloaded in lesser quantities in 1963. The 6,620,488 of this commodity which were unloaded in 1962 had declined to 6,119,125 tons a year later.

As a result of a large decrease in the Atlantic area, the amount of bituminous coal unloaded declined to 1,549,565 tons from 2,196,916 tons.

Unloadings of sand and gravel in the Pacific area rose considerably, resulting in an increase in unloadings in the three areas of 353,421 tons, to a total of 2,177,771 tons.

Significant changes in the number of vessel arrivals and departures were recorded at seven ports—Baie Comeau, Rimouski, Port Arthur-Fort William, Port Credit, Toronto, Nanaimo, and Vancouver. Because of greater use of Baie Comeau as a trans-shipment port, the total of 2,827 vessel arrivals and departures with a registered net tonnage of 3,618,367 tons which was recorded in 1962 changed to 2,741 vessel arrivals and departures with a registered net tonnage of 5,585,091 tons. Rimouski handled a total of 1,549 vessel arrivals and departures with a registered net tonnage of 2,228,347 tons in 1962, and 1,891 vessel arrivals and departures with a registered net tonnage of 3,241,865 tons in 1963. Because of the increased wheat trade, the number of vessel arrivals and departures at Port Arthur-Fort William increased from 1,602 to 1,831, and the size of the carrying capacity of the vessels increased from 7,356,445 tons to 9,454,702 tons. Due

to a change in location of the terminal facilities of a large shipping company, activity at Port Credit greatly increased, while the activity at Toronto decreased. In 1962, 196 vessel arrivals and departures of 206,615 registered net tons were recorded at Port Credit, in 1963 these figures had changed to 563 vessel arrivals and departures of 1,723,263 registered net tons. The corresponding 1962 figures for Toronto are 1,936 vessel arrivals and departures of 3,853,839 registered net tons, and the 1963 figures are 1,372 vessel arrivals and departures of 2,508,187 registered net tons. As a result of decreased ferry activity between Nanaimo and Vancouver, 1963 data for these two ports show substantial decreases. Nanaimo handled 8,799 vessel arrivals and departures of 14,101,121 registered net tons in 1962, but a year later the port counted 5,660 vessel arrivals and departures of 6,668,426 registered net tons. Vancouver counted 39,915 vessel arrivals and departures of 23,327,922 registered net tons in 1962, and 38,091 vessel arrivals and departures of 16,537,321 registered net tons in 1963.

Of the total cargo unloaded in coastwise shipping, 39,934,109 tons, or 89.2 per cent, were transported in vessels of Canadian registry. This compares with 1962, when 37,897,683 tons, or 86.6 per cent, were transported in Canadian vessels.

In 1963 two changes which affect port totals were made in the tabulating procedures. Shipments from Toquart, B.C., which clear customs at Port Alberni and which were formerly credited to Port Alberni, have been credited to Toquart. Shipments from Jedway, B.C., which clear customs at Prince Rupert and which were formerly credited to Prince Rupert have been included in the category "All other B.C. ports".
